ELECTRONICS & INSTRUMENTATION ENGINEERING

DEPARTMENT VISION

Achieving academic excellence in Instrumentation Technology by adopting interdisciplinary research with a focus on sustainable and inclusive technologies

DEPARTMENT MISSION

1. To create an environment for students to excel in domain areas and get motivated to involve in interdisciplinary research by utilizing state of the art infrastructure.
2. To impart technical knowledge, encourage experiential learning and develop future professional leaders.
3. To establish industry-academia networking and develop industry-ready students and future entrepreneurs, to meet societal & industrial challenges.
4. To motivate lifelong learning and research in sustainable technologies to find improved solutions for the betterment of society.

PROGRAM EDUCATIONAL OBJECTIVES

- PEO1:** Apply Instrumentation, Electronics, Controls and Automation concepts to develop technical solutions for industrial problems.
- PEO2:** Exhibit competency in adapting to various industrial challenges and work in inter-disciplinary projects with team spirit and professional ethics for achieving Organizational goals.
- PEO3:** Pursue higher education in technology or management and achieve professional excellence by imbibing leadership qualities and communication skills.
- PEO4:** Become entrepreneurs with a focus on sustainable technologies and develop innovative solutions to meet industrial and societal needs.

PROGRAM SPECIFIC OUTCOMES

- PSO1:** Design, analyze and practice the instrumentation, controls and automation concepts and techniques required for industrial and/or research pursuits resulting in product development, publications or patents.
- PSO2:** Demonstrate the knowledge of basic science, mathematics, electronic system design and programming for real-time applications, towards developing industrial solutions and become technology leaders of future.

Semester: VII						
CONSTITUTION OF INDIA AND PROFESSIONAL ETHICS						
Category: Professional Core						
(Theory)						
Course Code	:	21HS71		CIE	:	100
Credits: L:T:P	:	03		SEE	:	100
Total Hours	:	03		SEE Duration	:	3 Hours
Unit-I					10 Hrs	
Salient features of Indian Constitution; Preamble to the Constitution of India; Provisions Relating to Citizenship in India-Modes of Acquisition and Termination of Citizenship of India. Scope & Extent of Fundamental Rights-Articles 14-32 with case studies; Right to Information Act, 2005 with Case studies.						
Unit – II					10 Hrs	
Significance of Directive Principles of State Policy; Fundamental Duties in the Constitution of India; Union Executive- President and State Executive- Governor; Parliament & State Legislature; Council of Ministers; Union and State Judiciary; Emergency provisions; Elections commission . Human Rights & Human Rights Commission.						
Unit –III					05 Hrs	
Consumer Protection Law - Definition and Need of Consumer Protection; Consumer Rights under the Consumer Protection Act, 2019; Unfair Trade Practice, Defect in goods, Deficiency in services; Product liability and Penal Consequences, False and Misleading Advertisement, E-Commerce, Alternate dispute Redress mechanism; Redresses Mechanisms under the Consumer Protection Act, 2019.						
Unit –IV					07 Hrs	
Introduction to Labour and Industrial Law, Theory and Concept of Industrial Relations, Industrial Relations Code 2020, Code on Social Security 2020, Code on Occupational Safety, Health and Working Conditions 2020, Code on Wages 2020, Industrial Disputes Act , The Factories Act, 1948, Analysis of Recent Amendments made in Labour Laws.						
Unit –V					07 Hrs	
Scope and aims of engineering ethics (NSPE Code of Ethics), Responsibility of Engineers, Impediments to responsibility. Honesty, Integrity and reliability, Risks, Safety and Liability in Engineering. Corporate Social Responsibility. Statutory Provision regarding prohibition and prevention of Ragging, The Sexual Harassment of Women at Workplace (Prevention, Prohibition and Redressal) Act, 2013.						

Course Outcomes: After completing the course, the students will be able to: -	
CO1	Demonstrate the citizen's fundamental Rights, duties & consumer responsibility capability and to take affirmative action as a responsible citizen.
CO2	Identify the conflict management in legal perspective and judicial systems pertaining to professional environment, strengthen the ability to contribute to the resolve of human rights & Ragging issues and problems through investigative and analytical skills.
CO3	Understanding process of ethical and moral analysis in decision making scenarios and inculcate ethical behavior as a trait for professional development
CO4	Apply the knowledge to solve practical problems with regard to personal issues & business enterprises

IMAGE PROCESSING AND APPLICATIONS			
Category: Professional Core			
(Theory and Practice)			
Course Code	: 21EI72	CIE	: 100 Marks
Credits: L:T:P	: 3:0:1	SEE	: 100 Marks
Total Hours	: 45L + 30P	SEE Duration	: 3Hours
Unit-I			09 Hrs
Digital image fundamentals: Introduction, Fundamental steps in DIP, A simple image formation model, representing digital images, Spatial & Gray level resolution, Basic relationship between pixels. Image Enhancement: Point operations, Spatial averaging, Median filtering, Spatial low Pass, high pass and band pass filtering, Histogram equalization, Transform operations, Application discussion on Biomedical Digital Image Processing			
Unit – II			09 Hrs
Image Segmentation: Detection of discontinuities, Edge linking and Boundary detection by local processing & global processing using Hough transform, Region based segmentation, Application discussion on Biomedical Digital Image Processing.			
Unit –III			09 Hrs
Morphological Image Processing: Basic concepts of set theory, Logical operations involving binary images, Dilation and erosion, Opening and closing, The hit-or-miss transformation, Basic morphological algorithms.			
Unit –IV			09 Hrs
Image Representation and Description: Representation – Chain codes, polygonal approximations, signatures, boundary segments, skeletons, Boundary descriptors – Some simple descriptors, Shape numbers, Fourier descriptors, statistical moments.			
Unit –V			09 Hrs
Image Compression: Huffman coding, DFT, DCT, Wavelet coding & JPEG standard, Application discussion on Biomedical Digital Image Processing.			

Course Outcomes: After completing the course, the students will be able to:-	
CO1	Understand the fundamentals of Digital image processing including the topics of filtering, transforms, morphology, image analysis and compression.
CO2	Evaluate algorithms for image analysis based on segmentation, shape & texture, registration, recognition and classification
CO3	Analyze the different image processing algorithms of segmentation, registration, object recognition and classification using MATLAB
CO4	Develop the necessary skill base to explore and implement Digital Image Processing algorithms.

Reference Books	
1.	Digital Image Processing, Rafael C. Gonzalez & Richard E. Woods,, 3rd Edition, 2011, Pearson Education Inc. ISBN: 9780133002324.
2.	Evaluate algorithms for image analysis based on segmentation, shape & texture, registration, recognition and classification
3.	Analyze the different image processing algorithms of segmentation, registration, object recognition and classification using MATLAB
4.	Develop the necessary skill base to explore and implement Digital Image Processing algorithms

Practicals

Perform different image processing experiments as listed below by using

MATLAB/SCILAB/PYTHON.

1. Image enhancement –Histogram based.
2. Image enhancement – by varying gray levels.
3. Image smoothing.
4. Image sharpening.
5. Algorithm for low pass filter, high pass filter, median filter.
6. Point detection, Line detection, Edge detection (Masks operations).
7. Image Segmentation (Water shed segmentation, Fuzzy k means clustering).
8. Image Restoration.
9. Applications of Wavelets in Image Processing.
10. Assignments on real life image problem.

Innovative Experiment:

- Innovative Experiment:**
1. Applications based on clustering segmentation
 2. Satellite Image Processing
 3. Detection of abnormalities in medical images

REAL TIME OPERATING SYSTEMS			
Category: Professional Core Elective (Group G)			
(Theory)			
Course Code	: 21EI73GA	CIE	: 100 Marks
Credits: L:T:P	: 4:0:0	SEE	: 100 Marks
Total Hours	: 45L	SEE Duration	: 3Hours
Unit-I			09 Hrs
Basic Real Time Concepts- Basic computer architecture: Bus transfer Mechanism, input and output, memory, CPU operation, software concepts, system concepts, real time definition, Event and Determinism, Synchronous and asynchronous events, real time design issues, Examples of real time systems. Computer Hardware: CPU, addressing modes: implied mode, immediate mode, Direct mode, Indirect mode, register indirect mode, Pipelining.			
Unit – II			09 Hrs
Process Management of OS/RTOS: Uniprocessor Scheduling: Types of scheduling, scheduling algorithms: FCFS, SJF, Priority, Round Robin, UNIX Multi-level feedback queue scheduling, Multiprocessor Scheduling concept.			
Unit –III			09 Hrs
Real -Time Kernels: Introduction, Polled loop with interrupts, Coroutines, Interrupt Driven systems, context switching, Round-Robin system, pre-emptive priority systems, Major and minor cycles, hybrid systems, foreground /background systems, Real time operation, Full-Featured real- Time operating systems, Task control block model, task management.			
Unit –IV			09 Hrs
Inter-task Communication and Synchronization: Buffering Data ring buffers, Mailboxes, mailbox implementation, Queues, critical regions, semaphores, mailboxes and semaphores, counting semaphores, binary semaphores deadlock, avoidance, detect and recover.			
Unit –V			09 Hrs
RTOS APPLICATION DOMAINS			
Comparison and study of RTOS: Case studies: RTOS for Image Processing – Embedded RTOS for voice over IP – RTOS for fault Tolerant Applications – RTOS for Control Systems.

4.	Embedded Systems-Architecture, Programming and Design, Raj Kamal, 2nd Edition, McGraw Hill Publishing Company,2008, ISBN: 978-0-07-066764-8.

Course Outcomes: After completing the course, the students will be able to:-	
CO1	Understand the fundamental concepts of real-time operating systems
CO2	Comprehend the importance of determinism and predictability in real-time systems.
CO3	Apply the different techniques used to develop an application through RTOS
CO4	Analyze the use of multitasking techniques in real-time systems

Low Power VLSI Design			
Category: Professional Core Elective (Group G)			
(Theory)			
Course Code	: 21EI73GB	CIE	: 100 Marks
Credits: L:T:P	: 3:0:0	SEE	: 100 Marks
Total Hours	: 45L	SEE Duration	: 3Hours
Unit-I			09 Hrs
<p>Introduction: Need for low power VLSI chips, charging and discharging capacitance, short circuit current in CMOS, leakage current, Reverse Biased PN-junction, Sub threshold Channel Leakage, Leakage Current in Digital Design, static current, basic principles of low power design, Reduce Switching Voltage, Reduce Switching Frequency , low power figure of merits.</p>			
Unit – II			09 Hrs
<p>Simulation Power Analysis: SPICE Basics, SPICE Power Analysis, Discrete Transistor Modeling and Analysis, Tabular Transistor Model, Switch Level Analysis, Gate-level Logic Simulation, Gate-level Logic Simulation, Capacitive Power Dissipation, Internal Switching Energy, Internal Switching Energy, Internal Switching Energy, Gate-level Power Analysis. (Ref.1) Probabilistic power analysis: Random logic signals, Characterization of Logic Signals, Continuous and Discrete Random Signals, probability & frequency, state and Conditional Probability and Frequency, Word-level and Bit-level Statistics, probabilistic power analysis techniques, Propagation of Static Probability in Logic Circuits, Transition Density Signal Model , Propagation of Transition Density, signal entropy.</p>			
Unit –III			09 Hrs
<p>Logic: Gate reorganization, Local Restructuring, signal gating, logic encoding, Binary versus Gray Code Counting, Binary versus Gray Code Counting, state machine encoding, Transition Analysis of State Encoding, Output Don't-care Encoding, Design Trade-offs in State Machine Encoding, precomputation logic. (Ref.1) Low power Clock Distribution: Power dissipation in clock distribution, single driver Vs distributed buffers, Zero skew v/s tolerable skew, chip & package co design of clock network.</p>			
Unit –IV			09 Hrs
<p>Circuit: Transistor and gate sizing, Sizing an Inverter Chain, Transistor and Gate Sizing for Dynamic Power Reduction, equivalent pin ordering, Transistor Sizing for Leakage Power Reduction, Transistor Network Partitioning and Reorganization, network restructuring and reorganization, special latches and flip flops, Combinational Flip-flop, Double Edge Triggered Flip-flop, low power digital cell library, Cell Sizes and Spacing, Varieties of Boolean Functions, adjustable device threshold voltage.</p>			
Unit –V			09 Hrs
<p>Low power Architecture & Systems: Power & performance management, Microprocessor Sleep Modes, Performance Management, Adaptive Filtering, switching activity reduction, Guarded Evaluation, Bus Multiplexing, Bus Multiplexing, parallel architecture with voltage reduction, flow graph transformation, Operator Reduction, Loop Unrolling. (Ref.1). Low power arithmetic components: Introduction, circuit design style, adders, multipliers, division.</p>

4.	S. Ramamurthy, Low-Power Digital VLSI Design Circuits and Systems, Medtech, 2014. ISBN: 978-9384007034.

Course Outcomes: After completing the course, the students will be able to:-	
CO1	Identify the sources of power dissipation in CMOS circuits.
CO2	Perform power analysis using simulation based approaches and probabilistic analysis
CO3	Use optimization and trade-off techniques that involve power dissipation of digital circuits.
CO4	Make the power design a reality by making power dimension an integral part of the design. Use practical low power design techniques and their analysis at various levels of design abstraction and analyse how these are being captured in the latest design.

Embedded Systems vs Internet of Things vs Cyber Physical System: Embedded Systems (I/O Units, Multitasking and Scheduling), Internet of Things Architecture, CPS Architecture			
Unit –V			09 Hrs
Security and Privacy in Cyber Physical Systems: Security and Privacy Issues in CPSs, Local Network Security for CPSs, Internet-Wide Secure Communication, Security and Privacy for Cloud-Interconnected CPSs, Case Study: Cybersecurity in Digital Manufacturing/Industry 4.0			

Reference Books	
1.	Principles of Cyber Physical Systems, Rajeev Alur, MIT Press, 2015
2.	E. A. Lee, Sanjit Seshia , "Introduction to Embedded Systems – A Cyber–Physical Systems Approach", Second Edition, MIT Press, 2017, ISBN: 978-0-262-53381-2
3.	Gunasekaran Manogaran, ” Cyber Physical systems for Industrial Transformation fundamentals, standards and protocols, Taylor and Francis group.,2023.
4.	Houbing Song, Glenn A.Fink, Sabina Jesche, “Security and Privacy in Cyber-Physical Systems: Foundations, Principles and Solutions”, , Elsevier, 2017

Course Outcomes: After completing the course, the students will be able to:-	
CO1	Understand the basics of cyber physical systems
CO2	Analyze the technical platforms involved in different cyber physical systems systems.
CO3	Apply Cyber Physical System – Models and Dynamics Behaviours in different application areas.
CO4	Evaluate different cyber physical systems and its Security and Privacy .

RUBRIC FOR THE CONTINUOUS INTERNAL EVALUATION (THEORY)		
#	COMPONENTS	MARKS
1.	QUIZZES: Quizzes will be conducted in online/offline mode. TWO QUIZZES will be conducted & Each Quiz will be evaluated for 10 Marks. THE SUM OF TWO QUIZZES WILL BE THE FINAL QUIZ MARKS.	20
2.	TESTS: Students will be evaluated in test, descriptive questions with different complexity levels (Revised Bloom’s Taxonomy Levels: Remembering, Understanding, Applying, Analyzing, Evaluating, and Creating). THREE tests will be conducted. Each test will be evaluated for 50 Marks, adding upto 150 Marks. FINAL TEST MARKS WILL BE REDUCED TO 40 MARKS.	40
3.	EXPERIENTIAL LEARNING: Students will be evaluated for their creativity and practical implementation of the problem. Case study-based teaching learning (10), Program specific requirements (10), Video based seminar/presentation/demonstration (20) ADDING UPTO 40 MARKS.	40
MAXIMUM MARKS FOR THE CIE THEORY		100

2	Unit 1 : (Compulsory)	16
3 & 4	Unit 2 : Question 3 or 4	16
5 & 6	Unit 3 : Question 5 or 6	16
7 & 8	Unit 4 : Question 7 or 8	16
9 & 10	Unit 5: Question 9 or 10	16
TOTAL		100

Semester: VII			
Data Analytics and Applications			
Category: Professional Core Elective (Group G)			
(Theory)			
Course Code	: 21EI73GD	CIE	: 100 Marks
Credits: L:T:P	: 3:0:0	SEE	: 100 Marks
Total Hours	: 45L	SEE Duration	: 3Hours
Unit-I			09 Hrs
Introduction to Data Analytics and Python Fundamentals:			
Overview of data analytics, Importance and applications of data analytics in various domains, Data integration and data quality issues, Data visualization techniques (histograms, box plots, scatter plots, etc.), Python programming essentials.			
Unit – II			09 Hrs
Probability and Sampling: Introduction to probability, Sampling techniques and distributions, Understanding hypothesis testing, Two-sample testing and ANOVA.			
Unit –III			09 Hrs
Regression Analysis: Linear regression, Multiple regression, Concepts of Maximum Likelihood Estimation (MLE), Logistic regression, Receiver Operating Characteristic (ROC) curve, Building regression analysis models			
Unit –IV			09 Hrs
Cluster Analysis and Classification: Introduction to cluster analysis, Clustering techniques, Classification using Regression Trees (CART).			
Unit –V			09 Hrs
Time Series Methods: ARIMA, SARIMA, forecast accuracy measures, and feature extraction.			
Case Study: Data Analytics for weather forecasting.			

Course Outcomes: After completing the course, the students will be able to:-	
CO1	Understand the fundamental principles of data science and the role of R as a tool for data analysis.
CO2	Acquire knowledge and skills in optimization techniques, which are essential for solving data science problems efficiently.
CO3	Apply logistic regression for classification problems, using it to make informed decisions based on data.
CO4	Demonstrate competence in clustering as additional tools for solving classification tasks.

Reference Books

Course Code	: 21EI74HA	CIE	: 100 Marks
Credits: L:T:P	: 3:0:0	SEE	: 100 Marks
Total Hours	: 45L	SEE Duration	: 3Hours
Unit-I			09 Hrs
Basics of Medical Instrumentation; Basic Medical instrumentation System with block diagram Constraints in design of Biomedical Systems. Reliability of Medical devices: Basics, Effects of Medical devices, Causes of Failure, Safety and Risk Management. The feasibility phase: Device classification, Overview of FDA and the approval process in India. Important medical device standards			
Unit – II			09 Hrs
Bio-Electric Potentials; Sources of Bioelectric potentials and Electrodes Resting and Action Potentials, Propagation of Action Potentials, Bio Potential Electrodes. ECG Electrodes and types, EEG and EMG Electrodes			
Unit –III			09 Hrs
Cardiovascular System & assistive devices; Functioning of Heart, Electrical Conductivity of Heart Basic Principles of ECG Cardiac Pacemakers-Need, types and functional characteristics Cardiac defibrillators, disadvantages, DC defibrillator, types Instantaneous, Synchronized.			
Unit –IV			09 Hrs
Respiratory System and RS aids; Basics of Respiratory System, Mechanics of Respiration, Pulmonary Function tests Ventilator- Need, Types, Intermittent positive pressure, Humidifier, Nebulizer, Aspirator.			
Unit –V			09 Hrs
Central Nervous system & BCI; Basics of CNS, Neuron, Propagation of impulses, EEG, Brain Computer Interface. Brain Computer Interface Types, Types of BCI Signals, Monitoring Brain Activity Using EEG, EcoG BCI Trends.			

Course Outcomes: After completing the course, the students will be able to:-	
CO1	Understand the significance of design constraints in biomedical systems.
CO2	Apply knowledge of medical instrumentation principles to design simple biomedical systems or to determine the regulatory requirements
CO3	Assess the mechanisms of Instruments and their suitability for various cardio/respiratory conditions.
CO4	Evaluate the reliability of medical devices based on industry standards and guidelines.

Product Design Technology			
Category: Professional Core Elective (Group H)			
(Theory)			
Course Code	: 21EI74HB	CIE	: 100 Marks
Credits: L:T:P	: 3:0:0	SEE	: 100 Marks
Total Hours	: 45L	SEE Duration	: 3Hours
Unit-I			09 Hrs
Introduction: Characteristics of successful product development, who Designs and develops products, duration and cost of product development, the challenges of product development			
Development Processes and Organizations: A generic development process, concept development: the front-end process, adapting the generic product development process.			
Product Planning: The product planning process, identify opportunities. Evaluate and prioritize projects, allocate resources and plan timing, complete pre-project planning.			
Unit – II			09 Hrs
Identifying Customer Needs: Gather raw data from customers, interpret raw data in terms of customer needs, organize the needs into a hierarchy, establish the relative importance of the needs and reflect on the results and the process.			
Product Specifications: What are specifications, when are specifications established, establishing target specifications, setting the final specifications.			
Concept Generation and Selection: The activity of concept generation, clarifies the problem search externally, search internally, explore Systematically, and reflect on the results and the process. Concept screening, concept scoring.			
Unit –III			09 Hrs
PCB Technology: Introduction to PCB, Types of PCB, PCB layout design and artwork generation Using CAD. Properties of copper clad sheets, materials used for fabrication of copper clad sheet, PCB film, Properties of film, film master preparation, Multilayer PCB Design and test consideration.			
Unit –IV			09 Hrs
Industrial Design: What Is Industrial Design?, Assessing the Need for Industrial Design, The Impact of Industrial Design, The Industrial Design Process, Management of the Industrial Design Process, Assessing the Quality of Industrial Design.			
Unit –V			09 Hrs
Prototyping, Product Development Economics, Managing Projects Prototyping basics, principles of prototyping, Technologies, planning for prototypes. Elements of economic analysis, base case financial mode. Understanding and representing task, baseline project planning. Accelerating projects. Project execution. Post-mortem project evaluation

(Theory)			
Course Code	: 21EI74HC	CIE	: 100 Marks
Credits: L:T:P	: 3:0:0	SEE	: 100 Marks
Total Hours	: 45L	SEE Duration	: 3Hours
Unit-I			09 Hrs
Introduction to Safety Instrumented Systems: Scope, Safety Technology in Process Automation. Fire Triangle, Fire & Gas Detection, Learning from Major Accidents. Basic Process control Systems (BPCS) & Safety Instrumented Systems (SIS) .			
Unit – II			09 Hrs
Introduction to Reliability engineering: Equipment failure, Failure rate, mean time between failure, mean time to restore, relationship between MTBF, MTTR and failure rate. Probability of failure on demand. System Reliability engineering: Reliability block diagram, series and parallel configuration, fault tree analysis, Markov modeling, Markov solution technique.			
Unit –III			09 Hrs
Equipment Failure Modes, Fail-safe, Fail-danger, Detected/Undetected, PFD, PFDavg, Problems on classification of Failure modes. HAZOP (Hazard and operability study), Layer of protection (LOPA), As low as reasonably practicable (ALARP), Different levels of Safety Integrity Level (SIL), and the target requirements.			
Unit –IV			09 Hrs
System Architectures: MooN architecture, redundancy and voting logic, Common Mode failure, importance of redundancy and diversity. Hardware design principles for functional safety, Meeting IEC 61508 Standard Part 2, fault tolerance, Safety PLCs, Safety requirements, identification of safe faults, and dangerous faults.			
Unit –V			09 Hrs
Software design principles for functional safety: Meeting IEC 61508 Standard Part 3. Software requirements for SIS, Introduction to Safe failure fraction (SFF), software verification requirements.

Course Code	:	21AS75IA		CIE	:	100 Marks
Credits: L:T:P	:	3:0:0		SEE	:	100 Marks
Total Hours	:	45L		SEE Duration	:	3.00 Hours

Unit-I	
Introduction to Unmanned Aerial Vehicles (UAVs): History of UAVs, Need of unmanned aerial systems, Overview of UAV Systems-System Composition, Classes and Missions of UAVs-Classification of UAVs based on size, range and endurance, Applications, Examples of UAVs	
Unit – II	
Aerodynamics & Propulsion aspects of UAVs: Basic Aerodynamic Equations, Air foils, lift, drag, moments, Aircraft Polar, The Real Wing and Airplane, Induced Drag, Total Air-Vehicle Drag, Flapping Wings, Rotary wings. Propulsion: Thrust Generation and basic thrust equation, Sources of Power for UAVs- Piston, Rotary, Gas turbine engines, electric or battery powered UAVs.	
Unit –III	
Airframe of UAVs: Mechanic loading, basics of types of load calculation and structural engineering, Material used for UAV (general introduction), FRP and methods of usage in UAV, Testing of FRP specimens for UAV, selection criteria for structure, Types of structural elements used in UAV their significance and characteristics, Methods of manufacturing UAV structure.	
Unit –IV	
Payloads for UAVs: Barometers, Accelerometer, Magnetometer, RADAR and range finder, Non-dispensable and dispensable Payloads- Optical, electrical, weapon, imaging payloads.	
Unit –V	
Mission Planning and Control: Air Vehicle and Payload Control, Reconnaissance/Surveillance Payloads, Weapon Payloads, Other Payloads, Data-Link Functions and Attributes, Data-Link Margin, Data-Rate Reduction, Launch Systems, Recovery Systems, Launch and Recovery Tradeoffs	

Course Outcomes: At the end of this course the student will be able to :	
CO1:	Appraise the evolution of UAVs and understand the current potential benefits of UAVs
CO2:	Apply the principles of Aerospace Engineering in design and development of UAVs
CO3:	Evaluate the performance of UAV designed for various Missions and applications
CO4:	Assess the performance and airworthiness of the designed UAV

Credits: L:T:P	:	3:0:0		SEE	:	100 Marks
Total Hours	:	42 Hrs		SEE Duration	:	3 Hours
Unit-I					09 Hrs	
Introduction to tools and databases: Introduction to Bioinformatics, Goals, Scope, Applications, Sequence databases, Structure databases, Special databases, Applications of these databases, Database similarity search: Unique requirements of database searching, Heuristic Database Searching, Basic Local Alignment Search Tool (BLAST), FASTA, Comparison of FASTA and BLAST, Database Searching with Smith-Waterman Method						
Unit – II					09 Hrs	
Sequence Analysis: Types of Sequence alignment -Pairwise and Multiple sequence alignment, Alignment algorithms, Scoring matrices, Statistical significance of sequence alignment. Multiple Sequence Alignment: Scoring function, Exhaustive algorithms, Heuristic algorithms, Profiles and Hidden Markov Models: Position-Specific scoring matrices, Profiles, Markov Model and Hidden Markov Model, Scoring matrices – BLOSSUM and PAM Molecular Phylogenetics: Introduction, Terminology, Forms of Tree Representation. Phylogenetic Tree Construction Methods - Distance-Based, Character-Based Methods and Phylogenetic Tree evaluation.						
Unit –III					09 Hrs	
Introduction to Next-Generation Sequencing (NGS) analysis: Sanger sequencing principles - history and landmarks, of Sequencing Technology Platforms, A survey of next-generation sequencing technologies, A review of DNA enrichment technologies, Base calling algorithms, Base quality, phred values, Reads quality checks, Interpretations from quality checks. Adapter and primer contamination. Processing reads using clipping of reads- Advantages and disadvantages of processing of reads						
Unit –IV					09 Hrs	
Structural analysis & Systems Biology: Gene prediction programs – ab initio and homology-based approaches.. Detection of functional sites and codon bias in the DNA. Predicting RNA secondary structure, Protein structure basics, structure visualization, comparison and classification. Protein structure predictive methods using protein sequence, Protein identity based on composition, Prediction of secondary structure. Scope, Applications. Concepts, implementation of systems biology, Mass spectrometry and Systems biology.						
Unit –V					09 Hrs	
Drug Screening: Introduction to Computer-aided drug discovery, target selection, ligand preparation and enumeration, molecular docking, post-docking processing, molecular dynamics simulations, applications and test cases.						

Course Outcomes: After completing the course, the students will be able to:-	
CO1	Comprehend Bioinformatics Tools: Understand and effectively utilize various bioinformatics tools and databases for sequence and structure analysis.
CO2	Investigate and apply innovative sequencing technologies and analytical methods to solve complex biological questions and advance research in genomics and molecular biology.
CO3	Analyze Next-Generation Sequencing: Proficiency in NGS technologies, including data quality assessment and read processing techniques and handle big data.
CO4	Apply bioinformatics tools to model and simulate various biological processes, leveraging gene prediction programs including both ab initio and homology-based approaches.

Semester VII						
SUSTAINABILITY AND LIFE CYCLE ANALYSIS						
Category: Institutional Electives-II (Group I)						
(Theory)						
Course Code	:	21CH75IC		CIE	:	100 Marks
Credits: L:T:P	:	3:0:0		SEE	:	100 Marks
Total Hours	:	45L		SEE Duration	:	3Hours
Unit-I					09Hrs	
Introduction to sustainability: Introduction to Sustainability Concepts and Life Cycle Analysis, Material flow and waste management, Chemicals and Health Effects, Character of Environmental Problems						
Unit – II					09 Hrs	
Environmental Data Collection and LCA Methodology: Environmental Data Collection Issues, Statistical Analysis of Environmental Data, Common Analytical Instruments, Overview of LCA Methodology. – Goal, Definition.						
Unit –III					09 Hrs	
Life Cycle Assessment: Life Cycle Impact Assessment, Life Cycle Interpretation, LCA Benefits and Drawbacks.						
Wet Biomass Gasifiers: Introduction, Classification of feedstock for biogas generation, Biomass conversion technologies: Photosynthesis, Biogas generation, Factors affecting bio-digestion, Classification of biogas plants, Floating drum plant and fixed dome plant their advantages and disadvantages.						
Unit –IV					09 Hrs	
Design for Sustainability: Green Sustainable Materials, Environmental Design for Sustainability.						
Dry Biomass Gasifiers: Biomass energy conversion routes, Thermal gasification of biomass, Classification of gasifiers, Fixed bed systems:						
Unit –V					09Hrs	
Case Studies: Odor Removal for Organics Treatment Plant, Bio-methanation, Bioethanol production. Bio fuel from water hyacinth.						

Course Outcomes: After completing the course, the students will be able to:-	
CO1	Understand the sustainability challenges facing the current generation, and systems-based approaches required to create sustainable solutions for society.
CO2	Identify problems in sustainability and formulate appropriate solutions based on scientific research, applied science, social and economic issues.
CO3	Apply scientific method to a systems-based, trans-disciplinary approach to sustainability
CO4	Formulate appropriate solutions based on scientific research, applied science, social and economic issues.

Semester: VII (2021 Scheme)						
ADVANCES IN CORROSION SCIENCE AND MANAGEMENT						
Category: Institutional Electives-II (Group I)						
(Theory)						
Course Code	:	21CM75ID		CIE	:	100 Marks
Credits: L:T:P	:	3:0:0		SEE	:	100 Marks
Total Hours	:	42		SEE Duration	:	03 Hours

Course Learning Objectives: The students will be able to	
1	Understand the fundamental & socio, economic aspects of corrosion.
2	Identify practices for the prevention and remediation of corrosion.
3	Analyzing methodologies for predicting corrosion tendencies.
4	Evaluate various corrosion situations and implement suitable corrosion control measures.

Unit-I	
Basics of corrosion: Introduction: Galvanic series, Pilling-Bedworth ratio, Types: Galvanic corrosion, crevice corrosion, pitting corrosion, intergranular corrosion, erosion corrosion, stress corrosion, season cracking, hydrogen embrittlement, bacterial corrosion. Corrosion in different engineering materials: Concrete structures, duplex, stainless steels, ceramics, composites.	

Unit-II	
Corrosion mechanism: Electrochemical theory of corrosion, Crevice corrosion-mechanism of differential aeration corrosion, mixed potential theory for understanding common corrosion of metals and alloys. Thermodynamics of Corrosion: Pourbaix diagram and its importance in metal corrosion and its calculation for Al, Cu, Ni and Fe.	

Unit – III	
Effects of corrosion: The direct and indirect effects of corrosion, economic losses, Indirect losses -Shutdown, contamination, loss of product, loss of efficiency, environmental damage, Importance of corrosion prevention in various industries, corrosion auditing in industries, corrosion map of India. Corrosion issues in specific industries-power generation, chemical processing industries, oil and gas Industries, corrosion effect in electronic industry.	

Unit –IV	
Corrosion Testing and monitoring: Introduction, classification. Purpose of corrosion testing, materials, specimen. Surface preparation, measuring and weighing. Types of testing, lab, pilot plant and field tests. Measurement of corrosion rate, weight loss method, CPR numericals, Electrochemical methods, Tafel extrapolation. Linear polarization method.	

Unit –V	
Corrosion Control: Principles of corrosion prevention, material selection, design considerations, control of environment- decrease in velocity, passivity, removal oxidizer, Inhibitors and passivators, coatings- organic, electroplating of Copper, Nickel and Chromium, physical vapor deposition-sputtering, Electroless plating of Nickel.	

Course Outcomes: After completing the course, the students will be able to	
CO1:	Understand the causes and mechanism of various types of corrosion
CO2:	Apply the knowledge of chemistry in solving issues related to corrosion.
CO3:	Analyse and interpret corrosion with respect to practical situations.
CO4:	Develop practical solutions for problems related to corrosion.

Semester: VII						
Prompt Engineering						
Category: Institutional Electives-II (Group I)						
(Theory)						
Course Code	:	21CS75IE		CIE	:	100 Marks
Credits: L:T:P	:	3:0:0		SEE	:	100 Marks
Total Hours	:	40L		SEE Duration	:	03 Hours
Course Learning Objectives: The students will be able to						
1	Describe the principles and concepts underlying prompt engineering					
2	Design and formulate effective prompts for various AI models to achieve desired outputs					
3	Analyse and assess the performance of different prompts to improve the quality and reliability of AI-generated outputs.					
4	Apply prompt engineering techniques to solve real-world problems in various domains					
Unit-I						
Introduction to Prompt Engineering						
Raise of Context Learning, Prompts, Prompt Engineering, LLM Settings, Basics of prompting, Elements of a Prompt, Settings for Prompting Language Model, General Tips for Designing Prompts, Designing Prompts for Different Tasks: few examples of common tasks using different prompts- Text Summarization, Information Extraction, Question Answering, Text Classification, Conversation/Role Playing, Code Generation, Reasoning						
Unit – II						
Techniques for Effective Prompts						
Techniques designed to improve performance on complex tasks - Zero-Shot Prompting, Few-shot prompting, Chain-of-thought (CoT) prompting, Zero-Shot CoT, Self-Consistency, Knowledge Generation Prompting, Program-aided Language Model (PAL), ReAct, Directional Stimulus Prompting						
Unit –III						
Best Practices in Prompt Engineering						
Tools & IDEs						
Capabilities include: Developing and experimenting with prompts, Evaluating prompts. Versioning and deploying prompts; Advanced prompting techniques: advanced applications with LLMs LLMs and external tools/APIs -- LLMs with External Tools; Data-augmented Generation – Steps, External Data, QA with sources, Summarization using sources						
Unit –IV						
Applications of Prompt Engineering:						
LLM Applications: Function Calling with LLMs - Getting Started with Function Calling, Function Calling with GPT-4, Function Calling with Open-Source LLMs,						
Function Calling Use Cases: Conversational Agents, Natural Language Understanding, Math Problem Solving, API Integration, Information Extraction						
Unit –V						
Opportunities and Future Directions						
Model safety, Prompt Injection, Prompt Leaking, Jail Breaking; Reinforcement Learning from Human Feedback (RLHF) -- Popular examples: aClaude (Anthropic), ChatGPT (OpenAI),						
Future directions: Augmented LMs, Emergent ability of LMs, Acting / Planning - Reinforcement Learning, Multimodal Prompting, Graph Prompting						

Course Outcomes: After completing the course, the students will be able to	
CO1	Demonstrate an understanding of prompt engineering principles including how prompt structure and phrasing impact the performance of AI models.
CO2	Design and implement effective prompts- to create and apply prompts for various natural language processing (NLP) tasks, such as text generation, summarization, and translation, using AI models.
CO3	Critically evaluate the effectiveness of prompts - assess the quality and performance of prompts in terms of accuracy, coherence, and relevance, identifying areas for improvement.
CO4	Apply prompt engineering techniques in real-world scenarios - use prompt engineering strategies to address practical problems in domains such as education, healthcare, and business, demonstrating the applicability of AI-driven solutions.
CO5	Collaborate on projects involving prompt engineering - work effectively in teams to design, implement, and evaluate prompt-based solutions, showcasing their ability to contribute to complex AI-related projects.

INTEGRATED HEALTH MONITORING OF STRUCTURES			
Category: Institutional Electives-II (Group I)			
(Theory)			
Course Code	: 21CV75IF	CIE	: 100 Marks
Credits: L:T:P	: 3:0:0	SEE	: 100 Marks
Total Hours	: 42L	SEE Duration	: 3Hours
Unit-I			08 Hrs
Structural Health: Factors affecting Health of Structures, Causes of Distress, Regular Maintenance, Importance of maintenance			
Structural Health Monitoring: Concepts, Various Measures, Analysis of behavior of structures using remote structural health monitoring, Structural Safety in Alteration.			
Unit – II			08 Hrs
Materials: Piezo–electric materials and other smart materials, electro–mechanical impedance (EMI) technique, adaptations of EMI technique, Sensor technologies used in SHM			
Structural Audit: Assessment of Health of Structure, Collapse and Investigation, Investigation Management, SHM Procedures, SHM using Artificial Intelligence			
Unit –III			08 Hrs
Static Field Testing: Types of Static Tests, Simulation and Loading Methods, sensor systems and hardware requirements, Static Response Measurement.			
Unit –IV			08 Hrs
Dynamic Field Testing: Types of Dynamic Field Test, Stress History Data, Dynamic Response Methods, Hardware for Remote Data Acquisition Systems, Remote Structural Health Monitoring.			
Unit –V			08 Hrs
Remote Structural Health Monitoring: Introduction, Hardware for Remote Data Acquisition Systems, Advantages, Case studies on conventional and Remote structural health monitoring			
Case studies: Structural Health Monitoring of Bridges, Buildings, Dams, Applications of SHM in offshore Structures- Methods used for non-destructive evaluation (NDE) and health monitoring of structural components			
Course Outcomes: After completing the course, the students will be able to:-			
CO1	Diagnose the distress in the structure understanding the causes and factors.		
CO2	Understand safety aspects, components and materials used in Structural Health Monitoring.		
CO3	Assess the health of structure using static field methods and dynamic field tests.		
CO4	Analyse behavior of structures using remote structural health monitoring

WEARABLE ELECTRONICS (Category: Institutional Electives-II) (Group I) Theory						
Course Code	:	21EC751G		CIE	:	100 Marks
Credits: L:T:P	:	3:0:0		SEE	:	100 Marks
Total Hours	:	39L		SEE Duration	:	03 Hours
Course Learning Objectives: The students will be able to						
1	Explain the types and application of wearable sensor.					
2	Describe the working of sensitivity, conductivity and energy generation in wearable devices.					
3	Explain the various facets of wearable application, advantage & challenges.					
4	Understand different testing and calibration in wearable devices.					

Unit-I	
Introduction: world of wearable (WOW), Role of wearable, The Emerging Concept of Big Data, The Ecosystem Enabling Digital Life, Smart Mobile Communication Devices, Attributes of Wearables, Taxonomy for Wearables, Advancements in Wearables, Textiles and Clothing, Applications of Wearables. [Ref 1: Chapter 1.1]	
Unit – II	
Wearable Bio and Chemical Sensors: Introduction, System Design, Microneedle Technology, Sampling Gases, Types of Sensors, Challenges in Chemical Biochemical Sensing, Sensor Stability, Interface with the Body, Textile Integration, Power Requirements, Applications: Personal Health, Sports Performance, Safety and Security, Case studies. [Ref 1: Chapter 2.1]	
Unit –III	
Wearable Textile: Conductive fibres for electronic textiles: an overview, Types of conductive fibre, Applications of conductive fibres, Bulk conductive polymer yarn, Bulk conductive polymer yarn, Techniques for processing CPYs, Wet-spinning technique, Electrospinning technique, case studies, Hands on project in wearable textile: Solar Backpack, LED Matrix wallet. [Ref 2: Chapter 1,2] & [Ref 3: Chapter 6,9]	
Unit –IV	
Energy Harvesting Systems: Introduction, Energy Harvesting from Temperature Gradient, Thermoelectric Generators, Dc-Dc Converter Topologies, Dc-Dc Converter Design for Ultra-Low Input Voltages, Energy Harvesting from Foot Motion, Ac-Dc Converters, Wireless Energy Transmission, Energy Harvesting from Light, Case studies. [Ref 1: Chapter 4.1]	
Unit –V	
Wearable antennas for communication systems: Introduction, Background of textile antennas, Design rules for embroidered antennas, Integration of embroidered textile surfaces onto polymer substrates, Characterizations of embroidered conductive, textiles at radio frequencies, RF performance of embroidered textile antennas, Applications of embroidered antennas. [Ref 2: Chapter 10]	

Course Outcomes: After completing the course, the students will be able to	
CO1:	Describe the different types and wearable sensors, textile, energy harvesting systems and antenna
CO2:	Analysis measurable quantity and working of wearable electronic devices.
CO3:	Determine & interpret the outcome of the wearable devices and solve the design challenges
CO4:	Analyse and Evaluate the wearable device output parameter in real time scenario or given problem statement.

E-MOBILITY						
Category: Institutional Electives-II (Group I)						
(Theory)						
Course Code	:	21EE75IH		CIE	:	100Marks
Credits: L:T:P	:	3:0:0		SEE	:	100 Marks
Total Hours	:	45 L		SEE Duration	:	3 Hours

Unit-I	
<p>E-Mobility: A Brief History of the Electric Powertrain, Energy Sources for Propulsion and Emissions, The Advent of Regulations, Drive Cycles, BEV Fuel Consumption, Range, Carbon Emissions for Conventional and Electric Powertrains, An Overview of Conventional, Battery, Hybrid, and Fuel Cell Electric Systems, A Comparison of Automotive and Other Transportation Technologies. Vehicle Dynamics: Vehicle Load Forces, Vehicle Acceleration, Simple Drive Cycle for Vehicle Comparisons</p>	

Unit – II	
<p>Batteries: Batteries Types and Battery Pack, Lifetime and Sizing Considerations, Battery Charging, Protection, and Management Systems, Battery Models, Determining the Cell/Pack Voltage for a Given Output\Input Power, Cell Energy and Discharge Rate.</p> <p>Battery Charging: Basic Requirements for Charging System, Charger Architectures, Grid Voltages, Frequencies, and Wiring, Charging Standards and Technologies, SAE J1772, Wireless Charging, The Boost Converter for Power Factor Correction.</p>	

Unit –III	
<p>Battery Management System: BMS Definition, Li-Ion Cells, Li-Ion BMSs, Li-Ion Batteries, BMS Options: Functionality, CCCV Chargers, Regulators, Balancers, Protectors, Functionality Comparison, Technology, Topology. Measurement: Voltage, Temperature, Current, Management: Protection, Thermal Management, Balancing, Distributed Charging, Evaluation, External Communication: Dedicated analog and digital wires.</p>	

Unit –IV	
<p>Electric Drive train: Overview of Electric Machines, classification of electric machines used in automobile drivetrains, modelling of electric machines, Power Electronics, controlling electric machines, electric machine and power electronics integration Constraints.</p> <p>Energy Management Strategies: Introduction to energy management strategies used in hybrid and electric vehicles, Classification of different energy management strategies, Comparison of different energy management strategies and implementation issues of energy management strategies.</p>	

Unit –V	
<p>Charger Classification and standards: classification based on charging, levels (region-wise), modes, plug types, standards related to: connectors, communication, supply equipments, EMI/EMC.</p> <p>Sizing the drive system: Matching the electric machine and the internal combustion engine (ICE), Sizing the propulsion motor, sizing the power electronics, selecting the energy storage technology, Communications, supporting subsystems</p> <p>Communications, Supporting Subsystems: In vehicle networks- CAN</p>	

Course Outcomes: After completing the course, the students will be able to: -	
CO 1	Explain the basics of electric and hybrid electric vehicles, their architecture, technologies and modelling.
CO 2	Discuss and implement different energy storage technologies used for electric vehicles and their management system.
CO 3	Analyze various electric drives and its integration techniques with Power electronic circuits suitable for electric vehicles.
CO 4	Design EV Simulator for performance evaluation and system optimization and understand the requirement for suitable EV infrastructure.

Reference Books

Semester: VII						
PROGRAMMABLE LOGIC CONTROLLER'S AND APPLICATIONS						
Category: Institutional Electives-II (Group I)						
(Theory)						
Course Code	:	21EI75IJ		CIE	:	100Marks
Credits: L:T:P	:	3:0:0		SEE	:	100 Marks
Total Hours	:	45 L		SEE Duration	:	3 Hours

Unit-I	
Introduction: Introduction to Industrial Automation, Historical background, Different parts and types of Industrial automation, Block diagram of PLC, PLC Versus Other types of Controls, PLC Product Application Ranges, Fixed and Modular I/O Hardware PLC Operation: Binary Data representation, Input and output status files for modular PLC, Addressing concept.	
UNIT II	
PLC Hardware: The I/O section, Discrete I/O Modules, Analog I/O Modules, Special I/O Modules, I/O specifications Input and Output modules: Brief overview of Discrete and Analog input modules, Discrete and TTL/Relay output modules	
Unit –III	
Basics of PLC Programming: Processor memory organization, Program scan, PLC programming languages, Basic Relay Instruction, Bit or relay instructions, NO, NC, One Shot, Output latching software, negated Output and Internal Bit Type instructions, mode of operations	
Unit –IV	
Special programming Instructions: Timer and Counter Instructions: On delay and Off delay and retentive timer instructions, PLC Counter up and down instructions, combining counters and timers. Program Control &Data manipulation Instructions: Data handling instructions, Sequencer instructions, Programming sequence output instructions.	
UNIT V	
SCADA & DCS Building Block of SCADA System, Hardware structure of Remote Terminal Unit, Block diagram of Distributive Control System Case Studies: Bottle filling system, Material Sorter. Elevator, Traffic control, Motor sequencers, Piston extraction and retraction using timers and counters.	

Course Outcomes: After completing the course, the students will be able to: -	
CO1	Understand the basic concepts of PLC's and SCADA techniques.
CO2	Apply the programming concepts to interface peripheral.
CO3	Analyze and evaluate the automation techniques for industrial applications.
CO4	Develop a system for automation application.

Credits: L:T:P	:	3:0:0		SEE	:	100 Marks
TotalHours	:	45 L		SEEDuration	:	3 Hours
Unit-I						9 Hrs
Earth's environment: Atmosphere, ionosphere, Magnetosphere, Van Allen Radiation belts, Interplanetary medium, Solar wind, Solar- Earth Weather Relations. Launch Vehicles: Rocketry, Propellants, Propulsion, Combustion, Solid, Liquid and Cryogenic engines, Control and Guidance system, Ion propulsion and Nuclear Propulsion.						
Unit- II						9Hrs
Satellite Technology: Structural, Mechanical, Thermal, Power control, Telemetry, Telecomm and Quality and Reliability, Payloads, Classification of satellites. Satellite structure: Satellite Communications, Transponders, Satellite antennas.						
Unit-III						9Hrs
Satellite Communications: LEO, MEO and GEO orbits, Altitude and orbit controls, Multiple Access Techniques. Space applications: Telephony, V-SAT, DBS system, Satellite Radio and TV, Tele-Education, Telemedicine, Satellite navigation, GPS.						
Unit-IV						9Hrs
Remote Sensing: Visual bands, Agricultural, Crop vegetation, Forestry, water Resources, Land use, Land mapping, geology, Urban development resource Management, and image processing techniques. Metrology: Weather forecast (Long term and Short term), weather modelling, Cyclone predictions, Disaster and flood warning, rainfall predictions using						
Unit-V						9 Hrs
Space Missions: Technology missions, deep space planetary missions, Lunar missions, zero gravity experiments, space biology and International space Missions. Advanced space systems: Remote sensing cameras, planetary payloads, space shuttle, space station, Interspace communication systems.						

Course Outcomes: After completing the course, the students will be able to	
CO1	Explain various Orbital Parameters, Satellite Link Parameters, Propagation considerations and Radar systems.
CO2	Apply the concepts to determine the parameters of satellite, performance of radar and navigation systems.
CO3	Analyze the design issues of satellite and its subsystems, radars and navigation systems.
CO4	Evaluate the performance of the satellite systems and its parameters, radar and navigation systems

Course Code	:	21IS75IL		CIE	:	100 Marks
Credits: L:T:P	:	3:0:0		SEE	:	100 Marks
TotalHours	:	45L		SEE Duration	:	03 Hours

Prerequisite: - Programming in Java.

Unit-I	09 Hrs
Introduction: Smart phone operating systems and smart phones applications. Introduction to Android, Installing Android Studio, creating an Android app project, deploying the app to the emulator and a device. UI Design: Building a layout with UI elements, Layouts, Views and Resources, Text and Scrolling Views. Activities and Intents, The Activity Lifecycle, Managing State, Activities and Implicit Intents, The Android Studio Debugger, Testing the Android app, The Android Support Library.	
Unit-II	09 Hrs
User experience: User interaction, User Input Controls, Menus, Screen Navigation, RecyclerView, Delightful user experience, Drawables, Styles, and Themes, Material Design, Testing app UI, Testing the User Interface	
Unit-III	09 Hrs
Working in the background: Async Task and Async Task Loader, Connect to the Internet, Broadcast Receivers and Services. Scheduling and optimizing background tasks – Notifications, Scheduling Alarms, and Transferring Data Efficiently	
Unit-IV	09 Hrs
All about data: Preferences and Settings, Storing Data, Shared Preferences. Storing data using SQLite, SQLite Database. Sharing data with content providers. Advanced Android Programming: Internet, Entertainment and Services. Displaying web pages and maps, communicating with SMS and emails, Sensors.	
Unit-V	09 Hrs
Hardware Support & devices: Permissions and Libraries, Performance and Security. Fire base and AdMob, Publish and Polish, Multiple Form Factors, Using Google Services.	

Course Outcomes: After completing the course, the students will be able to	
CO1:	Comprehend the basic features of android platform and the application development process. Acquire familiarity with basic building blocks of Android application and its architecture.
CO2:	Apply and explore the basic framework, usage of SDK to build Android applications incorporating Android features in developing mobile applications.
CO3:	Demonstrate proficiency in coding on a mobile programming platform using advanced Android technologies, handle security issues, rich graphics interfaces, using debugging and troubleshooting tools.
CO4:	Create innovative applications, understand the economics and features of the app marketplace by offering the applications for download.

PROJECT MANAGEMENT					
Category: Institutional Electives-II (Group I)					
(Theory)					
Course Code	:	21IM75IM		CIE	: 100Marks
Credits: L:T:P	:	3:0:0		SEE	: 100 Marks
Total Hours	:	45 L		SEE Duration	: 3 Hours

Unit-I					06 Hrs
Introduction: Project, Project management, relationships among portfolio management, program management, project management, and organizational project management, relationship between project management, operations management and organizational strategy, business value, role of the project manager, project management body of knowledge.					
Generation and Screening of Project Ideas: Generation of ideas, monitoring the environment, corporate appraisal, scouting for project ideas, preliminary screening, project rating index, sources of positive net present value.					
Unit – II					09 Hrs
Project Scope Management: Project scope management, collect requirements define scope, create WBS, validate scope, control scope.					
Organizational influences & Project life cycle: Organizational influences on project management, project state holders & governance, project team, project life cycle.					
Unit –III					09 Hrs
Project Integration Management: Develop project charter, develop project management plan, direct & manage project work, monitor & control project work, perform integrated change control, close project or phase.					
Project Quality management: Plan quality management, perform quality assurance, control quality.					
Unit –IV					09 Hrs
Project Risk Management: Plan risk management, identify risks, perform qualitative risk analysis, perform quantitative risk analysis, plan risk resources, control risk.					
Project Scheduling: Project implementation scheduling, Effective time management, Different scheduling techniques, Resources allocation method, PLM concepts. Project life cycle costing.					
Unit –V					09 Hrs
Tools & Techniques of Project Management: Bar (GANNT) chart, bar chart for combined activities, logic diagrams and networks, Project evaluation and review Techniques (PERT) Planning, Computerized project management.					

Course Outcomes: After completing the course, the students will be able to: -	
CO 1	Understand the fundamental concepts of project management and its relationship with organizational strategy, operations management, and business value.
CO 2	Apply techniques for generating, screening, and evaluating project ideas, considering factors such as net present value and project rating index.
CO 3	Create Work Breakdown Structures (WBS), utilization of PERT/CPM for developing project schedule, alongside requirement collection, scope definition, scope validation, and scope control.
CO 4	Develop skills in project integration, quality, risk management, and scheduling, enabling effective project planning, execution, monitoring, and control.

SUPPLY CHAIN ANALYTICS				
Category: Institutional Electives-II (Group I)				
(Theory)				
Course Code	:	21IM75IN	CIE	: 100 Marks
Credits: L:T:P	:	3:0:0	SEE	: 100 Marks
Total Hours	:	42L	SEE Duration	: 03 Hours
Unit-I				06 Hrs
Introduction: Supply Chain, Supply Chain Management, Business Analytics, Supply Chain Analytics. Data-Driven Supply Chains: Data and its value in SCM, Data Source in Supply Chains, Big Data, Introduction to Python (Concepts only).				
Unit – II				08 Hrs
Data Manipulation: Data Manipulation, Data Loading and Writing, Data Indexing and Selection, Data Merging and Combination, Data Cleaning and Preparation, Data Computation and Aggregation, Working with Text and Datetime Data (Concepts only).				
Unit –III				08 Hrs
Customer Management: Customers in Supply Chains, Understanding Customers, Building a Customer-Centric SC, Cohort Analysis, RFM Analysis, Clustering Algorithms (Concepts only). Supply Management: Procurement in Supply Chains, Supplier Selection, Supplier Evaluation, Supplier Relationship Management, Supply Risk Management, Regression Algorithms (Concepts only).				
Unit –IV				08 Hrs
Warehouse and Inventory Management: Warehouse Management, Inventory Management, Warehouse Optimization, Classification Algorithms (Concepts only). Demand Management: Demand Management, Demand Forecasting, Time Series Forecasting, Machine Learning Methods (Concepts only).				
Unit –V				06 Hrs
Logistics Management: Logistics Management, Modes of Transport in Logistics, Logistics Service Providers, Global Logistics Management, Logistics Network Design, Route Optimization (Concepts only).				
Experiential Learning: Data Visualization: Data Visualization in Python, Creating a Figure in Python, Formatting a Figure, Plotting Simple Charts, Plotting with Seaborn, Geographic Mapping with Basemap, Visualizing Starbucks Locations. Python programming for various algorithms applied to supply chain processes and modelling included in the five units of the syllabus.				

Course Outcomes: After completing the course, the students will be able to know	
CO1:	Understand supply chain concepts, systemic and strategic role of SCM in global competitive environment.
CO2:	Evaluate alternative supply and distribution network structures using optimization models.
CO3:	Develop optimal sourcing and inventory policies in the supply chain context.

CO4:	Select appropriate information technology frameworks for managing supply chain processes.

NUCLEAR ENGINEERING					
Category: Institutional Electives-II (Group I)					
(Theory)					
Course Code	:	21ME75IO		CIE	: 100 Marks
Credits: L:T:P	:	3:0:0		SEE	: 100 Marks
Total Hours	:	45		SEE Duration	: 3 Hours
Prerequisites: Basic knowledge of Physics and Mathematics at the college level					
Unit-I					09 hrs
Introduction to Nuclear Engineering					
Historical Development of Nuclear Engineering, Overview of Nuclear Energy Applications, Nuclear Physics Fundamentals: Atomic Structure and Nuclear Models: Nuclear Forces and Interactions, Nuclear Reactions and Cross-sections, Types of Nuclear Reactions: Fission and Fusion Reactions, Neutron-Induced Reactions, Applications in Power Generation and Industry, Nuclear Power Generation: Basic Principles of Nuclear Reactors, Types of Nuclear Reactors, Radiation Basics, Types of Radiation (Alpha, Beta, Gamma), Radioactive Decay and Decay Chains, Units of Radioactivity and Radiation Measurement					
Unit-2					10 hrs
Nuclear Reactors					
Types of Nuclear Reactors, Reactor Components and Their Functions, Nuclear Reactor Kinetics and Control, Neutron Interactions and Transport, Neutron Moderation and Absorption, Reactor Kinetics and Dynamics, Specific Types of Nuclear Reactor, Light Water Reactors: Pressurized Water Reactor (PWR) and Boiling Water Reactor (BWR), Heavy Water Reactors: Canada Deuterium Uranium (CANDU), Gas-Cooled Reactors: Gas-Cooled Reactor and Fast Breeder Reactor (and HTGR), Liquid Metal-Cooled Reactors (LMFR).					
Unit - 3					10 hrs
Nuclear Fuel Cycle					
Introduction to the Nuclear Fuel Cycle: Importance of Fuel Cycle Management, Uranium Mining and Ore Processing, Types of Uranium Deposits, Mining Methods and Processing Techniques, Environmental and Health Considerations, Uranium Enrichment and Fuel Fabrication: Enrichment Technologies (Centrifugation, Gaseous Diffusion), Fuel Fabrication Processes, Quality Control and Safety Measures, Nuclear Reactors and Fuel Utilization: Fuel Assembly Design and Composition.					
Unit-4					08 hrs
Radiation Protection and Safety:					
Basics of Ionizing Radiation, Types of Ionizing Radiation, Interaction of Radiation with Matter, Units of Radiation Measurement, Biological Effects of Radiation, Deterministic and Stochastic Effects, Acute and Chronic Radiation Effects, Risk Assessment and Dose, Response Relationships, Radiation Dose Assessment: External and Internal Dosimetry, Radiation Monitoring Devices, Occupational and Public Dose Limits, Radiation Safety Measures:, Emergency Response and Contingency Planning: Emergency Procedures and Drills, Communication Strategies During Radiation Incidents.					
Unit-5					08 hrs
Environmental and Societal Aspects					
Environmental Impact Assessment: Life Cycle Analysis of Nuclear Energy, Impact of Uranium Mining and Fuel Cycle Operations, Radioactive Waste Management and Environmental Considerations, Societal Perceptions and Attitudes, Factors Influencing Public Perception, Ethical Considerations: Principles of Ethics in Nuclear Engineering, Nuclear Energy and Social Justice, Ethical Dilemmas in Nuclear Technology, Nuclear Energy and Climate Change: Carbon Footprint of Nuclear Power.					

Course Outcomes:	
CO1	Understand nuclear physics: grasp atomic structure, nuclear models, and the forces driving nuclear interactions
CO2	Evaluate various reactor types and advanced concepts, applying kinetics and controls to ensure safe and efficient nuclear reactor analysis and design.
CO3	Examine the nuclear fuel cycle from mining to recycling, assess environmental impact and safety, and promote responsible, sustainable practices throughout.
CO4	Apply ionizing radiation principles for safety measures; integrate communication and regulatory compliance into emergency response plans effectively.

<p>Psycholinguistics:Definition, characteristics of language, theories - Chomsky. Structure of Language (Properties), Stages in Language Development, Neurological Language. Comprehension and Production. Bilingualism, Multilingualism, and Learning disability</p>		
Unit-V		08Hrs
<p>Cognitive Neuroscience: Definition and emergence of cognitive neuroscience, Scope of Neuroscience, structure and functions of Brain, Brain Plasticity, Intelligence and Neuroscience. Meta-cognitive strategies. Artificial intelligence, Robotics, Models on Information Processing.</p>		

CourseOutcomes:Aftercompletingthecourse,thestudentwillbeableto:-	
CO1	Describe the basic theories, principles, and concepts of cognitive psychology as they relate to behaviours and mental processes.
CO2	Apply learning and compare and contrast the factors that cognitive, behavioural, and Humanistic theorists believe influence the learning process.
CO3	Develop understanding of psychological attributes such as reasoning, problem solving creativity, resulting in their enhancement and apply effective strategies for self-management and self-improvement.
CO4	Apply the theories into their own and others' lives in order to better understand their personalities and experiences.

RUBRIC FOR THE CONTINUOUS INTERNAL EVALUATION (THEORY)		
#	COMPONENTS	MARKS
1.	QUIZZES: Quizzes will be conducted in online/offline mode. TWO QUIZZES will be conducted & Each Quiz will be evaluated for 10 Marks. THE SUM OF TWO QUIZZES WILL BE THE FINAL QUIZ MARKS.	20
2.	TESTS: Students will be evaluated in test, descriptive questions with different complexity levels (Revised Bloom's Taxonomy Levels: Remembering, Understanding, Applying, Analyzing, Evaluating, and Creating). THREE tests will be conducted. Each test will be evaluated for 50 Marks, adding up to 150 Marks. FINAL TEST MARKS WILL BE REDUCED TO 40 MARKS.	40
3.	EXPERIENTIAL LEARNING: Students will be evaluated for their creativity and practical implementation of the problem. Case study-based teaching learning (10), Program specific requirements (10), Video based seminar/presentation/demonstration (20) ADDING UP TO 40 MARKS.	40
MAXIMUM MARKS FOR THE CIET THEORY		100

Semester: VII						
PRINCIPLES AND PRACTICES OF CYBER LAW						
Category: Institutional Electives-II (Group I)						
(Theory)						
Course Code	:	21HS75IR		CIE	:	100
Credits: L:T:P	:	03		SEE	:	100
Total Hours	:	03		SEE Duration	:	3 Hours

Unit-I					08 Hrs
Introduction - Origin and meaning of Cyberspace; Introduction to Indian Cyber Law, Distinction between Cyber Crime and Conventional Crime, Cyber Criminals and their Objectives, Kinds of Cyber Crime & Cyber Threats, challenges of cybercrimes, Overview of General Laws and Procedures in India.					
Cyber Jurisdiction - Concept of Jurisdiction, Jurisdiction in Cyberspace, Issues and concerns of Cyberspace Jurisdiction in India, International position of Cyberspace Jurisdiction, Judicial interpretation of Cyberspace Jurisdiction.					
Activities:Case Studies and Practical Applications					
Unit – II					08 Hrs
Information Technology Act: A brief overview of Information Technology Act 2000, IT Act 2000 vs. IT Amendment Act 2008, Relevant provisions from Indian Penal Code, Indian Evidence Act, Bankers Book Evidence Act, Reserve Bank of India Act, etc.					
Electronic Signature and Digital Signature - Meaning & Concept of Relevance of Signature, Handwritten signature vs Digital Signature, Technological Advancement and development of signature, Digital Signature: IT Act, 2000, Cryptography, Public Key and Private Key, Public Key Infrastructure Electronic Signature vs. Digital Signature, E-Commerce under IT Act 2000, Issues and challenges of E-Commerce.					
Activities:Case Studies and Practical Applications					
Unit –III					08 Hrs
Data Protection and Privacy Concerns in Cyberspace - Need to protect data in cyberspace, Types of data, Legal framework of data protection, Data protection bill -an overview, GDPR, Concept of privacy, Privacy concerns of cyberspace, Constitutional framework of privacy, Judicial interpretation of privacy in India.					
Data Privacy and Data Security- Defining data, meta-data, big data, non- personal data. Data protection, Data privacy and data security, Data protection regulations of other countries- General Data Protection Regulations (GDPR),2016 Personal Information Protection and Electronic Documents Act (PIPEDA)., Social media- data privacy and security issues.					
Activities:Case Studies and Practical Applications					
Unit –IV					08 Hrs
IP Protection Issues in Cyberspace					
Copyright Issues in Cyberspace- Copyright infringement in digital environment. Indian legal protection of copyright in cyberspace.					
Trademark Issues in Cyberspace - Domain Name Vs Trademark, Domain Name dispute and Related Laws, Different Form of Domain in Cyberspace.					
Patent Issues in Cyberspace - Legal position on Computer related Patents - Indian Position on Patents.					
Activities:Case Studies and Practical Applications					
Unit –V					07 Hrs
Digital Forensics - Computer Forensics, Mobile Forensics, Forensic Tools ,Anti-Forensics					
Cyber Crime & Criminal Justice Agencies - Cyber Crime Cells, Cyber Crime Appellate- Cyber Crime Investigation, Investigation Procedure - FIR - Charge Sheet					

Course Outcomes: After completing the course, the students will be able to: -	
CO1	Understand the importance of professional practice, Law and Ethics in their personal lives and professional careers.
CO2	Build in Depth Knowledge of Information Technology Act and Legal Frame Work of Right to Privacy, Data Security and Data Protection.
CO3	Identify the bone of contentions of cybercrime investigation techniques, evaluate problem-solving strategies, and develop science-based solutions.
CO4	Develop an Understanding of the Relationship Between E-Commerce and Cyberspace.

Semester: VII				
SUMMER INTERNSHIP				
Course Code	:	21EI76I		CIE : 50 Marks
Credits: L:T:P	:	0:0:2		SEE : 50 Marks
Hours/Week	:	04		SEE Duration : 2 Hours
GUIDELINES				
<ol style="list-style-type: none"> 1. The duration of the internship shall be for a period of 6/8 weeks on full time basis after VI semester final exams and before the commencement of VII semester. 2. The student must submit letters from the industry clearly specifying his / her name and the duration of the internship on the company letter head with authorized signature. 3. Internship must be related to the field of specialization of the respective UG programme in which the student has enrolled. 4. Students undergoing internship training are advised to report their progress and submit periodic progress reports to their respective guides. 5. Students have to present the internship activities carried out to the departmental committee and only upon approval by the committee, the student can proceed to prepare and submit the hard copy of the final internship report. However, interim or periodic reports as required by the industry / organization can be submitted as per the format acceptable to the respective industry / organizations. 6. The reports shall be printed on A4 size with 1.5 spacing and Times New Roman with font size 12, outer cover of the report (wrapper) has to be Ivory color for UG circuit Programs and Light Blue for Non-Circuit Programs. 7. The broad format of the internship final report shall be as follows <ul style="list-style-type: none"> • Cover Page • Certificate from College • Certificate from Industry / Organization • Acknowledgement • Synopsis • Table of Contents • Chapter 1 - Profile of the Organization: Organizational structure, Products, Services, Business Partners, Financials, Manpower, Societal Concerns, Professional Practices, • Chapter 2 - Activities of the Department • Chapter 3 - Tasks Performed: summary of the tasks performed during 8-week period • Chapter 4 – Reflections: Highlight specific technical and soft skills acquired during internship • References & Annexure 				
Course Outcomes:				
After going through the internship the student will be able to:				
CO1: Apply Engineering and Management principles				
CO2: Analyze real-time problems and suggest alternate solutions				
CO3: Communicate effectively and work in teams				
CO4: Imbibe the practice of professional ethics and need for lifelong learning.				
Scheme of Continuous Internal Evaluation (CIE):				

The evaluation committee shall consist of Guide, Professor/Associate Professor and Assistant Professor. The committee shall assess the presentation and the progress reports in two reviews. The evaluation criteria shall be as per the rubrics given below:

Reviews	Activity	Weightage
Review-I	Explanation of the application of engineering knowledge in industries, ability to comprehend the functioning of the organization/ departments.	25 Marks
Review - II	Importance of resource management, environment and sustainability, presentation skills and report writing	25 Marks

Scheme for Semester End Evaluation (SEE):

The SEE examination shall be conducted by an external examiner (domain expert) and an internal examiner. Evaluation shall be done in batches, not exceeding 6 students per batch.

Scheme of Evaluation for SEE	
Particulars	%Marks
Project Synopsis (Initial Writeup)	10%
Project Demo/Presentation	30%
Methodology and Results Discussion	30%
Project Work Report	10%
Viva-voce	20%
Total	100

Semester: VII				
MINOR PROJECT				
Course Code	:	21EI77P		CIE : 50 Marks
Credits: L:T:P	:	0:0:2		SEE : 50 Marks
Hours/Week	:	04		SEE Duration : 2 Hours
GUIDELINES				
<p>1. The minor project is to be carried out individually or by a group of students. (maximum of 4 members and minimum of 3 students).</p> <p>2. Each student in a team must contribute equally in the tasks mentioned below.</p> <p>3. Each group has to select a current topic that will use the technical knowledge of their program of study after detailed literature survey.</p> <p>4. The project should result in system/module which can be demonstrated, using the available resources in the college.</p> <p>5. The CIE evaluation will be done by the committee constituted by the department. The committee shall consist of respective guide & two senior faculty members as examiners. The evaluation will be done for each student separately.</p> <p>6. The final copy of the report should be submitted after incorporation of any modifications suggested by the evaluation committee.</p>				
<u>The minor-project tasks would involve:</u>				
<ol style="list-style-type: none"> 1. Carrying out the Literature Survey of the topic chosen. 2. Understand the requirements specification of the minor-project. 3. Detail the design concepts as applicable through appropriate functional block diagrams. 4. Commence implementation of the methodology after approval by the faculty. 5. Conduct thorough testing of all the modules developed and carry out integration testing. 6. Demonstrate the functioning of the minor project along with presentations of the same. 7. Prepare a project report covering all the above phases with proper inference to the results obtained. 8. Conclusion and Future Enhancements must also be included in the report. 				
The students are required to submit the report in the prescribed format provided by the department.				
Course Outcomes:				
After going through the minor project the student will be able to:				
CO1: Interpreting and implementing the project in the chosen domain by applying the concepts learnt.				
CO2: The course will facilitate effective participation by the student in team work and development of communication and presentation skills essential for being part of any of the domains in his / her future career.				
CO3: Applying project life cycle effectively to develop an efficient product.				
CO4: Produce students who would be equipped to pursue higher studies in a specialized area or carry out research work in an industrial environment.				
Scheme of Continuous Internal Evaluation (CIE):				

The evaluation committee shall consist of Guide, Professor/Associate Professor and Assistant Professor. The committee shall assess the presentation and the progress reports in three review phases. The evaluation criteria shall be as per the rubrics given below:

ReviewPhase	Activity	Weightage
Phase-I	Synopsis submission, approval of the selected topic, Problem definition, Literature review, formulation of objectives, methodology	10 Marks
Phase - II	Mid-term evaluation to review the progress of implementation, design, testing and result analysis along with documentation	15 Marks
Phase -III	Submission of report, Final presentation and demonstration	25 Marks

Scheme for Semester End Evaluation (SEE):

The SEE examination shall be conducted by an external examiner (domain expert) and an internal examiner. Evaluation shall be done in batches, not exceeding 6 students per batch.

Scheme of Evaluation for SEE	
Particulars	%Marks
Project Synopsis (Initial Writeup)	10%
Project Demo/Presentation	30%
Methodology and Results Discussion	30%
Project Work Report	10%
Viva-voce	20%
Total	100

Semester: VIII						
MAJOR PROJECT						
Course Code	:	21EI81P		CIE	:	100 Marks
Credits: L:T:P	:	0:0:12		SEE	:	100 Marks
Hours/Week	:	24		SEE Duration	:	03 Hours
GUIDELINES						
<ol style="list-style-type: none"> 1. The project topic, title and synopsis have to be finalized and submitted to their respective internal guide(s) before the beginning of the 8th semester. 2. The detailed Synopsis (approved by the department Project Review Committee) has to be submitted during the 1st week after the commencement of 8th semester. 						
<u>Batch Formation:</u>						
<ul style="list-style-type: none"> • Students are free to choose their project partners from within the program or any other program. • Each student in the team must contribute towards the successful completion of the project. • The project may be carried out In-house / Industry / R & D Institution. The project work is to be carried out by a team of two to four students, in exceptional cases where a student is placed in a company and offered an internship through the competitive process or student is selected for internship at national or international level through competitive process, the student can work independently. • The students are allowed to do either a project for full 5 days in the industry or full 5 days in the college. • In case the project work is carried out outside Bengaluru, such students must be available during Project Evaluation process scheduled by the respective departments and they must also interact with their guide regularly through Email / Webinar / Skype etc. 						
<u>Project Topic Selection:</u>						
<p>The topics of the project work must be in the field of respective program areas or in line with CoE's (Centre of Excellence) identified by the college or List of project areas as given by industry/Faculty. The projects as far as possible should have societal relevance with focus on sustainability.</p> <p>Students can select courses in NPTEL from the discipline of Humanities and Social Sciences, Management, Multidisciplinary and Design Engineering. The course chosen could be either of 4w/8w/12w duration. The students need to enrol for a course, register for the exam and submit the e-certificate to the department, as and when it is released by NPTEL. The same will be considered as one of the components during project evaluation of phase 2 and phase 5.</p>						
<u>Project Evaluation:</u>						
<ul style="list-style-type: none"> • Continuous monitoring of project work will be carried out and cumulative evaluation will be done. • The students are required to meet their internal guides once in a week to report their progress in project work. • Weekly Activity Report (WAR) has to be maintained in the form of a diary by the project batch and the same has to be discussed with the Internal Guide regularly. • In case of Industry project, during the course of project work, the internal guides will have continuous interaction with external guides and will visit the industry at least twice during the project period. 						

- For CIE assessment the project groups must give a final seminar with the draft copy of the project report.
- The presentation by each group will be for 20-30 minutes and every member of the team needs to justify the contributions to the project.
- The project team is required to submit Hard copies of the detailed Project Report in the prescribed format to the department.
- For CIE 50% weightage should be given to the project guide and 50% weightage to the project evaluation committee.
- Before the final evaluations the project group is required to produce a No dues certificate from Industry, Central Library and Department.

Course Outcomes:

After going through the major project the student will be able to:

CO1: Apply knowledge of mathematics, science and engineering to solve respective engineering domain problems.

CO2: Design, develop, present and document innovative/multidisciplinary modules for a complete engineering system.

CO3: Use modern engineering tools, software and equipment to solve problem and engage in life-long learning to follow technological developments.

CO4: Function effectively as an individual, or leader in diverse teams, with the understanding of professional ethics and responsibilities.

Scheme of Continuous Internal Evaluation (CIE):

The following are the weightings given for the various stages of the project.

1.Selection of the topic and formulation of objectives	10%
2.Design and Development of Project methodology	25%
3.Execution of Project	25%
4.Presentation,Demonstration and Results Discussion	30%
5.Report Writing & Publication	10%

Scheme for Semester End Evaluation (SEE):

The following are the weightages given during Viva Examination.

1.Written presentation of synopsis	10%
2.Presentation/Demonstration of the project	30%
3.Methodology and Experimental Results &Discussion	30%
4.Report	10%
5.VivaVoce	20%

Calendar of Events for the Project Work:

Week	Event
Beginning of 7 th Semester	Formation of group and approval by the department committee.
7 th Semester	Problem selection and literature survey
Last two weeks of 7 th Semester	Finalization of project and guide allotment
II Week of 8 th Semester	Synopsis submission and preliminary seminar
III Week	First visit of the internal guides to industry(In case of project being carried out In industry)

III to VI Week	Design and development of project methodology
VII to IX Week	Implementation of the project
X Week	Submission of draft copy of the project report
XI and XII Week	Second visit by guide to industry for demonstration. Final seminar by Department project Committee and guide for internal assessment. Finalization of CIE.

Curriculum Design Process

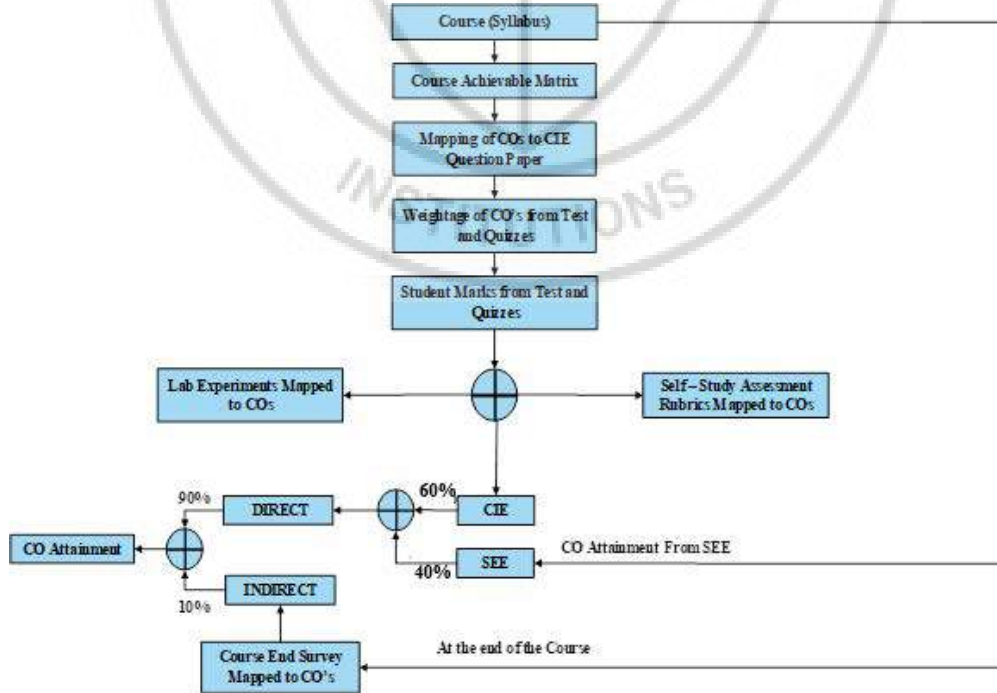

Academic Planning and Implementation

Process For Course Outcome Attainment

Final CO Attainment Process

Program Outcome Attainment Process

KNOWLEDGE & ATTITUDE PROFILE

- **WK1:** A systematic, theory-based understanding of the natural sciences applicable to the discipline and awareness of relevant social sciences.
- **WK2:** Conceptually-based mathematics, numerical analysis, data analysis, statistics and formal aspects of computer and information science to support detailed analysis and modelling applicable to the discipline.
- **WK3:** A systematic, theory-based formulation of engineering fundamentals required in the engineering discipline.
- **WK4:** Engineering specialist knowledge that provides theoretical frameworks and bodies of knowledge for the accepted practice areas in the engineering discipline; much is at the forefront of the discipline.
- **WK5:** Knowledge, including efficient resource use, environmental impacts, whole-life cost, re-use of resources, net zero carbon, and similar concepts, that supports engineering design and operations in a practice area.
- **WK6:** Knowledge of engineering practice (technology) in the practice areas in the engineering discipline.
- **WK7:** Knowledge of the role of engineering in society and identified issues in engineering practice in the discipline, such as the professional responsibility of an engineer to public safety and sustainable development.
- **WK8:** Engagement with selected knowledge in the current research literature of the discipline, awareness of the power of critical thinking and creative approaches to evaluate emerging issues.
- **WK9:** Ethics, inclusive behaviour and conduct. Knowledge of professional ethics, responsibilities, and norms of engineering practice. Awareness of the need for diversity by reason of ethnicity, gender, age, physical ability etc. with mutual understanding and respect, and of inclusive attitudes.

PROGRAM OUTCOMES (POs)

- ❖ **PO1:** Engineering Knowledge: Apply knowledge of mathematics, natural science, computing, engineering fundamentals and an engineering specialization as specified in WK1 to WK4 respectively to develop to the solution of complex engineering problems.
- ❖ **PO2:** Problem Analysis: Identify, formulate, review research literature and analyze complex engineering problems reaching substantiated conclusions with consideration for sustainable development. (WK1 to WK4)
- ❖ **PO3:** Design/Development of Solutions: Design creative solutions for complex engineering problems and design/develop systems/components/processes to meet identified needs with consideration for the public health and safety, whole-life cost, net zero carbon, culture, society and environment as required. (WK5)
- ❖ **PO4:** Conduct Investigations of Complex Problems: Conduct investigations of complex engineering problems using research-based knowledge including design of experiments, modelling, analysis & interpretation of data to provide valid conclusions. (WK8).
- ❖ **PO5:** Engineering Tool Usage: Create, select and apply appropriate techniques, resources and modern engineering & IT tools, including prediction and modelling recognizing their limitations to solve complex engineering problems. (WK2 and WK6)
- ❖ **PO6:** The Engineer and The World: Analyze and evaluate societal and environmental aspects while solving complex engineering problems for its impact on sustainability with reference to economy, health, safety, legal framework, culture and environment. (WK1, WK5, and WK7).
- ❖ **PO7:** Ethics: Apply ethical principles and commit to professional ethics, human values, diversity and inclusion; adhere to national & international laws. (WK9)
- ❖ **PO8:** Individual and Collaborative Team work: Function effectively as an individual, and as a member or leader in diverse/multi-disciplinary teams.
- ❖ **PO9:** Communication: Communicate effectively and inclusively within the community and society at large, such as being able to comprehend and write effective reports and design documentation, make effective presentations considering cultural, language, and learning differences
- ❖ **PO10:** Project Management and Finance: Apply knowledge and understanding of engineering management principles and economic decision-making and apply these to one's own work, as a member and leader in a team, and to manage projects and in multidisciplinary environments.
- ❖ **PO11:** Life-Long Learning: Recognize the need for, and have the preparation and ability for i) independent and life-long learning ii) adaptability to new and emerging technologies and iii) critical thinking in the broadest context of technological change. (WK8)

INNOVATIVE TEAMS OF RVCE

Ashwa Mobility Foundation (AMF): Designs and fabricates Formula-themed race cars and mobility solutions to address urban transportation issues.

Astra Robotics Team: Focuses on designing and building application-specific robots.

Coding Club: Helps students gain coding skills and succeed in competitions like GSoC and ACM-ICPC.

Entrepreneurship Development Cell (E-Cell): Promotes entrepreneurship through workshops, speaker sessions, and mentoring for startups.

Frequency Club Team: Works on software and hardware, emphasizing AI and Machine Learning.

Team Garuda: Develops a supermileage urban concept electric car and E-mobility products.

Team Jatayu: Builds low-cost UAVs with autonomous capabilities for various tasks.

Solar Car Team: Aims to create a solar electric vehicle for sustainable transportation.

Team Antariksh: Focuses on space technology and the development of operational rockets.

Team Chimera: Builds a Formula Electric Car through R&D in E-Mobility.

Helios Racing Team: Designs and tests All-Terrain Vehicles, participating in SAE's BAJA competitions.

Team Hydra: Develops autonomous underwater vehicles for tasks like water purification.

Team Krushi: Creates low-cost farming equipment to assist farmers in cultivation and harvesting.

Team Vyoma: Designs and tests radio-controlled aircraft and UAVs.

Team Dhruva: Engages in astronomy-related activities and collaborates on projects with organizations like ICTS and IIA.

Ham Club: Promotes Amateur Radio and explores technical innovations in communications, especially for disaster response.

Cultural Activity Teams

1. AALAP (Music club)
2. DEBSOC (Debating society)
3. CARV (Dramatics club)
4. FOOTPRINTS (Dance club)
5. QUIZCORP (Quizzing society)
6. ROTARACT (Social welfare club)
7. RAAG (Youth club)
8. EVOKE (Fashion team)
9. f/6.3 (Photography club)
10. CARV ACCESS (Film-making)

NSS of RVCE

NCC of RVCE

VISION

Leadership in Quality Technical Education, Interdisciplinary Research & Innovation, with a Focus on Sustainable and Inclusive Technology

MISSION

- To deliver outcome based Quality education, emphasizing on experiential learning with the state of the art infrastructure.
- To create a conducive environment for interdisciplinary research and innovation.
- To develop professionals through holistic education focusing on individual growth, discipline, integrity, ethics and social sensitivity.
- To nurture industry-institution collaboration leading to competency enhancement and entrepreneurship.
- To focus on technologies that are sustainable and inclusive, benefiting all sections of the society.

QUALITY POLICY

Achieving Excellence in Technical Education, Research and Consulting through an Outcome Based Curriculum focusing on Continuous Improvement and Innovation by Benchmarking against the global Best Practices.

CORE VALUES

Professionalism, Commitment, Integrity, Team Work, Innovation

RV College of
Engineering®

Mysore Road, RV Vidyaniketan Post,
