

**Rashtreeya Sikshana Samithi Trust**

# **R.V.College of Engineering**

*(Autonomous Institution Affiliated to Visvesvaraya Technological University, Belagavi)*

**Department of Mechanical Engineering**

**Master of Technology (M. Tech.)**

## **Machine Design**

**Scheme and Syllabus of  
Autonomous System w.e.f 2016**

**R.V. College of Engineering, Bengaluru – 59***(Autonomous Institution Affiliated to Visvesvaraya Technological University, Belagavi)***Department of Mechanical Engineering****Vision:**

Quality education in Design, Materials, Thermal and Manufacturing with emphasis on research, sustainable technologies and entrepreneurship for societal symbiosis.

**Mission:**

- Imparting knowledge in basic and applied areas of Mechanical Engineering.
- Providing state-of-the-art laboratories and infrastructure for academics and research in the areas of design, materials, thermal engineering and manufacturing.
- Facilitating faculty development through continuous improvement programs.
- Promoting research, education and training in materials, design, manufacturing, Thermal Engineering and other multidisciplinary areas.
- Strengthening collaboration with industries, research organizations and institutes for internship, joint research and consultancy.
- Imbibing social and ethical values in students, staff and faculty through personality development programs

**Program Specific Criteria (PSC) as per ASME****Program Educational Objectives (PEO)**

The Graduates of M. Tech. in Machine Design Program will be prepared for:

**PEO1** Practicing design of engineering systems through the application of the fundamental knowledge and skills of Mechanical Engineering.

**PEO2** Enhancing their skills through training, independent inquiry, and professional development.

**PEO3** Working independently as well as collaboratively, while demonstrating the professional and ethical responsibilities of the engineering profession.

**Program Outcomes (PO)**

M. Tech. in Machine Design graduates will be able to:

- PO1:** Apply the knowledge of Mathematics and Engineering for machine design
- PO2:** Identify and analyze the engineering challenges / problems regarding human needs in daily life about machines and systems.
- PO3:** Design and develop engineering solutions for global progress, productivity and economic development.
- PO4:** Use of modern tools and techniques for modeling and analysis of complex engineering systems.
- PO5:** Understand the impact of Machine Design engineering on all aspects of environment and society and to demonstrate the knowledge and need for sustainable development.
- PO6:** Work as professionals in accordance with the norms of Machine Design engineering practices and commit to societal, ethical and professional responsibilities.
- PO7:** Apply professional, ethical, legal, security and social issues in the design systems.
- PO8:** Demonstrate design principles to work as team member and / or leader in multidisciplinary areas of engineering
- PO9:** Communicate effectively through written and oral modes.
- PO10:** Understand and apply project management techniques, tools and practices to plan manage and complete an Engineering Design project.
- PO11:** Engage in independent and lifelong learning by pursuing higher studies and training.

**Program: M.Tech in Machine Design****Program Specific Criteria (PSC):****Program Specific Criteria (PSC) as per American Society of Mechanical Engineers**

The curriculum is designed to enable the students to (a) apply principles of engineering design, analysis, selection of materials and manufacturing processes using modern tools and techniques to new products; (b) be proficient in costing, quality assessment and its life cycle management; (c) work in teams, communicate effectively, demonstrate concern for environment and sustainability of products and processes.

The faculty members of the program possess in-depth understanding and expertise in their areas of specialization with a commitment to periodically update their knowledge in respective domains.

### **Program Specific Outcomes (PSO)**

M. Tech. in Machine Design graduates will be able to:

**PSO 1:** Design Mechanical systems using interrelationship among force, stress, vibration and failure analysis.

**PSO 2:** Develop advanced analysis tools for evaluating performance of mechanical systems to enhance the capability of the designer.

**R. V. College of Engineering, Bengaluru – 59.**

**THIRD SEMESTER****ADVANCED MACHINE DESIGN****(Theory & Practice)**

<b>Course Code</b>	<b>:</b>	<b>16MMD31</b>		<b>CIE Marks</b>	<b>:</b>	<b>100 + 50</b>
<b>Hrs/Week</b>	<b>:</b>	<b>L:T:P:S</b>	<b>4:0:2:0</b>	<b>SEE Marks</b>	<b>:</b>	<b>100 + 50</b>
<b>Credits</b>	<b>:</b>	<b>05</b>		<b>SEE Duration</b>	<b>:</b>	<b>3 + 3 Hrs.</b>

**Course Objective:**

Graduates will be able to

1. Fundamental understanding of linear elastic fracture mechanics (LEFM) and the conditions under which LEFM is valid;
2. Explain generalized (nonlinear) fracture mechanics;
3. Demonstrate various regimes of fatigue crack growth;
4. Experimental methods to assess the integrity and/or life of structural components.

**Unit 1****12 hours**

**Introduction:** Role of failure prevention analysis in mechanical design, Modes of mechanical failure, Review of failure theories for ductile and brittle materials including Mohr's theory and modified Mohr's theory, Numerical examples. Fatigue of Materials: Introductory concepts, High cycle and low cycle fatigue, Fatigue design models, Fatigue design methods, Fatigue design criteria, Fatigue testing, Test methods and standard test specimens, Fatigue fracture surfaces and macroscopic features, Fatigue mechanisms and microscopic features

**Unit 2****12 hours**

**Stress-Life (S-N) Approach:** S-N curves, Statistical nature of fatigue test data, General S-N behaviour, Mean stress effects, Different factors influencing S-N behaviour, S-N curve representation and approximations, Constant life diagrams, Fatigue life estimation using SN approach. Strain-Life( $\epsilon$ -N) approach: Monotonic stress-strain behaviour, Strain controlled test methods, Cyclic stress-strain behavior, Strain based approach to life estimation, Determination of strain life fatigue properties, Mean stress effects, Effect of surface finish, Life estimation by  $\epsilon$ -N approach.

**Unit 3****12 hours**

**LEFM Approach:** LEFM concepts, Crack tip plastic zone, Fracture toughness, Fatigue crack growth, Mean stress effects, Crack growth life estimation. Notches and their effects: Concentrations and gradients in stress and strain, S-N approach for notched membranes, mean stress effects and Haigh diagrams, Notch strain analysis and the strain – life approach, Neuber's rule, Glinka's rule, and applications of fracture mechanics to crack growth at notches.

**Unit 4****8 hours**

**Fatigue from Variable Amplitude Loading:** Spectrum loads and cumulative damage, Damage quantification and the concepts of damage fraction and accumulation, Cumulative damage theories, Load interaction and sequence effects, Cycle counting methods, Life estimation using stress life approach.

**Unit 5****8 hours**

**Surface Failure:** Introduction, Surface geometry, Mating surface, Friction, Adhesive wear, Abrasive wear, Corrosion wear, Surface fatigue spherical contact, Cylindrical contact, General contact, Dynamic contact stresses, Surface fatigue strength.

<b>Unit – 6 Lab component</b>
-------------------------------

**Lab exercises**

1. To determine the fatigue life ( $N_f$ ) as functions of uniaxial tensile stress for an aluminium alloy.
2. To study the effect of fluctuating stress normally encountered in the cyclic loading of materials in service.
3. To determine the critical speed of shaft with various diameters.
4. To generate S-N curve by performing test on rotating-beam fatigue test
5. Perform fatigue analysis using ANSYS Workbench
6. Perform stress based approach for high cycle fatigue for constant amplitude, variable amplitude with proportional loading using ANSYS Workbench

**Course Outcomes:** After going through this course the student will be able to:

CO1: Identify and explain the types of fractures of engineered materials and their characteristic features

CO2: Develop detailed understanding of S-N curves, S-N approach & behaviour

CO3: Understand the differences in the classification of fracture mechanics (LEFM and EPFM) and how their corresponding parameters can be utilized to determine conditions under which engineering materials will be liable to fail catastrophically in service.

CO4: Appreciate the theoretical basis of the experimental techniques utilized for surface failure analysis

**Scheme of Continuous Internal Evaluation (CIE) for Theory**

CIE will consist of TWO Tests, TWO Quizzes and ONE assignment. The test will be for 30 marks each and the quiz for 10 marks each. The assignment will be for 20 marks. The total marks for CIE (Theory) will be 100 marks.

**Scheme of Continuous Internal Evaluation (CIE) for Practical**

CIE for the practical courses will be based on the performance of the student in the laboratory, every week. The laboratory records will be evaluated for 40 marks. One test will be conducted for 10 marks. The total marks for CIE (Practical) will be for 50 marks.

**Scheme of Semester End Examination (SEE) for Theory**

The question paper will have FIVE questions with internal choice from each unit. Each question will carry 20 marks. Student will have to answer one question from each unit. The total marks for SEE (Theory) will be 100 marks.

**Scheme of Semester End Examination (SEE) for Practical**

SEE for the practical courses will be based on conducting the experiments and proper results for 40 marks and 10 marks for viva-voce. The total marks for SEE (Practical) will be 50 marks.

<b>FRACTURE MECHANICS</b> (Elective 5)						
<b>Course Code</b>	:	<b>16MMD321</b>		<b>CIE Marks</b>	:	<b>100</b>
<b>Hrs/Week</b>	:	<b>L:T:P:S</b>	<b>4:0:0:0</b>	<b>SEE Marks</b>	:	<b>100</b>
<b>Credits</b>	:	<b>04</b>		<b>SEE Duration</b>	:	<b>3 Hrs.</b>
<b>Course Objective:</b>						
Graduates shall be able to						
1. Understand the fracture behavior of materials.						
2. Apply Linear & nonlinear fracture mechanics principles & their applications to structural design.						
3. To perform damage tolerance analysis of structures.						
4. Explain fracture phenomena in metals and non-metals.						
<b>Unit 1</b>						
<b>8 hours</b>						
<b>History and Overview</b> , Why Structures Fail, Historical Perspective, Early Fracture Research, The Liberty Ships, Post-War Fracture Mechanics Research, The Fracture Mechanics Approach to Design, The Energy Criterion, The Stress-Intensity Approach, Time-Dependent Crack Growth and Damage Tolerance, Effect of Material Properties on Fracture, A Brief Review of Dimensional Analysis.						
<b>Unit 2</b>						
<b>12 hours</b>						
<b>Linear Elastic Fracture Mechanics</b> , An Atomic View of Fracture, Stress Concentration Effect of Flaws, The Griffith Energy Balance, Comparison with the Critical Stress Criterion, Modified Griffith Equation, The Energy Release Rate, Instability and the R-Curve, Reasons for the R-Curve Shape, Load Control vs. Displacement Control, Structures with Finite Compliance, Stress Analysis of Cracks, The Stress Intensity Factor, Relationship between K and Global Behaviour, Effect of Finite Size, Principle of Superposition, Weight Functions.						
<b>Unit 3</b>						
<b>12 hours</b>						
<b>Relationship between K and G</b> , Crack-Tip Plasticity, The Irwin Approach, The Strip-Yield Model, Comparison of Plastic Zone Corrections, Plastic Zone Shape, K -Controlled Fracture, Plane Strain Fracture: Fact vs. Fiction, Effect of Thickness on Apparent Fracture Toughness, Plastic Zone Effects, Implications for Cracks in Structures, Mixed-Mode Fracture, Mathematical Foundations of Linear Elastic Fracture Mechanics, Plane Elasticity, Cartesian Coordinates, Polar Coordinates, Crack Growth Instability Analysis, Crack-Tip Stress Analysis, Generalized In-Plane Loading, The Westergaard Stress Function, Elastic-Plastic Fracture Mechanics, Crack-Tip-Opening Displacement, The Contour Integral, J as a Path-Independent Line Integral, J as a Stress Intensity Parameter, The Large Strain Zone, Laboratory Measurement of J, Relationships Between J and CTOD, Crack-Growth Resistance Curves, Stable and Unstable Crack Growth, Computing J for a Growing Crack, J-Controlled Fracture.						
<b>Unit 4</b>						
<b>8 hours</b>						
<b>Fatigue Crack Propagation</b> , Similitude in Fatigue, Empirical Fatigue Crack Growth Equations, Crack Closure, A Closer Look at Crack-Wedging Mechanisms, Effects of Loading Variables on Closure, The Fatigue Threshold, The Closure Model for the Threshold, A Two-Criterion Model, Threshold Behaviour in Inert Environments, Variable Amplitude Loading and Retardation, Linear Damage Model for Variable Amplitude Fatigue, Reverse Plasticity at the						

Crack Tip, The Effect of Overloads and Under loads , Models for Retardation and Variable Amplitude Fatigue, Growth of Short Cracks, Micro-mechanisms of Fatigue , Fatigue in Region II, Fatigue at High  $\Delta K$  Values, Fatigue Crack Growth Experiments, Crack Growth Rate and Threshold Measurement, Closure Measurements, A Proposed Experimental Definition of  $\Delta K_{eff}$ , Damage Tolerance Methodology.

### Unit 5

**8 hours**

**Computational Fracture Mechanics**, Overview of Numerical Methods, The Finite Element Method, The Boundary Integral Equation Method, Traditional Methods in Computational Fracture Mechanics, Stress and Displacement Matching, Elemental Crack Advance, Contour Integration, Virtual Crack Extension: Stiffness Derivative Formulation, Virtual Crack Extension: Continuum Approach, The Energy Domain Integral, Theoretical Background, Generalization to Three Dimensions , Finite Element Implementation, Mesh Design, Linear Elastic Convergence Study , Analysis of Growing Cracks , Properties of Singularity Elements, Quadrilateral Element, Triangular Element.

**Course Outcomes:** After going through this course the student will be able to:

CO1: Illustrate material failure for any combination of applied stresses.

CO2: Estimate failure conditions of a structure

CO3: Determine the stress intensity factor for simple components of simple geometry

CO4: Predict the likelihood of failure of a structure containing a defect

<b>COMPUTATIONAL FLUID MECHANICS (Elective 5)</b>					
<b>Course Code</b>	<b>:</b>	<b>16MMD322</b>		<b>CIE Marks</b>	<b>:</b> <b>100</b>
<b>Hrs/Week</b>	<b>:</b>	<b>L:T:P:S</b>	<b>4:0:0:0</b>	<b>SEE Marks</b>	<b>:</b> <b>100</b>
<b>Credits</b>	<b>:</b>	<b>04</b>		<b>SEE Duration</b>	<b>:</b> <b>3 Hrs.</b>
<p>The objectives of this course are</p> <ul style="list-style-type: none"> <li>• To introduce the basics of computational fluid dynamics and its application to solve engineering problems.</li> <li>• Introduction to basic governing equations of fluid flow and heat transfer.</li> <li>• To train the students to apply these equations to real fluid flow situations.</li> <li>• Introduction to numerical methods and popular discretization techniques to solve these equations.</li> </ul>					
<b>Unit – I</b>					<b>06 Hrs</b>
<p><b>Introduction to CFD:</b>the need for computer simulations of fluid flows; Brief history of CFD; A few examples of contribution of CFD to engineering design  <b>Governing equations of fluid flows:</b> Navier-Stokes equations, Equations of inviscid compressible and incompressible flows; Concepts of convection and diffusion.</p>					
<b>Unit – II</b>					<b>07 Hrs</b>
<p><b>Analysis of the governing equations of fluid flows:</b>Navier-Stokes to Burgers equation, Convection-diffusion equation, Linear convection equation, Diffusion equation, Unsteady and steady state heat conduction equations.  <b>Mathematical classification of Partial Differential Equations (PDEs):</b>Elliptic, Parabolic and Hyperbolic equations; Physical significance of the equation; Method of Characteristics; diffusion, Burgers and linear convection equations.</p>					
<b>Unit – III</b>					<b>07 Hrs</b>
<p><b>Finite difference method:</b> Introduction to Finite Difference Method (FDM) and its application to unsteady heat conduction and steady heat conduction equations; Explicit and implicit methods; FDM for linear convection equation and upwind differencing method; FDM in two dimensions.  <b>Properties of numerical methods:</b> Consistency, Stability, Convergence, Order of accuracy, Modified equations, Artificial viscosity or Numerical diffusion, Numerical dispersion.</p>					
<b>Unit – IV</b>					<b>07 Hrs</b>
<p><b>Finite volume method:</b> Introduction to Finite Volume Method (FVM) and its application to unsteady and steady heat conduction equations, Linear convection equation; Central discretization and upwind discretization in FVM; 2-D Finite volume method on Cartesian, quadrilateral and triangular grids; Basics of grid generation.</p>					

Unit – V		07 Hrs
<p><b>Numerical methods for incompressible flows:</b>Basic problem of the pressure updating; stream function and vorticity formulation, Pressure correction methods, SIMPLE algorithm, Artificial compressibility formulation.</p> <p><b>Solution of algebraic equations:</b> Gauss-Seidel iteration method, Tri-diagonal matrix (Thomas) algorithm, Alternating Direction Implicit (ADI) method.</p>		
<p><b>Course outcomes:</b> After the course the students will be able to: Understand the basics involved in the developments of CFD (L1 &amp; L2). Formulate and solve processes (L3). Interpret the results and to obtain the solution to governing equations to fluid flow and heat flow processes (L4 &amp; L5). Ability to develop CFD models for “real world” engineering problems (L6).</p>

<b>MECHATRONICS SYSTEMS</b> (Elective 6)					
<b>Course Code</b>	:	<b>16MMD331</b>		<b>CIE Marks</b>	: <b>100</b>
<b>Hrs/Week</b>	:	<b>L:T:P:S</b>	<b>4:0:0:0</b>	<b>SEE Marks</b>	: <b>100</b>
<b>Credits</b>	:	<b>04</b>		<b>SEE Duration</b>	: <b>3 Hrs.</b>
<b>Course Learning Objectives (CLO):</b> Graduates shall be able to					
<ol style="list-style-type: none"> <li>1. Substantiate the need for interdisciplinary study in technology education.</li> <li>2. Understand the evolution and development of Mechatronics as a discipline.</li> <li>3. Compare various types of transducers used in industrial automation, machine control systems, instrumentation and equipments.</li> <li>4. Understand the applications of microprocessors in various systems and to know the functions of each element.</li> </ol>					
<b>Unit – I</b>					<b>07 Hrs</b>
<b>Introduction:</b> Definition, Multidisciplinary Scenario, Evolution of Mechatronics, Design of Mechatronics system, Objectives, advantages and disadvantages of Mechatronics.					
<b>Transducers and Sensors:</b> Definition and classification of transducers, Difference between transducer and sensor, Definition and classification of sensors, Principle of working and applications of light sensors, proximity switches and Hall effect sensors.					
<b>Unit – II</b>					<b>10 Hrs</b>
<b>Microprocessors and Microcontrollers:</b> Introduction, Microprocessor systems, Basic elements of control systems, Microcontrollers, Difference between Microprocessor and Microcontrollers, Microprocessor architecture, Terminology-CPU, memory and address, I/O and Peripheral devices, ALU, Instruction and Program, Assembler, Data, Registers, Program Counter, Flags, Fetch cycle; write cycle, state, bus interrupts. Intel's 8085A Microprocessor.					
<b>Unit – III</b>					<b>12 Hrs</b>
<b>PLC:</b> Introduction to PLC's, basic structure, Principle of operation, Programming and concept of ladder diagram, Concept of latching & selection of a PLC.					
<b>Integration:</b> Introduction & background, Advanced actuators, Pneumatic actuators, Industrial Robot, different parts of a Robot-Controller, Drive, Arm, End Effectors, Sensor & Functional requirements of robot.					
<b>Unit – IV</b>					<b>12 Hrs</b>
<b>Mechanical Actuation:</b> Mechanical systems, types of motion, Cams, Gear trains, Ratchet & Pawl, Belt and chain drives, Mechanical aspects of motor selection.					
<b>Electrical Actuation System:</b> Electrical systems, Mechanical switches, Solenoids, Relays, DC/AC Motors, Principle of Stepper Motors & servomotors.					
<b>Unit – V</b>					<b>09 Hrs</b>
<b>Pneumatic and Hydraulic systems:</b> Actuating systems, Pneumatic and hydraulic systems, Classifications of Valves, Pressure relief valves, Pressure regulating/reducing valves, Pressure sequence valve, Cylinders and rotary actuators.					
<b>DCV&amp; FCV:</b> Principle & construction details, types of sliding spool valve, Solenoid operated, Symbols of hydraulic elements, Components of hydraulic system, functions of various units of hydraulic system.					

**Course Outcomes:**

After going through this course the student will be able to:

- CO1: Define various types of transducers used in industrial automation and machine control systems.
- CO2: Explain the architecture of microprocessors system
- CO3: Describe the working principle of mechanical, electrical, pneumatic and hydraulic actuators
- CO4: Design ladder logic based PLC circuit to control various industrial activities

<b>ROTOR DYNAMICS (Elective 6)</b>						
<b>Course Code</b>	:	<b>16MMD332</b>		<b>CIE Marks</b>	:	<b>100</b>
<b>Hrs/Week</b>	:	<b>L:T:P:S</b>	<b>4:0:0:0</b>	<b>SEE Marks</b>	:	<b>100</b>
<b>Credits</b>	:	<b>04</b>		<b>SEE Duration</b>	:	<b>3 Hrs.</b>
<b>Course Objective:</b>						
Graduates shall be able to						
1. Understand the lubrication phenomenon rotor dynamics phenomena with the help of simple rotor models.						
2. Identify the design parameters that determine the rotor dynamic behavior.						
3. Recognize machine behavior due to anisotropy and be aware of the implications for balancing.						
4. Examine the design, application, and reliability evaluation of bearings in rotating machinery applications						
<b>Unit 1</b>						
						<b>8 hours</b>
<b>Fluid Film Lubrication:</b> Basic theory of fluid film lubrication, Derivation of generalized Reynolds equations, Boundary conditions, Fluid film stiffness and Damping coefficients, Stability and dynamic response for hydrodynamic journal bearing, Two lobe journal bearings.						
<b>Unit 2</b>						
						<b>10 hours</b>
<b>Stability of Flexible Shafts:</b> Introduction, equation of motion of a flexible shaft with rigid support, Radial elastic friction forces, Rotary friction, friction Independent of velocity, friction dependent on frequency, Different shaft stiffness Constant, gyroscopic effects, Nonlinear problems of large deformation applied forces, instability of rotors in magnetic field.						
<b>Unit 3</b>						
						<b>12 hours</b>
<b>Turbo rotor System Stability by Transfer Matrix Formulation:</b> General Turbo rotor system, development of element transfer matrices, the matrix differential equation, effect of shear and rotary inertia, the elastic rotors supported in bearings, numerical solutions						
<b>Turborotor System Stability by Finite Element Formulation:</b> General turbo rotor system, generalized forces and co-ordinates system assembly element matrices.						
<b>Unit 4</b>						
						<b>8 hours</b>
<b>Consistent mass matrix formulation,</b> Lumped mass model, linearized model for journal bearings, System dynamic equations Fix stability analysis non dimensional stability analysis, unbalance response and Transient analysis.						
<b>Unit 5</b>						
						<b>10 hours</b>
<b>Critical Speed:</b> Dunkerley's method, Rayleigh's method, Stodola's method. Rotor Bearing System: Instability of rotors due to the effect of hydrodynamic oil layer in the bearings, support flexibility, Simple model with one concentrated mass at the centre						
<b>Blade Vibration:</b> Centrifugal effect, Transfer matrix and Finite element, approaches

**Course Outcomes:** At the end of the course students will be able to

CO1: Emphasize on vibration phenomena exhibited by the machine undergoing high vibration.

CO2: Analyze rotor dynamics and vibration analysis as it relates to machinery condition monitoring systems.

CO3: Implement proper steps to prevent torsional vibration problems occurring in rotating equipments.

CO4: Ability to develop FE procedures for blade vibration.

**Scheme of Continuous Internal Evaluation (CIE)**

CIE will consist of TWO Tests, TWO Quizzes and ONE assignment. The test will be for 30 marks each and the quiz for 10 marks each. The assignment will be for 20 marks. The total marks for CIE (Theory) will be 100 marks.

**Scheme of Semester End Examination (SEE)**

The question paper will have FIVE questions with internal choice from each unit. Each question will carry 20 marks. Student will have to answer one question from each unit. The total marks for SEE (Theory) will be 100 marks.

<b>DESIGN OF SMART STRUCTURES</b> (Elective 7)						
<b>Course Code</b>	:	<b>16MMD341</b>		<b>CIE Marks</b>	:	<b>100</b>
<b>Hrs/Week</b>	:	<b>L:T:P:S</b>	<b>4:0:0:0</b>	<b>SEE Marks</b>	:	<b>100</b>
<b>Credits</b>	:	<b>04</b>		<b>SEE Duration</b>	:	<b>3 Hrs.</b>
<b>Course Objective:</b> Graduates will be able to						
1.To model different types of smart materials and to design simple smart structures.						
2.Perform detailed analysis of the response of systems exhibiting shape memory effects						
3.Apply mechanisms of MR fluids for minimizing damping						
4. Illustrate the response of materials exhibiting piezoelectricity and piezo resistivity						
<b>Unit 1</b>						
<b>8 hours</b>						
<b>Smart Structures:</b> Types of Smart Structures, Potential Feasibility of Smart Structures, Key Elements Of Smart Structures, Applications of Smart Structures. Piezoelectric materials, Properties, piezoelectric Constitutive Relations, Depoling and Coersive Field, field strain relation. Hysteresis, Creep and Strain Rate effects, Inchworm Linear Motor.						
<b>Unit 2</b>						
<b>12 hours</b>						
<b>Beam Modeling:</b> Beam Modeling with induced strain Rate effects, Inchworm Linear Motor Beam Modeling with induced strain Actuation-single Actuators, dual Actuators, Pure Extension, Pure Bending harmonic excitation, Bernoulli-Euler beam Model, problems, Piezo electrical Applications						
<b>Shape memory Alloy:</b> Experimental Phenomenology, Shape Memory Effect, Phase Transformation, Tanaka’s Constitutive Model, testing of SMA Wires, Vibration Control through SMA, Multiplexing. Applications Of SMA and Problems						
<b>Unit 3</b>						
<b>12 hours</b>						
<b>ER and MR Fluids:</b> Mechanisms and properties, Fluid Composition and behaviour, The Bingham Plastic and Related Models, Pre-Yield Response. Post-Yield flow applications in Clutches, Dampers and Others.						
<b>Vibration Absorbers:</b> series and Parallel Damped Vibrations (Overview), Active Vibration Absorbers, fibre Optics, Physical Phenomena, Characteristics, Sensors, Fibre Optics in Crack Detection, applications.						
<b>Unit 4</b>						
<b>8 hours</b>						
<b>Control of Structures:</b> Modeling, Control Strategies and Limitations, Active Structures in Practice <b>MEMS</b> – Mechanical Properties of MEMS Materials, Scaling of Mechanical Systems, Fundamentals of Theory, The Intrinsic Characteristics of MEMS, Miniaturization, Microelectronics Integration.						
<b>Unit 5</b>						
<b>8 hours</b>						
<b>Devices:</b> Sensors and Actuators, Conductivity of Semiconductors, Crystal Planes and Orientation, (Stress and Strain Relations, Flexural Beam Bending Analysis Under Simple Loading Conditions), Polymers in MEMS, Optical MEMS Applications.						

**Course Outcomes:** At the end of the course students will be able to

CO1: Understand the behavior and applicability of various smart materials, beam models

CO2: Design detailed response of systems exhibiting shape memory effect

CO3: Perform modeling and control of active structures in practice

CO4: Apply the techniques to produce solutions to industrial problems using smart structures and materials

<b>DESIGN OF PRESSURE VESSELS</b> (Elective 7)						
<b>Course Code</b>	:	<b>16MMD342</b>		<b>CIE Marks</b>	:	<b>100</b>
<b>Hrs/Week</b>	:	<b>L:T:P:S</b>	<b>4:0:0:0</b>	<b>SEE Marks</b>	:	<b>100</b>
<b>Credits</b>	:	<b>04</b>		<b>SEE Duration</b>	:	<b>3</b>
<b>Course Objective:</b> Graduates will be able to						
1. Understand basic design procedure for pressure vessel, using ASME code						
2. Impart basic knowledge of design of pressure vessels and piping system						
3. To Analyze stresses in pressure vessels of different shapes						
4. To enable the students to design piping systems						
<b>Unit 1</b>						
<b>5 hours</b>						
<b>Introduction:</b> Methods for determining stresses – Terminology and Ligament Efficiency – Applications; Introduction to ASME cods for pressure vessel design, Pressure vessel and related components’ design using ASME codes; Supports for short vertical vessels, stress concentration at a variable thickness transition section in a cylindrical vessel; Design of nozzles;						
<b>Unit 2</b>						
<b>12 hours</b>						
<b>Stresses In Pressure Vessels:</b> Introduction – Stresses in a circular ring, cylinder – Membrane stress Analysis of Vessel Shell components – Cylindrical shells, spherical Heads, conical heads – Thermal Stresses –Discontinuity stresses in pressure vessels. Bending of circular plates and determination of stresses in simply supported and clamped circular plate; Thermal stresses; Stress concentration in plate having circular hole due to bi-axial loading, excessive elastic deformation, plastic instability, brittle, rupture and creep. Theory of reinforced opening and reinforcement limits						
<b>Unit 3</b>						
<b>12 hours</b>						
<b>Design Of Vessels:</b> Design of Tall cylindrical self-supporting process columns –Supports for short, vertical and horizontal vessels – stress concentration – at a variable Thickness transition section in a cylindrical vessel, about a circular hole, elliptical openings. Theory of Reinforcement – pressure vessel Design. Introduction to ASME pressure vessel codes.						
<b>Unit 4</b>						
<b>10 hours</b>						
<b>Buckling of Vessels:</b> Buckling phenomenon – Elastic Buckling of circular ring and cylinders under external pressure – collapse of thick walled cylinders or tubes under external pressure – Effect of supports on Elastic Buckling of Cylinders – Buckling under combined External pressure and axial loading.						
<b>Unit 5</b>						
<b>9 hours</b>						
<b>Piping:</b> Introduction – Flow diagram – piping layout and piping stress Analysis. Design of piping system as per B31.1 piping code. Piping components - bends, tees, bellows and valves.Types of piping supports and their behaviour; Introduction to piping Codes and Standards.

**Course Outcomes:** At the end of the course students will be able to

CO1: Ability to analyse thin plates and shells for various types of stresses.

CO2. Design shells, end closures and nozzles of pressure vessels using ASME codes.

CO3. Analyse buckling of vessels and their failures due to external loads.

CO4: To identify, formulate, and solve simple problems in piping systems

### Scheme of Continuous Internal Evaluation (CIE)

CIE will consist of TWO Tests, TWO Quizzes and ONE assignment. The test will be for 30 marks each and the quiz for 10 marks each. The assignment will be for 20 marks. The total marks for CIE (Theory) will be 100 marks.

### Scheme of Semester End Examination (SEE)

The question paper will have FIVE questions with internal choice from each unit. Each question will carry 20 marks. Student will have to answer one question from each unit. The total marks for SEE (Theory) will be 100 marks.

<b>INTERNSHIP / INDUSTRIAL TRAINING</b>						
<b>Course Code</b>	:	<b>16MMD35</b>		<b>CIE Marks</b>	:	<b>100</b>
<b>Hrs/Week</b>	:	<b>L:T:P:S</b>	<b>0:0:6:0</b>	<b>SEE Marks</b>	:	<b>100</b>
<b>Credits</b>	:	<b>3</b>		<b>SEE Duration</b>	:	<b>30 min</b>
<b>GUIDELINES FOR INTERNSHIP</b>						
<b>Course Learning Objectives (CLO):</b>						
The students shall be able to:						
<ol style="list-style-type: none"> <li>(1) Understand the process of applying engineering knowledge to produce product and provide services.</li> <li>(2) Explain the importance of management and resource utilization</li> <li>(3) Comprehend the importance of team work, protection of environment and sustainable solutions.</li> <li>(4) Imbibe values, professional ethics for life long learning.</li> </ol>						
<ol style="list-style-type: none"> <li>1) The duration of the internship shall be for a period of 8 weeks on full time basis between II semester final exams and beginning of III semester.</li> <li>2) The student must submit letters from the industry clearly specifying his / her name and the duration of the internship on the company letter head with authorized signature.</li> <li>3) Internship must be related to the field of specialization or the M.Tech program in which the student has enrolled.</li> <li>4) Students undergoing internship training are advised to use ICT tools such as skype to report their progress and submission of periodic progress reports to the faculty members.</li> <li>5) Every student has to write and submit his/her own internship report to the designated faculty.</li> <li>6) Students have to make a presentation on their internship activities in front of the departmental committee and only upon approval of the presentation should the student proceed to prepare and submit the hard copy of the internship final report. However interim or periodic reports and reports as required by the industry / organization can be submitted as per the format acceptable to the respective industry /organizations.</li> <li>7) The reports shall be printed on bond paper – 80GSM, back to back print, with soft binding – A4 size with 1.5 spacing and times new roman font size 12.</li> <li>8) The broad format of the internship final report shall be as follows <ul style="list-style-type: none"> <li>• Cover Page</li> <li>• Certificate from College</li> <li>• Certificate from Industry / Organization</li> <li>• Acknowledgement</li> <li>• Synopsis</li> <li>• Table of Contents</li> <li>• Chapter 1 - Profile of the Organization – Organizational structure, Products, Services, Business Partners, Financials, Manpower, Societal Concerns, Professional Practices,</li> <li>• Chapter 2 - Activities of the Department -</li> <li>• Chapter 3 – Tasks Performed – summaries the tasks performed during 8 week period</li> <li>• Chapter 4 – Reflections – Highlight specific technical and soft skills that you acquired during internship</li> </ul> </li> </ol>						

- References & Annexure

**Course Outcomes:**

After going through the internship the student will be able to:

- CO1: Apply engineering and management principles  
 CO2: Analyze real-time problems and suggest alternate solutions  
 CO3: Communicate effectively and work in teams  
 CO4: Imbibe the practice of professional ethics and need for lifelong learning.

**Scheme of Continuous Internal Evaluation (CIE):**

A committee comprising of the Head of the Department / Associate Dean, Associate Professor, Assistant Professor and Guide would review the presentation and the progress reports in two phases. The evaluation criteria shall be as per the rubrics given below:

**Scheme for Semester End Evaluation (SEE):**

The evaluation will be done by ONE senior faculty from the department and ONE external faculty member from Academia / Industry / Research Organization. The following weightages would be given for the examination. Evaluation will be done in batches, not exceeding 6 students.

- |  |     |
|--|-----|
| (1) Explanation of the application of engineering knowledge in industries  | 35% |
| (2) Ability to comprehend the functioning of the organization/ departments | 20% |
| (3) Importance of resource management, environment and sustainability      | 25% |
| (4) Presentation Skills and Report   | 20% |

**GUIDELINES FOR INDUSTRIAL TRAINING****Course Learning Objectives (CLO):**

The students shall be able to:

- (1) Understand the process of applying engineering knowledge to industrial products & processes
- (2) Explain the importance of skilling, training and resource management.
- (3) Comprehend the importance of team work, communication and sustainable solutions.
- (4) Imbibe values, professional ethics for life long learning.

- 1) The duration of industrial training must be for a minimum of 1 week and maximum of 8 weeks on full time basis.
- 2) Industrial Training in which students pays a fee to the organization / industry will not be considered.
- 3) He/she can undergo training in one or more industry /organization.
- 4) The student must submit letters from the industry clearly specifying his / her name and the duration of the training provided by the company with authorized signatures.
- 5) Industrial training must be related to the field of specialization or the M.Tech program in which the student has enrolled.
- 6) Students undergoing industrial training are advised to use ICT tools such as skype to report their progress and submission of periodic progress reports to the faculty members.
- 7) Every student has to write and submit his/her own industrial training report to the designated faculty.
- 8) Students have to make a presentation on their industrial training in front of the departmental committee and only upon approval of the presentation should the student proceed to prepare and submit the hard copy of the final report.
- 9) The reports shall be printed on bond paper – 80GSM, back to back print, with soft binding – A4 size with 1.5 spacing and times new roman font size 12.
- 10) The broad format of the industrial training report shall be as follows
  - Cover Page
  - Certificate from College
  - Training Certificate from Industry / Organization
  - Acknowledgement
  - Executive Summary
  - Table of Contents
  - Chapter 1 - Profile of the Organization –Organizational structure, Products, Services, Business Partners, Financials, Manpower, Societal Concerns, Professional Practices
  - Chapter 2 – Details of the Training Modules
  - Chapter 3 – Reflections – Highlight specific technical and soft skills that you acquired
  - References & Annexure

**Course Outcomes:**

After going through the industrial training the student will be able to:

- CO1: Understand the process of applying engineering knowledge to solve industrial problems
- CO2: Develop skills through training relevant to industrial requirement
- CO3: Communicate effectively and work in teams
- CO4: Imbibe ethical practices and develop it as life skill.

**Scheme of Continuous Internal Evaluation (CIE):**

A committee comprising of Head of the Department / Associate Dean, Associate Professor, Assistant Professor and Guide would review the presentation and the progress reports in two phases. The evaluation criteria shall be as per the rubrics given below:

**Scheme for Semester End Evaluation (SEE):**

The evaluation will be done by ONE senior faculty from the department and ONE external faculty member from Academia / Industry / Research Organization. The following weightages would be given for the examination. Evaluation will be done in batches, not exceeding 6 students.

**GUIDELINES FOR INDUSTRIAL VISITS****Course Learning Objectives (CLO):**

The students shall be able to:

- (1) Understand the role of industries and service organization in meeting the demands of the society.
- (2) Explain the working of different industries and organizations with an engineering perspective
- (3) Comprehend the importance of team work, communication and sustainable solutions.
- (4) Imbibe values, professional ethics for life long learning.

- 1) Student must visit a minimum of THREE organizations/industry. The duration of the visit per organization must be for ONE full day, during which he/she must comprehend the importance of organization structure, function of various departments, application of engineering knowledge, resource management, importance to environment and safety, professional ethics.
- 2) It is mandatory to visit ONE private multi-national company or public sector industry / organization, ONE medium-small enterprise and ONE rural based or NG organization.
- 3) The student must submit letter from the industry clearly specifying his / her name and the date

of visit to the industry with authorized signatures.

- 4) Industrial visit must be related to the field of specialization or the M.Tech program in which the student has enrolled.
- 5) Every student has to write and submit his/her own report on each industrial visit and submit the report to the designated faculty advisor for evaluation.
- 6) A photograph outside the industry with the name and logo of the industry in the background along with the students and faculty members could be included in the report.
- 7) Students have to make a presentation on their industrial visit in front of the departmental committee and only upon approval of the presentation should the student proceed to prepare and submit the hard copy of the final report.
- 8) The reports shall be printed on bond paper – 80GSM, back to back print, with soft binding – A4 size with 1.5 spacing and times new roman font size 12.
- 9) The broad format of the industrial visit report shall be as follows
  - Cover Page
  - Certificate from College
  - Acknowledgement
  - Synopsis / Executive Summary
  - Table of Contents
  - Chapter 1 - Profile of the PSU or MNC – must include Organizational structure, Products, Services, Financials, Manpower, Societal Concerns, Professional Practices
  - Chapter 2 – Profile of the SME – must include Organizational structure, Products, Services, Financials, Manpower, Societal Concerns, Professional Practices
  - Chapter 3 - Profile of the NGO – must include Organizational structure, services, Manpower, Societal Concerns, Professional Practices
  - Chapter 4 – Comparative Analysis of PSU/MNC – SME – NGO
  - References & Annexure (Permission letters from the organizations for the visit & photographs)

**Course Outcomes:**

After going through this course the student will be able to:

- CO1: Classify the role of different industries and organization in addressing the needs of the society.
- CO2: Explain the process of applying engineering knowledge in industries and organizations.
- CO3: Describe the importance of communication and team work
- CO4: Recognize the importance of practicing professional ethics and need for life skills.

**Scheme of Continuous Internal Evaluation (CIE):**

A committee comprising of Head of the Department / Associate Dean, Associate Professor, Assistant Professor and Guide would review the presentation and the progress reports in two phases. The evaluation criteria shall be as per the rubrics given below:

**Scheme for Semester End Evaluation (SEE):**

The evaluation will be done by ONE senior faculty from the department and ONE external faculty member from Academia / Industry / Research Organization. The following weightages would be given for the examination. Evaluation will be done in batches, not exceeding 6 students.

(1) Explanation of the application of engineering knowledge in industries	25%
(2) Ability to comprehend the functioning of the organization/ departments	30%
(3) Importance of resource management, environment and sustainability	20%
(4) Presentation Skills and Report	25%

TECHNICAL SEMINAR						
Course Code	:	16MMD36		CIE Marks	:	50
Hrs/Week	:	L:T:P:S	0:0:4:0	SEE Marks		50
Credits	:	2		SEE Duration		30 min
<b>Course Learning Objectives (CLO):</b>						
The students shall be able to:						
<ol style="list-style-type: none"> <li>(1) Understand the technological developments in their chosen field of interest</li> <li>(2) Explain the scope of work and challenges in the domain area</li> <li>(3) Analyze these engineering developments in the context of sustainability and societal concerns.</li> <li>(4) Improve his/her presentation skills and technical report writing skills</li> </ol>						
<b>GUIDELINES</b>						
<ol style="list-style-type: none"> <li>1) The presentation will have to be done by individual students.</li> <li>2) The topic of the seminar must be in one of the thrust areas with in-depth review and analysis on a current topic that is relevant to industry or on-going research.</li> <li>3) The topic could be an extension or complementary to the project</li> <li>4) The student must be able to highlight or relate these technological developments with sustainability and societal relevance.</li> <li>5) Each student must submit both hard and soft copies of the presentation.</li> </ol>						
<b>Course Outcomes:</b>						
After going through this course the student will be able to:						
CO1: Identify topics that are relevant to the present context of the world						
CO2: Perform survey and review relevant information to the field of study.						
CO3: Enhance presentation skills and report writing skills.						
CO4: Develop alternative solutions which are sustainable						

**Scheme of Continuous Internal Evaluation (CIE):** Evaluation would be carried out in TWO phases. The evaluation committee shall comprise of Head of the Department / Associate Dean, Associate Professor, Assistant Professor and Guide. The evaluation criteria shall be as per the rubrics given below:

**Scheme for Semester End Evaluation (SEE):**

The evaluation will be done by ONE senior faculty from the department and ONE external faculty member from Academia / Industry / Research Organization. The following weightages would be given for the examination. Evaluation will be done in batches, not exceeding 6 students.

**Rubrics for Evaluation:**

- |  |     |

## IV SEMESTER

MAJOR PROJECT						
Course Code	:	<b>16MMD41</b>		CIE Marks	:	<b>100</b>
Hrs/Week	:	<b>L:T:P:S</b>	<b>0:0:52:0</b>	SEE Marks	:	<b>100</b>
Credits	:	<b>26</b>		SEE Duration	:	<b>3 Hours</b>
<b>Course Learning Objectives:</b>						
The students shall be able to						
<ol style="list-style-type: none"> <li>1. Understand the method of applying engineering knowledge to solve specific problems.</li> <li>2. Apply engineering and management principles while executing the project</li> <li>3. Demonstrate good verbal presentation and technical report writing skills.</li> <li>4. Identify and solve complex engineering problems using professionally prescribed standards.</li> </ol>						
<b>GUIDELINES</b>						
<ol style="list-style-type: none"> <li>1. Major project will have to be done by only one student in his/her area of interest.</li> <li>2. Each student has to select a contemporary topic that will use the technical knowledge of their program of specialization.</li> <li>3. Allocation of the guides preferably in accordance with the expertise of the faculty.</li> <li>4. The number of projects that a faculty can guide would be limited to three.</li> <li>5. The project can be carried out on-campus or in an industry or an organization with prior approval from the Head of the Department.</li> <li>6. The standard duration of the project is for 16 weeks, however if the guide and the evaluation committee of the department, after the assessment feel that the work is insufficient and it has to be extended, then the student will have to continue as per the directions of the guide and the committee.</li> <li>7. It is mandatory for the student to present his/her work in one of the international conferences or publish the research finding in a reputed unpaid journal with impact factor.</li> </ol>						
<b>Course Outcomes:</b>						
After going through this course the students will be able to						
<b>CO1:</b> Conceptualize, design and implement solutions for specific problems.						
<b>CO2:</b> Communicate the solutions through presentations and technical reports.						
<b>CO3:</b> Apply project and resource managements skills, professional ethics, societal concerns						
<b>CO4:</b> Synthesize self-learning, sustainable solutions and demonstrate life long learning						

### Scheme of Continuous Internal Examination (CIE)

Evaluation will be carried out in THREE Phases. The evaluation committee will comprise of: guide, two senior faculty members, one industry member and Head of the Department.

Phase	Activity	Weightage
<b>I</b> 5 <sup>th</sup> week	Synopsis, Preliminary report for the approval of selected topic along with literature survey, objectives and methodology.	20%
<b>II</b> 10 <sup>th</sup> week	Mid-term progress review shall check the compliance with the objectives and methodology presented in Phase I, review the work performed.	40%

<b>III</b> 15 <sup>th</sup> week	Oral presentation, demonstration and submission of project report. After this presentation, the student will have one week time to correct / modify his report to address the issues raised by the committee members.	40%
-------------------------------------	--	-----

**CIE Evaluation shall be done with marks distribution as follows:**

- Selection of the topic & formulation of objectives 10%
- Design and simulation/ algorithm development/experimental setup 25%
- Conducting experiments / implementation / testing / analysis 25%
- Demonstration & Presentation 20%
- Report writing 20%

**Scheme for Semester End Evaluation (SEE):**

The evaluation will be done by ONE senior faculty from the department and ONE external faculty member from Academia / Industry / Research Organization. The following weightages would be given for the examination. Evaluation will be done in batches, not exceeding 6 students.

1. Brief write-up about the project 5%
2. Formulation of Project Objectives & Methodology 20%
3. Experiments / Analysis Performed; Results & Discussion 25%
4. Report 20%
5. Viva Voce 30%

SEMINAR						
Course Code	:	16MMD42		CIE Marks	:	50
Hrs/Week	:	L:T:P:S	0:0:4:0	SEE Marks		50
Credits	:	2		SEE Duration		30 min
<b>Course Learning Objectives (CLO):</b>						
The students shall be able to:						
<ol style="list-style-type: none"> <li>1) Understand the technological developments in their chosen field of interest</li> <li>2) Explain the scope of work and challenges in the domain area</li> <li>3) Analyze these engineering developments in the context of sustainability, societal concerns and project management.</li> <li>4) Improve his/her verbal presentation and report writing skills</li> </ol>						
GUIDELINES						
<ol style="list-style-type: none"> <li>1) The presentation will have to be done by individual students.</li> <li>2) The topic of the seminar must be in one of the thrust areas with in-depth review and analysis on a current topic that is relevant to industry or on-going research.</li> <li>3) The topic could be an extension or complementary to the project topic.</li> <li>4) Topics could be in multidisciplinary areas and strongly address the technical design issues.</li> <li>5) The student must be able to highlight or relate these technological developments with sustainability and societal relevance.</li> <li>6) The students must mandatorily address legal, ethical issues as related to the topic of study.</li> <li>7) The student shall make an attempt to perform financial / cost analysis or apply project management tools as related to his/her topic of study.</li> <li>8) Each student must submit both hard and soft copies of the presentation.</li> </ol>						
<b>Course Outcomes:</b>						
After going through this course the student will be able to:						
CO1: Identify topics that are relevant in the present context of the world and relate it to sustainability and societal relevance.						
CO2: Perform literature/market/product survey and analyse information to the field of study.						
CO3: Enhance presentation and report writing skills.						
CO4: Develop creative thinking abilities.						

**Scheme of Continuous Internal Evaluation (CIE):** Evaluation would be carried out in TWO phases. The evaluation committee shall comprise of TWO senior faculty members. The evaluation criteria shall be as per the rubrics given below:

**Scheme for Semester End Evaluation (SEE):**

The evaluation will be done by ONE senior faculty from the department and ONE external faculty member from Academia / Industry / Research Organization. The following weightages would be given for the examination. Evaluation will be done in batches, not exceeding 6 students.

**Rubrics for Evaluation:**

- Topic – Technical Relevance, Sustainability and Societal Concerns 15%
- Literature Review 25%
- Presentation Skills 35%
- Report 25%
