

## RV COLLEGE OF ENGINEERING®

(Autonomous Institution Affiliated to VTU, Belagavi) R.V. Vidyaniketan Post, Mysore Road Bengaluru – 560 059

# Bachelor of Engineering (B.E.) Scheme and Syllabus of III & IV Semesters

# **2018 SCHEME**

# ELECTRICAL AND ELECTRONICS ENGINEERING

## **VISION**

Leadership in Quality Technical Education, Interdisciplinary Research & Innovation, with a Focus on Sustainable and Inclusive Technology

# **MISSION**

- 1. To deliver outcome based Quality education, emphasizing on experiential learning with the state of the art infrastructure.
- 2. To create a conducive environment for interdisciplinary research and innovation.
- 3. To develop professionals through holistic education focusing on individual growth, discipline, integrity, ethics and social sensitivity.
- 4. To nurture industry-institution collaboration leading to competency enhancement and entrepreneurship.
- 5. To focus on technologies that are sustainable and inclusive, benefiting all sections of the society.

# **QUALITY POLICY**

Achieving Excellence in Technical Education, Research and Consulting through an Outcome Based Curriculum focusing on Continuous Improvement and Innovation by Benchmarking against the global Best Practices.

## **CORE VALUES**

Professionalism, Commitment, Integrity, Team Work, Innovation

# RV COLLEGE OF ENGINEERING®

(Autonomous Institution Affiliated to VTU, Belagavi) R.V. Vidyaniketan Post, Mysore Road Bengaluru – 560 059

# Bachelor of Engineering (B.E.) Scheme and Syllabus of III & IV Semesters

# **2018 SCHEME**

# DEPARTMENT OF ELECTRICAL & ELECTRONICS ENGINEERING

#### **Department Vision**

Attain technical excellence in Electrical and Electronics Engineering through graduate programs and interdisciplinary research related to sustainability in power, energy and allied fields.

#### **Department Mission**

- To provide technical education that combines rigorous academic study and the excitement of innovation enabling the students to engage in lifelong learning
- To establish Centre of Excellence in sustainable electrical energy, smart grids and systems
- To establish tie-ups with industries and institutions of repute and to foster building up of a wide knowledge base to keep in tune with upcoming technologies.
- To motivate commitment of faculty and students to collate, generate, disseminate, persevere, knowledge and to work for the benefit of society.
- To develop simple, appropriate and cost effective inclusive technologies which are instrumental in the up-liftment of the rural society.

#### PROGRAM EDUCATIONAL OBJECTIVES (PEOs)

- **PEO 1.** To provide a strong foundation in Mathematics, Science and Electrical & Electronics Engineering to comprehend, analyze, design, innovate and develop products for real world applications.
- **PEO 2.** To inculcate ethical attitude, effective communication skills, leadership qualities and team spirit for a successful professional career with concern for society.
- **PEO 3.** To provide a holistic academic environment to foster excellence, entrepreneurship and multidisciplinary approach to inculcate an aptitude for research and lifelong learning

#### PROGRAM SPECIFIC OUTCOMES (PSOs)

PSO	Description
	_
PSO1	The B.E. EEE Program must demonstrate knowledge and competence in the application of circuit analysis, control systems, field theory, analog and digital electronics, Power Electronics, microcontrollers, microprocessors, Signal processing and conditioning,
	computer hardware and software to the design, building, testing, protection and operation of electrical machines, power systems, electrical and electronic systems.
PSO2	The B.E. EEE Program must demonstrate knowledge and competence in the application of basic sciences, rigorous mathematics and project management techniques in the design of complex electrical and electronic systems.
PSO3	The B.E. EEE Program must demonstrate the ability to effectively work in a team, communicate correctly and develop an ethical attitude and concern for society and environment.

**Lead Society: Institute of Electrical and Electronics Engineers (IEEE)** 

### **ABBREVIATIONS**

Sl. No.	Abbreviation	Meaning		
1.	VTU	Visvesvaraya Technological University		
2.	BS	Basic Sciences

	Semester: III							
	DISCRETE AND INTEGRAL TRANSFORMS							
				(Theory)				
			(COMMO	ON TO EC, EE, EI & ET)				
Course Code		:	18MA31B	CIE		100 Marks		
Credits: L:T:P		:	4:1:0	SEE	:	100 Marks		
<b>Total Hours</b>			52L+26T	SEE Duration	:	3.00 Hours		
Cou	rse Learning O	)bj	ectives:					
1	Understand t	he	existence and basi	c concepts of Laplace, Fourier and z -	traı	nsforms.		
2	Demonstrate	th	e concepts of Lapla	ace transform to solve ordinary differe	ntia	al equations.		
3	3 Analyze the concept of periodic phenomena and develop Fourier series.							
4	4 Solve difference equations, interpret the physical significance of solutions.							
5								

Unit-I 10 H
-------------

#### **Laplace Transform:**

Existence and uniqueness of Laplace transform (LT), transform of elementary functions, region of convergence. Properties - linearity, scaling, s - domain shift, differentiation in the s - domain, division by t, differentiation and integration in the time domain. LT of special functions - Periodic functions (square wave, saw-tooth wave, triangular wave, full & half wave rectifier), Heaviside unit step function, unit impulse function, t - shift property. Relevant MATLAB commands to develop additional insight into the concepts.

Unit – II 11 Hrs

#### **Inverse Laplace Transform:**

Definition, properties, evaluation using different methods. Convolution theorem (without proof), problems. Application to solve ordinary linear differential equations. Relevant MATLAB commands to develop additional insight into the concepts.

Unit -III 11 Hrs

#### **Fourier Series:**

Introduction, periodic function, even and odd functions. Dirichlet's conditions, Euler's formulae for Fourier series, complex Fourier series, problems on time periodic signals (square wave, half wave rectifier, saw-tooth wave and triangular wave), Fourier sine series, Fourier cosine series. Relevant MATLAB commands to develop Fouries series of functions.

Unit –IV 10 Hrs

#### **Fourier Transform:**

Fourier integral theorem, complex Fourier transform, Fourier sine transform, Fourier cosine transform, properties - linearity, scaling, time-shift and modulation. Convolution theorem (without proof), problems. Parseval's identity. Relevant MATLAB commands to develop additional insight into the concepts.

Unit –V 10 Hrs

#### **Z-Transform:**

Introduction, z - transform of standard functions, Region of convergence, properties - linearity, scaling, shifting theorem, initial and final value theorems. Inverse z - transform using power series and partial fraction expansions, convolution theorem (without proof), problems. Application to solve difference equations arising in communication and control systems. Relevant MATLAB commands to develop additional insight into the concepts.

Course	<b>Course outcomes:</b> On completion of the course, the student should have acquired the ability to				
CO1:	Understand the significance of fundamental concepts of transforms, inverse transforms				
	and periodic phenomena.				
CO2:	2: Demonstrate the properties of transforms and inverse transforms, graphical				
	representation of various wave forms.				
CO3:	Evaluate transforms of special functions, develop Fourier series of various type of				
	functions.				
<b>CO4:</b>	Apply transform techniques to solve differential equations and difference equations				

	occurring in engineering problems.

#### **Continuous Internal Evaluation (CIE); Theory (100 Marks)**

CIE is executed by way of quizzes (Q), tests (T) and experiential learning (EL). A minimum of three quizzes are conducted and each quiz is evaluated for 10 marks adding up to 30 marks. All quizzes are conducted online. Faculty may adopt innovative methods for conducting quizzes effectively. The number of quizzes may be more than three also. The three tests are conducted for 50 marks each and the sum of the marks scored from three tests is reduced to 50. The marks component for experiential learning is 20.

Total CIE is 30(Q) + 50(T) + 20(EL) = 100 Marks.

#### Semester End Evaluation (SEE); Theory (100 Marks)

**SEE** for 100 marks is executed by means of an examination. The Question paper for the course contains two parts, Part – A and Part – B. Part – A consists of objective type questions for 20 marks covering the complete syllabus. Part – B consists of five main questions, one from each unit for 16 marks adding up to 80 marks. Each main question may have sub questions. The question from Units I, IV and V have no internal choice. Units II and III have internal choice in which both questions cover entire unit having same complexity in terms of COs and Bloom's taxonomy level.

	Semester: III ENVIRONMENTAL TECHNOLOGY							
	(Theory)(Common to EC,EE,ET&EI)							
Cou	rse Code	:	18BT32A	CIE	:	50 Marks		
Credits: L:T:P		:	2:0:0	SEE	:	50 Marks		
Total Hours		:	27L	SEE Duration	:	1.5Hours		
Cou	rse Learning O	bj	ectives:	·				
1 Understand the various components of environment and the significance of the sustainability of healthy environment.								
2 Recognize the implications of different types of the wastes produced by natural and anthropogenic activity.								
3	3 Learn the strategies to recover the energy from the waste.							
4 Design the models that help mitigate or prevent the negative impact of proposed activity on the environment								

Unit-I 06 Hrs

**Introduction:** Environment - Components of environment, Ecosystem. Impact of anthropogenic activities on environment (agriculture, mining and transportation), Environmental education, Environmental acts & regulations, role of non-governmental organizations (NGOs), EMS: ISO 14000, Environmental Impact Assessment. Environmental auditing.

Unit – II 06 Hr

**Environmental pollution:** Air pollution – point and non point sources of air pollution and their controlling measures (particulate and gaseous contaminants). Noise pollution, Land pollution (sources, impacts and remedial measures).

**Water management**: Water conservation techniques, water borne diseases & water induced diseases, arsenic & fluoride problems in drinking water and ground water contamination, advanced waste water treatment techniques.

Unit -III 06 Hrs

**Waste management**, Solid waste management, e waste management & biomedical waste management – sources, characteristics & disposal methods. Concepts of Reduce, Reuse and Recycling of the wastes. **Energy** – Different types of energy, conventional sources & non-conventional sources of energy, solar energy, hydro electric energy, wind energy, Nuclear energy, Biomass & Biogas Fossil Fuels, Hydrogen as an alternative energy.

Unit –IV 05 Hrs

**Environmental design:** Principles of Environmental design, Green buildings, green materials, Leadership in Energy and Environmental Design (LEED), soilless cultivation (hydroponics), organic farming, use of biofuels, carbon credits, carbon foot prints, Opportunities for green technology markets, carbon sequestration.

Unit –V 04 Hrs

**Resource recovery system:** Processing techniques, materials recovery systems, biological conversion (composting and anaerobic digestion). Thermal conversion products (combustion, incineration, gasification, pyrolysis, use of Refuse Derived Fuels). Case studies of Biomass conversion, e waste.

Course	<b>Course outcomes:</b> On completion of the course, the student should have acquired the ability to					
CO1:	Identify the components of environment and exemplify the detrimental impact of					
	anthropogenic activities on the environment.					
CO2:	2: Differentiate the various types of wastes and suggest appropriate safe technological methods					
	to manage the waste.					
<b>CO3:</b>	Aware of different renewable energy resources and can analyse the nature of waste and					
	propose methods to extract clean energy.					
<b>CO4:</b>	Adopt the appropriate recovering methods to recover the essential resources from the wastes					

for reuse or recycling.

2							
3	· · · · · · · · · · · · · · · · · · ·						
4	To familiari	ze va	arious analog	ICs and their application	ns		

Unit-I 09 Hrs

**Transistors Biasing:** fixed bias and voltage divider bias. Bias stabilization, stability factor, Thermal runaway

**BJT AC Analysis:** Amplification in AC Domain, BJT Modelling- r<sub>e</sub> model and Hybrid Equivalent Model for CE and CC configurations

**MOSFET**-Structure and characteristics, voltage divider bias for depletion and enhancement type MOSFETs

Unit – II 11 Hrs

**Frequency response of BJT Amplifiers:** General frequency considerations, Normalization process, low frequency analysis, high frequency response

**Power Amplifiers:** Series fed and Transformer coupled class A, class B and class AB amplifiers, IC TS472 power amplifier, heat sink for power amplifiers

**Feedback Amplifiers**: Characteristics of Feedback, Feedback Topologies, Analysis of series-series and series-shunt Feedback Amplifiers

Unit -III 11 Hrs

**Operational amplifier**: Internal Structure of Op-Amps, Parameters and Characteristics of Practical Op-Amps.

**OP-AMPS Applications:** Basic applications, Instrumentation amplifier, AC amplifier, V to I & I to V converters, Opamp circuits using diode, Sample & Hold

Schmitt trigger - regenerative comparator, Astable & mono - stable multi- vibrators.

**Wave form generator:** Square wave generator, Triangular wave generator and saw tooth-wave generator.

Unit –IV 10 Hrs

#### **Active Filters**

Comparison of Active and Passive filters. Butterworth filters (Butterworth function for n=2 and n=3), First order low and high pass filter, Second order Low and high pass filters, Butterworth second order low pass filters. Band pass filter (wide-band and narrow band), Band reject filters (wide-band and narrow band) and All-pass filter.

**Oscillators:** Principles of oscillators, Phase shift oscillator, Quadrature Oscillator, Three phase oscillator, Wein Bridge Oscillator

Unit –V 09 Hrs

**Analog IC's And Applications:** Voltage controlled oscillators-NE/SE-566, 555 Timer-functional block diagram, monostable and astable multivibrators and its applications, Digital to analog converters-R-2R ladder, weighted resistor D/A converters, IC D/A converters, Analog to digital converters-successive approximation A/D converter and IC A/D converter.

Voltage Regulators: Discrete Voltage Regulator, IC Voltage Regulators (IC 78XX, 79XX, LM317)

#### **Lab Experiments:**

- **1.**RC coupled amplifier.
- 2. MOSFET Characteristics
- **3.** a. Design of inverting amplifier, non-inverting amplifier, integrator using IC 741 b. Basics of PSPICE
- **4.** Study the working of half wave and full wave Precision Rectifiers using operational amplifier IC741
- 5. Design and implementation of peak detector and clamming circuit
- **6.** Design and implement a Schmitt trigger circuit for given UTP & LTP using op-amp.
- **7.**Design and implementation square and ramp wave generators for given frequency using operational amplifier IC 741
- **8.**Design and simulation of First order High pass filter, Low pass filter, wide Band Pass filter and wide Band reject filter for the given pass band gain and cut-off frequency and plot the frequency response.
- **9.**a. Design and implement a Astable multivibrator for a given frequency and duty cycle using NE555 Timer.
  - b. Design of Monostable multivibrator for a given frequency using NE555 timer
- **10.** Realization of 4 bit DAC using R-2R ladder network and asynchronous decade Counter IC 7490.
- 11. Design of Voltage Regulator using IC 7900

#### Design of analog circuits using PSPICE

- 12. Schmitt trigger circuit for given UTP & LTP
- 13. First order High pass filter, Low pass filter, wind Band Pass filter and wide Band reject filter for the given pass band gain and cut-off To plot the frequency response.
- **14.** Generation of ramp wave for a given frequency using NE555 timer. Implement FSK modulator using IC 555.

Course	<b>Course outcomes:</b> On completion of the course, the student should have acquired the ability to					
CO1:	Understand and Remember the basic fundamentals of transistor biasing and operational amplifiers					
CO2:	Analyze the performance of Op-amp and build simple circuits using op-amps					
<b>CO3:</b>	Apply the concepts to design various applications of op-amps					
CO4:

# Continuous Internal Evaluation (CIE): Total marks: 100+50=150 Theory -100 Marks

CIE is executed by way of quizzes (Q), tests (T) and experiential learning (EL). A minimum of three quizzes are conducted and each quiz is evaluated for 10 marks adding up to 30 marks. All quizzes are conducted online. Faculty may adopt innovative methods for conducting quizzes effectively. The number of quizzes may be more than three also. The three tests are conducted for 50 marks each and the sum of the marks scored from three tests is reduced to 50. The marks component for experiential learning is 20. The total CIE for theory is 100.

Total CIE is 30(Q) + 50(T) + 20(EL) = 100 Marks.

#### Scheme of Continuous Internal Evaluation (CIE); Practical Test for 50 Marks

The Laboratory session is held every week as per the time table and the performance of the student is evaluated in every session. The average marks (AM) over number of weeks is considered for 30 marks. At the end of the semester a test (T) is conducted for 10 marks. The students are encouraged to implement additional innovative experiments (IE) in the lab and are rewarded for 10 marks. Total marks for the laboratory is 50.

Total CIE is 30(AM) + 10(T) + 10(IE) = 50 Marks.

#### Semester End Evaluation (SEE): Total marks: 100+50=150Theory -100 Marks

**SEE** for 100 marks is executed by means of an examination. The Question paper for each course contains two parts, Part – A and Part – B. Part – A consists of objective type questions for 20 marks covering the complete syllabus. Part – B consists of five main questions, one from each unit for 16 marks adding up to 80 marks. Each main question may have sub questions. The question from Units I, IV and V have no internal choice. Units II and III have internal choice in which both questions cover entire unit having same complexity in terms of COs and Bloom's taxonomy level.

#### **Laboratory- 50 Marks**

Experiment Conduction with proper results is evaluated for 40 marks and Viva is for 10 marks. Total SEE for laboratory is 50 marks.

4													

Unit-I	09 Hrs
--------	--------

**Digital Integrated Circuits: Digital IC Logic Families:** Transistor-Transistor Logic (Totem pole TTL), Emitter Coupled Logic (ECL), Complementary MOS (CMOS) Logic.

Characteristics and Performance Parameters of CMOS Inverter: Introduction, Propagation delay, Sourcing, Sinking, Fan-in, Fan-out,  $V_{IH}$ ,  $V_{OH}$ ,  $V_{IL}$ ,  $V_{OL}$  and corresponding currents, Noise margin, Power dissipation, power consumption, power-delay product as a figure of merit. Simplification Techniques: 5-

variable K-Map, Quine-McClusky Minimization, Numerical Examples.

Unit – II 11 Hrs

#### **Combinational Circuits Design and Analysis:**

Parallel Adder/Subtractor using IC 7483, Decoders, Encoders, Multiplexers and De-Multiplexers, Priority

encoder and Magnitude comparator, Arithmetic circuits and code converters using Multiplexers and Decoders, Concepts of ripple carry and carry look ahead adders, BCD adder.

Unit -III 11Hrs

**Sequential Circuits Design and Analysis-I:** Introduction, Latches and Flip Flops, Triggering of Flip Flops, Flip Flop Excitation Tables, Flip-Flop conversions, Registers, Shift Registers and Various Operations, Ring counters, Johnson counters, Ripple Counters.

Unit –IV 10 Hrs

**Sequential Circuits Design and Analysis II:** Introduction, FSM (Melay and Moore), Analysis of Clocked Sequential Circuits, State table and Reduction, Design of synchronous Counters, Programmable counters. Design with State Equations, Sequence generators, PRBS generator and Sequence detectors.

Unit –V 09 Hrs

#### **Design of a Processor Unit:**

Introduction, Processor Organization, Arithmetic Logic Unit, Design of Arithmetic Unit, Design of Logic unit, Design of Arithmetic and Logic unit, Status Register, Design of Shifter, The Complete Processor unit and op-code generation.

#### **Laboratory Experiments for Practice:**

#### Note:

- a) Out of ten experiments, for seven experiments manual will be provided. Each of these would also include practice experiments. Last three experiments are case studies and are compulsory.
- b) Practice questions: Students should prepare and design in advance and practice in the lab.

#### **List of Experiments:**

- 1. a) Realization of Binary Adder and Subtractor using universal gates and IC-7483.
- b) Practice Question: (i) Design a parallel binary subtractor to get actual difference based on the value of C<sub>OUT</sub>. (ii) Design incrementor and decrementor circuits using **IC-74LS83** 
  - 2. a) Arithmetic circuits- Realize the given Boolean expressions using MUX/DEMUX using IC-74LS153, IC-74LS139.
    - b) Practice Question: Realize FA/FS using MUX/DEMUX.
  - 3. a) Code convertors i) Binary to Gray ii) Excess-3 to Binary
    - b) Practice Question (i) Binary to excess-3 using IC-74LS83 (ii) Binary to Gray using Decoder.
  - 4. a) Design a two-bit magnitude comparator using logic gates.
    - b) Drive the LED Display using **IC-74LS47**.
    - c) Practice Question: Design an n-bit comparator using **IC-74LS85** (make use of cascading facility).
  - 5. a) Design a Master-Slave JK-FF using NAND gates. Also design D-FF and T-FF using same. Observe the waveform using CRO.
    - b) Practice Question: Observe the race around condition using Master alone.
  - 6. a) Realization of asynchronous mod-n counter using IC-74LS90, IC-74LS93.
    - b) Using IC-74LS95 perform SISO, SIPO, PISO, PIPO, Shift left operations.
    - c) Design ring and Johnson counter using IC-74LS95
    - d) Practice Question: Design mod-99 counter using IC-74LS90.
  - 7. a) Design of synchronous up/down counter using IC-74LS76.
    - b) Design a synchronous counter to count given sequence
    - c) Using pre-settable counters IC-74LS192/LS193 perform mod-n counts.
    - d) Practice Question: Design Mod-n counter using above mentioned IC's.
  - 8. Design a priority encoder for driving Flash ADC and hexadecimal number conversion.
  - 9. Using IC-74LS192/LS193, drive the LED display.
  - 10. Design control logic for any two specified ALU operation.

Course out	comes: On completion of the course, the student should have acquired the ability to
CO1:	Apply the knowledge of digital electronics to construct combinational and sequential sub-
	systems useful for digital system designs.
CO2:	Develop a solution to real-life problems based on the knowledge of digital electronics.
CO3:	Demonstrate the engineering solutions using methodology obtained through extensive
	research
	with the help of modern engineering tools owing to the ethical responsibilities.
CO4:	Analyze and update the earned knowledge for obtaining sustainable solutions for
	technological
	enhancements in the field of digital electronics.

# Continuous Internal Evaluation (CIE): Total marks: 100+50=150 Theory -100 Marks

CIE is executed by way of quizzes (Q), tests (T) and experiential learning (EL). A minimum of three quizzes are conducted and each quiz is evaluated for 10 marks adding up to 30 marks. All quizzes are conducted online. Faculty may adopt innovative methods for conducting quizzes effectively. The number of quizzes may be more than three also. The three tests are conducted for 50 marks each and the sum of the marks scored from three tests is reduced to 50. The marks component for experiential learning is 20. The total CIE for theory is 100.

Total CIE is 30(Q) + 50(T) + 20(EL) = 100 Marks.

Scheme of Continuous Internal Evaluation (CIE); Practical Test for 50 Marks. The Laboratory session is held every week as per the time table and the performance of the student is evaluated in every session. The average marks (AM) over number of weeks is considered for 30 marks. At the end of the semester a test (T) is conducted for 10 marks. The students are encouraged to implement additional innovative experiments (IE) in the lab and are rewarded for 10 marks. Total marks for the laboratory is 50.

Total CIE is 30(AM) + 10(T) + 10(IE) = 50 Marks.

Semester End Evaluation (SEE): Total marks: 100+50=150 Theory -100 Marks

**SEE** for 100 marks is executed by means of an examination. The Question paper for each course contains two parts, Part – A and Part – B. Part – A consists of objective type questions for 20 marks covering the complete syllabus. Part – B consists of five main questions, one from each unit for 16 marks adding up to 80 marks. Each main question may have sub questions. The question from Units I, IV and V have no internal choice. Units II and III have internal choice in which both questions cover entire unit having same complexity in terms of COs and Bloom's taxonomy level.

#### **Laboratory- 50 Marks**

Experiment Conduction with proper results is evaluated for 40 marks and Viva is for 10 marks. Total SEE for laboratory is 50 marks.

2	· · · · · · · · · · · · · · · · · · ·											
3	Develop and o	lesi	gn mathematical mo	dels of communication char	nnels							

Unit-I 08 Hrs

**Electrostatics 1:** Coulomb's law, illustrative examples, Electric Field Intensity, Applications (field due to Line charge distribution, Surface charge distribution- Sheet, Circular ring, disk), Illustrative examples. Flux, flux density, Gauss's Law, Divergence Theorem(qualitative treatment), Application of Gauss's Law (Field due to Continuous Volume Charge, Line Charge, Sheet Charge, Metal Sphere, Spherical shell) Illustrative examples.

Unit – II 09 Hrs

**Electrostatics-2:** Electric Potential, Relation between E and V, Applications (Field and potential due to Line charge distribution, Surface charge distribution- sheet), Energy Density in an Electric Field, Illustrative examples. Boundary Conditions (dielectric-dielectric, dielectric-conductor), Poisson's and Laplace's Equations, Applications of Laplace's and Poisson's Equations (Different capacitors), Illustrative examples.

Unit -III 09 Hrs

Magneto Static Fields-1: Current, Current density, Biot -Savart Law, Applications (Infinite linear conductor, current carrying in loop, solenoid), Magnetic Flux and Flux Density, Ampere's Circuital Law, Stroke's theorem (qualitative treatment), Applications (Infinite line current, sheet current, coaxial transmission line), Problems.

Unit –IV 07 Hrs

Magneto Static Fields-2: Magnetic potentials, Magnetic energy, Magnetic Boundary Conditions, Force due to magnetic fields(Charged particle, Current element), Lorentz Force equation.

Maxwell's Equations: Introduction, Faraday's Law, Transformer and Motional EMFs, Displacement Current, Maxwell's Equations in Final Forms, Time-Varying Potentials, Time-Harmonic Fields, Illustrative examples

Unit –V 07 Hrs

**Electromagnetic Waves:** Introduction, Waves in General, Wave Propagation in Lossy Dielectrics, Plane Waves in Lossless Dielectrics, Plane Waves in Free Space, Plane Waves in Good Conductors, Power and the Poynting Vector, Numericals Reflection and transmission: Normal incidence and oblique incidence. Illustrative examples.

Course	Course outcomes: On completion of the course, the student should have acquired the ability to									
CO1:	Understand the basic concepts of electric fields, magnetic fields and electromagnetic waves.									
CO2:	Apply the basic concepts to solve complex problems in electric fields, magnetic fields and									
	electromagnetic waves.									
<b>CO3:</b>	Analyze different charge and current configurations to derive the electromagnetic field									
	equations									
<b>CO4:</b>	Design simple solutions for applications in electric and electronic circuits, electrical machines									
	and communication systems.

05 Hrs

Taylor and Maclaurin series for function of single variable. Partial derivatives – Introduction, simple problems. Total derivative, composite functions. Jacobians – simple problems.

Unit – II 05 Hrs

#### **Vector Differentiation:**

Introduction, simple problems in terms of velocity and acceleration. Concepts of gradient, divergence – solenoidal vector function, curl – irrotational vector function and Laplacian, simple problems.

Unit -III 06 Hrs

#### **DIFFERENTIAL EQUATIONS**

Higher order linear differential equations with constant coefficients, solution of homogeneous equations - Complementary functions. Non homogeneous equations –Invers differential operator Methods of finding particular integral based on input function (force function).

Unit –IV 05 Hrs

#### **NUMERICAL METHODS**

Solution of algebraic and transcendental equations – Intermediate value property, Newton-Raphson method. Solution of first order ordinary differential equations – Taylor series and 4<sup>th</sup> order Runge-Kutta methods. Numerical integration – Simpson's 1/3<sup>rd</sup>, 3/8<sup>th</sup> and Weddle's rules. (All methods without proof).

Unit –V 05 Hrs

#### **MULTIPLE INTEGRALS**

Evaluation of double integrals, change of order of integration. Evaluation of triple integrals. Applications – Area, volume and mass – simple problems.

Course	<b>Course outcomes:</b> On completion of the course, the student should have acquired the ability to

ಸ್ಥಳೀಯ ಅಥವಾ ಪ್ರಾದೇಶಿಕ ಭಾಷಾ ಕಲಿಕೆಯ ಅವಶ್ಯಕತೆ, ಭಾಷಾ ಕಲಿಕೆಯ ಸುಲಭ ವಿಧಾನಗಳು, ಸಂಭಾಷಣೆಗಾಗಿ ಸುಲಭ ಸೂಚ್ಯಗಳು ಕನ್ನಡ ಭಾಷೆಯ ಇತಿಹಾಸ.

ಂನ್ನಡ ಭಾಷಯ ಇತಹಾನ.	
ಅಧ್ಯಾಯ $ {f II}$	4Hrs

#### ಕನ್ನಡ ಅಕ್ಷರಮಾಲೆ ಹಾಗೂ ಉಚ್ಛಾರಣೆ:

ಕನ್ನಡ ಅಕ್ಷರಮಾಲೆ, ಒತ್ಪಕ್ಷರ, ಕಾಗುಣಿತ, ಉಚ್ಚಾರಣೆ, ಸ್ವರಗಳು ಉಚ್ಚಾರಣೆ, ವ್ಯಂಜನಗಳ ಉಚ್ಚಾರಣೆ.

ಅಧ್ಯಾಯ – III	4Hrs
--------------	------

#### ಸಂಭಾಷಣೆಗಾಗಿ ಕನ್ನಡ ಪದಗಳು:

ಏಕವಚನ, ಬಹುವಚನ, ಲಿಂಗಗಳು (ಸ್ತ್ರೀಲಿಂಗ, ಪುಲ್ಲಿಂಗ) ಪ್ರಶ್ನಾರ್ಥಕ ಪದಗಳು, ವಿರುದ್ಧಾರ್ಥಕ ಪದಗಳು, ಅಸಮಂಜಸ ಉಚ್ಚಾರಣೆ, ಸಂಖ್ಯಾ ವ್ಯವಸ್ಥೆ, ಗಣಿತದ ಚಿಹೈಗಳು, ಭಿನ್ನಾಂಶಗಳು.

ತರಕಾರಿಗಳ ಹೆಸರುಗಳು, ತಿಂಡಿಗಳ ಹೆಸರುಗಳು, ಆಹಾರಕ್ಕೆ ಸಂಬಂಧಿಸಿದ ಪದಗಳು, ಕಾಲ/ಸಮಯಕ್ಕೆ ಸಂಬಂಧಿಸಿದ ಪದಗಳು, ದಿಕ್ಕುಗಳ ಹೆಸರುಗಳು, ಭಾವನೆಗೆ ಸಂಬಂಧಿಸಿದ ಪದಗಳು, ಮಾನವ ಶರೀರದ ಭಾಗಗಳು, ಸಂಬಂಧದ ಪದಗಳು, ಸಾಮಾನ್ಯ ಸಂಭಾಷಣೆಯಲ್ಲಿ ಬಳಸುವಂತಹ ಪದಗಳು.

ಅಧ್ಯಾಯ $ {f IV}$	4Hrs

#### ಸಂಭಾಷಣೆಯಲ್ಲಿ ಕನ್ನಡ ಬಳಕೆ:

ನಾಮಪದಗಳು, ಸರ್ವನಾಮಗಳು, ನಾಮವಿಶೇಷಣಗಳು, ಕ್ರಿಯಾಪದಗಳು, ಕ್ರಿಯಾವಿಶೇಷಣಗಳು, ಕನ್ನಡದಲ್ಲಿ ಸಂಯೋಜನೆಗಳು, ಉಪಸರ್ಗಗಳು, ಪ್ರಶ್ನಾರ್ಥಕ ಪದಗಳು, ವಿಚಾರಣೆಯ / ವಿಚಾರಿಸುವ / ಬೇಡಿಕೆಯ ವಾಕ್ಯಗಳು. ಕನ್ನಡದಲ್ಲಿ ಚಟುವಟಿಕೆಗಳು, ಶಬ್ದಕೋಶ, ಸಂಭಾಷಣೆ.

	ಕ ಕನ್ನಡದ ಕಲಿಕಾ ಫಲಿತಾಂಶಗಳು :
	ನಿತ್ಯ ಜೀವನದಲ್ಲಿ ಆಡುಭಾಷೆಯ ಬಳಕೆ.
	ಸಂದರ್ಭ, ಸನ್ನಿವೇಶಕ್ಕನುಗುಣವಾಗಿ ಸರಳ ಕನ್ನಡ ವಾಕ್ಯಗಳ ಬಳಕೆ.
	ಗೌರವ ಸಂಬೋಧನೆಯ ಬಳಕೆ.
CO4:	ಇತರರೊಡನೆ ಸುಲಭ ಸಂವಹನ.

ಆಧಾರ	ಪುಸ್ತಕಗಳು :
1	ವ್ಯವಹಾರಿಕ ಕನ್ನಡ ಪಠ್ಯಪುಸ್ತಕ, ಎಲ್.ತಿಮ್ಮೇಶ್ ಮತ್ತು ವಿ.ಕೇಶವಮೂರ್ತಿ, ಪ್ರಸಾರಾಂಗ, ವಿಶ್ವೇಶ್ವರಯ್ಯ ತಾಂತ್ರಿಕ ವಿದ್ಯಾಲಯ, ಬೆಳಗಾಂ.
2	ಕನ್ನಡ ಕಲಿ, ಕೆ.ಎನ್.ಸುಬ್ರಹ್ಮಣ್ಯಂ, ಎನ್.ಎಸ್.ನರಹರಿ, ಎಚ್.ಜಿ.ಶ್ರೀನಿವಾಸ 'ಪ್ರಸಾದ್, ಎಸ್.ರಾಮಮೂರ್ತಿ ಮತ್ತು ಎಸ್.ಸತ್ಯನಾರಾಯಣ, 2ನೇ ಮುದ್ರಣ 2019, ರಾ.ವಿ.ತಾಂತ್ರಿಕ ಮಹಾವಿದ್ಯಾಲಯ, ಬೆಂಗಳೂರು.
3	ಮಾತನಾಡುವ ಕನ್ನಡ, ಕನ್ನಡ ಸಾಹಿತ್ಯ ಪರಿಷತ್, ಬೆಂಗಳೂರು.

#### Continuous Internal Evaluation (CIE); (50 Marks)

CIE is executed by way of quizzes (Q), tests (T) and Activity. A minimum of two quizzes are conducted and each quiz is evaluated for 10 marks and the sum of the marks scored from two quizzes is reduced to 10. The two tests are conducted for 50 marks each and the sum of the marks scored from two tests is reduced to 30. The marks component for Activity is 10. **Total CIE is 10(Q) + 30(T) + 10(A) = 50 Marks.** 

#### Semester End Evaluation (SEE); Theory (50 Marks)

**SEE** for 50 marksis executed by means of an examination. The Question paper for the course contains two parts, Part – A and Part – B. Part – A consists of objective type questions for 25 marks covering the complete syllabus. Part – B consists of essay type questions, one from each unit for 5 marks adding up to 25 marks.

#### **Continuous Internal Evaluation (CIE); (50 Marks)**

CIE is executed by way of quizzes (Q), tests (T) and Activity. A minimum of two quizzes are conducted and each quiz is evaluated for 10 marks and the sum of the marks scored from two quizzes is reduced to 10. The two tests are conducted for 50 marks each and the sum of the marks scored from two tests is reduced to 30. The marks component for Activity is 10. Total CIE is 10(Q) + 30(T) + 10(A) = 50 Marks.

#### Semester End Evaluation (SEE); Theory (50 Marks)

**SEE** for 50 marks is executed by means of an examination. The Question paper for the course contains two parts, Part – A and Part – B. Part – A consists of objective type questions for 10 marks covering the complete syllabus. Part – B is for 40 marks. It consists of essay type questions. Student has to answer any 4 questions out of 5 questions, each question carries 10 marks.

	Semester: IV									
LINEAR ALGEBRA, STATISTICS AND PROBABILITY										
	THEORY (Theory)									
	(Common to EC, EE, EI & ET)									
Cou	se Code	:	18MA41B		CIE	:	100 Marks			
Cred	lits: L:T:P	:	4:1:0		SEE	:	100 Marks			
Tota	l Hours	:	52L+26T		SEE Duration					
Cou	rse Learning (	)bje	ectives: The studen	ts will be able to						
1	Understand th	ie b	asics of Linear Alge	bra and Probability tl	heory.					
2	Demonstrate	the	concepts of linear tra	ansformation, orthog	onality and factorizat	tion	of matrices.			
3	3 Apply the knowledge of the statistical analysis and theory of probability in the study of uncertainties.									
4	4 Use probability and sampling theory to solve random physical phenomena and implement appropriate distribution models.									
5	Use mathema	tica	l IT tools to analyze	and visualize the abo	ove concepts.					

Unit-I 10 Hrs

**Linear Algebra – I:** Vector spaces, subspaces, linear dependence, basis, dimension, four fundamental subspaces. Rank and nullity theorem (without proof). Linear transformations- projection, rotation and reflection matrices, matrix representation, kernel and image of a linear transformation.

Unit – II 11 Hrs

**Linear Algebra – II:** Orthogonal and orthonormal bases, Gram-Schmidt process, QR- factorization, Eigen values and Eigen vectors (recapitulation). Diagonalization of a matrix (symmetric matrices), singular value decomposition. SVD applied to digital image processing (using MATLAB).

Unit –III 11 Hrs

**Statistics:** Central moments, mean, variance, coefficients of skewness and kurtosis in terms of moments. Curve fitting by method of least squares, fitting of curves – Polynomial, exponential and power functions. Correlation and linear regression analysis –problems. Simulation using MATLAB.

Unit –IV 10 Hrs

**Probability:** Basic concepts and Baye's rule. Random variables - Discrete and continuous, probability mass function, probability density function, cumulative density function, mean, variance - problems. Joint probability distribution function - Discrete and continuous, covariance, correlation and problems related to applications. Simulation using MATLAB.

Unit –V 10 Hrs

**Probability Distributions:** Discrete and continuous distributions - Binomial, Poisson, Exponential and Normal. Sampling theory - Sampling, sampling distributions, standard errors, student's t-distribution, chi-square distribution as a test of goodness of fit, problems. Simulation using MATLAB.

Course	Course Outcomes: After completing the course, the students will be able to							
CO1:	Understand the fundamental concepts of linear algebra, probability and sampling theory.							
CO2:	Solve the problems of vector spaces, linear transformation, measures of statistical data, curve							
	fitting and functions of random variables.							
CO3:	Apply the acquired knowledge to solve the problems on factorization of a matrix, correlation,							
	regression, probability and sampling distributions.							
CO4:	Evaluate decomposition of a matrix and estimate goodness of fit of problems occurring in							
	engineering applications.

#### **Continuous Internal Evaluation (CIE); Theory (100 Marks)**

CIE is executed by way of Quizzes (Q), Tests (T) and Experiential learning (EL). A minimum of three quizzes are conducted and each quiz is evaluated for 10 marks adding up to 30 marks. All quizzes are conducted online. Faculty may adopt innovative methods for conducting quizzes effectively. The number of quizzes may be more than three also. The three tests are conducted for 50 marks each and the sum of the marks scored from three tests is reduced to 50. The marks component for experiential learning is 20. Total CIE is 30(Q) + 50(T) + 20(EL) = 100 Marks.

#### Semester End Evaluation (SEE); Theory (100 Marks)

**SEE** for 100 marks is executed by means of an examination. The Question paper for the course contains two parts, Part – A and Part – B. Part – A consists of objective type questions for 20 marks covering the complete syllabus. Part – B consists of five main questions, one from each unit for 16 marks adding up to 80 marks. Each main question may have sub questions. The question from Units I, IV and V have no internal choice. Units II and III have internal choice in which both questions cover entire unit having same complexity in terms of COs and Bloom's taxonomy level.

	Semester: IV								
ELECTRICAL MACHINES- I									
				(Theory & Practice	)				
Course Code : 18EE43   CIE   : 100+50 Marks									
Cre	dits: L:T:P	:	3:0:1		SEE	:	100+50 Marks		
Tota	d Hours	:	40L+33P		SEE Duration	:	3.00+3.00Hours		
Cou	rse Learning (	Obj	ectives:						
1	Apply the the	ory	of electromagne	tism in analyzing elec	trical machines.				
2	Describe the	con	struction, charact	eristics and operation	of the transforme	ers a	nd induction		
	machines.								
3	3 Develop and analyze the equivalent circuit model of transformers and induction motors to								
	evaluate their performance characteristics at different loading conditions.								
4	Design and es	stim	ate the physical of	dimensions of the made	chine in relation to	o the	e output.		

Unit-I 08 Hrs

**Theory Of Transformer:** Principle, Types of transformer, Equivalent circuit, Phasor diagram, Losses, Predetermination of efficiency & regulation, Tap changing transformers, All day efficiency, Causes of failure of transformers.

**Auto Transformers:** Applications, advantages & limitations.

Unit – II 09 Hrs

**Industrial Tests:** H.V.Flash test, Sumner's test.

Parallel Operation: Polarity test, load sharing of transformers in parallel.

**3-Phase Transformers:** Y: Y, Y:  $\Delta$ ,  $\Delta$ : Y, and  $\Delta$ :  $\Delta$ , open delta connection, Scott connection, phasor diagrams. Harmonics in transformers.

Unit -III 09 Hrs

#### **Induction Machine:**

Production of rotating magnetic field, operation on no-load and load, phasor diagram, Power flow diagram- calculation of HP, torque, efficiency and power factor. Torque – slip characteristics, Maximum torque,

Performance of Induction Motors: No load and blocked rotor tests, equivalent circuit, circle diagram, Cogging and crawling

Unit –IV 07 Hrs

Method of starting induction motors. Speed control of induction motor by pole changing method, stator voltage control and Rotor resistance control.

Single Phase Induction Motors:

Double field revolving theory, Starting methods and type of motors, Single phase series motors, repulsion motors. Induction Generator :principle of working ,isolated induction generator, Advantages ,Limitations and applications of Induction Generator

Unit –V 07 Hrs

#### **Main dimensions of Transformers:**

Design on main dimensions, Design of windings, Design of insulations, Design of core sections(single phase, Three phase), problems.

#### **Main dimensions of Induction motors:**

Design on specifications, Stator design, Rotor Design(Single phase, Three phase), problems.

#### **Laboratory Experiments**

- 1. SC, OC test on 1 phase transformer. Predetermination of efficiency & regulation from equivalent circuit. Verification of efficiency & regulation by load test at UPF.
- 2. Sumpner's test
- 3. Parallel operation of two dissimilar 1 phase transformers.
- 4. Connection of 3 single phase transformers in star star, star-delta etc. and determination of efficiency & voltage relationship for balanced direct loading.
- 5. Scott connection-for balanced and unbalanced loads.
- 6. Load test on 3phase Induction motor performance evaluation from Equivalent circuit and

- Circle Diagram. Speed control of 3 phase induction motor stator voltage & rotor resistance control.
- 7. Load test on 1-phase Induction motor. Change the serial number and include one more test.
- 8. Load test on Induction generator to draw a plot of output versus speed.

Course	Course outcomes: On completion of the course, the student should have acquired the ability to						
CO1:	Understand the operation of transformers and induction motors.						
CO2:	Analyze the performance characteristics of Transformer and Induction motors.						
<b>CO3:</b>	Evaluate, assess and compare the operation of machines at different loadings.						
<b>CO4:</b>	Design the various parts of the machine by changing different parameters in steps to obtain						
	maximum output

#### **Continuous Internal Evaluation (CIE):**

#### **Total marks: 100+50=150 Theory – 100 Marks**

CIE is executed by way of quizzes (Q), tests (T) and experiential learning(EL). A minimum of three quizzes are conducted and each quiz is evaluated for 10 marks adding up to 30 marks. All quizzes are conducted online. Faculty may adopt innovative methods for conducting quizzes effectively. The number of quizzes may be more than three also. The three tests are conducted for 50 marks each and the sum of the marks scored from three tests is reduced to 50. The marks component for experiential learning is 20. The total CIE for theory is 100.

Total CIE is 30(Q) + 50(T) + 20(EL) = 100 Marks.

#### Scheme of Continuous Internal Evaluation (CIE); Practical Test for 50 Marks

The Laboratory session is held every week as per the time table and the performance of the student is evaluated in every session. The average marks (AM) over number of weeks is considered for 30 marks. At the end of the semester a test (T) is conducted for 10 marks. The students are encouraged to implement additional innovative experiments (IE) in the lab and are rewarded for 10 marks. Total marks for the laboratory is 50.

#### Total CIE is 30(AM) + 10(T) + 10(IE) = 50 Marks.

#### Theory – 100 Marks

SEE for 100 marks is executed by means of an examination. The Question paper for each course contains two parts, Part – A and Part – B. Part – A consists of objective type questions for 20 marks covering the complete syllabus. Part – B consists of five main questions, one from each unit for 16 marks adding up to 80 marks. Each main question may have sub questions. The question from Units I, IV and V have no internal choice. Units II and III have internal choice in which both questions cover entire unit having same complexity in terms of COs and Bloom's taxonomy level.

#### Laboratory- 50 Marks

Experiment Conduction with proper results is evaluated for 40 marks and Viva is for 10 marks. Total SEE for laboratory is 50 marks.

Cou	rse Code	:	18EI44		CIE	:	100 + 50 Marks
Credits: L:T:P		:	3:0:1		SEE	:	100 + 50 Marks
Tota	l Hours	:	39L+33P		SEE Duration	:	03+03 Hours
Cou	Course Learning Objectives:						
1	Specify, desig	n, i	mplement, and debu	ig simple microprod	cessor-based appli	icat	ions using the Intel
	8086 architecture.						
2	2 Understand & Analyze the architecture of 8051 microcontroller						
3	3 Use software development tools to assemble, test and debug the programs by using breakpoints,						
	single-stepping, monitoring the changes in register/memory contents, on a hardware platform or						
on an emulator.							
4	4 Apply assembly directives and assembly language to implement flow control (sequential,						
	conditional and iterative).						
5	Design and interface the external components of microprocessor and microcontroller						

Unit-I 07 Hrs

MPU Organization: Instruction set Architectures, Harvard & Von-Neuman Architectures, Micro programmed & Hardwired Control unit, Floating Point & Fixed-Point Processor, Endianness, Intel's 8086 architecture, Pin groups, Functioning, Segmentation, Address generation, Stack, Interrupts.

Unit – II 09 Hrs

8086 Assembly Language Programming: Addressing Modes of 8086, Instruction Format, Program Development Tools, Assembler Directives, Instruction Set of 8086: Data Transfer Instructions, Arithmetic Instructions, Bit Manipulation Instructions, Branching Instructions, Processor Control Instructions, String Instructions, Macros, Procedures, Assembly Language Programming Examples

Unit -III 09 Hrs

Hardware of 8051 Microcontrollers: Introduction to Embedded system, Microcontroller, Comparison of Microprocessor and Microcontroller, Intel MCS 51 family, Architecture and Pin Functions of 8051 Microcontroller, CPU Organization, Program Counter, Timing and Machine Cycles, Internal Memory Organization, Registers, Stack, Input/ Output Ports, Counters and Timers, Interrupts, Power Saving Modes.

Unit –IV 07 Hrs

8051 Microcontroller Based System Design: I/O Port Programming, Programming timers, Asynchronous Serial Data Communication, Interrupt Service Routines. Programming in C, Inline Assembly, Interfacing DAC, Interfacing Matrix Keyboard and Seven Segment Displays, Interfacing ADC in polled mode & Interrupt Mode, Interfacing LCD.

Unit –V 07 Hrs

Peripheral Based Systems Clock generator(8284), Memory Devices, Address Decoding, Interfacing Memory, I/O sub System: Busy wait, DMA, Interrupt Driven, Memory Maps, I/O Port address decoding, Introduction to 8255, Interfacing 8255 with 8086, Interrupt Based IO Design.

Practical: Processor & Controller Lab:

Experiments with 8086 Assembly using MASM

- 1. Data Transfer Programs: Block Moves & Exchange (With & Without Overlap) with &without String Instructions.
- 2. Arithmetic Operations: Addition, Multiplication & Division on 32-Bit Data.
- 3. a) Code Conversions: Use XLAT Instruction to Convert Binary to BCD, Input from Keyboard & Display Result on the Console.

- b) ASCII Operations: Addition, Subtraction, Multiplication
- 4. a) Search for a Key in an Array of Elements using Linear Search, Binary Search. Find Efficiency in each case.
- b) Sort an Array Using Bubble Sort & Selection Sort. Find Efficiency in each case. Interfacing experiments with 8051 C using Keil software
  - 5. Illustrate the interfacing of LCD and LED with variant of 8051 Microcontroller using C language.
  - 6. Implement the interfacing of stepper motor and DC Motor with variant of 8051 Microcontroller using C programming language.
  - 7. Implement the interfacing of ADC with variant of 8051 Microcontroller using Clanguage.
  - 8. Write a C program to interface 4 x 4 keypad with variant of 8051 Microcontroller.
  - 9. Write a C program to interface DAC and Elevator with variant of 8051 Microcontroller
  - 10. Design 8051 based system to measure the frequency of TTL waveform. Design 8051 based system for automatic controlling of light.

Course	Course outcomes: On completion of the course, the student should have acquired the ability to						
CO1:	Interpret the architecture, instruction set, memory organization and addressing modes of the microprocessors and microcontrollers.						
CO2:	Analyze pin functions / ports for implementing peripheral interfaces with microprocessors and microcontrollers.						
CO3:	Apply the knowledge of microprocessor and microcontroller for implementing assembly language/C programming.						
CO4:	Engage in assignment to understand, formulate, design and analyze problems to be realized on embedded processors.

#### **Continuous Internal Evaluation (CIE); Theory (100 Marks)**

CIE is executed by way of Quizzes (Q), Tests (T) and Experiential learning (EL). A minimum of three quizzes are conducted and each quiz is evaluated for 10 marks adding up to 30 marks. All quizzes are conducted online. Faculty may adopt innovative methods for conducting quizzes effectively. The number of quizzes may be more than three also. The three tests are conducted for 50 marks each and the sum of the marks scored from three tests is reduced to 50. The marks component for experiential learning is 20.

Total CIE is 30(Q) + 50(T) + 20(EL) = 100 Marks.

#### Scheme of Continuous Internal Evaluation (CIE); Practical Test for 50 Marks

The Laboratory session is held every week as per the time table and the performance of the student is evaluated in every session. The average marks (AM) over number of weeks is considered for 30 marks. At the end of the semester a test (T) is conducted for 10 marks. The students are encouraged to implement additional innovative experiments (IE) in the lab and are rewarded for 10 marks. Total marks for the laboratory is 50.

Total CIE is 30(AM) + 10(T) + 10(IE) = 50 Marks.

#### Semester End Evaluation (SEE); Theory (100 Marks)

SEE for 100 marks is executed by means of an examination. The Question paper for the course contains two parts, Part A and Part B. Part A consists of objective type questions for 20 marks covering the complete syllabus. Part B consists of five main questions, one from each unit for 16 marks adding up to 80 marks. Each main question may have sub questions. The question from Units I, IV and V have no internal choice. Units II and III have internal choice in which both questions cover entire unit having same complexity in terms of COs and Bloom's taxonomy level.

#### Scheme of Semester End Examination (SEE); Practical Exam for 50 Marks

SEE for the practical courses will be based on experiment conduction with proper results, is evaluated for 40 marks and Viva is for 10 marks. Total SEE for laboratory is 50 marks.

#### Semester End Evaluation (SEE): Theory (100 Marks) + Practical (50 Marks) = Total 150 Marks

	process to mig	grat	e between the two re	epresentations of the same entit	ty		
2	Analyze a con	npl	ex signal in terms of	basic signals in continuous and	d discrete tim	ne flavours.	
3	3 Define discrete-time signals and systems, and express the differences with their continuous-						
	time analogy.						
4	Understand th	e c	omputation of FFT a	algorithm in linear filtering & c	orrelations		

Unit-I 08 Hrs

Introduction to Signals and System Definition of Signals, Classification of Signals, Basic Operations on Signals: Operations Performed on the Independent and Dependent Variable, Precedence Rule, Elementary Signals. Definition of Systems, System Viewed as Interconnection of Operations, Properties of Systems.

Unit – II 08 Hrs

Time domain representations of Linear Time Invariant Systems: Convolution Sum, Convolution Sum Evaluation Procedure, Convolution Integrals, Convolution Integrals Evaluation Procedure, Interconnections of LTI System, Relations between LTI System Properties and the Impulse Response, step response, Difference Equation Representation of LTI System and Solving Difference Equations.

Unit -III 08 Hrs

Applications of Fourier Representations to Mixed Signal classes: Review of Fourier representation of signals, Introduction to DTFS and DTFT, Introduction, Fourier Transform Representations of periodic signals, Convolution and multiplication with Mixtures of periodic and Non-Periodic signals, Fourier Transform representation of discrete time signals, sampling Concept.

Unit –IV 08 Hrs

The Discrete Fourier transform - Its properties and Applications: Frequency domain Sampling and Reconstruction of Discrete time signals, DFT, DFT as a linear Transformation, Relationship of DFT to other transforms. Properties of DFT: Periodicity, Linearity and Symmetry properties,

Multiplication of two DFTs and circular convolution, additional DFT properties. Linear filtering methods based on the DFT: Use of DFT in linear filtering, Filtering of long data sequences.

Unit –V 07 Hrs

Efficient computation of DFT - FFT Algorithms: Direct computation of DFT, Radix-2 FFT Algorithms and Implementation of FFT Algorithms, Applications of FFT algorithms, Efficient computation of DFT of two real sequences, Efficient computation of DFT of a 2N – point real sequence.

Course	Course outcomes: On completion of the course, the student should have acquired the ability to							
CO1:	Understand representation of basic signals, LTI system and its response in time and							
	frequency domains.							
CO2:	Apply various mathematical operations on signals.							
CO3:	Analyze both continuous and discrete time systems in time, frequency and z-domains							
CO4:	Design simple signal conditioning systems

3 Design a system to analyze and evaluate stability of feedback control systems using both time							
and frequency domain methods to meet desired needs							
4	Express the et	fec	ts of PID controllers	s and compensators of	n the system perform	anc	e

Unit-I	08	Hrs

#### **Introduction:**

Definitions, Classification of control systems open loop and closed loop, linear and nonlinear, time variant and time invariant, continuous and discrete time systems. Block diagram of a typical closed loop control system showing the basic structure and different terminologies .

Modeling and Representation Of Control System:

The transfer function concept, transfer function of simple electrical networks, different forms of transfer functions, transfer function of a closed loop system, block diagrams and signal flow graphs. Masons gain formula. Modeling of mechanical translational and rotational systems and their electrical analog, gear trains, modeling of a.c &d.c servomotors.

Unit – II 09 Hrs

#### **Time Response of Feedback Control Systems:**

Standard test signals, step response of first and second order systems, time domain specifications. Type and order of the system, Steady state error and static error constants. Effect of feedback on sensitivity. **Stability Analysis:** 

Concept of stability, types of stability, Routh Hurwitz criterion, relative stability analysis.

Unit -III 09 Hrs

#### **Root Locus:**

Introduction, concept of magnitude and angle criterion, construction of root loci, root contours. Effect of adding a pole/zero to the system.

Introduction to frequency domain:

Frequency domain specifications, concept of phase margin and gain margin, correlation between time and frequency response.

Unit –IV 07 Hrs

#### **Frequency Domain Analysis:**

Introduction to frequency domain plots. Polar plots, Principle of argument, Nyquist plots and Nyquist stability criterion. Bode plots, stability analysis using Bode diagrams.

Unit –V 07 Hrs

#### **Controllers and Compensators:**

Basic control actions P, PI, PD and PID controllers and their effects on the dynamic and static behavior of the system. Lag, lead and lead-lag compensators, realization using RC networks. Design of controllers (PID) using Root locus and compensators (lag-lead) using bode plots.

Course	Course outcomes: On completion of the course, the student should have acquired the ability to						
CO1:	Comprehend the different types of control systems and their building blocks						
CO2:	Analyze the different systems by means of their transfer function						
CO3:	Evaluate the performance of systems and assess their stability						
CO4:	Design the system or compensator for the desired performance parameters

#### **Guidelines for Design Thinking Lab:**

- 1. The Design Thinking Lab (DTL) is to be carried out by a team of two-three students.
- 2. Each student in a team must contribute equally in the tasks mentioned below.
- 3. Each group has to select a theme that will provide solutions to the challenges of societal concern. Normally three to four themes would be identified by the by the department
- 4. Each group should follow the stages of Empathy, Design, Ideate, prototype and Test for completion of DTL.
- 5. After every stage of DTL, the committee constituted by the department along with the coordinators would evaluate for CIE. The committee shall consist of respective coordinator & two senior faculty members as examiners. The evaluation will be done for each student separately.
- 6. The team should prepare a Digital Poster and a report should be submitted after incorporation of any modifications suggested by the evaluation committee.

#### The Design Thinking lab tasks would involve:

- 1. Carry out the detailed questionnaire to arrive at the problem of the selected theme. The empathy report shall be prepared based on the response of the stake holders.
- 2. For the problem identified, the team needs to give solution through thinking out of the box innovatively to complete the ideation stage of DTL
- 3. Once the idea of the solution is ready, detailed design has to be formulated in the Design stage considering the practical feasibility.
- 4. If the Design of the problem is approved, the team should implement the design and come out with prototype of the system.
- 5. Conduct thorough testing of all the modules in the prototype developed and carry out integrated testing.
- 6. Demonstrate the functioning of the prototype along with presentations of the same.
- 7. Prepare a Digital poster indicating all the stages of DTL separately. A Detailed project report also should be submitted covering the difficulties and challenges faced in each stage of DTL.
- 8. Methods of testing and validation should be clearly defined both in the Digital poster as well as the report.

The students are required to submit the Poster and the report in the prescribed format provided by the department.

Course	Outcomes: After completing the course, the students will be able to							
<b>CO 1:</b>	Interpreting and implementing the empathy, ideate and design should be implemented by							
	applying the concepts learnt.							
<b>CO 2:</b>	The course will facilitate effective participation by the student in team work and							
	development of communication and presentation skills essential for being part of any of							
	the domains in his / her future career.							
CO 3:	Appling project life cycle effectively to develop an efficient prototype.							
CO 4:	Produce students who would be equipped to pursue higher studies in a specialized area							
	or carry out research work in an industrial environment.							

#### **Scheme of Evaluation for CIE Marks:**

### **Evaluation will be carried out in three phases:**

Phase	Activity	Weightage
I	Empathy, Ideate evaluation	10M
II	Design evaluation	15M
III	Prototype evaluation, Digital Poster presentation and report submission	25M
	Total	50M

#### **Scheme of Evaluation for SEE Marks:**

Sl. No.	Evaluation Component	Marks
1.	Written presentation of synopsis: Write up	5M
2.	Presentation/Demonstration of the project	15M
3.	Demonstration of the project	20M
4.	Viva	05M
5.	Report	05M
	Total	50M

3	3 Write C programs using appropriate programming constructs adopted in programming.						
4	Solve complex	x p	oblems using C pro	gramming.			

Unit-I 04 Hrs

Introduction to Reasoning, Algorithms and Flowcharts:

Skill development – Examples related to Arithmetical Reasoning and Analytical Reasoning. Fundamentals of algorithms and flowcharts

Introduction to C programming:

Basic structure of C program, Features of C language, Character set, C tokens, Keywords and Identifiers, Constants, Variables, Data types.

Unit – II 04 Hrs

Handling Input and Output Operations

Formatted input/output functions, Unformatted input/output functions with programming examples using different input/output functions.

**Operators and Expressions** 

Arithmetic operators, Relational operators, Logical Operators, Assignment operators, Increment and decrement operators, Conditional operators, Bit-wise operators, Arithmetic expressions. Evaluation of expressions, Precedence of arithmetic operators, Type conversion in expressions, Operator precedence and associativity.

Unit -III 06 Hrs

Programming Constructs

Decision Making and Branching

Decision making with 'if' statement, Simple 'if' statement, the 'if...else' statement, nesting of 'if...else' statements, The 'else if' ladder, The 'switch' statement, The '?:' operator, The 'goto' statement. Decision making and looping The while statement, The do while statement, The 'for' statement, Jumps

in loops.

Unit –IV 06 Hrs

#### Arrays

One dimensional arrays, Declaration of one dimensional arrays. Initialization of one dimensional arrays, Two dimensional arrays, Initializing two dimensional arrays.

Character Arrays and Strings

Declaring and Initializing String Variables, Reading Strings from Terminal, Writing strings to screen, String handling functions.

Unit –V 08 Hrs

User-defined functions

Need for User Defined Functions, Definition of functions, Return values and their types, Function calls, Function declaration. Examples.

Introduction to Pointers: Introduction, Declaration and initialization of pointers. Examples Structures and Unions: Introduction, Structure and union definition, Declaring structure and union variables, Accessing structure members. Example programs.

1b.	Write a program to enter a sentence and print total number of vowels.
12.	Design a structure 'Complex' and write a C program to perform the following operations:
	i.Reading a complex number.
	ii.Addition of two complex numbers.
	iii.Print the result
13.	Create a structure called student with the following members student name, rollno, and a
	structure with marks details in three tests. Write a C program to create N records and
	a) Search on roll no and display all the records.
	b) Average marks in each test.
	c) Highest marks in each test

Course	e outcomes: On completion of the course, the student should have acquired the ability to
CO1:	Understand and explore the fundamental computer concepts and basic programming principles like data types, input/output functions, operators, programming constructs and user defined functions.
CO2:	Analyze and Develop algorithmic solutions to problems.
<b>CO3</b> :	Implement and Demonstrate capabilities of writing 'C' programs in optimized, robust and reusable code.
<b>CO4</b> :	Apply appropriate concepts of data structures like arrays, structures implement programs for various applications.

#### **Continuous Internal Evaluation (CIE); Theory (100 Marks)**

CIE is executed by way of quizzes (Q), tests (T) and experiential learning (EL). A minimum of three quizzes are conducted and each quiz is evaluated for 10 marks adding up to 30 marks. All quizzes are conducted online. Faculty may adopt innovative methods for conducting quizzes effectively. The number of quizzes may be more than three also. The three tests are conducted for 50 marks each and the sum of the marks scored from three tests is reduced to 60. The marks component for experiential learning is 10. The total marks of CIE are 100.

#### Semester End Evaluation (SEE); Theory (100 Marks)

SEE for 100 marks is executed by means of an examination. The Question paper for each course contains two parts, Part – A and Part – B. Part – A consists of objective type questions for 20 marks covering the complete syllabus. Part – B consists of five main questions, one from each unit for 16 marks adding up to 80 marks. Each main question may have sub questions. The question from Units I, IV and V have no internal choice. Units II and III have internal choice in which both questions cover entire unit having same complexity in terms of COs and Bloom's taxonomy level.

Cou	se Learning O	bje	ectives: The students	will be able to				
1			own communication s		of good communicat	tion	and develop	
	their confidence to communicate effectively.							
2	2 Manage stress by applying stress management skills.							
3								
4	Ability to mak	te p	roblem solving decision	ons related to ethic	S.			

III Semester 6 Hrs

Communication Skills: Basics, Method, Means, Process and Purpose, Basics of Business Communication, Written & Oral Communication, Listening.

Communication with Confidence & Clarity- Interaction with people, the need the uses and the methods, Getting phonetically correct, using politically correct language, Debate & Extempore.

6 Hrs

Assertive Communication- Concept of Assertive communication, Importance and applicability of Assertive communication, Assertive Words, being assertive.

Presentation Skills- Discussing the basic concepts of presentation skills, Articulation Skills, IQ & GK, How to make effective presentations, body language & Dress code in presentation, media of presentation.

6 Hrs

Team Work- Team Work and its important elements Clarifying the advantages and challenges of team work Understanding bargains in team building Defining behaviour to sync with team work Stages of Team Building Features of successful teams.

IV Semester 6 Hrs

Body Language & Proxemics - Rapport Building - Gestures, postures, facial expression and body movements in different situations, Importance of Proxemics, Right personal space to maintain with different people.

6 Hrs

Motivation and Stress Management: Self-motivation, group motivation, leadership abilities, Stress clauses and stress busters to handle stress and de-stress; Understanding stress - Concept of sound body and mind, Dealing with anxiety, tension, and relaxation techniques. Individual Counseling & Guidance, Career Orientation. Balancing Personal & Professional Life-

6 Hrs

Professional Practice - Professional Dress Code, Time Sense, Respecting People & their Space, Relevant Behaviour at different Hierarchical Levels. Positive Attitude, Self Analysis and Self-Management.

Professional Ethics - values to be practiced, standards and codes to be adopted as professional engineers in the society for various projects. Balancing Personal & Professional Life

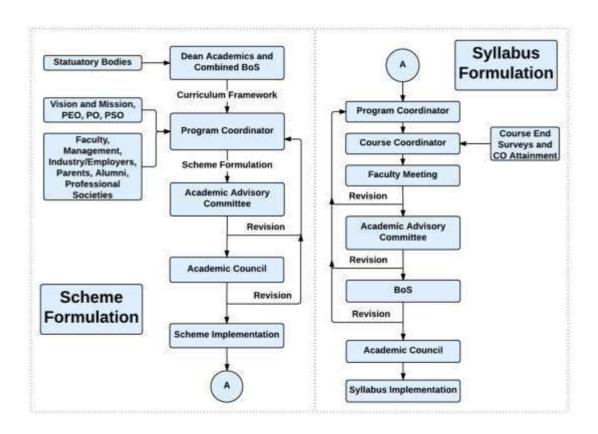

Course	Course Outcomes: After completing the course, the students will be able to							
CO1:	Inculcate skills for life, such as problem solving, decision making, stress management							
CO2:	Develop leadership and interpersonal working skills and professional ethics.							
CO3:	Apply verbal communication skills with appropriate body language.							
CO4:	Develop their potential and become self-confident to acquire a high degree of self

#### Scheme of Continuous Internal Examination and Semester End Examination

Phase	Activity	Weightage
Phase I	CIE will be conducted during the 3 <sup>rd</sup> semester and evaluated for 50 marks.	50%
III Sem	The test will have two components. The Quiz is evaluated for 15 marks and	
	second component consisting of questions requiring descriptive answers is	
	evaluated for 35 marks. The test & quiz will assess the skills acquired through	
	the training module.	
	SEE is based on the test conducted at the end of the 3 <sup>rd</sup> semester The test will	
	have two components a Quiz evaluated for 15 marks and second component	
	consisting of questions requiring descriptive answers is	
	evaluated for 35 marks.	
Phase II	During the 4 <sup>th</sup> semester a test will be conducted and evaluated for 50 marks.	50%
IV Sem	The test will have two components a Short Quiz and Questions requiring	
	descriptive answers. The test & quiz will assess the skills acquired through	
	the training module.	
	SEE is based on the test conducted at the end of the 4 <sup>th</sup> semester The test will	
	have two components. The Quiz evaluated for 15 marks and second	
	component consisting of questions requiring descriptive answers is	
	evaluated for 35 marks	
Phase III	At the end of the IV Sem Marks of CIE (3 <sup>rd</sup> Sem and 4 <sup>th</sup> Sem) is consolidated for 50 marks	
At the	(Average of Test1 and Test 2 (CIE 1+CIE2)/2.	
end of IV	At the end of the IV Sem Marks of SEE (3 <sup>rd</sup> Sem and 4 <sup>th</sup> Sem) is consolidated for 50 marks	
Sem	(Average of CIE 1 and CIE 2 (CIE 1+CIE2)/2.	

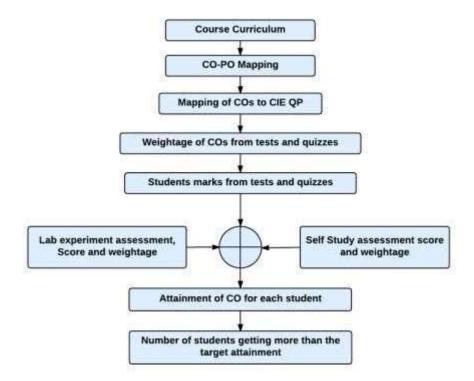

## **Curriculum Design Process**

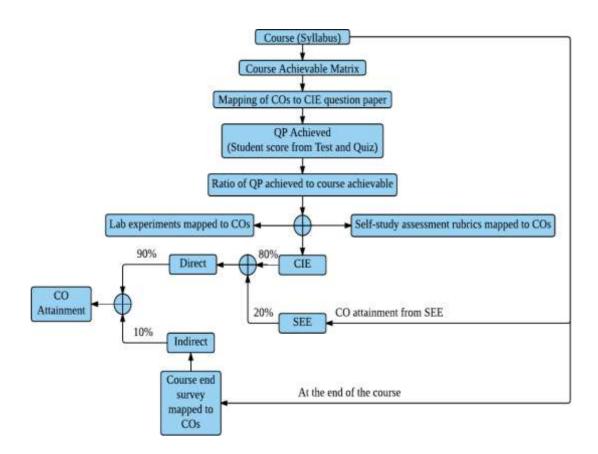

# Academic Planning and Implementation

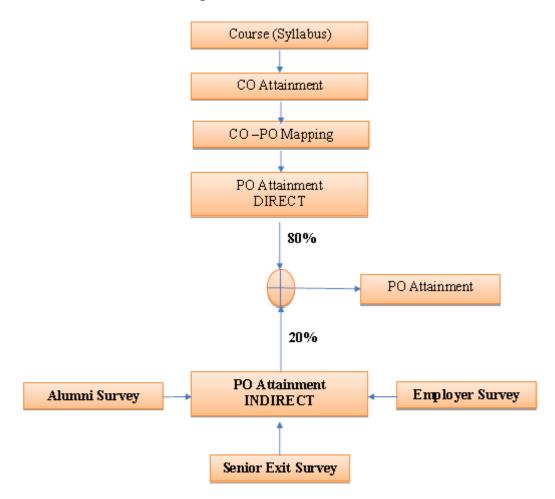

## Process for Course Outcome Attainment

### Final CO Attainment Process

## Program Outcome Attainment Process

#### PROGRAM OUTCOMES (POs)

- 1. Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialisation for the solution of complex engineering problems.
- 2. Problem analysis: Identify, formulate, research literature, and analyse complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
- 3. Design/development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for public health and safety, and cultural, societal, and environmental considerations.
- 4. Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
- 5. Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools, including prediction and modelling to complex engineering activities, with an understanding of the limitations.
- 6. The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal, and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
- 7. Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
- 8. Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
- 9. Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
- 10. Communication: Communicate effectively on complex engineering activities with the engineering community and with the society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
- 11. Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
- 12. Life-long learning: Recognise the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.
