Chemical Engineering

Bachelor of Engineering (B.E)

Scheme And Syllabus Of VII & VIII Semester (2021 Scheme)

B.E. Programs : AI, AS, BT, CH, CS, CV, EC, EE, EI, ET, IM, IS, ME. M. Tech (13) MCA, M.Sc. (Engg.) Ph.D. Programs : All Departments are recognized as Research Centres by VTU Except AI & AS

DEPARTMENT VISION

Imparting quality technical education in Chemical Engineering to promote leadership in research, innovation and sustainable technology through teamwork.

DEPARTMENT MISSION

- Impart quality education in basic and applied areas of Chemical Engineering.
- Enable students and faculty to achieve proficiency in the areas of Chemical Processes, Energy, Unit Operations and Computational Chemical Engineering using state-of-art laboratories and modern infrastructure.
- Encourage faculty and students to make career in research and contribute towards innovative processes and products.
- Develop inclusive technologies with a focus on new materials and sustainability.
- Collaborate with industries and research Institutes for academics and research.
- Inculcate leadership qualities, entrepreneurial skills, societal and ethical values in students and faculty.

PROGRAM EDUCATIONAL OBJECTIVES (PEOs)

- **PEO 1**: Exhibit knowledge of basic sciences, concepts and principles of Chemical Engineering.
- **PEO 2**: Comprehend, analyze, design and implement engineering systems with a focus on research, innovation and sustainability.
- **PEO 3**: Work in multidisciplinary team and cater to the needs of process industries with appropriate safety, health and environmental regulations.
- **PEO 4**: Demonstrate effective communication skills, leadership qualities and develop into successfulentrepreneurs.

PSO	Description
PSO1	Gain knowledge of Chemical Engineering fundamentals and demonstrate problem formulation capabilities
	Analyze and solve engineering problems with a focus on environment and sustainability
PSO3	Contribute to multidisciplinary research using relevant Chemical Engineering tools

PROGRAM SPECIFIC OUTCOMES (PSOs)

Total Hours								

Unit-I	10 Hrs					
Salient features of Indian Constitution; Preamble to the Constitution of India; Provisions Relating						
to Citizenship in India-Modes of Acquisition and Termination of Citizenship of India. Scope & Extent						
of Fundamental Rights-Articles 14-32 with case studies; Right to Information Act, 2005 with Cas						
studies.						
Unit – II	10 Hrs					
Significance of Directive Principles of State Policy; Fundamental Duties in the Constitution of						
India; Union Executive- President and State Executive- Governor; Parliament & State Legislature;						
Council of Ministers; Union and State Judiciary; Emergency provisions; Elections commission.						
Human Rights & Human Rights Commission.						
Unit –III 05 H						

Consumer Protection Law - Definition and Need of Consumer Protection; Consumer Rights under the Consumer Protection Act, 2019; Unfair Trade Practice, Defect in goods, Deficiency in services; Product liability and Penal Consequences, False and Misleading Advertisement, E-Commerce, Alternate dispute Redress mechanism; Redresses Mechanisms under the Consumer Protection Act, 2019.

Unit –IV	07 Hrs
Introduction to Labour and Industrial Law, Theory and Concept of Industrial Relations,	Industrial
Relations Code 2020, Code on Social Security 2020, Code on Occupational Safety, H	lealth and
Working Conditions 2020, Code on Wages 2020, Industrial Disputes Act,	
The Factories Act. 1948 Analysis of Recent Amendments made in Labour Laws.	

07 Hrs

Unit –V Scope and aims of engineering ethics (NSPE Code of Ethics), Responsibility of Engineers, Impediments to responsibility. Honesty, Integrity and reliability, Risks, Safety and Liability in Engineering.Corporate Social Responsibility,Statutory Provision regarding prohibition and prevention of Ragging, The Sexual Harassment of Women at Workplace (Prevention, Prohibition and Redressal) Act, 2013.

Cours	e Outcomes: After completing the course, the students will be able to: -
CO1	Equips with a comprehensive understanding of the legal and political framework of India,
	preparing them to engage with complex legal, social, and political issues both as
	professionals and responsible citizens.
CO2	Effectively advocate for consumer rights, navigate regulatory frameworks, and address
	emerging challenges in the marketplace & empowers them with the legal knowledge and
	practical skills necessary to protect consumers and promote fair business practices.
CO3	Equipping with the knowledge and skills to navigate legal, ethical, and social issues in their
	professional and personal lives & Cultivate a sense of professional integrity and
	responsibility, emphasizing the importance of ethical behavior in engineering.
CO4	Apply the knowledge to solve practical problems with regard to personal
	issues & business enterprises

Design of distillation column: Process design of bubble cap distillation column. Design					
Design of distillation column: Process design of bubble cap distillation column. Design					

Laboratory Component

Development of 3D models and 2D layout drawings of

- 1. Shells of shell and tube heat exchanger and column.
- 2. Development of hemispherical, torrispherical heads/covers.
- 3. Tube sheets of shell and tube heat exchanger.
- 4. Segmental baffles of a shell and tube exchanger.
- 5. Flanges with bolt slots and threaded holes.
- 6. Tube bank of u-tube bundle.
- 7. 3D part development of nozzles.
- 8. 3D part assembly of pass partition plate in channel.
- 9. Development of trays in distillation column.
- 10. Assembly of parts into a model equipment.

Course Outcomes: After completing the course, the students will be able to							
CO1:	Understand design procedure of process equipment.						
CO2:	Apply chemical engineering principles to design process equipment's.						
CO3:	Estimate physical dimensions of various parts of chemical process equipment's and						
	accessories						
CO4:	Analyze various design options at all design stages

RUBRIC FOR THE CONTINUOUS INTERNAL EVALUATION (THEORY)

RV College of Engineering® Mysore Road, RV Vidyaniketan Post, Bengaluru - 560059, Karnataka, India

#	COMPONENTS	MARKS
1.	QUIZZES: Quizzes will be conducted in online/offline mode. TWO QUIZZES will be conducted & Each Quiz will be evaluated for 10 Marks. THE SUM OF TWO QUIZZES WILL BE THE FINAL QUIZ MARKS.	20
2.	TESTS: Students will be evaluated in test, descriptive questions with different complexity levels (Revised Bloom's Taxonomy Levels: Remembering, Understanding, Applying, Analyzing, Evaluating, and Creating). TWO tests will be conducted. Each test will be evaluated for 50 Marks, adding upto 100 Marks. FINAL TEST MARKS WILL BE REDUCED TO 40 MARKS.	40
3.	EXPERIENTIAL LEARNING: Students will be evaluated for their creativity and practical implementation of the problem. Case study-based teaching learning (10), Program specific requirements (10), Video based seminar/presentation/demonstration (20) Phase 2 will be done in the exhibition mode (Demo/Prototype/any outcome). ADDING UPTO 40 MARKS.	40
	MAXIMUM MARKS FOR THE CIE THEORY	100

	RUBRIC FOR SEMESTER END EXAMINATION (THEORY)				
Q. NO.	CONTENTS	MARKS			
	PART A				
1	Objective type questions covering entire syllabus	20			
	PART B (Maximum of TWO Sub-divisions only)				
2	Unit 1 : (Compulsory)	16			
3 & 4	Unit 2 : Question 3 or 4	16			
5&6	Unit 3 : Question 5 or 6	16			
7&8	7 & 8 Unit 4 : Question 7 or 8				
9 & 10	Unit 5: Question 9 or 10	16			
	TOTAL	100			

Semester: VII								
BIOCHEMICAL ENGINEERING								
	Category: Professional Elective							
	(Theory)							
Course Code	:	21CH73GD	CIE	:	100 Marks			
Credits: L:T:P	Credits: L:T:P : 3:0:0 SEE : 100 Marks							
Total Hours	:	45L	SEE Duration	:	3.00 Hours			

Unit-I	09 Hrs			
Microbiology: Scope, Classification of microorganisms, Whitaker"s	5-Kingdom concept.			
Prokaryotic and Eukaryotic cells.				
Biochemistry: Cell construction, Amino acids and proteins, Carbohydrates,	Nucleic acids.			
Unit – II	09 Hrs			
Enzyme Catalyzed Reactions: Introduction, Enzyme kinetics, MM, BH a	pproach, evaluation of			
kinetic parameters.				
Enzyme Inhibitors: Types of inhibitors, Effects of temperature and pH, E methods of immobilization	nzyme immobilization,			
Unit –III	09Hrs			
Stoichiometry of Cell Growth and Product Formation: Elemental balan balances, degrees of reduction; yield coefficients of biomass and product f coefficients. Growth media formulation, Oxygen consumption and heat cultures. Sterilization Techniques: Continuous and batch sterilization, sterilization o	ormation, maintenance evolution in aerobic			
Unit –IV	09 Hrs			
Kinetics of Microbial Growth and Product Formation: Phases of cell growth and kinetics in batch cultures, Monod and Leudeking-Piret equations, unstructured non-segregated models, models with growth inhibitors. Introduction to structured models, Ideal Bioreactors, Batch reactor, Ideal Chemostat				
Unit –V	09 Hrs			
Recovery and purification of products : Removal of microbial cells and o separation, precipitation, filtration, centrifugation, cell disruption, chemical relations				

Course Outcomes: After completing the course, the students will be able to		
CO1:	D1: Recall the basics of microbiology and enzymes	
CO2:	Explain the various product recovery operations	
CO3:	Analyze the enzyme kinetics and the factors affecting enzyme kinetics	
CO4:	Predict appropriate sterilization Techniques and Design Bioreactors

Cou	rse Learning	Obj	ectives: The students wi	ll be able to		
1.	The student is able to classify and characterize the waste according to various criteria in accordance with the waste catalogue.					
2.	The student is able to use the knowledge of the applicable legal regulations.					
3. Student can use the principles of waste management						
4. Student can analyse methods and techniques of disposal, storage and organization of recycling						

Unit – I	9 Hrs	
Quality requirements of boiler and cooling waters, Quality requirements of process water for	r Textiles,	
Food processing and Brewery Industries, Boiler and cooling water treatment methods.		
Unit – II	9 Hrs	
Manufacturing process and origin of liquid waste from Textiles, Paper and Pulp indus	tries, and	
Tanneries, Special Characteristics, Effects and treatment methods		
Unit – III	9 Hrs	
Manufacturing process and origin of liquid waste from Fertilizers, Distillers, and Dairy	/, Special	
Characteristics, Effects and treatment methods.		
Unit – IV	9 Hrs	
Manufacturing Process and origin of liquid waste from Sugar Mills, Steel Plants, and Oil Refineries, ,		
Special Characteristics, Effects and treatment methods.		
Unit – V	9 Hrs	
Common Effluent Treatment Plants - Advantages and Suitability, Limitations, Effluent	Disposal	
Methods.		

•			
Course Outcomes: After completing the course, the students will be able to			
CO 1:	Provide knowledge of the classification of waste and principles of waste management		
CO 2:	Familiarize the current legal regulations and economic mechanisms of waste		
	management		
CO 3:	Acquaint the methods and techniques of neutralization and waste disposal on		
	selected examples.		
CO 4:	Acquire practical skills in using the knowledge of basic methods and techniques used in		
	waste management.

	INSTRUMENTAL METHODS OF ANALYSIS					
		Category: Profe	ssional Elective			
		(Theory				
Course Code	:	21CH74HC	CIE	:	100 Marks	
Credits: L:T:P	:	3:0:0	SEE	:	100 Marks	
Total Hours	:	45 L	SEE Duration	:	3.00 Hours	

Unit-I	09 Hrs
Introduction: Selection of techniques, Measurement and readings, errors in analysis,	Graph and
measurement, Statistics to data evaluation, Uncertainty in chemical analysis.	
Sampling and sample preparation: Homogenization of samples, sample integrity, s	eparation,
types of sample, sample matrices, sample preparation.	
Quantitation and calibration: Response factor, peak area, composition, external and in	ternal
standard methods, standard addition method, calibration method, linear regression.	
Unit – II	09 Hrs
General Introduction to Spectroscopy: Types of spectroscopy, representation of a	spectrum,
nature and interaction of electromagnetic radiation, energies corresponding to various	s kinds of
radiations, atomic and molecular transitions, selection rules, spectral width, factors in	nfluencing
positions and intensity of spectral lines.	
Electronic Spectroscopy (Absorption Spectroscopy): Quantitative aspects of	
measurements - Beer's law and its limitations, terminology associated with electronic sp	
types of absorption bands and theoretical interpretation, effect of solvent and structu	ire on l _{max} ,
Instrumentation for Qualitative and Quantitative analysis, structure determination.	1
Unit –III	09 Hrs
Infrared Spectroscopy: Theory of IR absorption, types of vibrations, theoretical n	
fundamental nodes of vibrations and group frequencies, factor affecting the group frequ	
band shapes. Instrumentation – FITR Instrument and its advantages, sample handling t	echniques.
Qualitative applications of IR.	
Applications of IR to structural elucidation of sample organic molecules.	
Unit –IV	09 Hrs
Flame Photometry and Atomic Absorption Spectroscopy: Introduction, principle, f	
flame spectra, variation of emission intensity with flame, metallic spectra in flame, flam	
role of temperature on absorption emission and fluorescence. Comparative study of flam	
spectroscopy (FES) and Atomic absorption spectroscopy (AAS). Application – Qualitati	ve and
Quantitative determination of alkali and alkaline earth metals.	1
Unit –V	09 Hrs
Chromatography: General description, definitions, terms and parameters used in chrom	
classification of chromatographic methods, working principle, Instrumentation and appli	cations of
high pressure liquid chromatography (HPLC), Gas chromatography (GC).	

Course Outcomes: After completing the course, the students will be able to			
CO1: Recollect the basic principles of spectroscopy and chromatography;			
CO2: Interpret and communicate an analytical result			
CO3: Identify suitable technique for analysis.			
CO4: Formulate analytical procedure to characterize samples

	I	RUBRIC FOR THE CONTINUOUS INTERNAL EVALUATION (THEOR	(Y)				
#		COMPONENTS	MARKS				
1.	QUIZZES: Quizzes will be conducted in online/offline mode. TWO QUIZZES will be conducted & Each Quiz will be evaluated for 10 Marks adding up to 20 Marks. THE SUM OF TWO QUIZZES WILL BE CONSIDERED AS FINAL QUIZ MARKS.						
2.	TESTS: Students will be evaluated in test consisting of descriptive questions with different complexity levels (Revised Bloom's Taxonomy Levels: Remembering, Understanding, Applying, Analyzing, Evaluating, and Creating). TWO TESTS will be conducted. Each test will be evaluated for 50 Marks, adding up to 100 Marks. FINAL TEST MARKS WILL BE REDUCED TO 40 MARKS.						
3.	EXPERIENTIAL LEARNING: Students will be evaluated for their creativity and practical implementation of the problem. Phase I (20) & Phase II (20) ADDING UPTO 40 MARKS .						
		MAXIMUM MARKS FOR THE CIE THEORY	100				
		RUBRIC FOR SEMESTER END EXAMINATION (THEORY)	MADIZO

Semester: VII ADVANCES IN CORROSION SCIENCE AND MANAGEMENT								
(Theory)								
Course Code	:	21CM75ID	CIE	:	100 Marks			
Credits: L:T:P	:	3:0:0	SEE	:	100 Marks			
Total Hours	:	42 L	SEE Duration	:	03 Hours			

Course Learning Objectives: The students will be able to				
1	Understand the fundamental & socio, economic aspects of corrosion.			
2	Identify practices for the prevention and remediation of corrosion.			
3	Analyzing methodologies for predicting corrosion tendencies.			
4	Evaluate various corrosion situations and implement suitable corrosion control measures.			

Unit-I

08 Hrs

Basics of corrosion:

Introduction: Galvanic series, Pilling-Bedworth ratio, Types: Galvanic corrosion, crevice corrosion, pitting corrosion, intergranular corrosion, erosion corrosion, stress corrosion, season cracking, hydrogen embrittlement, bacterial corrosion.

Corrosion in different engineering materials: Concrete structures, duplex, stainless steels, ceramics, composites.

Unit-II	08	Hrs
0111-11	00	1113

Corrosion mechanism:

Electrochemical theory of corrosion, Crevice corrosion-mechanism of differential aeration corrosion, mixed potential theory for understanding common corrosion of metals and alloys.

Thermodynamics of Corrosion: Pourbaix diagram and its importance in metal corrosion and its calculation for Al, Cu, Ni and Fe.

Unit – III	08 Hrs

Effects of corrosion:

The direct and indirect effects of corrosion, economic losses, Indirect losses -Shutdown, contamination, loss of product, loss of efficiency, environmental damage, Importance of corrosion prevention in various industries, corrosion auditing in industries, corrosion map of India.

Corrosion issues in specific industries-power generation, chemical processing industries, oil and gas Industries, corrosion effect in electronic industry.

Unit –IV

Corrosion Testing and monitoring:

Introduction, classification. Purpose of corrosion testing, materials, specimen. Surface preparation, measuring and weighing. Types of testing, lab, pilot plant and field tests. Measurement of corrosion rate, weight loss method, CPR numericals, Electrochemical methods, Tafel extrapolation. Linear polarization method.

Unit –V

09 Hrs

09 Hrs

Corrosion Control:

Principles of corrosion prevention, material selection, design considerations, control of environmentdecrease in velocity, passivity, removal oxidizer, Inhibitors and passivators, coatings- organic, electroplating of Copper, Nickel and Chromium, physical vapor deposition-sputtering, Electroless plating of Nickel.

Cours	Course Outcomes: After completing the course, the students will be able to					
CO1:	Understand the causes and mechanism of various types of corrosion					
CO2 :	Apply the knowledge of chemistry in solving issues related to corrosion.					
CO3:	Analyse and interpret corrosion with respect to practical situations.					
CO4 :	Develop practical solutions for problems related to corrosion.

Course Outcomes: After completing the course, the students will be able to

CO1	Demonstrate an understanding of prompt engineering principles including how prompt structure and phrasing impact the performance of AI models.
CO2	Design and implement effective prompts- to create and apply prompts for various natural language processing (NLP) tasks, such as text generation, summarization, and translation, using AI models.
CO3	Critically evaluate the effectiveness of prompts - assess the quality and performance of prompts in terms of accuracy, coherence, and relevance, identifying areas for improvement.
CO4	Apply prompt engineering techniques in real-world scenarios - use prompt engineering strategies to address practical problems in domains such as education, healthcare, and business, demonstrating the applicability of AI-driven solutions.
CO5	Collaborate on projects involving prompt engineering - work effectively in teams to design, implement, and evaluate prompt-based solutions, showcasing their ability to contribute to complex AI-related projects.

E-Mobility: A Brief History of the Electric Powertrain, Energy Sources for Propu	ilsion and			
Emissions, The Advent of Regulations, Drive Cycles, BEV Fuel Consumption, Range, Carbon				
Emissions for Conventional and Electric Powertrains, An Overview of Conventional, Battery,				
Hybrid, and Fuel Cell Electric Systems, A Comparison of Automotive and Other Tran	sportation			
Technologies. Vehicle Dynamics: Vehicle Load Forces, Vehicle Acceleration, Simple Dr	rive Cycle			
for Vehicle Comparisons	-			
Unit – II	09 Hrs			
Batteries: Batteries Types and Battery Pack, Lifetime and Sizing Considerations, Battery	Charging,			
Protection, and Management Systems, Battery Models, Determining the Cell/Pack Vol-	tage for a			
Given Output\Input Power, Cell Energy and Discharge Rate.				
Battery Charging: Basic Requirements for Charging System, Charger Architectures, Grid	Voltages,			
Frequencies, and Wiring, Charging Standards and Technologies, SAE J1772, Wireless	Charging,			
The Boost Converter for Power Factor Correction.				
Unit –III	09 Hrs			
Battery Management System: BMS Definition, Li-Ion Cells, Li-Ion BMSs, Li-Ion Batte	ries, BMS			
Options: Functionality, CCCV Chargers, Regulators, Balancers, Protectors, Fur	nctionality			
Comparison, Technology, Topology. Measurement: Voltage, Temperature, Current, Man	nagement:			
Protection, Thermal Management, Balancing, Distributed Charging, Evaluation,	External			
Communication: Dedicated analog and digital wires.				
Unit –IV	09 Hrs			
Electric Drive train: Overview of Electric Machines, classification of electric machine				
automobile drivetrains, modelling of electric machines, Power Electronics, controllin	ig electric			
machines, electric machine and power electronics integration Constraints.				
Energy Management Strategies: Introduction to energy management strategies used in h				
electric vehicles, Classification of different energy management strategies, Comparison o				
energy management strategies and implementation issues of energy management strategie	s.			
Unit –V	09 Hrs			
Charger Classification and standards: classification based on charging, levels (reg				
modes, plug types, standards related to: connectors, communication, supply equipments, E				
Sizing the drive system: Matching the electric machine and the internal combustion engine (ICE),				
Sizing the propulsion motor, sizing the power electronics, selecting the energy storage te	chnology,			
Communications, supporting subsystems				

Communications, supporting Subsystems: In vehicle networks- CAN

Course	Course Outcomes: After completing the course, the students will be able to: -			
CO 1	Explain the basics of electric and hybrid electric vehicles, their architecture, technologies			
	and modelling.			
CO 2	Discuss and implement different energy storage technologies used for electric vehicles and			
	their management system.			
CO 3	Analyze various electric drives and its integration techniques with Power electronic circuits			
	suitable for electric vehicles.			
CO 4	Design EV Simulator for performance evaluation and system optimization and understand			
	the requirement for suitable EV infrastructure.

	process. Acquire familiarity with basic building blocks of Android application and its						
	architecture.						
CO2:	Apply and explore the basic framework, usage of SDK to build Android applications						
	incorporating. Android features in developing mobile applications.						
CO3:	Demonstrate proficiency in coding on a mobile programming platform using advanced						
	Android technologies, handle security issues, rich graphics interfaces, using debugging and						
	troubleshooting tools.						
CO4:	: Create innovative applications, understand the economics and features of the app marketplace						
	by offering the applications for download.

	RUBRIC FOR THE CONTINUOUS INTERNAL EVALUATION (THEOR	Y)
#	COMPONENTS	MARKS
1.	QUIZZES: Quizzes will be conducted in online/offline mode. TWO QUIZZES will be conducted & Each Quiz will be evaluated for 10 Marks. Each quiz is evaluated for 10 marks adding up to 20 MARKS	20
2.	TESTS: Students will be evaluated in test, descriptive questions with different complexity levels (Revised Bloom's Taxonomy Levels: Remembering, Understanding, Applying, Analyzing, Evaluating, and Creating). TWO tests will be conducted . Each test will be evaluated for 50 Marks , adding upto 100 Marks. FINAL TEST MARKS WILL BE REDUCED TO 40 MARKS .	40
3.	EXPERIENTIAL LEARNING: Students will be evaluated for their creativity and practical implementation of the problem. Case study based teaching learning (10), Program specific requirements (10), Video based seminar/presentation/demonstration (10) Designing & Modeling (10) ADDING UPTO 40 MARKS.	40
	MAXIMUM MARKS FOR THE CIE THEORY	100

Course	Course Outcomes: After completing the course, the students will be able to: -					
CO 1	Understand the fundamental concepts of project management and its relationship with					
	organizational strategy, operations management, and business value.					
CO 2	Apply techniques for generating, screening, and evaluating project ideas, considering factors					
	such as net present value and project rating index.					
CO 3	Create Work Breakdown Structures (WBS), utilization of PERT/CPM for developing project					
	schedule, alongside requirement collection, scope definition, scope validation, and scope					
	control.					
CO 4	Develop skills in project integration, quality, risk management, and scheduling, enabling					
	effective project planning, execution, monitoring, and control.

Course Outcomes:

CO1	Understand nuclear physics: grasp atomic structure, nuclear models, and the forces driving
	nuclear interactions
CO2	Evaluate various reactor types and advanced concepts, applying kinetics and controls to
	ensure safe and efficient nuclear reactor analysis and design.
CO3	Examine the nuclear fuel cycle from mining to recycling, assess environmental impact and
	safety, and promote responsible, sustainable practices throughout.
CO4	Apply ionizing radiation principles for safety measures; integrate communication and
	regulatory compliance into emergency response plans effectively.

 Unit-I
 09 Hrs

 Fundamentals & current trends in cognitive psychology: Definition, Emergence of cognitive psychology, Cognitive development theories and perspectives; Current status and trends in cognitive Psychology. Research methods in cognitive psychology- goals of research. Distinctive research method. Current areas of research in cognitive psychology, (Educational application, marketing and advertisement).

Unit – 11	08 Hrs	
Basic cognitive processes: Sensation and Perception: Sensory receptors and Brain, The co	onstancies,	
pattern recognition, Modularity, Imagery: Characteristics of Imagery, Cognitive maps. Atte	ention and	
Information processing: Nature and Types, Theories and models of attention. Neuropsyc	chological	
studies of Attention. Consciousness: - meaning, Modern Theories and Contemporary Re	esearch of	
Consciousness.		
Unit –III	08 Hrs	
Reasoning, Creativity and Problem-Solving: Reasoning definition, types, influencing factors.		
Creativity- definition, steps involved in creative process, obstacles involved in creativity, enhancing		
techniques of creativity. Metacognition: Problem-solving, steps in problem solving, types	, methods,	
obstacles, and aids of problem-Solving. Concept of Design Thinking		
Unit –IV	08 Hrs	
Psycholinguistics: Definition, characteristics of language, theories - Chomsky. Str	ucture of	
Language (Properties), Stages in Language Development, Neurological Language. Comp	orehension	
and Production. Bilingualism, Multilingualism and Learning disability.		
Unit –V	09 Hrs	

Cognitive Neuroscience: Definition and emergence of cognitive neuroscience, Scope of Neuroscience, structure and functions of Brain, Brain Plasticity, Intelligence and Neuroscience.Meta-cognitive strategies. Artificial intelligence, Robotics, Models on Information Processing.

Cours	Course Outcomes: After completing the course, the students will be able to: -				
CO1	Describe the basic theories, principles, and concepts of cognitive psychology as they relate to				
	behaviours and mental processes.				
CO2	Define learning and compare and contrast the factors that cognitive, behavioural, and				
	Humanistic theorists believe influence the learning process.				
CO3	Develop understanding of psychological attributes such as reasoning, problem solving creativity, resulting in their enhancement and apply effective strategies for self-management				
	and self-improvement.				
CO4	Apply the theories into their own and others' lives in order to better understand their				
	personalities and experiences.

	RUBRIC FOR SEMESTER END EXAMINATION (THEORY)					
Q.NO.	Q.NO. CONTENTS					
	PART A					
1	Objective type questions covering entire syllabus	20				
(Maxin	PART B num of TWO Sub-divisions only; wherein one sub division will be a caselet in t topics)	he related				
2	Unit 1 : (Compulsory)	16				
3 & 4	Unit 2 : Question 3 or 4	16				
5&6	Unit 3 : Question 5 or 6	16				
7&8	Unit 4 : Question 7 or 8	16				
9 & 10	Unit 5: Question 9 or 10	16				
	TOTAL	100				

			Semester: VII			
	PF	RINCIPLES AN	D PRACTICES	5 OF CYBER LAV	N	
		Categor	: Institutional	Elective - I		
		C	(Theory)			
Course Code	:	21HS75IR		CIE	:	100
Credits: L:T:P	:	3;0;0		SEE	:	100
Total Hours	:	39 L		SEE Duration	:	3 Hours
			Unit-I			08 Hrs
Introduction - Origin and meaning of Cyberspace; Introduction to Indian Cyber Law, Distinction						
between Cyber Cr	ime a	and Conventiona	l Crime, Cyber	Criminals and their	ir O	bjectives, Kinds of
Cyber Crime & Cyber Threats, challenges of cybercrimes, Overview of General Laws and						
Procedures in India.						
Cyber Jurisdictio	on - C	Concept of Juriso	iction. Jurisdicti	on in Cyberspace.	Issu	es and concerns of
Cyberspace Jurisdiction in India, International position of Cyberspace Jurisdiction, Judicial						
interpretation of Cyberspace Jurisdiction.						
Activities:Case Studies and Practical Applications						
100111005.0000 50		•	nit – II			08 Hrs

Information Technology Act: A brief overview of Information Technology Act 2000, IT Act 2000 vs. IT Amendment Act 2008, Relevant provisions from Indian Penal Code, Indian Evidence Act, Bankers Book Evidence Act, Reserve Bank of India Act, etc.

Electronic Signature and Digital Signature - Meaning & Concept of Relevance of Signature, Handwritten signature vs Digital Signature, Technological Advancement and development of signature, Digital Signature: IT Act, 2000, Cryptography, Public Key and Private Key, Public Key Infrastructure Electronic Signature vs. Digital Signature, E-Commerce under IT Act 2000, Issues and challenges of E-Commerce.

Activities:Case Studies and Practical Applications

08 Hrs

Data Protection and Privacy Concerns in Cyberspace - Need to protect data in cyberspace, Types of data, Legal framework of data protection, Data protection bill -an overview, GDPR, Concept of privacy, Privacy concerns of cyberspace, Constitutional framework of privacy, Judicial interpretation of privacy in India.

Unit –III

Data Privacy and Data Security- Defining data, meta-data, big data, non- personal data. Data protection, Data privacy and data security, Data protection regulations of other countries- General Data Protection Regulations (GDPR),2016 Personal Information Protection and Electronic Documents Act (PIPEDA)., Social media- data privacy and security issues.

Activities: Case Studies and Practical Applications

Unit –IV	08 Hrs

IP Protection Issues in Cyberspace

Copyright Issues in Cyberspace- Copyright infringement in digital environment. Indian legal protection of copyright in cyberspace.

Trademark Issues in Cyberspace - Domain Name Vs Trademark, Domain Name dispute and Related Laws, Different Form of Domain in Cyberspace.

Patent Issues in Cyberspace - Legal position on Computer related Patents - Indian Position on Patents.

Activities:Case Studies and Practical Applications

Unit –V	07 Hrs
Digital Forensics - Computer Forensics, Mobile Forensics, Forensic Tools , Anti-Forensic	s
Cyber Crime & Criminal Justice Agencies - Cyber Crime Cells, Cyber Crime Appellate- Cyber	
Crime Investigation, Investigation Procedure - FIR - Charge Sheet	

RV College of Engineering®

Mysore Road, RV Vidyaniketan Post, Bengaluru - 560059, Karnataka, India

Course Outcomes: After completing the course, the students will be able to: -

CO1	Understand the importance of professional practice, Law and Ethics in their personal lives
	and professional careers.
CO2	Build in Depth Knowledge of Information Technology Act and Legal Frame Work of Right
	to Privacy, Data Security and Data Protection.
CO3	Identify the bone of contentions of cybercrime investigation techniques, evaluate problem-

- solving strategies, and develop science-based solutions.
- **CO4** Develop an Understanding of the Relationship Between E-Commerce and Cyberspace.

	Cyber Law by Dr. Pavan Duggal Publisher: LexisNexis, ISBN-10: 8196241070, ISBN-13: 978-
	8196241070
2.	Introduction to Information Security and Cyber Laws by Surya Prakash Tripathi, Ritendra Goel, Praveen Kumar Shukla ASIN: 9351194736, Publisher: Dreamtech Press, ISBN-10: 9789351194736, ISBN-13: 978-9351194736.
3.	Cyber Forensics in India: A Legal Perspective by Nishesh Sharma, 1 st Edition, ISBN: 9788131250709.
4.	Cyber Laws, Justice Yatindra Singh, 6 th Edition, Vol. 1, ISBN : 9789351437338

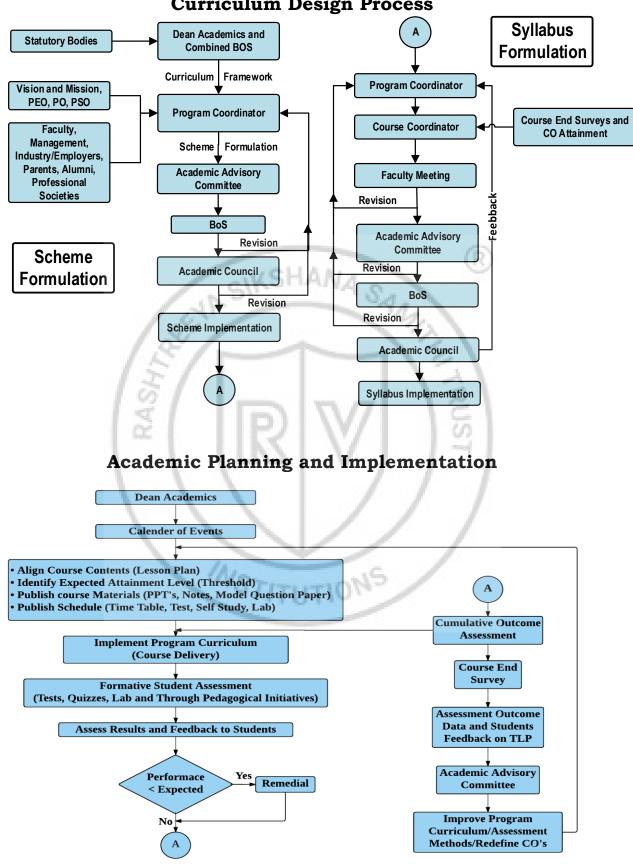

RUBRIC FOR THE CONTINUOUS INTERNAL EVALUATION (THEORY)			
#	COMPONENTS	MARKS	
1.	QUIZZES: Quizzes will be conducted in online/offline mode. TWO QUIZZES will be conducted & Each Quiz will be evaluated for 10 Marks. THE SUM OF TWO QUIZZES WILL BE THE FINAL QUIZ MARKS.	20	
2.	 TESTS: Students will be evaluated in test, descriptive questions with different complexity levels (Revised Bloom's Taxonomy Levels: Remembering, Understanding, Applying, Analyzing, Evaluating, and Creating). TWO tests will be conducted. Each test will be evaluated for 50 Marks, adding up to 100 Marks 		
3.	EXPERIENTIAL LEARNING: Students will be evaluated for their creativity and practical implementation of the problem. Case study-based teaching learning (10), Program specific requirements (10), Video based seminar / presentation / demonstration (20) ADDING UPTO 40 MARKS.	40	
MAXIMUM MARKS FOR THE CIE			

	RUBRIC FOR SEMESTER END EXAMINATION (THEORY)

Curriculum Design Process

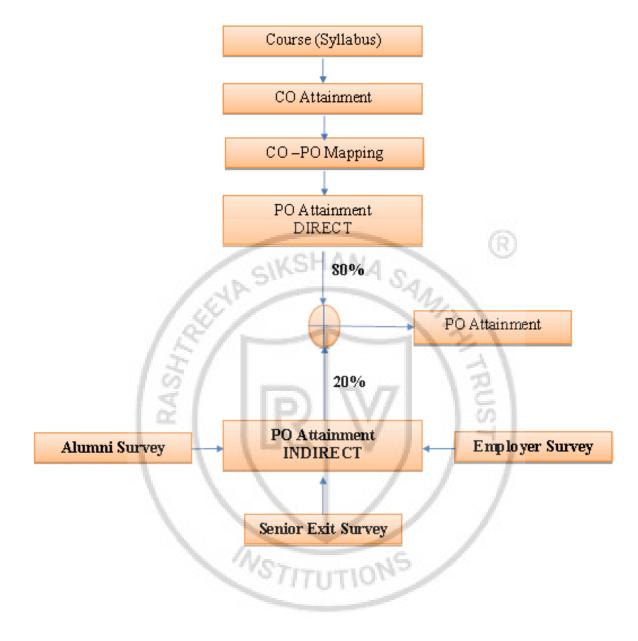

Process For Course Outcome Attainment

Program Outcome Attainment Process

KNOWLEDGE & ATTITUDE PROFILE

- **WK1:** A systematic, theory-based understanding of the natural sciences applicable to the discipline and awareness of relevant social sciences.
- **WK2:** Conceptually-based mathematics, numerical analysis, data analysis, statistics and formal aspects of computer and information science to support detailed analysis and modelling applicable to the discipline.
- **WK3:** A systematic, theory-based formulation of engineering fundamentals required in the engineering discipline.
- **WK4:** Engineering specialist knowledge that provides theoretical frameworks and bodies of knowledge for the accepted practice areas in the engineering discipline; much is at the forefront of the discipline.
- **WK5:** Knowledge, including efficient resource use, environmental impacts, whole-life cost, re-use of resources, net zero carbon, and similar concepts, that supports engineering design and operations in a practice area.
- **WK6:** Knowledge of engineering practice (technology) in the practice areas in the engineering discipline.
- **WK7:** Knowledge of the role of engineering in society and identified issues in engineering practice in the discipline, such as the professional responsibility of an engineer to public safety and sustainable development.
- **WK8:** Engagement with selected knowledge in the current research literature of the discipline, awareness of the power of critical thinking and creative approaches to evaluate emerging issues.
- **WK9:** Ethics, inclusive behaviour and conduct. Knowledge of professional ethics, responsibilities, and norms of engineering practice. Awareness of the need for diversity by reason of ethnicity, gender, age, physical ability etc. with mutual understanding and respect, and of inclusive attitudes.

PROGRAM OUTCOMES (POs)

- * **PO1:** Engineering Knowledge: Apply knowledge of mathematics, natural science, computing, engineering fundamentals and an engineering specialization as specified in WK1 to WK4 respectively to develop to the solution of complex engineering problems.
- * PO2: Problem Analysis: Identify, formulate, review research literature and analyze engineering problems reaching substantiated complex conclusions with consideration for sustainable development. (WK1 to WK4)
- * **PO3:** Design/Development of Solutions: Design creative solutions for complex engineering problems and design/develop systems/components/processes to meet identified needs with consideration for the public health and safety, whole-life cost, net zero carbon, culture, society and environment as required. (WK5)
- **PO4:** Conduct Investigations of Complex Problems: Conduct investigations of complex * engineering problems using research-based knowledge including design of experiments, modelling, analysis & interpretation of data to provide valid conclusions. (WK8).
- * **PO5:** Engineering Tool Usage: Create, select and apply appropriate techniques, resources and modern engineering & IT tools, including prediction and modelling recognizing their limitations to solve complex engineering problems. (WK2 and WK6)
- PO6: The Engineer and The World: Analyze and evaluate societal and environmental * aspects while solving complex engineering problems for its impact on sustainability with reference to economy, health, safety, legal framework, culture and environment. (WK1, WK5, and WK7).
- * PO7: Ethics: Apply ethical principles and commit to professional ethics, human values, diversity and inclusion; adhere to national & international laws. (WK9)
- * **PO8:** Individual and Collaborative Team work: Function effectively as an individual, and as a member or leader in diverse/multi-disciplinary teams.
- * **PO9:** Communication: Communicate effectively and inclusively within the community and society at large, such as being able to comprehend and write effective reports and design documentation, make effective presentations considering cultural, language, and learning differences
- * **PO10:** Project Management and Finance: Apply knowledge and understanding of engineering management principles and economic decision-making and apply these to one's own work, as a member and leader in a team, and to manage projects and in multidisciplinary environments.
- PO11: Life-Long Learning: Recognize the need for, and have the preparation and * ability for i) independent and life-long learning ii) adaptability to new and emerging technologies and iii) critical thinking in the broadest context of technological change. (WK8)

INNOVATIVE TEAMS OF RVCE

Ashwa Mobility Foundation (AMF): Designs and fabricates Formula-themed race cars and mobility solutions to address urban transportation issues.

Astra Robotics Team: Focuses on designing and building application-specific robots.

Coding Club: Helps students gain coding skills and succeed in competitions like GSoC and ACM-ICPC.

Entrepreneurship Development Cell (E-Cell): Promotes entrepreneurship through workshops, speaker sessions, and mentoring for startups.

Frequency Club Team: Works on software and hardware, emphasizing AI and Machine Learning.

Team Garuda: Develops a supermileage urban concept electric car and E-mobility products.

Team Jatayu: Builds low-cost UAVs with autonomous capabilities for various tasks.

Solar Car Team: Aims to create a solar electric vehicle for sustainable transportation.

Team Antariksh: Focuses on space technology and the development of operational rockets.

Team Chimera: Builds a Formula Electric Car through R&D in E-Mobility.

Helios Racing Team: Designs and tests All-Terrain Vehicles, participating in SAE's BAJA competitions.

Team Hydra: Develops autonomous underwater vehicles for tasks like water purification.

Team Krushi: Creates low-cost farming equipment to assist farmers in cultivation and harvesting.

Team Vyoma: Designs and tests radio-controlled aircraft and UAVs.

Team Dhruva: Engages in astronomy-related activities and collaborates on projects with organizations like ICTS and IIA.

Ham Club: Promotes Amateur Radio and explores technical innovations in communications, especially for disaster response.

Cultural Activity Teams

- 1. AALAP (Music club)
- 2. DEBSOC (Debating society)
- 3. CARV (Dramatics club)
- 4. FOOTPRINTS (Dance club)
- 5. QUIZCORP (Quizzing society)
- 6. ROTARACT (Social welfare club)
- 7. RAAG (Youth club)
- 8. EVUKE (Fashion team)
- 9. f/6.3 (Photography club)
- 10. CARV ACCESS (Film-making

NSS of RVCE

NCC of RVCE

Leadership in Quality Technical Education, Interdisciplinary Research & Innovation, with a Focus on Sustainable and Inclusive Technology

- To deliver outcome based Quality education, emphasizing on experientiallearning with the state of the art infrastructure.
- To create a conducive environment for interdisciplinary research and innovation.
- To develop professionals through holistic education focusing on individual growth, discipline, integrity, ethics and social sensitivity.
- To nurture industry-institution collaboration leading to competency enhancement and entrepreneurship.
- To focus on technologies that are sustainable and inclusive, benefiting all sections of the society.

Achieving Excellence in Technical Education, Research and Consulting through an Outcome Based Curriculum focusing on Continuous Improvement and Innovation by Benchmarking against the global Best Practices.

Professionalism, Commitment, Integrity, Team Work, Innovation
