DEPARTMENT OF INFORMATION SCIENCE & ENGINEERING

VISION

To be the hub for innovation in Information Science & Engineering through Teaching, Research, Development and Consultancy; thus make the department a global resource center in advanced, sustainable and inclusive

MISSION

1. To enable students to become responsible professionals, strong in fundamentals of information science and engineering through experiential learning

2. To bring research and entrepreneurship into classrooms by continuous design of innovative solutions through research publications and dynamic development-oriented curriculum.

3. To facilitate continuous interaction with the outside world through student internship, faculty consultancy, workshops, faculty development programs, industry collaboration and association with the professional societies.

4. To create a new generation of entrepreneurial problem solvers for a sustainable future through green technology with an emphasis on ethical practices, inclusive societal concerns, and environment

5. To promote teamwork through interdisciplinary projects, co-curricular and social activities.

PROGRAMME OUTCOMES (PO)

M. Tech in **Information Technology** graduates will be able to:

PO1: An ability to independently carry out research /investigation and development work to solve practical problems.

PO2: An ability to write and present a substantial technical report/document.

PO3: Acquire in-depth knowledge of information technology with global perspective, analyse & synthesize with existing and new knowledge to enhance the skills.

PO4: Apply appropriate techniques to use modern engineering & IT tools by analysing its limitations.

PO5: Recognise opportunities and contribute positively to collaborative multidisciplinary scientific research in Information Technology, demonstrate a capacity for self-management and teamwork.

PO6: Demonstrate knowledge and understanding of Information Technology principles & apply the same to one's own work, as a member and leader in a team, manage projects efficiently.

SEMESTER: I						
Course Code	:	MMA211TB	**LINEAR ALGEBRA AND PROBABILITY THEORY**	CIE Marks	:	100
Credits L-T-P	:	3-1-0	*Theory: Common to* *MDC, MCE, MCN, MPE, MSE, MIT*	SEE Marks	:	100
Hours	:	45L+30T+45EL	*(Professional Core Course)*	SEE Duration	:	3 Hours

UNIT – I	**9 Hours**
Vector spaces and Linear Transformations: Vector spaces and subspaces, Linear independence, Basis and dimension, Four fundamental subspaces, Linear transformations, Matrix representation, Rank-nullity theorem.	
UNIT – II	**9 Hours**
Orthogonality and Least square approximations: Orthogonal vectors, orthogonal projections, orthogonal bases, Orthogonal complement subspaces, Gram-Schmidt orthogonalization process, QR factorisation, Least square problems, and application to linear models.	
UNIT – III	**9 Hours**
Symmetric matrices and Quadratic forms: Real symmetric matrices, Eigenvalues and Eigenvectors, Diagonalization, Quadratic forms, constrained optimization, positive definiteness, Singular value decomposition, Principal component analysis.	
UNIT – IV	**9 Hours**
Random variables and Probability Distributions: Random variables-discrete and continuous, probability mass function, probability density function, cumulative distribution function, mean and variance. Discrete distributions - Binomial and Poisson, Continuous distributions – Uniform and Normal.	
UNIT – V	**9 Hours**
Sampling and Inferential statistics: Population and sample, sample mean and sample proportion, central limit theorem, Sampling distributions - Sampling distributions of means, Sampling distributions of proportions. Principles of Statistical Inference, Null and alternative hypothesis, Type I and Type II errors, level of significance, one – tailed and two – tailed tests, z-test, t-test.	

Course Outcomes:

After going through this course the student will be able to:

CO1	:	Explore the fundamental concepts of linear algebra, random variables, probability distributions, sampling, inferential statistics. **(PO1)**
CO2	:	Apply theoretical concepts of linear algebra, discrete and continuous random variables, probability distributions, sampling, inferential statistics to evaluate the problems of engineering applications. **(PO1, PO4)**
CO3	:	Analyze the solution of the engineering problems solved using appropriate techniques of linear algebra, random variables, probability distributions, sampling theory, inferential statistics. **(PO1, PO4, PO5, PO6)**

CO4	:	Enhance the comprehensive understanding of linear algebra, random variables, probability distributions, sampling theory, inferential statistics gained to demonstrate the problems arising in many practical situations. **(PO1, PO4, PO5, PO6)**

3. Introduction to Probability and Statistics for Engineers and Scientists, Sheldon Ross, 5th Edition, 2014, Academic Press, ISBN: 13-978-0123948113.
4. Probability and Statistics for Computer Scientists, Michael Baron, CRC Press, 2nd Edition, 2014, ISBN- 13: 978-1-4822-1410-9.

RUBRIC FOR THE CONTINUOUS INTERNAL EVALUATION (CIE-Theory)

CIE will consist of TWO Quizzes (Q), TWO Tests (T), and ONE Experiential Learning (EL) component **[20 (Q) + 40 (T) + 40 (EL) = 100 marks)**

Sl.No.	COMPONENTS	MARKS
1.	**QUIZZES:** Quizzes will be conducted in online/offline mode. **TWO QUIZZES** will be conducted & each Quiz will be evaluated for 10 marks, and Final Quiz marks adding up to 20 marks. **THE SUM OF TWO QUIZZES WILL BE CONSIDERED AS FINAL QUIZ MARKS.**	**20**
2.	**TESTS:** Students will be evaluated in test consisting of descriptive questions with different complexity levels (Revised Bloom's Taxonomy Levels: Remembering, Understanding, Applying, Analyzing, Evaluating, and Creating). **TWO TESTS** will be conducted. Each test will be evaluated for 50 Marks, adding up to 100 Marks. **FINAL TEST MARKS WILL BE REDUCED TO 40 MARKS.**	**40**
3.	**EXPERIENTIAL LEARNING:** Students will be evaluated for their creativity and practical implementation of the problem. **Phase I (20) & Phase II (20) ADDING UPTO 40 MARKS**.	**40**
	MAXIMUM MARKS FOR THE CIE	**100**

RUBRIC FOR SEMESTER END EXAMINATION (SEE-Theory)

Q.NO.	CONTENTS	MARKS
1 & 2	Unit 1: Question 1 or 2	20
3 & 4	Unit 2: Question 3 or 4	20
5 & 6	Unit 3: Question 5 or 6	20
7 & 8	Unit 4: Question 7 or 8	20
9 & 10	Unit 5: Question 9 or 10	20
	MAXIMUM MARKS FOR THE SEE	**100**

SEMESTER: I						
Course Code	:	MIT412IA	**ALGORITHM DESIGN AND APPLICATIONS**	CIE Marks	:	150
Credits L-T-P	:	3-0-1		SEE Marks	:	150
Hours	:	45L+30P+45EL	(Theory & Practice)	SEE Duration	:	3+3 Hrs

UNIT-I	**9 Hrs**
Analysis Techniques: Growth of Functions- Asymptotic notations, Recurrences relations and solutions, Amortized Analysis- Aggregate analysis, The accounting method, The potential method, Advanced Data structures: Abstract Data Types (ADTs) - Arrays, List, Linked list, Stack, Queue, trees, Hashing. Red Black tree, Trees: 2-3-4 tree.	
UNIT-II	**9 Hrs**
Heaps: Binary Heap, Priority Queues. **Shortest Path Algorithms:** Directed Acyclic Graph; Bellman - Ford Algorithm, Shortest paths in a DAG, Dijkstra's algorithm, Johnson's Algorithm for sparse graphs, Flow networks and Ford- Fulkerson method, Maximum bipartite matching.	
UNIT-III	**9 Hrs**
String-Matching Algorithms: Naïve string Matching, Rabin - Karp algorithm, String matching with finite automata, Number Theoretic Algorithms: Elementary Notions, Chinese Remainder Theorem, RSA Public-Key Cryptosystems.	
UNIT - IV	**9 Hrs**
Dynamic Programming: Matrix-Chain Multiplication, Longest Common Subsequence. Greedy Algorithms: An Activity Selection Problem, A task Scheduling Problem, Computational Geometry: Line-Segment-Properties and Intersection; Finding closest points and Convex-Hull.	
UNIT - V	**9 Hrs**
OpenMP for Parallel Programming: Scope of Variables, The Reduction Clause, The parallel for Directive, Caveats, Data dependences, Finding loop-carried dependences, Loops in OpenMP, Scheduling Loops, The schedule clause, The static schedule type, The dynamic and guided schedule types, The runtime schedule type. The atomic directive, Critical sections and locks, Using locks in the message-passing program, critical directives, atomic directives, or locks. **Parallel Algorithms:** The basics of fork-join parallelism, Parallel matrix multiplication, Parallel merge sort, Parallel Dijkstra shortest paths.	
LABORATORY	
The following programs will be executed on Java/C/C++/Python or any equivalent tool/language by adapting exception handling technique wherever it is suitable **Part-A** 1. Design, develop, and write a program to implement insertion and search operation in a 2-3-4 tree. Determine its complexity. 2.Design, develop, and write a program to implement the Dijkstra's algorithm using Binary heap. Determine its complexity. 3 Design, develop, and write a program to implement to solve string matching problem using naive approach and the Rabin Karp algorithm and compare their complexity. 4. Design, develop, and write a program to implement to solve matrix chain multiplication problem 5. Design and implement RSA public key to decrypt ciphertext **Part-B** Design and Implement Realtime applications using the available data structures and applications	

Course Outcomes: **After going through this course, the student will be able to:**		
CO1	:	Explain the fundamentals of different Data Structures and their applications in various algorithms
CO2	:	Evaluate advanced data structures and algorithms with an emphasis on persistence.
CO3	:	Analyze the impact of Data Structures on algorithms with efficiency as a parameter
CO4	:	Design and implement optimized solutions for real world problems

SEMESTER: I						
Course Code	:	MIT413IA	**IOT APPLICATION DEVELOPMENT**	CIE Marks	:	100
Credits L-T-P	:	3:0:1		SEE Marks	:	100
Hours	:	45L+30P+45EL	*(Professional Core Course with Integrated Lab)*	SEE Duration	:	3+3 Hrs

UNIT-I	**9 Hrs**
Fundamentals of IoT: Introduction, Physical design of IoT, Logical design of IoT, IoT Enabling technologies, IoT Levels and Deployment Templates, , IoT vs M2M. **IoT Systems - Logical Design using Python:** Installing Python, Python Data Types & Data Structures, Functions. Modules, Python Packages of Interest for IoT: JSON, XML, HTTPLib & URLLib, SMTPLib (Text book 1)	
UNIT-II	**9 Hrs**
Basics of Arduino: Introduction to Arduino, Arduino IDE, Basic Commands for Arduino, Play with LED and Arduino, Play with LCD with Arduino. **Basics of Raspberry Pi:** Introduction to Raspberry pi, Installation of NOOBS on SD Card, Installation of Raspbian on SD Card, Terminal Commands, Installation of Libraries on Raspberry Pi, Getting the static IP address of Raspberry Pi, Run a Program on Raspberry Pi, Installing the Remote Desktop Server. (Text book 2)	
UNIT-III	**9 Hrs**
Programming with Raspberry Pi: Controlling LED with Raspberry Pi , Installation of I2C driver on Raspberry Pi, SPI (serial peripheral interface) with Raspberry Pi, Programming a Raspberry Pi, Play with LED and Raspberry Pi, Reading the digital input, Reading an edge triggered input. (Text book 2)	
UNIT - IV	**9 Hrs**
Case Studies Illustrating IoT Design: Home Automation: Smart Lighting, Home Intrusion Detection, Smart Cities: Smart Parking, Smart Environment: Weather Monitoring System, Weather Reporting Bot, Air Pollution Monitoring, Forest Fire Detection, Smart Agriculture. (Text book 1)	
UNIT - V	**9 Hrs**
Connecting to the Cloud: Smart IoT Systems, DHT11 Data Logger with ThingSpeak Server, Ultrasonic Sensor Data Logger with ThingSpeak Server, Air Quality Monitoring System and Data Logger with ThingSpeak Server, Landslide Detection and Disaster Management System, Smart Motion Detector and Upload Image to gmail.com. (Text book 2)	
LABORATORY	**30Hrs**
PART A: Note: The following programs can be executed in Python language. Prerequisities: Installation of following open source softwares is compulsory: 1. Arduino IDE Latest version 2. Putty software for remote connectivity 3. Angry IP scanner 4. VNC Viewer and Server softwares for remote connectivity 5. ThingsSpeak open-source cloud sign up for account creation.	

Application projects to be developed with prototype model as:

1. Design and develop an AI with IoT system for intrusion monitoring in home/office environments using both arduino and Raspberry Pi boards with appropriate sensors deployed.

2. Design and develop an AI-IoT system for traffic monitoring and air pollution measurement with display unit.

3. Design and develop an IoT system for logistics and zero trust inventory management with day today analysis visualization.

4. Design and develop an intelligent agriculture IoT system for monitoring plant growth, soil moisture, pumping water on/off, light detection, disease detection and data visualization.

PART B: Free MooC IoT certifications to be submitted- Min 1 and Max 2.

Course Outcomes:
After going through this course the student will be able to:

CO1	:	Understand the fundamentals of direct integration of the physical world with computer-based systems
CO2	:	Design & Implement solutions for Internet of Things with Raspberry Pi and Arduino through basic knowledge of programming and interfacing of input/output devices.
CO3	:	Apply and analyse the analog & digital data with advanced interfacing techniques
CO4	:	Create visualizations for IoT data captured through real time systems to help decision making systems

SEMESTER: I						
Course Code	:	MCN314A1	**ADVANCED CLOUD COMPUTING AND DISTRIBUTED SYSTEMS**	CIE Marks	:	100
Credits L-T-P	:	3-1-0	*(Theory)*	SEE Marks	:	100
Hours	:	45L+30T+45EL	*Professional Core Courses - (Cluster Elective)- (Group-A)*	SEE Duration	:	3 Hours

UNIT - I — **9 Hours**

Distributed System Models & Cloud Computing:
Technologies for network-based system, System models for distributed & cloud, Cloud Computing in a Nutshell, System Model for Distributed and Cloud Computing, Roots of Cloud Computing, Grid and Cloud, Layers and Types of Clouds, Desired Features of a Cloud

UNIT - II — **9 Hours**

Service Oriented Architecture for Distributed Computing:
Services & SOA, Message Oriented Middleware, Workflow in SOA. Cloud Programming & Software Environments: Features of Cloud & Grid, Parallel & Distributed programming paradigms, Programming support of Google Cloud, Amazon AWS & Azure

UNIT - III — **9 Hours**

Virtual Machines and Virtualization:
Levels of Virtualization, Virtualization structures/Tools and Mechanism, Virtualization of CPU, Memory and I/O Devices, Virtual Clusters and Resources Management, Virtualization Data-Centre Automation

UNIT - IV — **9 Hours**

Virtualization of Cluster and Public Cloud Platforms:
Virtual Machine Migration Services, VM Provisioning and Migration in Action. PUBLIC CLOUD PLATFORMS: GAE, AWS, AND AZURE: Cloud infrastructure, Architecture and Functional modules.

UNIT - V — **9 Hours**

Designing Distributed Systems:
GOOGLE CASE STUDY: Introducing the case study: Google Overall architecture and design philosophy Underlying communication paradigms, Data storage and coordination services Distributed computation services.

Course Outcomes:
After going through this course the student will be able to:

CO1	:	Apply the distributed and cloud computing concepts to solve problems in computing domain.
CO2	:	Analyse various architectures, work flow models and algorithms used to implement cloud and distributed systems.
CO3	:	Design solutions using modern tools to solve applicable problems in cloud and distributed systems.
CO4	:	Demonstrate effective communication , report writing and usage of modern tools for implementing cloud and distributed systems applications

SEMESTER: I						
Course Code	:	MCE314A2	**BLOCKCHAIN TECHNOLOGIES AND APPLICATIONS**	CIE Marks	:	100
Credits L-T-P	:	3-1-0	*(Theory)*	SEE Marks	:	100
Hours	:	45L+30T+45EL	*Professional Core Courses - (Cluster Elective)- (Group-A)*	SEE Duration	:	3 Hours

UNIT - I	**9 Hours**
Introduction to Blockchain Technology: Basic ideas behind block chain, how it is changing the landscape of digitalization, introduction to cryptographic concepts, Hashing, public key cryptosystems, private vs public block chain and use cases, Hash Puzzles Blockchain Fundamentals: Basic architecture of Blockchain, different terminologies associated, Characteristics of Block chain, Types of networks, Introducing Smart contract concept in Blockchain. Components of Blockchain: Core components of Blockchain, Types of Block chains; Blockchain Protocol, Permission & Permission less Block chains	
UNIT - II	**9 Hours**
Smart Contracts: Introduction to Smart Contracts, Structure of Smart Contract, Smart Contract Interaction, Contracts, Patterns and Smart Contracts Examples **Ethereum Blockchain Components:** Introduction to Ethereum Development Tools, Ethereum Clients, Ethereum Languages, Ethereum Wallets, Ethereum Accounts, Ethereum Key pairs, Ethereum Platform	
UNIT - III	**9 Hours**
Bitcoins: Introduction to Bitcoins, Bitcoin : Digital Signature, Digital Keys, Private Keys, Public Keys, Bitcoins Addresses, Bitcoins Transactions, Bitcoins Network, Bitcoins Wallets, Bitcoins Payments, Bitcoins Clients and APIs, Bitcoins Limitation	
UNIT - IV	**9 Hours**
Hyperledgers: Hyperledger Fabric, Saw tooth, Indy, Hyperledger tools Caliper and Hyperledger library Ursa, Blockchain as-a-service deployment model of Hyperledger Cello	
UNIT - V	**9 Hours**
Emerging Trends in Blockchain: Cloud-based block chain, Multi chain, Geth , Stellar , Ripple, R3 Corda, Blockchain API, Blockchain Sandboxes	

Course Outcomes:

After going through this course the student will be able to:

CO1	:	Comprehend the foundational concepts of blockchain technology and its impact on digital transformation
CO2	:	Analyze the fundamental architecture of blockchain, its core components, and the concept of smart contracts
CO3	:	Apply knowledge of Ethereum and Bitcoin ecosystems to develop blockchain-based solutions
CO4	:	Evaluate emerging blockchain platforms and technologies for practical deployment in industries

Course Code	:	MSE314A3	**MICROSERVICES DEVELOPMENT AND APPLICATIONS**	CIE Marks	:	100
Credits L-T-P	:	3:1:0	*(Theory)*	SEE Marks	:	100
Hours	:	45L+30T+45EL	*Professional Core Courses - (Cluster Elective)- (Group-A)*	SEE Duration	:	3 Hours

UNIT - I	**9 Hours**

Toward a Microservices Architecture: What Are Microservices?, Reducing Coordination Costs, Learning by Doing, Decisions, Decisions.
Designing a Microservices Operating Model: Why Teams and People Matter, Introducing Team Topologies, Designing a Microservices Team Topology.
Designing Microservices: The SEED(S) Process: Introducing the Seven Essential Evolutions of Design for Services, Identifying Actors, Identifying Jobs That Actors Have to Do, Discovering Interaction Patterns with Sequence Diagrams, Deriving Actions and Queries from JTBDs, Describing Each Query and Action as a Specification with an Open Standard, Getting Feedback on the API Specification, Implementing Microservices, Microservices Versus APIs.

UNIT - II	**9 Hours**

Rightsizing Your Microservices: Finding Service Boundaries: Why Boundaries Matter, When They Matter, and How to Find Them, Domain-Driven Design and Microservice Boundaries, Introduction to Event Storming, Introducing the Universal Sizing Formula.
Dealing with the Data: Independent Deployability and Data Sharing, Microservices Embed Their Data, Event Sourcing and CQRS, Event Sourcing and CQRS Beyond Microservices.

UNIT - III	**9 Hours**

Building an Infrastructure Pipeline: DevOps Principles and Practices, Setting Up the IaC Environment, Configuring Amazon Web Services, Building an IaC Pipeline.
Building a Microservices Infrastructure: Infrastructure Components, Implementing the Infrastructure.

UNIT – IV	**9 Hours**

Developer Workspace: Coding Standards and the Developer's Setup, Setting Up a Containerized Environment Locally, Installing Docker, Advanced Local Docker Usage: Installing Cassandra, Installing Kubernetes.
Developing Microservices: Designing Microservice Endpoints, Implementing the Data for a Microservice, Implementing Code for a Microservice, Introducing a Second Microservice to the Project, Hooking Services Up with an Umbrella Project.

UNIT - V	**9 Hours**

Releasing Microservices: Setting Up the Staging Environment, Shipping the Flight Information Container, Deploying the Flights Service Container, Clean Up.
Managing Change: Changes in a Microservices System, Considerations for Our Architecture.
A Journey's End (and a New Beginning): On Complexity and Simplification Using Microservices, Measuring the Progress of a Microservices Transformation.

Course Outcomes:
After going through this course the student will be able to:

CO1	:	Comprehend the key concepts of microservices architecture, including the SEED(S) process, microservice boundaries, and event sourcing techniques.

CO2	:	Apply design principles to create microservices, implement endpoints, and develop infrastructure pipelines using tools like Docker, Kubernetes, and AWS for deployment.
CO3	:	Analyze the impact of microservice team structures and topologies on architecture decisions, efficiency of microservices implementation.
CO4	:	Assess the scalability and maintainability of a microservices system, including the management of data and changes across services.

SEMESTER: I						
Course Code	:	MIT314A4	**ROBOTIC PROCESS AUTOMATION**	CIE Marks	:	100
Credits L-T-P	:	3-1-0	*(Theory)*	SEE Marks	:	100
Hours	:	45L+45EL+30T	*Professional Core Courses - (Cluster Elective)- (Group-A)*	SEE Duration	:	3 Hours

UNIT - I	**9 Hours**

What is Robotic Process Automation? Scope and Techniques of automation: what should be automated? What can be automated? Techniques of automation Robotic Process Automation: What can RPA do? Benefits of RPA Components of RPA, RPA platforms. About UiPath. The future of automation. Record and Play: UiPath stack, Downloading and Installing UiPath Studio, Learning UiPath Studio, Task Recorder, Emptying trash in Gmail, Emptying Recycle Bin

UNIT - II	**9 Hours**

Sequence, Flowchart, and Control Flow: Sequencing the workflow, Activities, Control flow, various types of loops, and decision making, how to use a sequence, how to use a flowchart, step by step example using sequence and control flow. Data Manipulation: Variables and scope, Collections, Arguments-purpose and use, Data table usage with examples, Clipboard management, File operation with step-by-step example. CSV/Excel to data table and vice versa examples.

UNIT - III	**9 Hours**

Taking control of the controls : Finding and attaching windows, Finding the control, Techniques for waiting for a control, Act on controls-mouse and keyboard activities, working with UiExplorer, Handling events, Revisit recorder, Screen scraping, When to use OCR, Types of OCR available, How to use OCR, Avoiding typical failure points. Tame that Application with Plugins and Extensions Terminal plugin: SAP automation, Java Plugin, Citrix automation, Mail plugin, PDF plugin, web integration, Excel and Word plugins, Credential management.

UNIT – IV	**9 Hours**

Handling User Events and Assistant Bots: What are assistant bots? Monitoring system event triggers, Monitoring image and element triggers, Launching an assistant bot on a keyboard event. Exception Handling, Debugging, and Logging Exception handling: Common exceptions and ways to handle them, Logging and taking screenshots, Debugging techniques, Collecting crash dumps, Error reporting.

UNIT – V	**9 Hours**

Managing and Maintaining the Code: Project Organization, Nesting workflows, Reusability of workflows, commenting techniques, State Machine, When to use Flowcharts, State Machines or sequences, Using config files and examples of a config file. Deploying and Maintaining the Bot: Publishing using publish utility, Overview of Orchestration Server, Using Orchestration Server to control bots, Using Orchestration Server to deploy bots.

Course Outcomes:
After going through this course the student will be able to:

CO1	:	Apply the concept of Robotic Process Automation to automate various applications.
CO2	:	Analyse the usage of appropriate Robotic Process Automation technique for a given application.

CO3	:	Design and implement techniques of Robotic Process Automation.
CO4	:	Evaluate the code for deployment and maintenance.

SEMESTER: I						
Course Code	:	MIT415DL	**DESIGN THINKING LAB (FULL STACK MERN LAB)**	CIE Marks	:	50
Credits L-T-P	:	0-0-2		SEE Marks	:	50
Hours	:	30P		SEE Duration	:	3 Hrs

EMPATHIZE: Understanding user needs and contexts through research and observation

Overview of Full Stack Web Development, Introduction to the MERN stack: MongoDB, Express.js, React, and Node.js.
Role of each layer in the stack and how they interact, Setting up a MERN development environment, Introduction to RESTful APIs.

DEFINE: Framing the problem and defining user needs

React Basics: Components, JSX, and Virtual DOM,
React State and Props: Managing state and passing data between components, React Hooks: useState, useEffect, and custom hooks, Routing in React: React Router and navigation in single-page applications (SPA), Form Handling and Validation: Managing forms and user input, Consuming APIs: Fetching data from the server using Axios or Fetch API.

IDEATE: Generating potential solutions and brainstorming innovative approaches

Introduction to Node.js: Event-driven architecture and non-blocking I/O, Express.js Framework: Building web servers and APIs, RESTful APIs: Designing and implementing RESTful endpoints with Express.
Middleware in Express.js: Logging, error handling, and parsing requests.
User Authentication: JWT (JSON Web Tokens) and session-based authentication.
File Uploads: Handling file uploads in Node.js applications.

PROTOTYPE: Building tangible representations of the solution

Understanding collections, documents, and BSON, CRUD Operations in MongoDB: Creating, reading, updating, and deleting data, Mongoose: Object Data Modeling (ODM) library for MongoDB and Node.js, Data Relationships: Embedded documents and references in MongoDB, Aggregation Framework: Querying and aggregating data in MongoDB, Database Security: Best practices for securing MongoDB databases.

TEST: Evaluating the solution and gathering feedback

Connecting React Front-End to Node.js Back-End: Integrating front-end and back-end components.
Session Management and Cookies: Managing user sessions in full-stack applications.

Course Outcomes:
After going through this course the student will be able to:

CO1	:	Develop interactive front-end applications using React.
CO2	:	Implement back-end services and APIs using Node.js and Express.js.
CO3	:	Manage data using MongoDB in a NoSQL environment.
CO4	:	Integrate all layers of the MERN stack to build full-fledged web applications.

RUBRIC FOR CONTINUOUS INTERNAL EVALUATION (CIE-Lab)

The evaluation of the work will be carried out by the committee appointed by the Head of the department. Student/team should submit a report on the Case Studies solved under the theme.

Evaluation will be carried out in THREE Phases.

Phase	**Activity**	**MARKS**
I	Phase I	10
II	Phase II	15
III	Phase III and Draft report	15
	Final report	10
MAXIMUM MARKS FOR THE CIE		**50**

RUBRIC FOR SEMESTER END EXAMINATION (SEE-Lab)

The evaluation will be done by Internal and External examiners through Exhibition Mode. The following weightage would be given for the exhibition:

Q.NO.	**CONTENTS**	**MARKS**
1	Presentation through posters	15
2	Demonstration of the Prototype	25
3	Vivavoce	10
MAXIMUM MARKS FOR THE SEE		**50**

SEMESTER: I						
Course Code	:	HSS116L	**Technical English** **(Common to all Programs)**	CIE Marks	:	50
Credits L-T-P	:	0-0-1	**Online English Laboratory Course**	SEE Marks	:	50
Hours	:	30P	Humanities and Social Sciences	SEE Duration	:	2 Hours

UNIT - I	**10 Hours**
The Basics. Business Documents, Questions, and the Technical Pursuit. Engineering Concepts and Complexity; The Future Tense for Technical Work. White Papers; Modifiers and Qualifiers.	
UNIT - II	**10 Hours**
Making Recommendations; Interpreting Data, Ethical Persuasion for Technical Projects; Cause and Effect; Calls for Proposals. Technical Complexity in Communication. Numbers, Plain English, Jargon, and Technical Terms, Active and Passive Structures.	
UNIT III - Ethical Persuasion for Technical Projects	**6 Hours**
Organization Needs; Seeing the Big Picture; Negotiating. Audience Needs and Assessment; Standards versus White Papers; Objectivity, Communicating within Expected Genres; Identifying Trustworthy Sources or Bias in. A Review of Major Course Takeaways	

Course Outcomes:
After going through this course the student will be able to:

CO1	:	Demonstrate clarity and precision in technical communication by structuring information effectively, balancing technical terms with plain English, and adapting to diverse audiences.
CO2	:	Analyze and produce professional documents, such as white papers, business proposals, and reports, while applying ethical persuasion, data interpretation, and evidence-based reasoning.
CO3	:	Evaluate and refine communication strategies by assessing audience needs, recognizing trustworthy sources, and navigating organizational and technical complexities.
CO4	:	Apply critical thinking and negotiation skills to align communication with organizational goals, anticipate future challenges, and support informed decision-making.

Laboratory Component
Students are expected to find solutions for the problems stated below and perform the associated research oriented tasks given. Documentation of findings need to be submitted for the research oriented tasks. 1. Password Cracking using Dictionary Attack • Problem: Implement a password-cracking tool that attempts to break a password using dictionary attack. • Research Extension: Explore optimization techniques to reduce time complexity. 2. Detecting SQL Injection Attacks • Problem: Write a program that detects and logs SQL injection attempts in web applications. • Research Extension: Explore machine learning models to detect SQL injections in real-time. 3. Digital Image Steganography • Problem: Implement a tool to hide and extract data in an image file using LSB (Least Significant Bit) technique. • Research Extension: Explore steganalysis techniques to detect hidden data. 4. Network Traffic Analysis for Forensic Investigation Write simple python scripts to: a) Capture and analyze HTTP traffic b) Captures network packets and prints basic information about them

Course Outcomes:
After going through this course the student will be able to:

CO1	:	Interpret the basic concepts of cyber security and digital forensics
CO2	:	Identify Cybersecurity threats and develop solutions to detect and mitigate various attacks
CO3	:	Understand the current cybersecurity policy issues
CO4	:	Demonstrate knowledge on the cyber security, Cybercrime and forensics using appropriate tools.

RUBRIC FOR THE CONTINUOUS INTERNAL EVALUATION (CIE-Theory)		
CIE will consist of TWO Quizzes (Q), TWO Tests (T), and ONE Experiential Learning (EL) component **[20 (Q) + 40 (T) + 40 (EL) = 100 marks]**		
Sl.No.	**COMPONENTS**	**MARKS**
1.	**QUIZZES:** Quizzes will be conducted in online/offline mode. **TWO QUIZZES** will be conducted & each Quiz will be evaluated for 10 marks, and Final Quiz marks adding up to 20 marks. **THE SUM OF TWO QUIZZES WILL BE CONSIDERED AS FINAL QUIZ MARKS.**	**20**
2.	**TESTS:** Students will be evaluated in test consisting of descriptive questions with different complexity levels (Revised Bloom's Taxonomy Levels: Remembering, Understanding, Applying, Analyzing, Evaluating, and Creating). **TWO TESTS** will be conducted. Each test will be evaluated for 50 Marks, adding up to 100 Marks. **FINAL TEST MARKS WILL BE REDUCED TO 40 MARKS.**	**40**
3.	**EXPERIENTIAL LEARNING:** Students will be evaluated for their creativity and practical implementation of the problem. **Phase I (20) & Phase II (20) ADDING UPTO 40 MARKS**.	**40**
	CIE THEORY TOTAL	**100**

RUBRIC FOR CONTINUOUS INTERNAL EVALUATION (CIE-Lab)		
Q.NO.	**CONTENTS**	**MARKS**
1	Conduction of the Experiments & Lab Record	30
2	Open-ended Lab Experiment	10
3	Lab Test	10
	CIE LAB TOTAL	**50**
	MAXIMUM MARKS FOR THE CIE	**150**

RUBRIC FOR SEMESTER END EXAMINATION (SEE-Theory)		
Q.NO.	**CONTENTS**	**MARKS**
1 & 2	Unit 1: Question 1 or 2	20
3 & 4	Unit 2: Question 3 or 4	20
5 & 6	Unit 3: Question 5 or 6	20
7 & 8	Unit 4: Question 7 or 8	20
9 & 10	Unit 5: Question 9 or 10	20
	SEE THEORY TOTAL	**100**

RUBRIC FOR SEMESTER END EXAMINATION (SEE-Lab)		
Q.NO.	**CONTENTS**	**MARKS**
1	Write Up	10
2	Conduction of the Experiments	30
3	Viva	10
	SEE LAB TOTAL	**50**
	MAXIMUM MARKS FOR THE SEE	**150**

SEMESTER: II						
Course Code	:	MSE422IA	**CLOUD NATIVE AUTOMATION**	CIE Marks	:	100
Credits L-T-P	:	3:0:1		SEE Marks	:	100
Hours	:	42L + 30P+45EL	*(Professional Core Course with Integrated Lab)*	SEE Duration	:	3+3 Hours

UNIT - I	**9 Hours**

Revolution in the cloud: The creation of the cloud, The dawn of DevOps, The Coming of Containers, Conducting the Container Orchestra, Kubernetes, Cloud Native,The Future of Operations.
First Steps with Kubernetes : Running Your First Container, The Demo Application, Building a Container, Container Registries, Hello Kubernetes, Minikube.
Getting Kubernetes : Cluster Architecture, The Costs of Self-Hosting Kubernetes, Managed Kubernetes Services, Kubernetes Installers, Clusterless Container Services.

UNIT – II	**9 Hours**

Working with Kubernetes Objects: Deployments, Pods, ReplicaSets, Maintaining Desired State, The Kubernetes Scheduler, Resource Manifests in YAML Format, Helm: A Kubernetes Package Manager.
Managing Resources: Understanding Resources, Managing the Container Life Cycle, Using Namespaces, Optimizing Cluster Costs.

UNIT – III	**9 Hours**

Operating Clusters: Cluster Sizing and Scaling, Conformance Checking, Chaos Testing. Kubernetes Power Tools: Mastering kubectl, Working with Resources, Working with Containers, Contexts and Namespaces, Kubernetes Shells and Tools Kubernetes IDEs.

UNIT – IV	**9 Hours**

Running Containers: Containers and Pods, Container Manifests, Container Security, Volumes, Restart Policies, Image Pull Secrets, Init Containers.
Managing Pods: Labels, Node Affinities, Pod Affinities and Anti-Affinities, Taints and Tolerations, Pod Controllers, Ingress, Service Mesh.

UNIT – V	**9 Hours**

Configuration and Secrets: ConfigMaps, Kubernetes Secrets, Secrets Management Strategies, Encrypting Secrets with Sops, Sealed Secrets.
Security, Backups, and Cluster Health: Access Control and Permissions, Cluster Security Scanning, Container Security Scanning, Backups, Monitoring Cluster Status.

Course Outcomes:
After going through this course the student will be able to:

CO1	:	Understanding the concept of cloud native DevOps to applications.
CO2	:	Apply the usage of cloud, creating a docker image, kubernetes deployment for a given application.
CO3	:	Evaluate the design and implement cloud native applications and deployment.
CO4	:	Create real world applications using DevOps CI/CD deployment.

4. IBM, IBM Cloud DevOps Field Guide, IBM Corporation, 2021, https://ac-gm-static-files-server.lahgrqm5xee.ausyd.codeengine.appdomain.cloud/cloud/architecture/files/devops-field-guide.pdf

LABORATORY COMPONENT

PART A:

1. Introduction to Lab:
   Introduction to Source Control like (Git, Gitlab, Code Review, Pull request, etc)

   Docker Fundamentals (Image, Container, volumes, networking)
   Kubernetes (Introduction, Deployment platform)
   Continuous Integration(CI) and Continuous Deployment(CD).
   Hands on working with CI/CD Devops toolchains.

2. Design and develop an web application which has to be run in docker, kubernetes and then host in cloud.

3. Complete the Docker video workshop with following steps in the link as:
https://docs.docker.com/get-started/workshop/10_what_next/

- Docker overview and installation- https://www.youtube.com/watch?v=gAGEar5HQoU
- Pull, run, and explore containers- https://www.youtube.com/watch?v=gAGEar5HQoU&t=1400s
- Build a container image- https://www.youtube.com/watch?v=gAGEar5HQoU&t=3185s
- Containerize an app- https://www.youtube.com/watch?v=gAGEar5HQoU&t=4683s
- Connect a DB and set up a bind mount- https://www.youtube.com/watch?v=gAGEar5HQoU&t=6305s
- Deploy a container to the cloud- https://www.youtube.com/watch?v=gAGEar5HQoU&t=8280s

4. For Application 2 dockerised, apply the Kubernetes deployment as follows:
- Kubernetes deployment YAML with multiple replicas
- Kubernetes deployment YAML with resource limits
- Kubernetes deployment YAML with health checks

5. Know about Devops in following link and apply concept for application 2 developed:
https://www.youtube.com/watch?v=vwkBBjS0l3E

PART B: DevOps free two MooC certifications to be submitted.

RUBRIC FOR THE CONTINUOUS INTERNAL EVALUATION (CIE-Theory)

SEMESTER: II						
CourseCode	:	MIT323B1	**LARGE LANGUAGE MODELS**	CIE Marks	:	100
Credits L-T-P	:	3-1-0		SEE Marks	:	100
Hours	:	45L+45EL+ 30T	*Program Specific Course (Elective) (Group-B)*	SEE Duration	:	3 Hrs

UNIT-I	**9 Hrs**
Introduction: Introduction to Language Model, Evolution of Language Modelling Technologies **Overview of Natural Language Processing:** Computational Linguistics and Natural Language Processing, Morphology, Tokenization, Semantics **Neural Networks:** Multi-layer Perceptron, Training Neural Networks, Evaluation Metrics	
UNIT-II	**9 Hrs**
Word Embedding: Types of word Embedding, Frequency-Based Embeddings, Word2vec. Bias, Limitations, Applications **Statistical Language Model:** The Conditional Probability, The chain Rule of Probability, Smoothing, Evaluation of Language Model, Limitations of Statistical Language Model	
UNIT-III	**9 Hrs**
Neural Language Models: Convolutional Neural Networks, Recurrent Neural Networks, Limitations of Neural Language Models **Transformers:** Introduction, Self-Attention, Transformer Encoder Block, Transformer Decoder Block, Positional Embeddings	
UNIT – IV	**9 Hrs**
Language Model Pre-training: Embeddings from Language Model, Evaluation Datasets, Encoder-Based Pretraining **Prompting Strategies in LLMs:** Prompt Engineering, Prompt Application, Chain of thoughts	
UNIT – V	**9 Hrs**
Efficient Methods for Fine Tuning LLMs: Model compression with knowledge distillation **Applications of LLMs and Integration in Engineering Domains:** NLP Tasks Using LLMs: Text generation, summarization, question answering, and natural language understanding applications.	

Course Outcomes:
After going through this course the student will be able to:

CO1	:	Understand the evolution and foundational concepts of language models and natural language processing.
CO2	:	Analyze and implement word embeddings and statistical language modeling techniques.
CO3	:	Apply transformer architectures and pretraining strategies in neural language models.

CO4	:	Design efficient fine-tuning methods and deploy LLMs for NLP tasks across engineering domains.

SEMESTER: II						
CourseCode	:	MSE323B2	**APPLIED SOFTWARE PROJECT MANAGEMENT**	CIE Marks	:	100
Credits L-TP	:	3-1-0		SEE Marks	:	100
Hours	:	45L+45EL+ 30T	*Program Specific Course (Elective) (Group-B)*	SEE Duration	:	3 Hrs

UNIT-I	**9 Hrs**
PROJECT EVALUATION AND PROJECT PLANNING : Importance of Software Project Management – Software Projects versus Other Types of Project - Contract Management and Technical Project Management - Activities - Methodologies – Categorization of Software Projects – Setting objectives – Management Principles – Management Control –Project portfolio Management – Evaluation of Individual Projects - Cost-benefit evaluation techniques – Risk evaluation – Programme Management - Managing the Allocation of Resources within Programmes - Strategic programme Management – Stepwise Project Planning.	
UNIT-II	**10 Hrs**
PROJECT LIFE CYCLE AND EFFORT ESTIMATION : Software processes and Process Models – Selection of an Appropriate Project Approach - Rapid Application development – Agile methods – Dynamic System Development Method –Extreme Programming– Managing iterative processes – Basics of Software estimation – Effort and Cost estimation techniques – Bottom–up Estimating – The Top-down Approach and Parametric Models – COSMIC Full function points - COCOMO II - a Parametric Productivity Model.	
UNIT-III	**9 Hrs**
ACTIVITY PLANNING AND RISK MANAGEMENT : Objectives of Activity planning – Project schedules –Activities – Sequencing and scheduling – Network Planning models – Formulating Network Model – Forward Pass & Backward Pass techniques – Identifying the Critical path - Activity Float – Risk Management – Nature of Risks, Categories of Risk, A Framework for dealing with Risk, Risk identification, Risk Assessment, Risk Planning, Risk Management, Evaluating risks to the schedule – Resource Allocation – Identifying Resources Requirements, Scheduling Resources, Creation of critical paths – Cost schedules, The Scheduling Sequence.	
UNIT - IV	**9 Hrs**
PROJECT MONITORING AND CONTROL: Framework for monitoring and control – Collection of data – Review – Project Termination Review - Visualizing progress – Cost monitoring – Earned Value Analysis – Prioritizing Monitoring – Project tracking – Change control – Software Configuration Management – Types of Contract – Stages in Contract Placement – Typical terms of a Contract – Contract Management – Acceptance.	
UNIT - V	**8 Hrs**
MANAGING PEOPLE AND ORGANIZING TEAMS: Organizational behavior - Best methods of staff selection -Instruction in the best methods - Motivation – The Oldham–Hackman Job Characteristics Model - Working in teams – Decision making – Organization and Team structures – Coordination dependencies – Dispersed and Virtual teams – Communication Genres and Plans – Leadership.	

Course Outcomes:
After going through this course the student will be able to:

CO1	:	Understand Software Project Management principles to be followed during its development.
CO2	:	Estimate the risks involved in various Project activities

CO3	:	Gain extensive knowledge about the basic concepts, framework and the process models.
CO4	:	Obtain adequate knowledge about software process models and software effort estimation techniques.

SEMESTER: II						
Course Code	:	MIT323B3	**DESIGN PATTERNS AND ENTERPRISE APPLICATION DEVELOPMENT**	CIE Marks	:	100
Credits L-T-P	:	3-1-0		SEE Marks	:	100
Hours	:	45L+30T+45EL	*Program Specific Course (Elective) (Group-B)*	SEE Duration	:	3 Hrs

UNIT-I — **9 Hrs**

Overview of Enterprise Applications : Introduction, Architecture, Enterprise Applications, Kinds of Enterprise Application, Thinking About Performance, Patterns, The Structure of the Patterns, Limitations of Patterns, Layering, The Evolution of Layers in Enterprise Applications, The Three Principal Layers, Choosing Where to Run Layers. Organizing Domain Logic, Making a Choice, Service Layer.

UNIT-II — **9 Hrs**

Mapping to Relational Databases: Architectural Patterns, The Behavioral Problem, Reading in Data, Structural Mapping Patterns, Mapping, Inheritance, Building the Mapping, Double Mapping, Using Metadata, Database Connections, Web Presentation: View Patterns, Input control patterns.

UNIT-III — **9 Hrs**

Concurrency and Session State: Concurrency, Concurrency Problems, Execution Contexts, Isolation and Immutability, Optimistic and Pessimistic Concurrency Control. Preventing Inconsistent Reads, Deadlocks, Transactions ACID, Transactional Resources, Reducing Transaction Isolation for Liveness, Business and System Transactions, Patterns for Offline Concurrency Control, Application Server Concurrency. Session state: Value of statelessness, Session state, Ways to store session state.

UNIT - IV — **9 Hrs**

Distributed Objects: The Allure of Distributed Objects, Remote and Local Interfaces, Where You Have to Distribute, Working with the Distribution Boundary, Interfaces for Distribution, Layers all together: Domain Layer, Data Source Layer, Data Source for Transaction Script, Data Source Table Module, Data Source for Domain Model, The Presentation Layer, Other Layering schemes.

UNIT - V — **9 Hrs**

Constructing Enterprise Applications: Construction Readiness: Defining construction plan, package structure, Setting up Configuration plan, Development environment Defining software construction Map. Constructing Solution layers: Infrastructure services layer, Presentation layer, Business layer, Data access layer, Integration layer component. Testing Enterprise applications: Types and Methods, Testing Level, Testing approach, Rolling out enterprise applications.

Course Outcomes:
After going through this course the student will be able to:

CO1	:	Comprehend the concepts of prime layers in Enterprise application development to solve real world problems.
CO2	:	Design the architecture of EA through mapping of patterns to database and implementing concurrency.
CO3	:	Develop Enterprise Application with appropriate web presentation techniques and Session state attributes.

CO4	:	Plan and define software construction map for building layers for enterprise applications.

SEMESTER: II						
Course Code	:	MIT323B4	**FINTECH PROCESSES**	CIE Marks	:	100
Credits L-T-P	:	3-1-0		SEE Marks	:	100
Hours	:	45L+45EL +30T	*Program Specific Course (Elective) (Group-B)*	SEE Duration	:	3 Hrs

UNIT-I	**9 Hrs**
Introduction; Banking and the E-Book Moment; Why We're so Excited About FinTech; Current Trends in Financial Technology; **FinTech Themes;** Banks Need to Think Collaboration Rather Than Competition; Global Compliance is Key; Lending (Capital) in the 21st Century; The Next Big Innovation in FinTech - Identity, Tech Giants Becoming Non-Bank Banks; Design is No Longer an Option-User Experience (UX) in FinTech;	
UNIT-II	**9 Hrs**
FinTech Solutions; Rewiring the Deal – The Path Forward for B2B Supply Chains; Payments and Point of Sales (POS) Innovation; Predictive Algorithms – Building Innovative Online Banking Solutions; Big Data is the Cornerstone of Regulatory Compliance Systems; FinTech Solutions in Complex Contracts Optimization; Behavioural Biometrics – A New Era of Security; Ultra-Fast Text Analytics in Trading Strategies; Regulated Crowdfunding Ecosystems; Remittances – International FX Payments at Low Cost; FinTech Solutions for Small Businesses; Payment Solutions Including Apple Pay; FinTech Solutions Benefiting other Sectors; FinTech Innovation for Wearables	
UNIT-III	**9 Hrs**
Technologies That Can Create the New ABC of Fintech; A for Artificial intelligence, Algorithms, Anomaly and Autonomous, B for Big Data, Blockchain and Bitcoin, C for Cloud, Crypto (Ethereum, Smart contracts) and Cybersecurity **Crypto-currencies and Blockchains,** FinTech + Digital Currency – Convergence or Collision?, Blockchain and Crypto-currencies	
UNIT - IV	**9 Hrs**
The Future of FinTech; How Emerging Technologies Will Change Financial Services, The Future of Financial Services, Banking on Innovation Through Data, Why FinTech Banks Will Rule the World, The FinTech Supermarket – The Bank is Dead, Long Live the Bank!, Banks Partnering with FinTech Start-ups to Create an Integrated Customer Experience, The Rise of BankTech – The Beauty of a Hybrid Model for Banks, FinTech Impact on Retail Banking – From a Universal Banking Model to Banking Verticalization, Embracing the Connected API Economy, Banking Like Water, Eliminating Friction in Customers' Financial Lives, FinTech is the Future Itself, A Future Without Money, Ethics in FinTech	
UNIT - V	**9 Hrs**
Cybersecurity Vulnerabilities in FinTech: General Cybersecurity Vulnerabilities in Fintech, Specific Cybersecurity Vulnerabilities in Fintech, Assessing the Fintech Cybersecurity Vulnerabilities, General Policies to mitigate Fintech Cybersecurity Vulnerabilities **Emerging Markets and Social Impact;** FinTech – The Not So Little Engine That Can; Why Am I Not Gonna Be Able to Enter a Bank?; The Rise of the Rest in FinTech; Smartphones, FinTech, and Education – Helping the Unbanked Reach Financial Inclusion, The Social Impact of FinTech in Nigeria, India and the Pyramid of Opportunity,	

Course Outcomes:After going through this course the student will be able to:

CO1	:	Explain the interplay of finance and technology and how the two universes inevitably are colliding into one another

CO2	:	How big data technology can make risk and compliance information systems easier to implement
CO3	:	Understand the role of emerging technologies in securing and leveraging banking services
CO4	:	Analyse the impact of applying trending technologies to financial institutions through real time case studies

2.	**TESTS:** Students will be evaluated in test consisting of descriptive questions with different complexity levels (Revised Bloom's Taxonomy Levels: Remembering, Understanding, Applying, Analyzing, Evaluating, and Creating). **TWO TESTS** will be conducted. Each test will be evaluated for 50 Marks, adding up to 100 Marks. **FINAL TEST MARKS WILL BE REDUCED TO 40 MARKS.**	**40**
3.	**EXPERIENTIAL LEARNING:** Students will be evaluated for their creativity and practical implementation of the problem. **Phase I (20) & Phase II (20) ADDING UPTO 40 MARKS**.	**40**
	MAXIMUM MARKS FOR THE CIE	**100**
RUBRIC FOR SEMESTER END EXAMINATION (SEE-Theory)		
Q.NO.	**CONTENTS**	**MARKS**
1 & 2	Unit 1: Question 1 or 2	20
3 & 4	Unit 2: Question 3 or 4	20
5 & 6	Unit 3: Question 5 or 6	20
7 & 8	Unit 4: Question 7 or 8	20
9 & 10	Unit 5: Question 9 or 10	20
	MAXIMUM MARKS FOR THE SEE	**100**

SEMESTER: II						
Course Code	:	MCN324C1	**ADVANCED ROUTING PROTOCOLS (THEORY)**	CIE Marks	:	100
Credits L-T-P	:	3-1-0		SEE Marks	:	100
Hours	:	45L+45EL+30T	*Professional Core Course (Cluster Electives) (Group-C)*	SEE Duration	:	3 Hrs

UNIT-I	**9 Hrs**
Internet Protocol Traffic Engineering: Routing Protocols, Routing Classification and Routing Table, Traffic, Stochasticity, Delay and Utilization, Traffic and Performance Measures, Characterizing Traffic, Average Delay in a single link system, Nonstationary of traffic, Applications View, An Architectural Framework, Traffic Engineering, a Four-Node Illustration, IGP Metric, Determining IGP Link Weights via Duality of MCNF Problems, Illustration of Link Weight Determination Through Duality, Link Weight Determination, Link weight determination Large Networks.	
UNIT-II	**9 Hrs**
Hierarchical and Dynamic Call Routing in the Telephone Network: Hierarchical Call Routing, Overall Hierarchical Routing Architecture, The Road to Dynamic Routing, Limitations of Hierarchical Routing, Call Control and Crankback, Trunk Reservation, Mixing of OCC and PCC, Dynamic Non-hierarchical Routing, Dynamically Controlled Routing, Dynamic Alternate Routing, Real-Time Network Routing, Classification of Dynamic Call Routing Maximum Allowable Residual Capacity Routing, Dynamic Routing and Its Relation to Other Routing.	
UNIT-III	**9 Hrs**
Traffic Engineering in the Voice Telephone Network: Traffic Engineering, Traffic Load and Blocking, Computing Erlang-B Loss Formula, Grade-of-Service and Trunk Occupancy, Centi-Call Seconds and Determining Based Load, Economic CCS Method Network Controls for Traffic Engineering, Guidelines on Detection of Congestion Examples of Controls, Communication of Congestion Control Information, Congestion Manifestation, State-Dependent Call Routing, Three-Node Network, N-Node Symmetric Network, N-Node Symmetric Network with Trunk Reservation, Illustration Without and with Trunk Reservation, Qualiy of Service(QoS), QoS Routing Classification, QoS Attributes.	
UNIT - IV	**9 Hrs**
IP Packet Filtering and Classification: Importance of Packet Classification, Packet Classification Problem, Expressing Rules, Performance Metrics, Packet Classification Algorithms, Naïve Solutions, Two-Dimensional Solutions and its types, Approaches for d Dimensions, Extending Two-Dimensional Solutions Divide and Conquer Approaches-Lucent Bit Vector, Aggregated Bit Vector, Tuple Space Approaches, Decision Tree Approaches-Hierarchical Intelligent Cuttings, Hardware-Based Solutions Ternary Content Addressable Memory (TCAM).	
UNIT - V	**9 Hrs**
VoIP Routing: Interoperability Through IP and PSTN: Traffic Engineering of IP/MPLS Networks, VPN Traffic Engineering, PSTN Call Routing Using the Internet, PSTN Call Routing: Managed IP Approach, IP-PSTN Interworking for VoIP, IP Multimedia Subsystem, Multiple Heterogeneous Providers Environment, All-IP Environment of VoIP Services	
Course Outcomes:After going through this course the student will be able to:	

CO1	:	Explore different types of traffic engineering adopted in an Internet based services and Telephone networks
CO2	:	Apply call routing and voice routing approaches used to optimize the routing in different types of networks.
CO3	:	Analyze the performance issues related to routing in an IP traffic engineering networks
CO4	:	Examine the various algorithms of routing in VoIP call services, Traffic Engineering and Telephone networks.

RUBRIC FOR SEMESTER END EXAMINATION (SEE-Theory)		
Q.NO.	**CONTENTS**	**MARKS**
1 & 2	Unit 1: Question 1 or 2	20
3 & 4	Unit 2: Question 3 or 4	20
5 & 6	Unit 3: Question 5 or 6	20
7 & 8	Unit 4: Question 7 or 8	20
9 & 10	Unit 5: Question 9 or 10	20
	MAXIMUM MARKS FOR THE SEE	**100**

SEMESTER: II						
Course Code	:	MCE324C2	**ADVANCES IN COMPUTER VISION**	CIE Marks	:	100
Credits L-T-P	:	3-1-0	*(Theory)*	SEE Marks	:	100
Hours	:	45L+45EL+30T	*(Professional Core Course (Cluster Electives) (Group-C)*	SEE Duration	:	3 Hours

UNIT - I	**10 Hours**

Introduction to Digital Image Fundamentals: Digital Image Processing concepts: The origin of Digital Image processing, Fundamental Steps in Digital Image Processing, Components of an Image Processing System, Image Sampling and Quantization, Some Basic Relationships between Pixels.

Histogram Processing: Histogram Equalization, Histogram Matching (Specification Local Histogram Processing. Fundamentals Of Spatial Filtering the Mechanics of Linear Spatial Filtering, Spatial Correlation and Convolution, Separable Filter Kernels.

UNIT - II	**9 Hours**

Image Segmentation: Fundamentals, Thresholding: The Basics of Intensity Thresholding, The Role of Noise in Image Thresholding, The Role of Illumination and Reflectance in Image Thresholding. Basic Global Thresholding Optimum Global Thresholding Using Otsu's Method Segmentation by Region Growing and By Region Splitting and Merging Region Growing Region Splitting and Merging.

UNIT - III	**9 Hours**

Region Segmentation Using Clustering and Super pixels: **R**egion Segmentation Using K-Means Clustering, Region Segmentation Using Super pixels, Slic Superpixel Algorithm.

Object Recognition:

Image Pattern Classification: Priori by A Human Designer, Patterns and Pattern Classes, Pattern Vectors, Structural Patterns, Pattern Classification by Prototype Matching.

UNIT - IV	**9 Hours**

Object Recognition: Minimum-Distance Classifier Using Correlation for 2-D Prototype Matching Sift Feature Matching Structural Prototypes.

Tracking: Tracking as an Abstract Inference Problem, Independence Assumptions, Tracking as Inference. Data Association: Choosing the Nearest- Global Nearest Neighbours, Gating and Probabilistic Data Association, Applications and Examples, Vehicle Tracking, Finding and Tracking People.

UNIT - V	**8 Hours**

Applications: Finding Faces Using Frame Invariance, Multilocal Visual Events, finding: Annotation and segmentation, Template matching, Shape and correspondence, Video Image-Based Rendering: Constructing 3D Models from Image Sequences, Scene Modelling from Registered Images, Scene Modelling from Unregistered Images Transfer-Based Approaches to Image-Based Rendering Affine View Synthesis.

Course Outcomes:		
After going through this course the student will be able to:		
CO1	:	Analyze the difficulties of the pattern recognition problems which include classification techniques, Feature detection and Histogram equalization process in feature extraction methods, which help identify meaningful patterns and structures in images.
CO2	:	Apply appropriate image processing methods for image filtering, image restoration, image reconstruction, segmentation, classification and representation
CO3	:	Designing and implement a Computer Vision system as part of an experiential learning initiative in teams to solve societal and environmental problems using pattern recognition in images and videos
CO4	:	Evaluation of the performances of different CV algorithms and its limitation, study of ethical issues related to CV applications including privacy concerns and bias in algorithms

SEMESTER: II						
Course Code	:	MSE324C3	**MOBILE COMMERCE AND APPLICATIONS**	CIE Marks	:	100
Credits L-T-P	:	3-1-0		SEE Marks	:	100
Hours	:	45L+45EL+ 30T	*(Professional Core Course (Cluster Electives) (Group-C)*	SEE Duration	:	3 Hrs

UNIT-I	**9 Hrs**
Introduction to Mobile commerce: Mobile commerce, Mobile commerce framework, Mobile commerce business models, M commerce applications, E commerce vs M commerce. Mobile commerce services: Types of M commerce services, Mobile portal, Applications of mobile commerce in industry, Mobile application development.	
UNIT-II	**9 Hrs**
Wireless and Mobile Communication: communication systems, wireless communication, satellite communication, mobile communication systems. Digital cellular Technology: Cellular communications, cellular networks, mobile phone cellular networks. Mobile access technology: Mobile communication standards, Evolution of mobile communication systems, 2G and 3G systems.	
UNIT-III	**9 Hrs**
4G and 5G systems: 4G features, 4G technologies, IPv6 support, LTE advanced, 4G objectives and Goals, 4G deployment plans, 5G systems, 5G features, 5G technologies, Cloud based systems, (IoT) Internet of Things systems, Artificial intelligence and Mobile Edge computing, Mobile Devices: Types of Mobile Devices, mobile computers, Mobile Internet Device (MID), Personal Digital Assistant (PDA), Handheld game console, portable media player, pager, Personal Navigation Device, Tablet, Mobile service providers: Mobile network operators, Mobile Virtual network operators, satellite based mobile operators. Case Study: Mobile Shopping, Mobile Business Intelligence.	
UNIT - IV	**9 Hrs**
Mobile Banking: Bank in your mobile , Mobile banking business models, mobile banking technologies, mobile banking services, advantages and challenges of mobile banking , mobile banking applications, SMS banking, Tickets on mobile : Mobile ticketing, applications of mobile tickets, advantages of mobile tickets, privacy and security issues, mobile ticketing Apps, mobile ticket providers, Mobile Payment: characteristics of mobile payment systems, mobile payment models, types of mobile payments, security issues.	
UNIT - V	**9 Hrs**
Mobile computing : Ubiquitous computing, applications of mobile computing , challenges of mobile computing , mobile computing software platforms, Business applications of mobile computing, Mobile computing software platforms, Mobile business intelligence, Security and privacy issues: mobile security concepts, mobile security mechanism, Mobile network security, mobile information security, mobile device security, mobile device security arrangements, mobile application security, mobile security management, Legal aspects: mobile device related laws, cell phone freedom act 2010, information technology act 2000 of India, Privacy and Electronic Communication Regulations act 2003. **Case Study:** Mobile Cloud Computing, Mobile Education.	

Course Outcomes:
After going through this course the student will be able to:

CO1	:	Describe the value-added attributes, benefits, and fundamental drivers of m-commerce

CO2	:	Apply the mobile computing infrastructure that supports m-commerce (devices, software, and services)
CO3	:	Differentiate m-commerce applications in banking and financial services
CO4	:	Analyze consumer and personal applications of m-commerce, including entertainment, ubiquitous computing and sensory networks

UNIT - I	**9 Hours**
Introduction Virtual Reality, Augmented Reality, Mixed Reality, Extended Reality applications. Birds-eye view: Hardware, Software, Human Physiology and perception, History of VR and AR Programming with Unity: Unity Basics, Manipulating the Scene, Code blocks and Methods, Debugging Conditional and looping statements.	
UNIT - II	**9 Hours**
Programming with Unity: Working with objects, Working with Scripts, Player movement, Camera Movement, Menu and UI, Advanced 3D movement Further Learning for Unity: The Asset Store **Mouse-Aimed camera:** First Person Controller, Third Person Controller **Further Learning for Unity**: The Asset Store	
UNIT - III	**9 Hours**
Augmented Reality: Types of tracking, Marker-based tracking, Marker-less tracking, Build and Run-Vuforia. **Modeling Tools:** An introduction to different modeling tools, Blender, Modeling of an object, sculpting objects, Importing from Blender to Unity, Animation. Visual Scripting, Digital Twining	
UNIT - IV	**9 Hours**
XR Market, applications.**Introduction to WebXR:** Entering VR through WebXR, Life cycle of WebXR application, Creating an XR session through WebXR. Creating an AR website with WebXR: Object creation, spatial tracking, start AR session.	
UNIT - V	**9 Hours**
Extended Reality and Artificial Intelligence: XR and Artificial Intelligence, Future Research Agenda and Roadmap. **XR and Metaverse Software Platforms:** Enabling Platforms, Content Platforms, Human-Centered Platforms, Utility Platforms, Application Platforms.	

Course Outcomes:

After going through this course the student will be able to:

CO1	:	Understand the concepts of AR/VR/XR and its Applications
CO2	:	Identify, examine and develop application that reflects techniques for the design and deployment of VR/AR/XR experiences
CO3	:	Demonstrate a VR/AR/XR environment to captivate its experiences
CO4	:	Analyze the technology for unimodal/multimodal interaction

Hours	:	45L+45EL	*(Interdisciplinary Course Global Elective Group-D)*	SEE Duration	:	3 Hr

UNIT - I	**9 Hours**
Bio-Inspired designs-biomimetics: Termites; Sustainable buildings, Insect foot adaptations for adhesion. Bees and Honeycomb Structure. Namib Desert Beetle; Harvesting desert fog-Nature's water filter. Biopolymers, Bio-steel, Bio-composites, multi-functional biological materials. Antireflection and photo-thermal biomaterials, Invasive and non-invasive thermal detection inspired by skin.	
UNIT - II	**9 Hours**
Plant inspired Technologies: Photosynthesis and Photovoltaic cells, Bionic/Artificial leaf. Lotus leaf effect for super hydrophobic surfaces. Flectofin®, a new façade-shading system inspired by flower of the Bird-of-Paradise (Strelitzia reginae). Robotic Solutions Inspired by Plant Root.	
UNIT - III	**9 Hours**
Bio-Inspired technologies for medical applications: Organ system- Circulatory- artificial blood, artificial heart, pacemaker. Respiratory- artificial lungs. Excretory- Artificial kidney and skin. Artificial Support and replacement of human organs: artificial liver and pancreas. Total joint replacements- artificial limbs. Visual prosthesis -artificial / bionic eye.	
UNIT - IV	**9 Hours**
Bio-Inspired driven technologies for industrial applications: Biosensors: Artificial tongue and nose. Biomimetic echolation. Insect foot adaptations for adhesion. Thermal insulation and storage materials. Bio-robotics.	
UNIT - V	**9 Hours**
Bio-inspired computing: Cellular automata, neural networks, evolutionary computing, swarm intelligence, artificial life, and complex networks. Genetic Algorithms, Artificial Neural Networks. Artificial intelligence and MEMS.	

Course Outcomes:
After going through this course the student will be able to:

CO1	:	Contemplate a deep understanding of biological systems, mimetics structures, and functions that inspire engineering innovations for adaptability and sustainability.
CO2	:	Endeavor biological principles from nature driven techniques to design engineering systems for solving real-world challenges
CO3	:	Appraise the bioinspired materials for their advanced applications in the domain of health, energy and environmental sustainability.
CO4	:	Paraphrase biomimicry and ethics in bioinspired engineering designs, ensuring that their solutions are environmentally responsible and socially conscious

SEMESTER: II						
Course Code	:	MBT325DB	**CLINICAL DATA MANAGEMENT**	CIE Marks	:	100
Credits L-T-P	:	3-0-0	*(Theory)*	SEE Marks	:	100
Hours	:	45L+45EL	*(Interdisciplinary Course Global Elective Group-D)*	SEE Duration	:	3 Hrs

UNIT - I	**9 Hours**

Fundamentals of Healthcare Data and Analytics: Overview, importance, and evolution of health informatics in the digital age, Healthcare Data Types: Structured vs. unstructured data, clinical vs. operational data, and sources of healthcare data, Data Conversion and Integration: Data standardization, integration into clinical data warehouses, and data cleaning. Data Analytics: Introduction to descriptive, predictive, and prescriptive analytics in healthcare. Use of AI and machine learning for improved outcomes, Challenges and Future Trends: Data privacy, interoperability issues, the role of informatics in personalized medicine, and the future of digital health.

UNIT - II	**9 Hours**

Electronic Health Records (EHRs) and Digital Health: Overview of EHRs: Key components, data capture mechanisms, and the shift towards integrated EHR systems. Scope and Adoption: Role of EHRs in enhancing patient care, interoperability, and data sharing between healthcare providers. Implementation Process: Steps for selecting, deploying, and optimizing EHR systems, including vendor selection and compliance with healthcare regulations. Challenges in EHRs: Usability issues, data quality, resistance to adoption, and strategies for overcoming these barriers. Digital Health Innovations: Impact of telemedicine, remote patient monitoring, and digital therapeutics on EHR integration.

UNIT - III	**9 Hours**

Data Standards, Interoperability, and Medical Coding: Introduction to Standards: Need for data standards in health informatics, and their role in ensuring interoperability. Terminology and Content Standards: Deep dive into ICD, SNOMED CT, LOINC, and HL7 FHIR. Data Exchange and Transport Standards: HL7, DICOM, CDA, and emerging standards for seamless data exchange. Medical Coding Systems: Role of medical coding in billing, clinical documentation, and outcome measurement. Overview of CPT, ICD-10, and DRG codes. Emerging Trends: Role of AI in medical coding and billing, and the shift towards real-time data standardization.

UNIT - IV	**9 Hours**

Health Informatics Ecosystem: Introduction to the ecosystem, including hospitals, clinics, insurance providers, and regulatory bodies. Key Players and Stakeholders: Role of informatics professionals, data scientists, clinicians, and IT staff in healthcare. Challenges and Barriers: Addressing technical, organizational, and regulatory challenges in health informatics. Career Opportunities: Overview of roles like clinical informatics specialist, health data analyst, and telehealth coordinator. Resources and Professional Development: Important certifications, online resources, and organizations (e.g., HIMSS, AMIA).

UNIT - V	9 Hours
Health Information Privacy, Security, and Ethics: Introduction to Privacy and Security: Core principles of data privacy, HIPAA, and GDPR in healthcare. Security Principles: Confidentiality, integrity, availability, encryption methods, and access control mechanisms. Authentication and Identity Management: Role of biometric authentication, two-factor authentication, and secure access protocols. Data Security in the Cloud: Cloud computing in healthcare, managing risks in cloud-based data storage, and hybrid cloud models. Ethics in the use of AI in healthcare, managing bias in algorithms, and ensuring equitable access to digital health technologies.	

Course Outcomes:

After going through this course the student will be able to:

CO 1	:	Understand the key principles and challenges of health informatics, and apply them to real-world scenarios.
CO 2	:	Effectively manage the process of data capture, conversion, and analysis to generate actionable insights.
CO 3	:	Apply knowledge of medical coding, data standards, and interoperability to improve data sharing and clinical workflows.
CO 4	:	Implement robust security measures to protect patient data, and navigate ethical issues in health informatics.

RUBRIC FOR THE CONTINUOUS INTERNAL EVALUATION (CIE-Theory)

CIE will consist of TWO Quizzes (Q), TWO Tests (T), and ONE Experiential Learning (EL) component **[20 (Q) + 40 (T) + 40 (EL) = 100 marks)**

Sl.No.	COMPONENTS	MARKS
1.	**QUIZZES:** Quizzes will be conducted in online/offline mode. **TWO QUIZZES** will be conducted & each Quiz will be evaluated for 10 marks, and Final Quiz marks adding up to 20 marks. **THE SUM OF TWO QUIZZES WILL BE CONSIDERED AS FINAL QUIZ MARKS.**	**20**
2.	**TESTS:** Students will be evaluated in test consisting of descriptive questions with different complexity levels (Revised Bloom's Taxonomy Levels: Remembering, Understanding, Applying, Analyzing, Evaluating, and Creating). **TWO TESTS** will be conducted. Each test will be evaluated for 50 Marks, adding up to 100 Marks. **FINAL TEST MARKS WILL BE REDUCED TO 40 MARKS.**	**40**

3.	**EXPERIENTIAL LEARNING:** Students will be evaluated for their creativity and practical implementation of the problem. **Phase I (20) & Phase II (20) ADDING UPTO 40 MARKS**.	**40**
	MAXIMUM MARKS FOR THE CIE	**100**
RUBRIC FOR SEMESTER END EXAMINATION (SEE-Theory)		
Q.NO.	**CONTENTS**	**MARKS**
1 & 2	Unit 1: Question 1 or 2	20
3 & 4	Unit 2: Question 3 or 4	20
5 & 6	Unit 3: Question 5 or 6	20
7 & 8	Unit 4: Question 7 or 8	20
9 & 10	Unit 5: Question 9 or 10	20
	MAXIMUM MARKS FOR THE SEE	**100**

SEMESTER: II						
Course Code	:	MCN325DC	**CYBER FORENSICS AND CYBER LAWS**	CIE Marks	:	100
Credits L-T-P	:	3-0-0	*(Theory)*	SEE Marks	:	100
Hours	:	45L+45EL	*(Interdisciplinary Course Global Elective Group-D)*	SEE Duration	:	3 Hours

UNIT - I **9 Hours**

Computer Forensics in Today's World

Introduction to Computer Forensics and Digital Evidence, the Role of the Forensic Investigator, Understanding Forensic Readiness. Legal Issues and Considerations, Types of Computer Forensic Investigations, Forensic Investigation Process.

UNIT - II **9 Hours**

Investigation Process

Computer Forensics Investigation Methodology, Handling Digital Evidence, Chain of Custody and Documentation, Evidence Preservation: Hashing and Imaging, Investigation Planning and Legal Approval, Searching and Seizing Computers: Search and Seizure Procedures, Obtaining a Search Warrant, Securing the Crime Scene

UNIT - III **9 Hours**

Digital Evidence

Types of Digital Evidence (Physical, Logical, Latent), Collecting and Preserving Digital Evidence, Writing Reports on Digital Evidence, Identifying Evidence Sources: Hard Drives, Network Logs, Databases, Evidence Recovery Techniques, First Responder Procedures: First Responder Role in Digital Investigations, Protecting and Securing Evidence, Best Practices for Incident Response

UNIT - IV **9 Hours**

Jurisdiction of Cyberspace:

Information Technology Law Literature and Glossary, Information Technology Law Concepts, Jurisdictional Issues in Cyber Space, scope of I.T. laws,

Law and the Internet:

Domain issues in Internet, Regulatory body, ICANN regulations

UNIT - V **9 Hours**

Security Governance Objectives –

Security Architecture, Risk Management Objective, Developing A Security Strategy, Sample Strategy Development

Course Outcomes:

After going through this course the student will be able to:

CO1	:	Gain a comprehensive understanding of Cyberfornsic and Investigation
CO2	:	Apply cyber forensics measures, tools, and techniques to protect systems, networks, and information.
CO3	:	Analyse the Legal Frameworks governing the internet
CO4	:	Exploration of Security Frameworks in the Cyber space.

	MAXIMUM MARKS FOR THE CIE	**100**
RUBRIC FOR SEMESTER END EXAMINATION (SEE-Theory)		
Q.NO.	**CONTENTS**	**MARKS**
1 & 2	Unit 1: Question 1 or 2	20
3 & 4	Unit 2: Question 3 or 4	20
5 & 6	Unit 3: Question 5 or 6	20
7 & 8	Unit 4: Question 7 or 8	20
9 & 10	Unit 5: Question 9 or 10	20
	MAXIMUM MARKS FOR THE SEE	**100**

SEMESTER: II						
Course Code	:	MCV325DD	**INDUSTRIAL SAFETY AND HEALTH**	CIE Marks	:	100
Credits L-T-P	:	3-0-0	*(Theory)*	SEE Marks	:	100
Hours	:	42L+45EL	*(Interdisciplinary Course Global Elective Group-D)*	SEE Duration	:	3 Hours

UNIT - I **9 Hours**

Industrial safety: Accident, causes, types, results and control, mechanical and electrical hazards, types, causes and preventive steps/procedure. National Policy and Legislations on EHS in India - Regulations and Codes of Practice - Role of trade union safety representatives. Occupational health and safety:

Introduction: Health, Occupational health: definition, Interaction between work and health, Health hazards, workplace, economy and sustainable development. Development of accident prevention programs and development of safety organizations.

UNIT - II **9 Hours**

Work as a factor in health promotion. Potential health hazards: Air contaminants, Chemical hazards, Biological hazards, Physical hazards, Ergonomic hazards, Psychosocial factors, Evaluation of health hazards: Exposure measurement techniques, Interpretation of findings, recommended exposure limits. Controlling hazards: Engineering controls, Work practice controls, Administrative controls. Occupational diseases: Definition, Characteristics of occupational diseases, Prevention of occupational diseases.

UNIT - III **9 Hours**

Hazardous Materials characteristics and effects on health: Introduction, Chemical Agents, Organic Liquids, Gases, Metals and Metallic Compounds, Particulates and Fibers, Alkalies and Oxidizers, General Manufacturing Materials, Chemical Substitutes, Allergens, Carcinogens, Mutagens, Reproductive Hazards, Sensitizers and Teratogens, Recommended Chemical Exposure Limits. Physical Agents, Noise and Vibration, Temperature and Pressure, Carcinogenicity, Mutagenicity and Teratogenicity. Ergonomic Stresses: Stress-Related Health Incidents, Eyestrain, Repetitive Motion, Lower Back Pain, Video Display Terminals.

UNIT - IV **9 Hours**

Occupational safety and Health act.: Occupational Safety and Health Administration, right to know Laws, Accident Causation, Correcting Missing Skills, Investigator Tendencies and Characteristics, Theories of accident causation: Domino theory, Human Factors theory, Accident/Incident theory, Epidemiological theory and systems theory of accident causation.GD

UNIT - V **9 Hours**

Environmental Health And Safety Management : Concept of Environmental Health and Safety Management – Elements of Environmental Health and Safety Management Policy and implementation and review – ISO 45001-Strucure and Clauses-Case Studies.

Occupational Health and Safety Considerations: Water and wastewater treatment plants, Construction material manufacturing industries like cement plants, RMC Plants, precast plants and construction sites, Municipal solid waste management.

Course Outcomes:

After going through this course the student will be able to:

CO1	:	Explain the Industrial and Occupational health and safety and its importance.

CO2	:	Demonstrate the exposure of different materials, occupational environment to which the employee can expose in the industries.
CO3	:	Exposure to the onset of regulatory acts and accident causation models.
CO4	:	Demonstrate the significance of safety policy, models and safety management practices.

SEMESTER: II						
Course Code	:	MCV325DE	**ADVANCED TECHNOLOGIES FOR TRANSPORTATION SYSTEMS**	CIE Marks	:	100
Credits L-T-P	:	3-0-0	*(Theory)*	SEE Marks	:	100
Hours	:	45L+45EL	*(Interdisciplinary Course Global Elective Group-D)*	SEE Duration	:	3 Hours

UNIT - I	**9 Hours**

Introduction to Intelligent Transportation Systems (ITS): Definition, objectives, Historical Background, Benefits of ITS –ITS. ITS User Services. ITS Applications. Strategic Needs Assessment and Deployment. Regional ITS Architecture Development Process. ITS Standards. ITS Evaluation. ITS Challenges and Opportunities.

UNIT - II	**9 Hours**

Data collection techniques – Detectors, Automatic Vehicle Location (AVL), Automatic Vehicle Identification (AVI), Geographic Information Systems (GIS), video data collection.
Telecommunications in ITS: Information Management, Traffic Management Centres (TMC). Application of sensors to Traffic management; Traffic flow sensor technologies; Transponders and Communication systems; Data fusion at traffic management centres; Sensor plan and specification requirements; Elements of Vehicle Location and Route Navigation and Guidance concepts.

UNIT - III	**9 Hours**

Traffic Engineering - Fundamental relations of traffic flow, Traffic Stream models - , Shock wave, Car following models, Lane changing models, Vehicle arrival models, PCU values, Interrupted and Uninterrupted flow. Signalized intersection design and Analysis based on IRC, HCM and Indo –HCM. Numerical Problems. Traffic Simulation. Numerical Problems. Application of IOT, Machine learning in traffic management.

UNIT - IV	**9 Hours**

Transportation Network Analysis – Basic Introduction to Travel demand modelling, Trip generation, Distribution, Modal Split and Trip Assignment. Transit Capacity, ITS functional areas: Advanced Traffic Management Systems (ATMS), Advanced Traveler Information Systems (ATIS), Commercial Vehicle Operations (CVO), Advanced Vehicle Control Systems (AVCS), Advanced Public Transportation Systems (APTS), Advanced Rural Transportation Systems (ARTS)

UNIT - V	**9 Hours**

ITS applications: Traffic and incident management systems; ITS and sustainable mobility, travel demand management, electronic toll collection, ITS and road-pricing. Parking Management; Transportation network operations; commercial vehicle operations; public transportation applications; Automated Highway Systems- Vehicles in Platoons –ITS in World – Overview of ITS implementations in developed countries, ITS in developing countries. Case Studies

Course Outcomes:
After going through this course the student will be able to:

CO1	:	Identify and apply ITS applications at different levels
CO2	:	Illustrate ITS architecture for planning process
CO3	:	Examine the significance of ITS for various levels

CO4	:	Compose the importance of ITS in implementations

SEMESTER: II						
Course Code	:	MEC325DF	**DESIGN AND IMPLEMENTATION OF HUMAN-MACHINE INTERFACE** Industry Assisted Elective-BOSCH	CIE Marks	:	100
Credits L-T-P	:	3:0:0	*(Theory)*	SEE Marks	:	100
Hours	:	45L+45EL	*(Interdisciplinary Course Global Elective Group-D)*	SEE Duration	:	3 Hours

UNIT - I	**9 Hours**

FOUNDATIONS OF HMI: The Human: History of User Interface Designing, I/O channels, Hardware, Software and Operating environments, The Psychopathology of everyday Things, Psychology of everyday actions, Reasoning and problem solving. The computer: Devices, Memory, processing and networks. Interaction: Models, frameworks, Ergonomics, styles, elements, interactivity, Paradigms.

Introduction to HMI and domains: Automotive, Industrial, CE, Medical, ECUs within car and their functionalities. Interaction between ECUs. Communication protocols for ECUs(CAN, LIN, Most, FlexRay, Ethernet etc)

UNIT - II	**9 Hours**

Automotive Human-Machine Interfaces:
Automotive infotainment system - Evolution road map, Feature sets, System architecture, Trends, Human factors and ergonomics in automotive design, Automotive User Experience (UX) Design Principles, In-Vehicle Information Systems (IVIS), Driver-Assistance Systems (DAS) Interfaces, HMI design for adaptive cruise control, Voice and Gesture Recognition in Automotive HMIs, Touchscreen Interfaces and Controls, Usability Testing and Evaluation in Automotive HMIs, Safety Considerations and Regulations in Automotive HMIs, Emerging Technologies in Automotive HMIs, Human-Machine Interfaces for Autonomous Vehicles

UNIT - III	**9 Hours**

UX and Guidelines:
Introduction to UX design - stages, theory, Design thinking, UX Study, Interaction concepts, Graphic design tools - Adobe Photoshop, Adobe XD, Blender, GIMP, Asset Design - Overview , Guidelines and norms, 2D/3D rendering, OpenGL, OSG.

UNIT - IV	**9 Hours**

HMI User Interface: User-centered HMI development process, Basics of Web-Server. Web-based HMI: Basics of TwinCAT and HTML, CSS, JavaScript.
HMI on Mobile: Four Principles of Mobile UI Design, Benefits of Mobile HMIs, Mobile HMI Development Suites.

UNIT - V	**9 Hours**

HMI Control Systems: Introduction to Voice-Based HMI, Gesture-Based HMI, Sensor-Based UI controls.
Haptics in Automotive HMI: Kinesthetic Feedback Systems, Tactile Feedback Systems, Haptics in Multimodal HMI, Automotive Use-Cases
HMI Testing: Limitations of Traditional Test Solutions, Case - Study: Bosch's HMI validation tool - Graphics Test Systems (GTS).
UI analytics: Usage patterns, Debugging, Performance Profiling, Use Cases.

Course Outcomes:		
After going through this course the student will be able to:		
CO1	:	Explain the application of HMIs in various domain
CO2	:	Differentiate various communication protocols used in HMI development.
CO3	:	Describe car multimedia system and hardware and software evolution.
CO4	:	Use various graphic tools and advanced techniques to create UIs

Hours	:	45L+45EL	*(Interdisciplinary Course Global Elective Group-D)*	SEE Duration	:	3 Hours

UNIT - I	**9 Hours**

Fuzzy Logic Systems: Introduction to fuzzy logic, fuzzy Vs crisp set, linguistic variables, membership functions, fuzzy sets and operations on crisp sets and fuzzy sets, Fuzzy relations, operations on fuzzy relation, Cartesian Product of Relation. linguistic variables, fuzzy if then rules, compositional rule of inference, Fuzzy Rule Base and Approximate Reasoning

UNIT - II	**9 Hours**

Fuzzy Logic Control: Basic concept of fuzzy logic control, relationship to PI, PD and PID control, design of FLC: determination of linguistic values, construction of knowledge base, inference engine, tuning, fuzzification, De-fuzzification methods. Fuzzy Inference Systems (FIS), Construction and Working Principle of FIS, Mamdani FIS models, Takagi-Sugeno-Kang (TSK) fuzzy models and concept of Adaptive Fuzzy control, Examples applicable to Drives.

UNIT - III	**9 Hours**

Neural network: Fundamental Concept, history and development of neural network principles, Biological Neural Network, Comparison Between Biological Neuron and Artificial Neuron, Important Terminologies of ANN. Basic Models and Advantages of Neural Networks.
Learning methods: types of learning, supervised, unsupervised, reinforced learning, knowledge representation and acquisition
Theory, architecture and learning algorithm of neural network models: McCulloc model, Hopfield model, Perceptron Network, Back propagation network.

UNIT - IV	**9 Hours**

Neural Networks for feedback Control: Identification of system models using neural networks, Model predictive control, feedback linearization and model reference control using neural networks, Neural Network Reinforcement Learning Controller, Radial basis function neural networks, Basic learning laws in REF nets, Recurrent back propagation, CMAC networks and ART networks, Kmeans clustering algorithm. Kohnen's feature maps, pattern recognition & mapping, Examples applicable to Drives.

UNIT - V	**9 Hours**

Hybrid algorithms: Neuro-fuzzy systems, ANFIS and extreme-ANFIS, derivative free optimization methods.
Genetic algorithms: introduction, principle of natural selection, Flow chart of simple genetic algorithm, GA operators and parameters. Particle swarm optimization, Solution of typical control problems. Case studies on Application to Electrical Drives.

Course Outcomes:
After going through this course the student will be able to:

CO1	:	Explain the concepts ANN and Fuzzy Logic.
CO2	:	Analyze the techniques involved in ANN and fuzzy logic applications.
CO3	:	Design and model hybrid system with ANN and FL or independent system.

CO4	:	Apply techniques in modern industrial drives and power electronics system

UNIT - I	**9 Hours**
An Introduction to Radar: Basic Radar, The simple form of the Radar Equation, Radar Block Diagram, Radar Frequencies, Application of radar, Types of Radars. Detection of signals in Noise, Receiver Noise and the Signal-to Noise Ratio, Probability of Detection and False alarm, Introduction to Doppler, MTI, UWB Radars	
UNIT - II	**9 Hours**
Terrestrial Network based positioning and navigation: General Issues of wireless positions location, Fundamentals, positioning in cellular networks, positioning in WLANs, Positioning in Wireless sensor networks.	
UNIT - III	**9 Hours**
Satellite-based navigation systems: Global Navigation satellite systems (GNSS), GNSS receivers.	
UNIT - IV	**9 Hours**
LiDAR: Introduction to LiDAR, context and conceptual discussion of LiDAR, Types of LiDARS, LiDARS Detection modes, Flash LiDAR versus Scanning LiDAR, Monostatic versus Bistatic LiDAR, Major Devices in a LiDAR, LiDAR remote sensing, Basic components and physical principles of LiDAR, LiDAR accuracy and data formats.	
UNIT - V	**9 Hours**
SONAR: Underwater acoustics, applications, comparison with radar, submarine detection and warfare, overcoming the effects of the ocean, sonar and information processing.Transmission of the acoustic signal: Introduction, detection contrast and detection index, transmission equation, equation of passive and active sonar.	

Course Outcomes:

After going through this course the student will be able to:

CO1	:	Understand the concepts of Radar, LiDAR, Sonar, terrestrial and satellite based navigation system.
CO2	:	Apply the concepts of radars, LiDAR, Sonar, cellular networks, WLAN, sensor networks and satellites in determining the user position and navigation.
CO3	:	Analyze the different parameters of satellite and terrestrial networks for navigation systems.
CO4	:	Evaluate the Radar, LiDAR, Sonar systems and satellite and terrestrial network based navigation and tracking systems.

Each test will be evaluated for 50 Marks, adding up to 100 Marks. **FINAL TEST MARKS WILL BE REDUCED TO 40 MARKS.**	**40**
3.	**EXPERIENTIAL LEARNING:** Students will be evaluated for their creativity and practical implementation of the problem. **Phase I (20) & Phase II (20) ADDING UPTO 40 MARKS**.	**40**
	MAXIMUM MARKS FOR THE CIE	**100**
RUBRIC FOR SEMESTER END EXAMINATION (SEE-Theory)		
Q.NO.	**CONTENTS**	**MARKS**
1 & 2	Unit 1: Question 1 or 2	20
3 & 4	Unit 2: Question 3 or 4	20
5 & 6	Unit 3: Question 5 or 6	20
7 & 8	Unit 4: Question 7 or 8	20
9 & 10	Unit 5: Question 9 or 10	20
	MAXIMUM MARKS FOR THE SEE	**100**

SEMESTER: II						
Course Code	:	MET325DJ	**VEHICULAR COMMUNICATION ECOSYSTEM**	CIE Marks	:	100
Credits L-T-P	:	3-0-0	*(Theory)*	SEE Marks	:	100
Hours	:	45L+45EL	*(Interdisciplinary Course Global Elective Group-D)*	SEE Duration	:	3 Hours

UNIT - I	9 Hours
Introduction: Basic Principles and Challenges, Past and Ongoing VANET Activities **Standards and Regulations of DSRC** Introduction, Layered Architecture for VANETs, DSRC Regulations, DSRC Physical Layer Standard, DSRC Data Link Layer Standard (MAC and LLC), DSRC Middle Layers.	
UNIT - II	**9 Hours**
Physical Layer Considerations for Vehicular Communications: Standards Overview, Wireless Propagation Theory, Channel Metrics, Measurement Theory, Empirical Channel Characterization at 5.9 GHz. **MAC Layer and Scalability Aspects of Vehicular Communication Networks:** Challenges and Requirements. MAC Approaches for VANETs, Communication Based on IEEE 802.11p.	
UNIT - III	**9 Hours**
MAC Layer and Scalability Aspects of Vehicular Communication Networks Performance Evaluation and Modeling, Aspects of congestion control. **Data Security in Vehicular Communication Networks**: Challenges of Data Security in Vehicular Networks, Network, Applications, and Adversarial Model, Security Infrastructure, Cryptographic Protocols.	
UNIT - IV	**9 Hours**
Intra-vehicle communication:-In-vehicle networks, Automotive bus systems, In-vehicle Ethernet, Wireless in-vehicle networks **Inter-vehicle communication**: Applications, Requirements and components, Concepts for inter-vehicle communication, Fundamental limit.	
UNIT - V	**9 Hours**
Cooperative Vehicular Safety Applications: Introduction, Enabling technologies, Cooperative system architecture, Mapping for safety applications. **VANET-enabled Active Safety Applications:** Infrastructure-to-vehicle applications, Vehicle-to-vehicle applications, Pedestrian-to-vehicle applications.	

Course Outcomes:
After going through this course the student will be able to:

CO1	:	Illustrate fundamentals of wireless vehicular networks.
CO2	:	Design of Physical & MAC layer and routing protocols for vehicular networks.
CO3	:	Analyse the security issues and energy management in vehicular networks.
CO4	:	Evaluate the performance of vehicular networks in different use cases.

RUBRIC FOR THE CONTINUOUS INTERNAL EVALUATION (CIE-Theory)		
CIE will consist of TWO Quizzes (Q), TWO Tests (T), and ONE Experiential Learning (EL) component **[20 (Q) + 40 (T) + 40 (EL) = 100 marks)**		
Sl.No.	**COMPONENTS**	**MARKS**
1.	**QUIZZES:** Quizzes will be conducted in online/offline mode. **TWO QUIZZES** will be conducted & each Quiz will be evaluated for 10 marks, and Final Quiz marks adding up to 20 marks. **THE SUM OF TWO QUIZZES WILL BE CONSIDERED AS FINAL QUIZ MARKS.**	**20**
2.	**TESTS:** Students will be evaluated in test consisting of descriptive questions with different complexity levels (Revised Bloom's Taxonomy Levels: Remembering, Understanding, Applying, Analyzing, Evaluating, and Creating). **TWO TESTS** will be conducted. Each test will be evaluated for 50 Marks, adding up to 100 Marks. **FINAL TEST MARKS WILL BE REDUCED TO 40 MARKS.**	**40**
3.	**EXPERIENTIAL LEARNING:** Students will be evaluated for their creativity and practical implementation of the problem. **Phase I (20) & Phase II (20) ADDING UPTO 40 MARKS**.	**40**
	MAXIMUM MARKS FOR THE CIE	**100**
RUBRIC FOR SEMESTER END EXAMINATION (SEE-Theory)		
Q.NO.	**CONTENTS**	**MARKS**
1 & 2	Unit 1: Question 1 or 2	20
3 & 4	Unit 2: Question 3 or 4	20
5 & 6	Unit 3: Question 5 or 6	20
7 & 8	Unit 4: Question 7 or 8	20
9 & 10	Unit 5: Question 9 or 10	20
	MAXIMUM MARKS FOR THE SEE	**100**

SEMESTER: II						
Course Code	:	MIM325DK	**ESSENTIALS OF PROJECT MANAGEMENT**	CIE Marks	:	100
Credits L-T-P	:	3-0-0	*(Theory)*	SEE Marks	:	100
Hours	:	45L+45EL	*(Interdisciplinary Elective)*	SEE Duration	:	3 Hours

UNIT - I	**9 Hours**
Introduction: Project Planning, Need of Project Planning, Project Life Cycle, Roles, Responsibility and Team Work, Project Planning Process, Work Breakdown Structure (WBS), Introduction to Agile Methodology.	
UNIT - II	**9 Hours**
Capital Budgeting: Capital Investments: Importance and Difficulties, phases of capital budgeting, levels of decision making, facets of project analysis, feasibility study – a schematic diagram, objectives of capital budgeting	
UNIT - III	**9 Hours**
Project Costing: Cost of Project, Means of Finance, Cost of Production, Working Capital Requirement and its Financing, Profitability Projections, Projected Cash Flow Statement, Projected Balance Sheet, Multi-year Projections, Financial Modeling, Social Cost Benefit Analysis	
UNIT - IV	**9 Hours**
Tools & Techniques of Project Management: Bar (GANTT) chart, bar chart for combined activities, logic diagrams and networks, Project evaluation and review Techniques (PERT) Critical Path Method (CPM), Computerized project management.	
UNIT - V	**9 Hours**
Project Management and Certification: An introduction to SEI, CMMI and project management institute USA – importance of the same for the industry and practitioners. PMBOK 6 - Introduction to Agile Methodology, hemes / Epics / Stories, Implementing Agile. Domain Specific Case Studies on Project Management: Case studies covering project planning, scheduling, use of tools & techniques, performance measurement.	

Course Outcomes:
After going through this course the student will be able to:

CO1	:	Explain project planning activities that accurately forecast project costs, timelines, and quality.
CO2	:	Evaluate the budget and cost analysis of project feasibility.
CO3	:	Analyze the concepts, tools and techniques for managing projects.
CO4	:	Illustrate project management practices to meet the needs of Domain specific stakeholders from multiple sectors of the economy (i.e. consulting, government, arts, media, and charity organizations).

SEMESTER: II						
Course Code	:	MIS325DM	**USER INTERFACE AND USER EXPERIENCE**	CIE Marks	:	100
Credits L-T-P	:	3-0-0	*(Theory)*	SEE Marks	:	100
Hours	:	45L+45EL	*(Interdisciplinary Course Global Elective Group-D))*	SEE Duration	:	3 Hours

UNIT - I	**9 Hours**
What's a UI Pattern?: How Users Interact With Design Patterns, Following Universal Design Conventions, Applying Empathy to UI Design Patterns. Why Use UI Patterns?: Why Patterns Work, Expectations Reinforce Themselves, Deadline-Busting Communication, Why not use patterns?. The Importance of Prototyping First: Got a Pattern? Plan it Out, Thinking Through the Process, Patterns Take Guesswork Off of Developers' Plates.	
UNIT - II	**9 Hours**
User Testing: Insights You Can't Ignore. Prototyping UI Patterns: Explaining the Gray Box, Pattern Libraries Are Prototyping Shortcuts, Reusable elements, Patterns and Prototypes Work Together, Applying UI Design Patterns: Building a Pattern Library, Riffing on Design Patterns, Tweaking Pattern Styles, Going forward, Useful UI Pattern Examples, Formatting Data, Getting input, Navigation, Teasers.	
UNIT - III	**9 Hours**
Design for Usefulness: Painkillers & Vitamins, Embracing Goal-Centered Design, Test for Relevancy With an MVP, A Quick MVP Case Study: Buffer. Designing for Usability: Forgiving, Satisfying, The 6-Step Process to Improve Usability. Designing for Desirability: Desirable Products Are More Usable, Desire Is Relative to Users, Elements of Desirable Design.	
UNIT - IV	**9 Hours**
Designing for Findability: Building the Right Information Architecture, 5 IA Layouts for the Web, 5 Navigational Menu Patterns, Testing Findability. Designing for Accessibility: Universal Design, What Accessibility Means for UX Design, Benefits of Accessibility, Accessibility Best Practices,	
UNIT - V	**9 Hours**
The Core of Desirable Design: The Habit Loop, A Quick Case Study, Quick Case Study: Apple.com. Designing for Credibility: First Impressions Matter, Quick Case Study: Chase, Building a Credible Product Interface, Selling the Product Through Social Proof, Persuading Through Transparency.	

Course Outcomes:

After going through this course the student will be able to:

CO1	:	Apply the concept of User Interface and User Experience to increase look and feel various applications.
CO2	:	Analyse the usability, accesssibility, availability and other factors of User Interface design patterns.
CO3	:	Design and implement techniques of implementing design patterns.
CO4	:	Evaluate the design patetrns and elements of user experience.

	MAXIMUM MARKS FOR THE SEE	**100**

SEMESTER: II						
Course Code	:	MMA325DN	**MATHEMATICAL METHODS FOR DATA SCIENCE**	CIE Marks	:	100
Credits L-T-P	:	3-0-0	*(Theory)*	SEE Marks	:	100
Hours	:	45L+45EL	*(Interdisciplinary Course Global Elective Group-D)*	SEE Duration	:	3 Hours

UNIT - I	**9 Hours**

Parameter Estimation: Introduction to probability models of univariate random variables, Discrete distribution (Bernoulli, Binomial, Poisson), Continuous distributions (Uniform, Exponential, Normal), Estimation - Criteria for good estimates - unbiasedness, consistency, efficiency and sufficiency, Variance of a point estimator, Parameter estimation via maximum likelihood, Method of moments, Bayesian estimation of parameters.

UNIT - II	**9 Hours**

Optimization I: Introduction and formulation, Optimality conditions, Review of local maxima, and local minima along with first and second order conditions. Taylor series and local function approximation, automatic differentiation, One dimensional Search Methods - Sequential search method, Fibonacci search method, Golden section search method.

UNIT - III	**9 Hours**

Optimization II: Constrained and Unconstrained optimization, Gradient vector, Hessian matrix, optimization using Hessian matrix, Gradient descent method, Step size selection and convergence, Newton method, Stochastic gradient descent (SGD), Convex optimization, Duality - weak and strong duality, Optimization using duality.

UNIT - IV	**9 Hours**

Fuzzy Optimization: Basic concepts of fuzzy sets - Operations on fuzzy sets, Fuzzy relation equations, Fuzzy logic control, Fuzzification, Defuzzification, Decision making logic, Membership functions.

Artificial Neural Networks: Introduction - Neuron model, Multilayer perceptions - Back propagation algorithm and its variants, Loss functions in artificial neural networks.

UNIT - V	**9 Hours**

Machine Learning Algorithms: Unsupervised learning, Supervised learning, Linear regression, Multiple Linear Regression, Overfitting, Naïve Bayes classifier. Clustering methods, k-means clustering, Linear support vector machine, Kernel functions and Nonlinear support vector machine.

Course Outcomes:

After going through this course the student will be able to:

CO1	:	Explore fundamental concepts of estimation, optimization, and machine learning applied in various branches of engineering. **(PO1, PO4, PO6)**
CO2	:	Apply theoretical concepts of estimation and optimization to model problems using a machine learning approach on model requirements and to evaluate solutions within given constraints effectively. **(PO1, PO2, PO4, PO6)**
CO3	:	Analyze and solve the modern engineering problems using appropriate techniques of statistical and mathematical learning to the real-world problems arising in many practical situations. **(PO1, PO3, PO4, PO6)**

CO4	:	Develop and implement algorithms for constrained and unconstrained optimization, utilizing estimation techniques to classify, predict, and optimize solutions for practical applications, emphasizing model accuracy and performance and also engage in lifelong learning. **(PO1, PO2, PO3, PO4, PO6)**

UNIT - I	**9 Hours**
Fundamentals of Industry 4.0-Introduction, Key Components of Industry 4.0, RAMI 4.0, Cyber-Physical Systems. **Servitization and Product-Service Systems** - Integrated Overview, Examples Across Sectors. Industry 4.0 Across Sectors- Introduction, Smart Manufacturing, Transportation 4.0, Multimodal Transportation Systems, Rail 4.0, Logistics 4.0 and Implications. **Future Trends and Challenges**- Emerging Applications, Risks and Barriers to Implementation	
UNIT - II	**9 Hours**
The Concept of IIoT- Introduction to IIoT, Key Features and Applications **Modern Communication Protocols**- Overview, TCP/IP, Wireless Communication, Technologies. **API**- A Technical Perspective, Importance in IIoT, Examples and Applications, **Middleware Architecture**- Role in IIoT, Integration and Data Flow Management. **Emerging Trends in IIoT**- Industrial IoT Standards and Frameworks, Edge Computing in IIoT.	
UNIT - III	**9 Hours**
Data Analytics in Manufacturing: Energy Efficiency in Manufacturing, Anomaly Detection in Air Conditioning Systems, Smart Remote Machinery Maintenance Systems with Komatsu, Quality Prediction in Steel Manufacturing, Predictive Maintenance with Data Analytics **Internet of Things and New Value Proposition**: IoT in Manufacturing, Value Creation Barriers: Standards, security, and privacy concerns. **Advances in Robotics in the Era of Industry 4.0**: Recent Technological Components of Robots, Advanced Sensor Technologies, Artificial Intelligence in Robotics, Collaborative Robots, Internet of Robotic Things, Cloud Robotics, Digital Twin Technology	
UNIT - IV	**9 Hours**
Additive Manufacturing Technologies and Applications: Additive Manufacturing Technologies Overview, Stereo lithography, 3D Printing, Fused Deposition Modeling, Selective Laser Sintering, Laser Engineered Net Shaping, Manufacturing in Industry 4.0, Hybrid Manufacturing Processes. **Advances in Virtual Factory Research and Applications**: The State of Art, The Virtual Factory Software	
UNIT - V	**9 Hours**
Cybersecurity and Resilience in Industry 4.0: Introduction to Cybersecurity in Industry 4.0, Industrial IoT security, Edge and Cloud Security, Digital Twin Security, AI and Machine Learning for Cybersecurity, Standards and Frameworks for Industry 4.0 Cybersecurity, Resilience Strategies for Industry 4.0, Future Trends in Cybersecurity for Industry 4.0	

Course Outcomes:		
After going through this course the student will be able to:		
CO1	:	Understand the opportunities, challenges brought about by Industry 4.0 for benefits of organizations and individuals
CO2	:	Analyze the effectiveness of Smart Factories, Smart cities, Smart products and Smart services
CO3	:	Apply the Industrial 4.0 concepts in a manufacturing plant to improve productivity and profits
CO4	:	Evaluate the effectiveness of Cloud Computing in a networked economy

SEMESTER: II						
Course Code	:	MME325DQ	**INDUSTRIAL INTERNET OF THINGS (IIOT)**	CIE Marks	:	100
Credits L-T-P	:	3-0-0	*(Theory)*	SEE Marks	:	100
Hours	:	45L+45EL	*(Interdisciplinary Course Global Elective Group-D)*	SEE Duration	:	3 Hours

UNIT - I	**9 Hours**

Introduction: IoT vs IIoT, challenges in deployment, building blocks of business model and architecture, layers, sensing for manufacturing process, processing, communication and networking. Applications – Factories and assembly lines, inventory management and quality control, facility management.

Industrial Control Systems: Process Industries versus Discrete Manufacturing Industries – Levels, variables and parameters, Continuous Control Systems, Discrete Control Systems, Computer Process Control - Control Requirements, Capabilities of Computer Control, Forms of Computer Process Control.

UNIT - II	**9 Hours**

Sensors in IIoT applications: Temperature sensor interfacing, accelerometer sensor interfacing, MoS Gas sensor, magneto strictive sensors, speed sensor, ultrasonic sensor, smart sensors.

Automatic identification and data Capture: Overview Of Automatic Identification Methods, Linear (One-Dimensional) Bar Code, Two-Dimensional Bar Codes, Radio Frequency Identification, Magnetic Stripes, Optical Character Recognition, Machine Vision

UNIT - III	**9 Hours**

Group Technology and Cellular Manufacturing: Part Family, Intuitive Grouping, Parts Classification and Coding, Production Flow Analysis, cellular manufacturing - Composite Part Concept, Machine Cell Design, applications of group technology, Opitz Part Coding System, Machine Cell Organization and Design Rank-Order Clustering - Numericals

UNIT - IV	**9 Hours**

Industrial Networking: Introduction, Hierarchy of Industrial Networks, Network Topologies, Data Flow Management, Transmission Hardware, Network Backbones, Network Communication Standards, Fieldbus Networks

Simulating Industrial Processes: Queues and Queueing – waiting time, service time, machine utilisation, Modelling an Industrial Process Designing a Process Simulation, managing resource utilisation, product mixes, Queuing network models.

UNIT - V	**9 Hours**

Clustering: Similarity measures, hierarchical clustering – single linkage, complete linkage, average linkage Non heirerchial clustering – Numericals, multidimensional scaling correspondence analysis - Numericals

Prediction Models: K- Nearest neighbour, RMS Error and Mean Absolute Error, Mean Absolute Percentage Error, Coefficient of Determination, Underfitting and Overfitting, Cross-Validation, multiple regression – Numericals.

Course Outcomes:		
After going through this course the student will be able to:		
CO1	:	**Analyze** the differences between IoT and IIoT, and evaluate the challenges, architectures, and sensing layers involved in the deployment of IIoT for manufacturing and industrial applications.
CO2	:	**Demonstrate** the ability to interface sensors in IIoT systems, and apply automatic identification techniques for process automation.
CO3	:	**Design** machine cells using group technology principles, and implement cellular manufacturing systems for optimized production workflows.
CO4	:	**Develop** simulation models for industrial processes, and predict outcomes to optimize industrial system performance.

5 & 6	Unit 3: Question 5 or 6	20
7 & 8	Unit 4: Question 7 or 8	20
9 & 10	Unit 5: Question 9 or 10	20
	MAXIMUM MARKS FOR THE SEE	**100**

SEMESTER: II						
Course Code	:	MIM426RT	**RESEARCH METHODOLOGY**	CIE Marks	:	NA
Credits L-T-P	:	2-0-0	*(Theory - NPTEL Online Course)*	SEE Marks	:	50
Hours	:	16L	*(Common Course to all M. Tech Programs)*	SEE Duration	:	2 Hours

This course is indicative only and it is subject to change based on the courses running at that time by NPTEL

Duration of the ONLINE Course - 8 Weeks

Week 1: A group discussion on what is research; Overview of research
Week 2: Literature survey, Experimental skills
Week 3: Data analysis, Modelling skills
Week 4: Technical writing; Technical Presentations; Creativity in Research
Week 5: Creativity in Research; Group discussion on Ethics in Research
Week 6: Design of Experiments
Week 7: Intellectual Property
Week 8: Department specific research discussions

GENERAL GUIDELINES

1. NPTEL is an acronym for National Programme on Technology Enhanced Learning which is an initiative by seven Indian Institutes of Technology (IIT Bombay, Delhi, Guwahati, Kanpur, Kharagpur, Madras and Roorkee) and Indian Institute of Science (IISc) for creating course contents in engineering and science.
2. NPTEL is offering online certification courses through its portal - https://swayam.gov.in/nc_details/NPTEL
3. Enrollment to courses and exam registration can be done in ONLINE mode only. The link is available on NPTEL website http://nptel.ac.in/
4. Students need to enroll for the NPTEL course and clear the exam.
5. In case students fail to get the certificate, they need to enroll for the same course once again, in the subsequent NPTEL semester and clear the exam.
6. If the same course is not offered by NPTEL (i.e. if the same course is not re-run) in the subsequent semester by NPTEL, the students need to write letter seeking permission from the Counsellor, HoD and Dean Academics with further approval from BoS Committee to take alternative course from the list announced by NPTEL.
7. Exam is conducted by NPTEL.

SEMESTER: II						
Course Code	:	MIT427SL	**SKILL LAB (API DEVELOPMENT AND INTEGRATION LAB)**	CIE Marks	:	50
Credits L-T-P	:	0-0-2		SEE Marks	:	50
Hours/Week	:	5	*Common Course (MIT,MSE)*	SEE Duration	:	3 Hrs
LABORATORY						**30 Hours**

Students are expected to choose a relevant case study (Problem Statement) and carryout following steps with proper documentation.
Module-1
Analyse problems related to building relevant APIs.
Design and develop Java-based RESTful APIs using Spring MVC and Spring Boot frameworks. Cover key principles and best practices for: Versioning, Security, Documentation, Error handling, Paging and sorting
Module- 2:
Develop skills to build advanced REST applications using Spring technologies, Focus on creating robust, scalable, and maintainable REST applications,
Module-3:
Hands-On Learning: Build Java-based microservices, native cloud, or any applications using Spring REST, Employ Spring MVC and RESTful Spring, • Build a GraphQL application example
Module-4:
Document REST services, as well as versioning, paging, and sorting, Test, handle errors and secure your application

Examples of API Integration Use Cases: Connect Cloud Apps, Creation of Custom APIs Multiple Services Management, Building an Application with Spring Boot/Any other technology

Course Outcomes:
After going through this course the student will be able to:

CO1	:	Comprehend and apply the key API concepts/tools such as REST, SOAP, and GraphQL, and describe how they differ in terms of design and usage for various application needs.
CO2	:	Analyse the API integration mechanisms within applications to effectively manage authentication, testing, handle errors to ensure proper functionality and reliability.
CO3	:	Design and Document functional APIs based on best practices and create detailed documentation using tools like OpenAPI, ensuring clarity and completeness for developers and users.
CO4	:	Evaluate and implement security protocols such as API keys, OAuth, and rate limiting to safeguard APIs against unauthorized access and potential attacks, ensuring secure and efficient API operation.

2. Sourabh Sharma, "Modern API Development with Spring and Spring Boot: Design highly scalable and maintainable APIs with REST, gRPC, GraphQL, and the reactive paradigm", Packt Publishing , 2021, Kindle Edition.

3.Dinesh Rajput, " Mastering Spring Boot 2.0: Build modern, cloud-native, and distributed systems using Spring Boot", Packt Publishing, 2018, ISBN: 978-1787127562.

4. Harihara Subramanian, Pethuru Raj, "Hands-On RESTful API Design Patterns and Best Practices", 1st Edition, Packt Publishing, 2019, ISBN: 978-1788992664.

RUBRIC FOR CONTINUOUS INTERNAL EVALUATION (CIE-Lab)

Q.NO.	CONTENTS	MARKS
1	Conduction of the Experiments relavant to modules & Report	15
2	Design and testing of the Prototype / Projects / Modules	20
3	Final presentation and report	15
	CIE LAB TOTAL	**50**
	MAXIMUM MARKS FOR THE CIE	**50**

RUBRIC FOR SEMESTER END EXAMINATION (SEE-Lab)

The evaluation will be carried out by Internal and External examiners through Exhibition Mode. The following weightage would be given for the exhibition.

Sl.NO.	CONTENTS	MARKS
1	Presentation through posters	15
2	Demonstration of the Prototype / Projects / Modules	25
3	Viva Voce	10
	SEE LAB TOTAL	**50**
	MAXIMUM MARKS FOR THE SEE	**50**

SEMESTER: III						
Course Code	:	MIT231TA	**BIG DATA COMPUTING (Theory)**	CIE Marks	:	100
Credits L-T-P	:	3-1-0		SEE Marks	:	100
Hours	:	45L+45EL+30T	*(Professional Coure Course)*	SEE Duration	:	3 Hrs

UNIT-I	**9 Hrs**
Introduction to Big Data Analytics: Definition, Need of Big Data and its characteristics, Classification of Data - Structured, semi structured, and unstructured, Scalability and Parallel Processing, Designing Data Architecture, Data Sources, Quality, Pre-Processing and Storing, Data Storage and Analysis, Big Data Analytics Applications and Case Studies.	
UNIT-II	**9 Hrs**
Introduction to Hadoop: Introduction, Hadoop and its Ecosystem, Hadoop Distributed File System, MapReduce Framework and Programming Model, Hadoop Yarn, Hadoop Ecosystem Tools, Hadoop Distributed File System Basics: HDFS Design Features, Components, HDFS User Commands.	
UNIT-III	**9 Hrs**
MapReduce, Hive and Pig: Introduction, MapReduce Map Tasks, Reduce Tasks and MapReduce Execution, Composing MapReduce for Calculations and Algorithms, Hive, HiveQL, Pig.	
UNIT - IV	**9 Hrs**
Spark and Big Data Analytics: Introduction to Data Analysis with Spark-Spark SQL, Using Python with Spark SQL, Data Analysis Operations, Data ETL process, Introduction Analytics, Reporting and Visualization.	
UNIT - V	**9 Hrs**
Machine Learning Algorithms for Big Data Analytics: Introduction, Estimating the relationships, Outliers, Variances, Probability Distributions, and Correlations, Regression analysis, Finding Similar Items, Similarity of Sets and Collaborative Filtering, Clustering Analysis.	

Course Outcomes:
After going through this course the student will be able to:

CO1	:	Understand the need and fundamental concepts of Big data and visualization in real world applications.
CO2	:	Identify and apply big data analytics frameworks and visualization techniques for decision making.
CO3	:	Analyze the use of big data analytics and visualization for business applications.

RUBRIC FOR THE CONTINUOUS INTERNAL EVALUATION (CIE-Theory)		
CIE will consist of TWO Quizzes (Q), TWO Tests (T), and ONE Experiential Learning (EL) component **[20 (Q) + 40 (T) + 40 (EL) = 100 marks)**		
Sl.No.	**COMPONENTS**	**MARKS**
1.	**QUIZZES:** Quizzes will be conducted in online/offline mode. **TWO QUIZZES** will be conducted & each Quiz will be evaluated for 10 marks, and Final Quiz marks adding up to 20 marks. **THE SUM OF TWO QUIZZES WILL BE CONSIDERED AS FINAL QUIZ MARKS.**	**20**
2.	**TESTS:** Students will be evaluated in test consisting of descriptive questions with different complexity levels (Revised Bloom's Taxonomy Levels: Remembering, Understanding, Applying, Analyzing, Evaluating, and Creating). **TWO TESTS** will be conducted. Each test will be evaluated for 50 Marks, adding up to 100 Marks. **FINAL TEST MARKS WILL BE REDUCED TO 40 MARKS.**	**40**
3.	**EXPERIENTIAL LEARNING:** Students will be evaluated for their creativity and practical implementation of the problem. **Phase I (20) & Phase II (20) ADDING UPTO 40 MARKS**.	**40**
	MAXIMUM MARKS FOR THE CIE	**100**

RUBRIC FOR SEMESTER END EXAMINATION (SEE-Theory)		
Q.NO.	**CONTENTS**	**MARKS**
1 & 2	Unit 1: Question 1 or 2	20
3 & 4	Unit 2: Question 3 or 4	20
5 & 6	Unit 3: Question 5 or 6	20
7 & 8	Unit 4: Question 7 or 8	20
9 & 10	Unit 5: Question 9 or 10	20
	MAXIMUM MARKS FOR THE SEE	**100**

SEMESTER: III						
Course Code	:	MCE332E1	**DATA MINING**	CIE Marks	:	NA
Credits L-T-P	:	2-0-0	*(Theory - NPTEL Course online)*	SEE Marks	:	50
Hours	:	16L	*Professional Elective Course (NPTEL) (Group-E)*	SEE Duration	:	2 Hrs

This course is indicative only and it is subject to change based on the courses running at that time by NPTEL

Duration of the ONLINE Course - 8 Weeks

Week 1: Introduction, Data Preprocessing
Week 2: Association Rule Mining, Classification Basics
Week 3: Decision Tree, Bayes Classifier, K nearest neighbor
Week 4: Support Vector Machine, Kernel Machine
Week 5: Clustering, Outlier detection
Week 6: Sequence mining
Week 7: Evaluation, Visualization.
Week 8: Case studies

Reference Books:

GENERAL GUIDELINES

1. NPTEL is an acronym for National Programme on Technology Enhanced Learning which is an initiative by seven Indian Institutes of Technology (IIT Bombay, Delhi, Guwahati, Kanpur, Kharagpur, Madras and Roorkee) and Indian Institute of Science (IISc) for creating course contents in engineering and science.
2. NPTEL is offering online certification courses through its portal - https://swayam.gov.in/nc_details/NPTEL
3. Enrollment to courses and exam registration can be done in ONLINE mode only. The link is available on NPTEL website http://nptel.ac.in/
4. Students need to enroll for the NPTEL course and clear the exam.
5. In case students fail to get the certificate, they need to enroll for the same course once again, in the subsequent NPTEL semester and clear the exam.
6. If the same course is not offered by NPTEL (i.e. if the same course is not re-run) in the subsequent semester by NPTEL, the students need to write letter seeking permission from the Counsellor, HoD and Dean Academics with further approval from BoS Committee to take alternative course from the list announced by NPTEL.
7. Exam is conducted by NPTEL for this or equivalent course for the same

SEMESTER: III						
Course Code	:	MCE332E2	**DATA SCIENCE FOR ENGINEERS**	CIE Marks	:	NA
Credits L-T-P	:	2-0-0	*(Theory - NPTEL Course online)*	SEE Marks	:	50
Hours	:	16L	*Professional Elective Course (NPTEL) (Group-E)*	SEE Duration	:	2 Hours

This course is indicative only and it is subject to change based on the courses running at that time by NPTEL

Duration of the ONLINE Course - 8 Weeks

Week 1: Course philosophy and introduction to R
Week 2: Linear algebra for data science

1. Algebraic view - vectors, matrices, product of matrix & vector, rank, null space, solution of over-determined set of equations and pseudo-inverse)
2. Geometric view - vectors, distance, projections, eigenvalue decomposition

Week 3: Statistics (descriptive statistics, notion of probability, distributions, mean, variance, covariance, covariance matrix, understanding univariate and multivariate normal distributions, introduction to hypothesis testing, confidence interval for estimates)
Week 4: Optimization
Week 5: 1. Optimization
2. Typology of data science problems and a solution framework
Week 6: 1. Simple linear regression and verifying assumptions used in linear regression
2. Multivariate linear regression, model assessment, assessing importance of different variables, subset selection
Week 7: Classification using logistic regression
Week 8: Classification using kNN and k-means clustering

4. Students need to enroll for the NPTEL course and clear the exam.
5. In case students fail to get the certificate, they need to enroll for the same course once again, in the subsequent NPTEL semester and clear the exam.
6. If the same course is not offered by NPTEL (i.e. if the same course is not re-run) in the subsequent semester by NPTEL, the students need to write letter seeking permission from the Counsellor, HoD and Dean Academics with further approval from BoS Committee to take alternative course from the list announced by NPTEL.
7. Exam is conducted by NPTEL equivalent course for the same.

SEMESTER: III						
Course Code	:	MCE362E3	**INTRODUCTION TO SOFT COMPUTING**	CIE Marks	:	NA
Credits L-T-P	:	2-0-0	*(Theory - NPTEL Course online)*	SEE Marks	:	50
Hours	:	16L	*Professional Elective Course (NPTEL)(Group-E)*	SEE Duration	:	2 Hours

This course is indicative only and it is subject to change based on the courses running at that time by NPTEL

Duration of the ONLINE Course - 8 Weeks

Week 1: Introduction to Soft Computing, Introduction to Fuzzy logic,Fuzzy membership functions,Operations on Fuzzy sets
Week 2: Fuzzy relations, Fuzzy propositions, Fuzzy implications, Fuzzy inferences
Week 3: Defuzzyfication Techniques-I, Defuzzyfication Techniques-II, Fuzzy logic controller-I, Fuzzy logic controller-II
Week 4: Solving optimization problems, Concept of GA, GA Operators: Encoding,GA Operators: Selection-I
Week 5: GA Operators: Selection-II, GA Operators: Crossover-I, GA Operators: Crossover-II, GA Operators: Mutation
Week 6: Introduction to EC-I, Introduction to EC-II, MOEA Approaches: Non-Pareto, MOEA Approaches: Pareto-I
Week 7: MOEA Approaches: Pareto-II, Introduction to ANN, ANN Architecture
Week 8: ANN Training-I, ANN Training-II, ANN Training-III, Applications of ANN

5. In case students fail to get the certificate, they need to enroll for the same course once again, in the subsequent NPTEL semester and clear the exam.

6. If the same course is not offered by NPTEL (i.e. if the same course is not re-run) in the subsequent semester by NPTEL, the students need to write letter seeking permission from the Counsellor, HoD and Dean Academics with further approval from BoS Committee to take alternative course from the list announced by NPTEL.
7. Exam is conducted by NPTEL for this or equivalent course for the same.

SEMESTER: III						
Course Code	:	MCE332E4	**DESIGN AND ENGINEERING OF COMPUTER SYSTEMS**	CIE Marks	:	NA
Credits L-T-P	:	2-0-0	*(Theory - NPTEL Course online)*	SEE Marks	:	50
Hours	:	16L	*Professional Elective Course (NPTEL) (Group-E)*	SEE Duration	:	2 Hours

This course is indicative only and it is subject to change based on the courses running at that time by NPTEL

Duration of the ONLINE Course - 8 Weeks

Week 1 - Introduction to computer systems.
• Introduction and overview of the course
• Principles for designing computer systems
• Overview of computer system hardware and software
Week 2 - Process management and CPU virtualization
• Process abstraction and process management in operating systems
• Threads and concurrency
• Virtual machines and containers
Week 3 - Memory management
• Memory management in operating systems
• Virtual memory and paging
• Optimizing memory access in user programs
Week 4 - Disk and network I/O
• Filesystem data structures and implementation
• Synchronous and event-driven APIs for socket-based network communication
• Network I/O subsystem in operating systems
Week 5 - Computer networking
• Architecture of the Internet
• Internet routing, transport and applications
• Network security
Week 6 - End-to-end application design
• Inter-process and inter-thread synchronization
• Architecture of multi-tier applications
• Case studies and examples of systems design
Week 7 - Performance engineering
• Performance measurement and analysis
• Techniques to improve performance of computer systems
• Caching, horizontal and vertical scaling, load balancing
Week 8 - Reliability engineering
• Techniques for fault tolerance in computer systems
• Replication, consistency, and atomicity
• Case studies of designing reliable computer systems

NPTEL is offering online certification courses through its portal - https://swayam.gov.in/nc_details/NPTEL 3. Enrollment to courses and exam registration can be done in ONLINE mode only. The link is available on NPTEL website http://nptel.ac.in/ 4. Students need to enroll for the NPTEL course and clear the exam. 5. In case students fail to get the certificate, they need to enroll for the same course once again, in the subsequent NPTEL semester and clear the exam. 6. If the same course is not offered by NPTEL (i.e. if the same course is not re-run) in the subsequent semester by NPTEL, the students need to write letter seeking permission from the Counsellor, HoD and Dean Academics with further approval from BoS Committee to take alternative course from the list announced by NPTEL. 7. Exam is conducted by NPTEL equivalent course for the same.

SEMESTER: III							
Course Code	:	MIT433P	**MINOR PROJECT**	CIE Marks	:	50
Credits L-T-P	:	0-0-6		SEE Marks	:	50
Hours/Week	:	12		SEE Duration	:	3 Hours

Guidelines

1. Student can form group of two to execute the Minor Project.
2. Students are required to select topics related to their PG Program Specialization after extensive Literature Survey and analyzing the Research gaps.
3. Students will be assigned to guides in accordance with the expertise of the faculty.
4. Minor project topics could also be aligned to be implemented/executed based on any of the 16 Centre of Excellence (CoE)/ 06 Center of Competence (CoC) domain. The details of these could be obtained by visiting the website https://rvce.edu.in/rvce-center-excellence
5. Minor project has to be implemented/executed in-house, using the resources available in the department/college/CoE/CoC.
6. Students have to note the periodic progress in the Minor Project Diary and report the work carried to their respective guides.
7. Students have to present the Minor project work to the departmental committee and only upon approval by the committee, the student can proceed to prepare and submit the hard copy of the final Minor project report.
8. The reports shall be printed on A4 size with 1.5 spacing and Times New Roman with font size 12, outer cover of the report (wrapper) has to be softbound in Ivory/White color for PG circuit Programs and Light Blue for Non-Circuit Programs.

Course Outcomes:
After going through this course the student will be able to:

CO1	:	Analyze the research gaps, formulate the problem definition, conceptualize the objectives and design solution to cater to specific problems.
CO2	:	Apply higher order thinking skills and develop skill competencies specific to program specialization to implement real world problems with professional ethical standards.
CO3	:	Demonstrate the skill and knowledge by applying appropriate tools and techniques specific to their domain.

Scheme of Continuous Internal Evaluation (CIE):
The evaluation committee shall consist of Guide, Professor, Associate Professor/Assistant Professor. The committee shall assess and evaluate the presentation and the progress reports.

The evaluation criteria shall be as per the rubrics given below:		
Reviews	**Activity**	**Weightage**
I	Approval of the selected topic, formulation of Problem Statement and Objectives along with Synopsis submission	10%
II	Demonstrate the skill and knowledge by applying appropriate tools/techniques to design solution specific to the problem.	30%
III	Demonstrates the work carried out through experimental results, analysis and testing. Exhibits writing and communication skills through presentations and report writing.	60%

Scheme for Semester End Evaluation (SEE):
The SEE examination shall be conducted by an external examiner (domain expert) and an internal examiner. Evaluation shall be done in batches, not exceeding 6 students per batch.

RUBRICS FOR SEMESTER END EXAMINATION

The SEE examination shall be conducted by an external examiner (domain expert) and an internal examiner.

Q.NO.	**CONTENTS**	**MARKS**
1	Write Up	**20%**
2	Demonstration of Minor Project Work	**60%**
3	Viva voce	**20%**

SEMESTER: III						
Course Code	:	MIT434N	**INTERNSHIP**	CIE Marks	:	50
Credits L-T-P	:	0-0-6		SEE Marks	:	50
Hours/Week	:	12		SEE Duration	:	3 Hours

Guidelines

1. Students can opt for undergoing internship at the industry or research organizations like BEL, DRDO, ISRO, NAL, etc.
2. Students must submit letter from the industry/research organizations clearly specifying the candidate's name and the duration of the internship on the company letter head with authorized signature.
3. The duration of the internship shall be for a period of 6 weeks on full time basis after II semester final exams and before the commencement of III semester.
4. RVCE hosts around 16 Centre of Excellence (CoE) in various domains and around 06 Center of Competence (CoC). The details of these could be obtained by visiting the website https://rvce.edu.in/rvce-center-excellence
5. Students can approach the CoE/CoC for registering and working on relevant domain for training/internship at the CoE/CoC.
6. Internship must be related to the field of specialization of the respective PG program in which the student has enrolled.
7. Students undergoing internship training are advised to report their progress and submit periodic progress reports/diary to their respective guides.
8. Students have to present the internship activities carried out to the departmental committee and only upon approval by the committee, the student can proceed to prepare and submit the hard copy of the final internship report.
9. The reports shall be printed on A4 size with 1.5 spacing and Times New Roman with font size 12, outer cover of the report (wrapper) has to be softbound in Ivory/White color for PG circuit Programs and Light Blue for Non-Circuit Programs.

Course Outcomes:

After going through this course the student will be able to:

CO1	:	Explore the workplace, operating procedures of the department/company and its products, and other organizational concepts.
CO2	:	Learn and improve writing and communication skills, research and technology, work in a team, and develop leadership skills.
CO3	:	Apply higher order thinking skills - critical thinking, analysis, synthesis and evaluate complex problems to solve real world problems with professional ethical standards.
CO4	:	Develop and demonstrate skill competencies and knowledge specific to program specialization by applying appropriate tools and techniques.

Scheme of Continuous Internal Evaluation (CIE):
The evaluation committee shall consist of Guide, Professor, Associate Professor/Assistant Professor. The committee shall assess and evaluate the presentation and the progress reports.

The evaluation criteria shall be as per the rubrics given below:

Reviews	Activity	Weightage
I	Ability to comprehend the functioning/operating procedures of the Organization/Departments. Application of Engineering knowledge, Critical thinking and analysis to solve problems.	40%
II	Demonstrates skill competencies, Resource Management and Sustainability. Exhibits writing and communication skills through presentations and report writing.	60%

Scheme for Semester End Evaluation (SEE):
The SEE examination shall be conducted by an external examiner (domain expert) and an internal examiner. Evaluation shall be done in batches, not exceeding 6 students per batch.

RUBRICS FOR SEMESTER END EXAMINATION

The SEE examination shall be conducted by an external examiner (domain expert) and an internal examiner.

Q.NO.	CONTENTS	MARKS
1	Write Up	**20%**
2	Demonstration of Internship Work	**60%**
3	Viva	**20%**

SEMESTER: IV						
Course Code	:	MIT341F1	**Information Security**	CIE Marks	:	NA
Credits L-T-P	:	2-0-0	*(Theory - NPTEL Course online)*	SEE Marks	:	50
Hours	:	16L	*Program Specific Courses (NPTEL-Elective) (Group-F)*	SEE Duration	:	2 Hours

This course is indicative only and it is subject to change based on the courses running at that time by NPTEL

Duration of the ONLINE Course - 8 Weeks

Week 1 : Introduction / gdb / buffer overflow
Week 2 : Preventing buffer overflow based malware
Week 3 : Integer overflow and buffer overread and heap overflow
Week 4 : More on heap overflow; Access Control
Week 5 : Confinement
Week 6 : SGX and Trustzone
Week 7 : Micro-architectural Attacks
Week 8 : Hardware Security.

3. Enrollment to courses and exam registration can be done in ONLINE mode only. The link is available on NPTEL website http://nptel.ac.in/
4. Students need to enroll for the NPTEL course and clear the exam.
5. In case students fail to get the certificate, they need to enroll for the same course once again, in the subsequent NPTEL semester and clear the exam.
6. If the same course is not offered by NPTEL (i.e. if the same course is not re-run) in the subsequent semester by NPTEL, the students need to write letter seeking permission from the Counsellor, HoD and Dean Academics with further approval from BoS Committee to take alternative course from the list announced by NPTEL.
7. Exam is conducted by NPTEL for this or equivalent course for the same.

SEMESTER: IV						
Course Code	:	MIT341F2	**Edge Computing**	CIE Marks	:	NA
Credits L-T-P	:	2-0-0	*(Theory - NPTEL Course online)*	SEE Marks	:	50
Hours	:	16L	*Program Specific Courses (NPTEL-Elective) (Group-F)*	SEE Duration	:	2 Hours

This course is indicative only and it is subject to change based on the courses running at that time by NPTEL

Duration of the ONLINE Course - 8 Weeks

Week 1 - Introduction to Cloud and its limitations to support low latency and RTT. From Cloud to Edge computing: Waves of innovation
Week 2 : Introduction to Edge Computing Architectures
Week 3 : Edge Computing to support User Applications (5G-Slicing, self-driving cars and more)
Week 4 : Concepts of distributed systems in edge computing such as time ordering and clock synchronization, distributed snapshot, etc.
Week 5 : Introduction to Edge Data Center, Lightweight Edge Clouds and its services provided by different service providers.
Week 6 : Introduction to docker container and Kubernetes in edge computing. Design of edge storage systems like key-value stores
Week 7 : Introduction to MQTT and Kafka for end-to-end edge pipeline. Edge analytics topologies for M2M and WSN network (MQTT)
Week 8 : Use cases of machine learning for edge sensor data in predictive maintenance, image classifier and self-driving cars. Deep Learning On-Device inference at the edge to support latency-based application

GENERAL GUIDELINES

1. NPTEL is an acronym for National Programme on Technology Enhanced Learning which is an initiative by seven Indian Institutes of Technology (IIT Bombay, Delhi, Guwahati, Kanpur, Kharagpur, Madras and Roorkee) and Indian Institute of Science (IISc) for creating course contents in engineering and science.
2. NPTEL is offering online certification courses through its portal - https://swayam.gov.in/nc_details/NPTEL
3. Enrollment to courses and exam registration can be done in ONLINE mode only. The link is available on NPTEL website http://nptel.ac.in/
4. Students need to enroll for the NPTEL course and clear the exam.
5. In case students fail to get the certificate, they need to enroll for the same course once again, in the subsequent NPTEL semester and clear the exam.
6. If the same course is not offered by NPTEL (i.e. if the same course is not re-run) in the subsequent semester by NPTEL, the students need to write letter seeking permission from

the Counsellor, HoD and Dean Academics with further approval from BoS Committee to take alternative course from the list announced by NPTEL.

7. Exam is conducted by NPTEL for this or equivalent course for the same

SEMESTER: IV						
Course Code	:	MIT341F3	**Introduction to Reliability Engineering**	CIE Marks	:	NA
Credits L-T-P	:	2-0-0	*(Theory - NPTEL Course online)*	SEE Marks	:	50
Hours	:	16L	*Program Specific Courses (NPTEL-Elective) (Group-F)*	SEE Duration	:	2 Hours

This course is indicative only and it is subject to change based on the courses running at that time by NPTEL

Duration of the ONLINE Course - 8 Weeks

Week 1: Introduction and Definitions
Week 2: Constant Failure Rates Models
Week 3: Time Dependent Failure Rate Models
Week 4: System Reliability Modeling: Series, parallel, series-parallel, and k-out-of-m modeling.
Week 5: Markov Modeling: standby, shared systems etc.
Week 6: Reliability Estimation (Non-Parametric)
Week 7: Reliability Estimation (Distribution Fitting)
Week 8: Maintainability and Availability Analysis

SEMESTER: IV						
Course Code	:	MIT442P	**MAJOR PROJECT**	CIE Marks	:	100
Credits L-T-P	:	0-0-18		SEE Marks	:	100
Hours/Week	:	36		SEE Duration	:	3 Hours

Guidelines

1. Major Project is to be carried out for a duration of 18 weeks
2. Student have to implement the Major Project individually.
3. Students are required to select topics related to their PG Program Specialization after extensive Literature Survey and analyzing the Research gaps.
4. Students will be assigned to guides in accordance with the expertise of the faculty.
5. Major project topics could also be chosen to be implemented/executed based on any of the 16 Centre of Excellence (CoE)/ 06 Center of Competence (CoC) domain. The details of these could be obtained by visiting the website https://rvce.edu.in/rvce-center-excellence
6. Major Project could be implemented in Industry/Research organizations after providing the letter of approval. Students can also implement Major Project, in-house using the resources available in the department/college/CoE/CoC.
7. Students have to adhere to the Project Presentation Schedule note the periodic progress in the Major Project Diary and report the work carried to their respective guides.
8.It is mandatory for the students to present/publish their project work in National/International Conferences/Journals
9. Students have to present the Major Project work to the departmental committee and only upon approval by the committee, the student can proceed to prepare and submit the hard copy of the final Major Project report.
10. Major Project report has to be printed on A4 size with 1.5 spacing and Times New Roman with font size 12, outer cover of the report (wrapper) has to be softbound in Ivory/White color for PG circuit Programs and Light Blue for Non-Circuit Programs.

Course Outcomes:

After going through this course the student will be able to:

CO1	:	Analyze the research gaps, formulate the problem definition, conceptualize the objectives and design solution to cater to specific problems.
CO2	:	Apply higher order thinking skills and develop skill competencies specific to program specialization to implement real world problems with professional ethical standards.
CO3	:	Demonstrate the skill and knowledge by applying appropriate tools and techniques specific to their domain.
CO4	:	Communicate, work in teams and demonstrate the learning through oral presentations and report writing.

Scheme of Continuous Internal Evaluation (CIE):
The evaluation committee shall consist of Guide, Professor, Associate Professor/Assistant Professor. The committee shall assess and evaluate the presentation and the progress reports.

The evaluation criteria shall be as per the rubrics given below:

Reviews	Activity	Weightage
I	Approval of the selected topic, formulation of Problem Statement and Objectives along with Synopsis submission	10%
II	Demonstrate the skill and knowledge by applying appropriate tools/techniques to design solution specific to the problem.	30%
III	Demonstrates the work carried out through experimental results, analysis and testing. Exhibits writing and communication skills through presentations, report writing and paper publication.	60%

Scheme for Semester End Evaluation (SEE):
Major Project SEE evaluation shall be conducted in two stages. This is initiated after fulfilment of submission of Project Report and CIE marks.
Stage-1 Report Evaluation: Evaluation of Project Report shall be done by the Guide and an External examiner.
Stage-2 Project Viva-voce: Major Project Viva-voce examination is conducted after receipt of evaluation reports from Guide and External examiner.

RUBRICS FOR SEMESTER END EXAMINATION

SEE procedure is as follows:

Report Evaluation	Internal Examiner: 100 Marks **(A)**	**Report Evaluation (A) + (B) = 200/2 = 100 (C)**
	External Examiner: 100 Marks **(B)**	
Viva-Voce	Jointly evaluated by Internal Guide & External Examiner	**100 (D)**
Total Marks = **(C+D)/2** = 200/2 =100		**100 Marks**

RV College of Engineering®
Mysore Road, RV Vidyaniketan Post,
Bengaluru - 560059, Karnataka, India

KNOWLEDGE & ATTITUDE PROFILE

- **WK1:** A systematic, theory-based understanding of the natural sciences applicable to the discipline and awareness of relevant social sciences.
- **WK2:** Conceptually-based mathematics, numerical analysis, data analysis, statistics and formal aspects of computer and information science to support detailed analysis and modelling applicable to the discipline.
- **WK3:** A systematic, theory-based formulation of engineering fundamentals required in the engineering discipline.
- **WK4:** Engineering specialist knowledge that provides theoretical frameworks and bodies of knowledge for the accepted practice areas in the engineering discipline; much is at the forefront of the discipline.
- **WK5:** Knowledge, including efficient resource use, environmental impacts, whole-life cost, re-use of resources, net zero carbon, and similar concepts, that supports engineering design and operations in a practice area.
- **WK6:** Knowledge of engineering practice (technology) in the practice areas in the engineering discipline.
- **WK7:** Knowledge of the role of engineering in society and identified issues in engineering practice in the discipline, such as the professional responsibility of an engineer to public safety and sustainable development.
- **WK8:** Engagement with selected knowledge in the current research literature of the discipline, awareness of the power of critical thinking and creative approaches to evaluate emerging issues.
- **WK9:** Ethics, inclusive behaviour and conduct. Knowledge of professional ethics, responsibilities, and norms of engineering practice. Awareness of the need for diversity by reason of ethnicity, gender, age, physical ability etc. with mutual understanding and respect, and of inclusive attitudes.

INNOVATIVE TEAMS OF RVCE

Ashwa Mobility Foundation (AMF): Designs and fabricates Formula-themed race cars and mobility solutions to address urban transportation issues.

Astra Robotics Team: Focuses on designing and building application-specific robots.

Coding Club: Helps students gain coding skills and succeed in competitions like GSoC and ACM-ICPC.

Entrepreneurship Development Cell (E-Cell): Promotes entrepreneurship through workshops, speaker sessions, and mentoring for startups.

Frequency Club Team: Works on software and hardware, emphasizing AI and Machine Learning.

Team Garuda: Develops a supermileage urban concept electric car and E-mobility products.

Team Jatayu: Builds low-cost UAVs with autonomous capabilities for various tasks.

Solar Car Team: Aims to create a solar electric vehicle for sustainable transportation.

Team Antariksh: Focuses on space technology and the development of operational rockets.

Team Chimera: Builds a Formula Electric Car through R&D in E-Mobility.

Helios Racing Team: Designs and tests All-Terrain Vehicles, participating in SAE's BAJA competitions.

Team Hydra: Develops autonomous underwater vehicles for tasks like water purification.

Team Krushi: Creates low-cost farming equipment to assist farmers in cultivation and harvesting.

Team Vyoma: Designs and tests radio-controlled aircraft and UAVs.

Team Dhruva: Engages in astronomy-related activities and collaborates on projects with organizations like ICTS and IIA.

Ham Club: Promotes Amateur Radio and explores technical innovations in communications, especially for disaster response.

Cultural Activity Teams

1. AALAP (Music club)
2. DEBSOC (Debating society)
3. CARV (Dramatics club)
4. FOOTPRINTS (Dance club)
5. QUIZCORP (Quizzing society)
6. ROTARACT (Social welfare club)
7. RAAG (Youth club)
8. EVOKE (Fashion team)
9. f/6.3 (Photography club)
10. CARV ACCESS (Film-making

NSS of RVCE

NCC of RVCE

VISION

Leadership in Quality Technical Education, Interdisciplinary Research & Innovation, with a Focus on Sustainable and Inclusive Technology

MISSION

- To deliver outcome based Quality education, emphasizing on experientiallearning with the state of the art infrastructure.
- To create a conducive environment for interdisciplinary research and innovation.
- To develop professionals through holistic education focusing on individual growth, discipline, integrity, ethics and social sensitivity.
- To nurture industry-institution collaboration leading to competency enhancement and entrepreneurship.
- To focus on technologies that are sustainable and inclusive, benefiting all sections of the society.

QUALITY POLICY

Achieving Excellence in Technical Education, Research and Consulting through an Outcome Based Curriculum focusing on Continuous Improvement and Innovation by Benchmarking against the global Best Practices.

CORE VALUES

Professionalism, Commitment, Integrity, Team Work, Innovation
