About the Conference

Critical thinking is an essential skill that should be investigated in a multifaceted way. It is a highly desirable skillset and plays an important role in education sector and other sectors. It is best conceived to excel and be successful in all walks of life. Students with critical thinking skills become more independent and self-learners. In the context of NEP 2020, Critical Thinking promotes social transformation and diversity in Indian education. This helps teachers to have solid grounding in critical thinking and motivate students with suitable strategies for learning and to align with industry requirements. Critical Thinking enables, one to develop a deep understanding of the core fundamentals and apply these to solve problems in an innovative way in multidisciplinary areas like Science, Engineering, Humanities, Health Care, Research, Education etc., These sectors must be addressed in a best possible way. The two-day National Conference focuses on Critical Thinking in the above niche areas for faculty, students, industry professionals and researchers.

The expected outcomes of the conference are:

- ❖ To promote in defining and advancing the principles and best practices of critical thinking in education and society
- ❖ To enhance teacher's ability to more substantively foster it in the classroom
