## Vision

Excel in Education, Research and Consultancy in Civil Engineering with emphasis on Sustainable Development

## Mission

1. Disseminating and integrating the knowledge of civil Engineering and allied fields
2. Enhancing industry-institute interaction leading to interdisciplinary research.
3. Imbibing wide-range of skills in cutting-edge technology for sustainable development.
4. Motivate entrepreneurship and professional ethics to serve the society.

## Program Educational Objectives

After successful completion of the program, the graduates will be able to PEO1:

Successfully address technological and managerial challenges.

PEO2: Professionally design and execute Civil Engineering projects.

PEO3: Pursue advanced education, research and continue life-long learning process to remain active professionals.

PEO4: Play key roles in addressing societal needs through interdisciplinary approach.

## Program Specific Outcomes

1. Apply knowledge of fundamental aspects to analyze and design civil engineering structures.
2. Provide sustainable solutions to civil engineering problems.
3. Employ codal provisions to arrive at comprehensive solutions to address societal needs
4. Exhibit communication and teamwork skills.

<b>Canal falls:</b> Necessity and types - Trapezoidal notch fall, Syphon well drop, Simple vertical drop fall, Sarda type fall, Straight glacis fall, Baffle fall or Inglis fall.	
<b>Canal Outlets or Modules:</b> Requirements of good Module, types of Modules, Criteria for judging the performance of modules, certain other important definitions connected with modules, types of non-modular outlets, types of semi modules or Flexible outlets, types of rigid modules.	

<b>Course Outcomes: After completing the course, the students will be able to</b>	
<b>CO1:</b>	Check the stability of gravity dam and design the dam.
<b>CO2:</b>	Estimate the quantity of seepage through earth dams.
<b>CO3:</b>	Design spillways and aprons for various diversion works.
<b>CO4:</b>	Select particular type of canal regulation work for canal network.

<b>Unit-I</b>			<b>08 Hrs</b>
<b>Introduction:</b> Elements in urban transit system, NUTP, MPO plan. Transportation Planning Process: Land use transportation planning; Systems approach, integration of transport planning, traffic and land use planning, Corridor Management and Preservation.			
<b>Unit – II</b>			<b>08 Hrs</b>
<b>Transportation Surveys:</b> Definition of study area, zoning, various types of surveys and interpretation, travel demand and forecasting. Trip Generation and Distribution: Trip generation - regression, category analysis Trip distribution - growth factor, Fratar and Furness methods, calibration of Gravity model, intervening opportunities model, competing Opportunities model, Gravity model.			
<b>Unit –III</b>			<b>08 Hrs</b>
<b>Modal Split :</b> Factors affecting modal split; Modal split in transport planning. Traffic Assignment: Description of transport network, route choice behavior. Assignment techniques- All-or-Nothing assignment, multipath traffic assignment, capacity restrained traffic assignment.			
<b>Unit –IV</b>			<b>08 Hrs</b>
<b>Evaluation:</b> Identification of corridor; Formulation of plans; Economic Evaluation. Mass Transit Systems: capacity, operation and management of Fleet planning and Scheduling.			
<b>Unit –V</b>			<b>08 Hrs</b>
<b>Case Studies:</b> Case studies on metropolitan transportation planning, integration of multimodal transport systems, best practices and emerging technologies in transportation planning			

<b>Course Outcomes: After completing the course, the students will be able to</b>	
1.	Explain planning process for an effective transportation system
2.	Compare the characteristics of mass transit system and methods of collecting traffic data to propose an effective transport facility
3.	Determine zonal trip generation and attraction for inter-zonal trip distribution methods
4.	Evaluate transport system for assigning travel trips to various routes for effective management and economic sustainability

<b>Unit-I</b>					<b>08 Hrs</b>	
<b>Introduction to Pre stressed concrete and Codal Provisions</b>						
Historic development- general principles of Prestressing, Types of pre stressing, pre-tensioning and post tensioning, advantages and limitation of prestressed concrete, Materials for pre stressed concrete- high strength steel and concrete, properties, Stress-strain characteristics of high strength steel and concrete						
Basic principles of pre stressing, fundamentals of prestressing, Stress concept, Strength concept, Load balancing concept, , Pretensioning and post tensioning methods-Analysis of post tensioning, Systems of pre stressing, End anchorages, Codal Provisions						
<b>Unit – II</b>					<b>08 Hrs</b>	
<b>Analysis of sections for Flexure:</b>						
Elastic analysis of pre stressed concrete beams with straight, parabolic, triangular, trapezoidal cable profiles, Eccentric and concentric pre stressing, Numerical problems						
<b>Unit –III</b>					<b>08 Hrs</b>	
<b>Losses of Pre stress:</b>						
Loss of prestress due to elastic shortening of concrete, shrinkage of concrete, creep of concrete, relaxation of steel, slip in anchorage and frictional losses, Computation of Loss of Prestress for Pretensioned and Post Tensioned members, Numerical problems						
<b>Unit –IV</b>					<b>08 Hrs</b>	
<b>Deflection of pre stressed concrete beams:</b>						
Short term and long-term deflections, Elastic deflections due to different loads and cable profiles, Deflection limits as per IS:1343, Effect of creep on deflection, Load versus deflection curve, methods of reducing deflection, Numerical problems.						
<b>Limit state of Collapse:</b>						
Flexure- IS code recommendations, Ultimate flexural strength of sections for pretensioned and post tensioned members with and without bonding, IS code recommendations on shear strength, Shear resistance of sections, shear reinforcement, Limit state of serviceability- Control of deflection and cracking, Numerical Problems						
<b>Unit –V</b>					<b>08 Hrs</b>	
<b>Design of Beams:</b>						
Design of pre stressing force and eccentricity for post tensioned prismatic beams, permissible stresses, Limiting zone and cable profile, Numerical Problems, Concept of design of end blocks						

<b>Course Outcomes: After completing the course, the students will be able to:-</b>	
<b>CO1</b>	Understand the fundamental concepts of stress analysis

<p><b>Basics of corrosion:</b> Introduction: Galvanic series, Pilling-Bedworth ratio, Types: Galvanic corrosion, crevice corrosion, pitting corrosion, intergranular corrosion, erosion corrosion, stress corrosion, season cracking, hydrogen embrittlement, bacterial corrosion. <b>Corrosion in different engineering materials:</b> Concrete structures, duplex, stainless steels, ceramics, composites.</p>	
<b>Unit-II</b>	<b>08 Hrs</b>
<p><b>Corrosion mechanism:</b> Electrochemical theory of corrosion, Crevice corrosion-mechanism of differential aeration corrosion, mixed potential theory for understanding common corrosion of metals and alloys. <b>Thermodynamics of Corrosion:</b> Pourbaix diagram and its importance in metal corrosion and its calculation for Al, Cu, Ni and Fe.</p>	
<b>Unit – III</b>	<b>08 Hrs</b>
<p><b>Effects of corrosion:</b> The direct and indirect effects of corrosion, economic losses, Indirect losses -Shutdown, contamination, loss of product, loss of efficiency, environmental damage, Importance of corrosion prevention in various industries, corrosion auditing in industries, corrosion map of India. Corrosion issues in specific industries-power generation, chemical processing industries, oil and gas Industries, corrosion effect in electronic industry.</p>	
<b>Unit –IV</b>	<b>09 Hrs</b>
<p><b>Corrosion Testing and monitoring:</b> Introduction, classification. Purpose of corrosion testing, materials, specimen. Surface preparation, measuring and weighing. Types of testing, lab, pilot plant and field tests. Measurement of corrosion rate, weight loss method, CPR numericals, Electrochemical methods, Tafel extrapolation. Linear polarization method.</p>	
<b>Unit –V</b>	<b>09 Hrs</b>
<p><b>Corrosion Control:</b> Principles of corrosion prevention, material selection, design considerations, control of environment- decrease in velocity, passivity, removal oxidizer, Inhibitors and passivators, coatings-organic, electroplating of Copper, Nickel and Chromium, physical vapor deposition-sputtering, Electroless plating of Nickel.</p>	

<b>Course Outcomes: After completing the course, the students will be able to</b>	
<b>CO1:</b>	Understand the causes and mechanism of various types of corrosion
<b>CO2:</b>	Apply the knowledge of chemistry in solving issues related to corrosion.
<b>CO3:</b>	Analyse and interpret corrosion with respect to practical situations.
<b>CO4:</b>	Develop practical solutions for problems related to corrosion.

**GUIDELINES**

1. The duration of the internship shall be for a period of **6/8 weeks** on full time basis after VI semester final exams and before the commencement of VII semester.
2. The student must submit letters from the industry clearly specifying his / her name and the duration of the internship on the company letter head with authorized signature.
3. Internship must be related to the field of specialization of the respective UG programme in which the student has enrolled.
4. Students undergoing internship training are advised to report their progress and submit periodic progress reports to their respective guides.
5. Students have to present the internship activities carried out to the departmental committee and only upon approval by the committee, the student can proceed to prepare and submit the hard copy of the final internship report. However, interim or periodic reports as required by the industry / organization can be submitted as per the format acceptable to the respective industry / organizations.
6. The reports shall be printed on A4 size with 1.5 spacing and Times New Roman with font size 12, outer cover of the report (wrapper) has to be Ivory color for UG circuit Programs and Light Blue for Non-Circuit Programs.
7. The broad format of the internship final report shall be as follows
  - Cover Page
  - Certificate from College
  - Certificate from Industry / Organization
  - Acknowledgement
  - Synopsis
  - Table of Contents
  - Chapter 1 - Profile of the Organization: Organizational structure, Products, Services, Business Partners, Financials, Manpower, Societal Concerns, Professional Practices,
  - Chapter 2 - Activities of the Department
  - Chapter 3 - Tasks Performed: summary of the tasks performed during 8-week period
  - Chapter 4 – Reflections: Highlight specific technical and soft skills acquired during internship
  - References & Annexure

**Course Outcomes:**

After going through the internship the student will be able to:

CO1: Apply Engineering and Management principles

CO2: Analyze real-time problems and suggest alternate solutions

CO3: Communicate effectively and work in teams

CO4: Imbibe the practice of professional ethics and need for lifelong learning.

**Scheme of Continuous Internal Evaluation (CIE):**

The evaluation committee shall consist of Guide, Professor/Associate Professor and Assistant Professor. The committee shall assess the presentation and the progress reports in two reviews. The evaluation criteria shall be as per the rubrics given below:

Reviews	Activity	Weightage
Review-I	Explanation of the application of engineering knowledge in industries, ability to comprehend the functioning of the organization/ departments.	25 Marks
Review - II	Importance of resource management, environment and sustainability, presentation skills and report writing	25 Marks

**Scheme for Semester End Evaluation (SEE):**

The SEE examination shall be conducted by an external examiner (domain expert) and an internal examiner. Evaluation shall be done in batches, not exceeding 6 students per batch.

<ol style="list-style-type: none"><li>1. The project topic, title and synopsis have to be finalized and submitted to their respective internal guide(s) before the beginning of the 8th semester.</li><li>2. The detailed Synopsis (approved by the department Project Review Committee) has to be submitted during the 1st week after the commencement of 8th semester.</li></ol>					
<b><u>Batch Formation:</u></b>					
<ul style="list-style-type: none"><li>• Students are free to choose their project partners from within the program or any other program.</li><li>• Each student in the team must contribute towards the successful completion of the project.</li><li>• The project may be carried out In-house / Industry / R &amp; D Institution. The project work is to be carried out by a team of two to four students, in exceptional cases where a student is placed in a company and offered an internship through the competitive process or student is selected for internship at national or international level through competitive process, the student can work independently.</li><li>• The students are allowed to do either a project for full 5 days in the industry or full 5 days in the college.</li><li>• In case the project work is carried out outside Bengaluru, such students must be available during Project Evaluation process scheduled by the respective departments and they must also interact with their guide regularly through Email / Webinar / Skype etc.</li></ul>					
<b><u>Project Topic Selection:</u></b>					
<p>The topics of the project work must be in the field of respective program areas or in line with CoE's(Centre of Excellence) identified by the college or List of project areas as given by industry/Faculty. The projects as far as possible should have societal relevance with focus on sustainability.</p> <p>Students can select courses in NPTEL from the discipline of Humanities and Social Sciences, Management, Multidisciplinary and Design Engineering. The course chosen could be either of 4w/8w/12w duration. The students need to enrol for a course, register for the exam and submit the e-certificate to the department, as and when it is released by NPTEL. The same will be considered as one of the components during project evaluation of phase 2 and phase 5.</p>					
<b><u>Project Evaluation:</u></b>					
<ul style="list-style-type: none"><li>• Continuous monitoring of project work will be carried out and cumulative evaluation will be done.</li><li>• The students are required to meet their internal guides once in a week to report their progress in project work.</li></ul>					

- Weekly Activity Report (WAR) has to be maintained in the form of a diary by the project batch and the same has to be discussed with the Internal Guide regularly.
- In case of Industry project, during the course of project work, the internal guides will have continuous interaction with external guides and will visit the industry at least twice during the project period.
- For CIE assessment the project groups must give a final seminar with the draft copy of the project report.
- The presentation by each group will be for 20-30 minutes and every member of the team needs to justify the contributions to the project.
- The project team is required to submit Hard copies of the detailed Project Report in the prescribed format to the department.
- For CIE 50% weightage should be given to the project guide and 50% weightage to the project evaluation committee.
- Before the final evaluations the project group is required to produce a No dues certificate from Industry, Central Library and Department.

### **Course Outcomes:**

After going through the major project the student will be able to:

CO1: Apply knowledge of mathematics, science and engineering to solve respective engineering domain problems.

CO2: Design, develop, present and document innovative/multidisciplinary modules for a complete engineering system.

CO3: Use modern engineering tools, software and equipment to solve problem and engage in life-long learning to follow technological developments.

CO4: Function effectively as an individual, or leader in diverse teams, with the understanding of professional ethics and responsibilities.

### **Scheme of Continuous Internal Evaluation (CIE):**

The following are the weightings given for the various stages of the project.

1.Selection of the topic and formulation of objectives	10%
2.Design and Development of Project methodology	25%
3.Execution of Project	25%
4.Presentation,Demonstration and Results Discussion	30%
5.Report Writing & Publication	10%

## KNOWLEDGE & ATTITUDE PROFILE

- **WK1:** A systematic, theory-based understanding of the natural sciences applicable to the discipline and awareness of relevant social sciences.
- **WK2:** Conceptually-based mathematics, numerical analysis, data analysis, statistics and formal aspects of computer and information science to support detailed analysis and modelling applicable to the discipline.
- **WK3:** A systematic, theory-based formulation of engineering fundamentals required in the engineering discipline.
- **WK4:** Engineering specialist knowledge that provides theoretical frameworks and bodies of knowledge for the accepted practice areas in the engineering discipline; much is at the forefront of the discipline.
- **WK5:** Knowledge, including efficient resource use, environmental impacts, whole-life cost, re-use of resources, net zero carbon, and similar concepts, that supports engineering design and operations in a practice area.
- **WK6:** Knowledge of engineering practice (technology) in the practice areas in the engineering discipline.
- **WK7:** Knowledge of the role of engineering in society and identified issues in engineering practice in the discipline, such as the professional responsibility of an engineer to public safety and sustainable development.
- **WK8:** Engagement with selected knowledge in the current research literature of the discipline, awareness of the power of critical thinking and creative approaches to evaluate emerging issues.
- **WK9:** Ethics, inclusive behaviour and conduct. Knowledge of professional ethics, responsibilities, and norms of engineering practice. Awareness of the need for diversity by reason of ethnicity, gender, age, physical ability etc. with mutual understanding and respect, and of inclusive attitudes.

## PROGRAM OUTCOMES (POs)

- ❖ **PO1:** Engineering Knowledge: Apply knowledge of mathematics, natural science, computing, engineering fundamentals and an engineering specialization as specified in WK1 to WK4 respectively to develop to the solution of complex engineering problems.
- ❖ **PO2:** Problem Analysis: Identify, formulate, review research literature and analyze complex engineering problems reaching substantiated conclusions with consideration for sustainable development. (WK1 to WK4)
- ❖ **PO3:** Design/Development of Solutions: Design creative solutions for complex engineering problems and design/develop systems/components/processes to meet identified needs with consideration for the public health and safety, whole-life cost, net zero carbon, culture, society and environment as required. (WK5)
- ❖ **PO4:** Conduct Investigations of Complex Problems: Conduct investigations of complex engineering problems using research-based knowledge including design of experiments, modelling, analysis & interpretation of data to provide valid conclusions. (WK8).
- ❖ **PO5:** Engineering Tool Usage: Create, select and apply appropriate techniques, resources and modern engineering & IT tools, including prediction and modelling recognizing their limitations to solve complex engineering problems. (WK2 and WK6)
- ❖ **PO6:** The Engineer and The World: Analyze and evaluate societal and environmental aspects while solving complex engineering problems for its impact on sustainability with reference to economy, health, safety, legal framework, culture and environment. (WK1, WK5, and WK7).
- ❖ **PO7:** Ethics: Apply ethical principles and commit to professional ethics, human values, diversity and inclusion; adhere to national & international laws. (WK9)
- ❖ **PO8:** Individual and Collaborative Team work: Function effectively as an individual, and as a member or leader in diverse/multi-disciplinary teams.
- ❖ **PO9:** Communication: Communicate effectively and inclusively within the community and society at large, such as being able to comprehend and write effective reports and design documentation, make effective presentations considering cultural, language, and learning differences
- ❖ **PO10:** Project Management and Finance: Apply knowledge and understanding of engineering management principles and economic decision-making and apply these to one's own work, as a member and leader in a team, and to manage projects and in multidisciplinary environments.
- ❖ **PO11:** Life-Long Learning: Recognize the need for, and have the preparation and ability for i) independent and life-long learning ii) adaptability to new and emerging technologies and iii) critical thinking in the broadest context of technological change. (WK8)

# INNOVATIVE TEAMS OF RVCE

**Ashwa Mobility Foundation (AMF):** Designs and fabricates Formula-themed race cars and mobility solutions to address urban transportation issues.

**Astra Robotics Team:** Focuses on designing and building application-specific robots.

**Coding Club:** Helps students gain coding skills and succeed in competitions like GSoC and ACM-ICPC.

**Entrepreneurship Development Cell (E-Cell):** Promotes entrepreneurship through workshops, speaker sessions, and mentoring for startups.

**Frequency Club Team:** Works on software and hardware, emphasizing AI and Machine Learning.

**Team Garuda:** Develops a supermileage urban concept electric car and E-mobility products.

**Team Jatayu:** Builds low-cost UAVs with autonomous capabilities for various tasks.

**Solar Car Team:** Aims to create a solar electric vehicle for sustainable transportation.

**Team Antariksh:** Focuses on space technology and the development of operational rockets.

**Team Chimera:** Builds a Formula Electric Car through R&D in E-Mobility.

**Helios Racing Team:** Designs and tests All-Terrain Vehicles, participating in SAE's BAJA competitions.

**Team Hydra:** Develops autonomous underwater vehicles for tasks like water purification.

**Team Krushi:** Creates low-cost farming equipment to assist farmers in cultivation and harvesting.

**Team Vyoma:** Designs and tests radio-controlled aircraft and UAVs.

**Team Dhruva:** Engages in astronomy-related activities and collaborates on projects with organizations like ICTS and IIA.

**Ham Club:** Promotes Amateur Radio and explores technical innovations in communications, especially for disaster response.

## Cultural Activity Teams

## VISION

Leadership in Quality Technical Education, Interdisciplinary Research & Innovation, with a Focus on Sustainable and Inclusive Technology

## MISSION

- To deliver outcome based Quality education, emphasizing on experiential learning with the state of the art infrastructure.
- To create a conducive environment for interdisciplinary research and innovation.
- To develop professionals through holistic education focusing on individual growth, discipline, integrity, ethics and social sensitivity.
- To nurture industry-institution collaboration leading to competency enhancement and entrepreneurship.
- To focus on technologies that are sustainable and inclusive, benefiting all sections of the society.

## QUALITY POLICY

Achieving Excellence in Technical Education, Research and Consulting through an Outcome Based Curriculum focusing on Continuous Improvement and Innovation by Benchmarking against the global Best Practices.

## CORE VALUES

Professionalism, Commitment, Integrity, Team Work, Innovation
