

**Rashtreeya Sikshana Samithi Trust**

**R.V. College of Engineering, Bengaluru**

*(Autonomous Institution Affiliated to Visvesvaraya Technological University, Belagavi)*

**Master of Technology (M. Tech.)  
Software Engineering**

**Scheme and Syllabus  
Autonomous System w.e.f 2016**

**R.V. College of Engineering, Bengaluru – 59**  
(Autonomous Institution Affiliated to Visvesvaraya Technological University., Belagavi )  
**Department of Information Science and Engineering**

**Vision:**

To be the hub for innovation in Information Science & Engineering through Teaching, Research, Development and Consultancy; thus make the department a global resource center in advanced, sustainable and inclusive technology.

**Mission:**

1. To enable students to become responsible professionals, strong in fundamentals of information science and engineering through experiential learning
2. To bring research and entrepreneurship into class rooms by continuous design of innovative solutions through research publications and dynamic development oriented curriculum.
3. To facilitate continuous interaction with the outside world through student internship, faculty consultancy, workshops, faculty development programmes, industry collaboration and association with the professional societies.
4. To create a new generation of entrepreneurial problem solvers for a sustainable future through green technology with an emphasis on ethical practices, inclusive societal concerns and environment
5. To promote team work through inter-disciplinary projects, co-curricular and social activities.

**Program Educational Objectives (PEO)**

M. Tech. in Software Engineering Program, Students will be able to:

**PEO1:** Design, build and evaluate software systems of varying complexity based on client's requirements.

**PEO2:** Apply the knowledge of Software Engineering to configure, package and deliver solutions for different sectors like ERP, Web technology.

**PEO3:** Apply the skills in clear communication, responsible teamwork, and time management for working on multidisciplinary project.

### **Program Outcomes (PO)**

M. Tech. in Software Engineering Students will be able to:

**PO 1: Scholarship of Knowledge** -Acquire in-depth knowledge of Software Engineering process, including wider and global perspective, with an ability to discriminate, evaluate, analyze and synthesize existing and new knowledge, and integration of the same for enhancement of knowledge.

**PO 2: Critical Thinking** - Analyse complex Software Engineering related problems, apply independent judgement for synthesizing information to make intellectual and/or creative advances for conducting research in a wider theoretical, practical and policy context.

**PO 3 : Problem Solving** - Think laterally and originally, conceptualise and solve issues related to Software Engineering, evaluate a wide range of potential solutions for those problems and arrive at feasible, optimal solutions after considering public health and safety, cultural, societal and environmental factors in the core areas of expertise.

**PO 4: Research Skill** - Extract information pertinent to unfamiliar problems in Software Engineering domain through literature survey and experiments, apply appropriate research methodologies, techniques and tools, design, conduct experiments, analyse and interpret data, demonstrate higher order skill and view things in a broader perspective, contribute individually/in group(s) to the development of scientific/technological knowledge in one or more domains of engineering.

**PO 5: Usage of modern tools** - Create, select, learn and apply appropriate techniques, resources, and modern engineering and IT tools of Software Engineering, including prediction and modelling, to complex engineering activities with an understanding of the limitations.

**PO 6: Collaborative and Multidisciplinary work** - Possess knowledge and understanding of group dynamics, recognise opportunities and contribute positively to collaborative-multidisciplinary scientific research in Software Engineering,

demonstrate a capacity for self-management and teamwork, decision-making based on open-mindedness, objectivity and rational analysis in order to achieve common goals and further the learning of themselves as well as others.

**PO 7: Project Management and Finance** - Demonstrate knowledge and understanding of Software Engineering principles and apply the same to one's own work, as a member and leader in a team, manage projects efficiently in respective disciplines and multidisciplinary environments after consideration of economical and financial factors.

**PO 8: Communication** - Communicate with the Software Engineering community, and with society at large, regarding complex engineering activities confidently and effectively, such as, being able to comprehend and write effective reports and design documentation by adhering to appropriate standards, make effective presentations, and give and receive clear instructions.

**PO 9: Life-long Learning** - Recognize the need for, and have the preparation and ability to engage in life-long learning independently in Software Engineering domain, with a high level of enthusiasm and commitment to improve knowledge and competence continuously.

**PO 10: Ethical Practices and Social Responsibility** - Acquire professional and intellectual integrity, professional code of conduct, ethics of research and scholarship, consideration of the impact of research outcomes on professional practices and an understanding of responsibility to contribute to the community for sustainable development of society using Software Engineering solutions.

**PO 11: Independent and Reflective Learning** - Observe and examine critically the outcomes of one's actions and make corrective measures subsequently, and learn from mistakes in project and professional practice without depending on external feedback.

### **Program Specific Outcomes (PSO)**

M. Tech. in Software Engineering Students will be able to:

**PSO 1.** Design, develop and deliver complex, scalable and cost effective software systems by applying Software Engineering principles, tools and processes.

**PSO 2.** Comprehend the role and responsibilities of the professional software engineer with importance to quality and management issues involved in software construction

**R. V. College of Engineering, Bengaluru – 59.**

**THIRD SEMISTER**

| <b>Course Title : Software Quality Assurance and Testing<br/>(Theory and Practice)</b>   |   |                            |
|--|---|----------------------------|
| <b>Course Code: 16MSE31</b>  |   | <b>CIE Marks: 100 + 50</b> |
| <b>Hrs/Week: L:T:P:S: 4-0-1-0</b>  |   | <b>SEE Marks: 100 + 50</b> |
| <b>Credits:05</b>  |   | <b>SEE Duration: 3 Hrs</b> |
| <b>Course Learning Objectives: The students will be able to</b>  |   |                            |
| <b>1</b>   | Interpret the goals of software testing.  |                            |
| <b>2</b>   | Analyze and design various tools which can be used for automating the testing process     |                            |
| <b>3</b>   | Apply various concept of software quality standards for establishing quality environment. |                            |
| <b>4</b>   | Demonstrate and evaluate the procedures for improving the quality Models.                 |                            |
| <b>UNIT-I</b>  |   |                            |
| <b>Introduction:</b> Meeting People's Quality Expectations, Dependency and Suggested Usage, Problems. What Is Software Quality? Quality: Perspectives and Expectations, Quality Frameworks and ISO-9126, Correctness and Defects: Definitions, Properties, and Measurements, A Historical Perspective of Quality, Problems. Quality Assurance: Classification: Defect Prevention, Defect Containment.  |   | <b>09 Hrs</b>              |
| <b>UNIT-II</b>   |   |                            |
| <b>Quality Assurance in Context:</b> Handling Discovered Defect During QA Activities, QA Activities in Software Processes. Verification and Validation Perspectives. Reconciling the Two Views. Concluding Remarks. Problems. <b>Quality Engineering.</b> Quality Engineering: Activities and Process. Quality Planning: Goal Setting and Strategy Formation. Quality Assessment and Improvement. Quality Engineering in Software Processes. Problems. <b>Testing: Concepts, Issues, and Techniques:</b> Purposes, Activities, Processes, and Context. Functional vs. Structural Testing, Coverage-Based vs. Usage-Based Testing: Problems. <b>Test activities, Management and Automation:</b> Test planning and preparation, Test Execution, Result Checking, and Measurement, Analysis and Follow-up. Activities, People, and Management. Test Automation. |   | <b>09 Hrs</b>              |
| <b>UNIT-III</b>  |   |                            |
| <b>A Perspective on Testing:</b> Basic Definitions , Test Cases, Insights from a Venn Diagram , Identifying Test Cases , Errors and Fault Taxonomies , Levels of Testing, <b>Generalized Pseudocode</b> , The Triangle Problem , The NextDate Function, The Commission Problem , The SATM System, The Currency Converter, Saturn Windshield Wiper Controller, <b>Boundary Value Testing</b> , Normal Boundary Value Testing, Robust Boundary Value Testing , Worst-Case Boundary Value Testing , Special Value Testing, Examples.  |   | <b>09 Hrs</b>              |
| <b>UNIT-IV</b>   |   |                            |

|  |               |
|--|---------------|
| <b>Equivalence Class Testing:</b> Equivalence Classes, Equivalence Class Test Cases for the Triangle Problem , Equivalence Class Test Cases for the NextDate Function, Equivalence Class Test Cases, Equivalence Class Test Cases for the Commission Problem, <b>Decision Table–Based Testing:</b> Decision Tables, Test Cases for the Triangle Problem , Test Cases for the NextDate Function, Test Cases for the Commission Problem, <b>Path Testing :</b> Du-paths for Stocks, Test Coverage Metrics , Basis path testing . | <b>09 Hrs</b> |
| <b>UNIT-V</b>  |               |
| <b>Data Flow Testing :</b> Use Testing , Slice Testing ,Model-Based Testing , <b>Levels of Testing:</b> Traditional view of testing levels, Alternative life cycle model, The SATM system, Separating integration and system Testing.  | <b>09 Hrs</b> |

|  |  |
|--|--|
| <b>Expected Course Outcomes: After completing the course, the students will be able to</b> |  |
| <b>CO 1</b>  | Analyze the importance of software quality assurance & testing in software development.  |
| <b>CO 2</b>  | Evaluate the concepts of software quality assurance techniques and find their relevance of use.  |
| <b>CO 3</b>  | Implement the concepts of software testing and appraise the most appropriate testing approaches for a given situation.   |
| <b>CO 4</b>  | Use the principles of testing and develop the necessary test cases in problem solution.  |

**Laboratory Component:**

Students are expected to analyze the following problems with respect to software testing and identify all necessary test cases.

1. Design, develop, code and run the program in any suitable language to solve the **commission problem**. Analyze it from the perspective of dataflow testing, derive at least 10 different test cases, execute these test cases and discuss the test results.
2. Design, develop, code and run the program in any suitable language to solve the **NextDate problem**. Analyze it from the perspective of decision table-based testing, derive at least 10 different test cases, execute these test cases and discuss the test results.

3. Design, develop, code and run the program in any suitable object-oriented language to solve the **calendar problem**. Analyze it from the perspective of OO testing, derive test cases to test the method that increment the date and the method that increments the month., execute these test cases and discuss the test results.
4. Design, develop, code and run the program in any suitable object-oriented language to solve the **currency converter problem**. Analyze it from the perspective of use case-based system testing, derive appropriate system test cases., execute these test cases and discuss the test results.

A report of these problem solutions need to be prepared for realizing the importance of software testing.

#### **Scheme of Continuous Internal Evaluation (CIE) for Theory**

CIE will consist of TWO Tests, TWO Quizzes and ONE assignment. The test will be for 30 marks each and the quiz for 10 marks each. The assignment will be for 20 marks. The total marks for CIE (Theory) will be 100 marks.

#### **Scheme of Continuous Internal Evaluation (CIE) for Practical**

CIE for the practical courses will be based on the performance of the student in the laboratory, every week. The laboratory records will be evaluated for 40 marks. One test will be conducted for 10 marks. The total marks for CIE (Practical) will be for 50 marks.

#### **Scheme of Semester End Examination (SEE) for Theory**

The question paper will have FIVE questions with internal choice from each unit. Each question will carry 20 marks. Student will have to answer one question from each unit. The total marks for SEE (Theory) will be 100 marks.

#### **Scheme of Semester End Examination (SEE) for Practical**

SEE for the practical courses will be based on conducting the experiments and proper results for 40 marks and 10 marks for viva-voce. The total marks for SEE (Practical) will be 50 marks.

within the Context of Social Networks. **Attacks on Social Media and Data Analytics Solutions:** Malware and Attacks, Attacks on Social Media, Data Analytics Solutions.

**Course Outcomes:**

After going through this course the student will be able to:

CO1: Comprehend basic notation and terminology used in network science.

CO2: Visualize, summarize and compare different networks and its security.

CO3: Use tools to analyze real world networks.

CO4: Use advanced network analysis methods to perform empirical investigations of network data.

**Scheme of Continuous Internal Evaluation (CIE)**

CIE will consist of TWO Tests, TWO Quizzes and ONE assignment. The test will be for 30 marks each and the quiz for 10 marks each. The assignment will be for 20 marks. The total marks for CIE (Theory) will be 100 marks.

**Scheme of Semester End Examination (SEE)**

The question paper will have FIVE questions with internal choice from each unit. Each question will carry 20 marks. Student will have to answer one question from each unit. The total marks for SEE (Theory) will be 100 marks.

| <p>Course Learning Objectives (CLO):<br/>Students shall be able to</p> <ol style="list-style-type: none"> <li>1. Comprehend the metrics in Web Application Development and related terminologies</li> <li>2. Apply the knowledge of frameworks and Enterprise Application Development Tools</li> <li>3. Analyze the Web frameworks.</li> <li>4. Develop EA solutions using Design Patterns</li> </ol>  |          |                        |  |                     |                       |
| <b>Unit – I</b>  |          |                        |  |                     | <b>10 Hrs</b>         |
| <p><b>Web application and java EE 6:</b> Exploring the HTTP Protocol, Introducing web applications, describing web containers, exploring web architecture models, exploring the MVC architecture. Working with servlets 3.0 Exploring the features of java servlet, Exploring new features in servlet 3.0, Exploring the servlet API, explaining the servlet life cycle, creating a sample servlet, creating a servlet by using annotation, working with servlet config and servlet context objects, working with the Http servlet request and Http Httpservlet response interfaces, Exploring request delegation and request scope, implementing servlet collaboration.</p>   |          |                        |  |                     |                       |
| <b>Unit – II</b>   |          |                        |  |                     | <b>09 Hrs</b>         |
| <p><b>Handling sessions in servlet 3.0:</b> Describing a session, introducing session tracking, Exploring the session tracking, mechanisms, using the java servlet API for session tracking, creating login application using session tracking. Implementing event handling Introducing events, Introducing event handling, working with the servlet events, developing the online shop web application. Working with java server pages: Introducing JSP technology, Exploring new features of JSP2.1, listing advantages of JSP over java servlet, Exploring the architecture of a JSP page, Describing the life cycle of a JSP page, working with JSP basic tags and implicit objects, working with the action tags in JSP, exploring the JSP unified EL, using functions with EL.</p> |          |                        |  |                     |                       |
| <b>Unit – III</b>  |          |                        |  |                     | <b>10 Hrs</b>         |
| <p><b>Implementing JSP tag extensions:</b> Exploring the elements of tag extensions, Working with classic tag handlers, Exploring the tag extensions, Working with simple tag handlers. Implementing java server pages standard tag library 1.2: Introducing JSTL, Exploring the tag libraries JSTL, working with the core tag library. Implementing filters: Exploring the need of filters, exploring the working of filters, exploring filters API, configuring a filter, creating a web application using filters, using initializing parameter in filters.</p>   |          |                        |  |                     |                       |
| <b>Unit – IV</b>   |          |                        |  |                     | <b>10 Hrs</b>         |
| <p><b>Persistence Management and Design Patterns:</b> Implementing java persistence using hibernate Introducing hibernate, exploring the architecture of hibernate, downloading hibernate, exploring HQL, understanding hibernate O/R mapping, working with hibernate, Implementing O/R mapping with hibernate. Java EE design patterns: Describing the java EE application architecture, Introducing a design patterns, discussing the role of design patterns, exploring types of patterns.</p>  |          |                        |  |                     |                       |
| <b>Unit – V</b>  |          |                        |  |                     | <b>09 Hrs</b>         |
| <p><b>Web Frameworks:</b> Working with struts 2 Introducing struts 2, understanding actions in struts 2. Working with java server faces 2.0: Introducing JSF, Explaining the features of JSF, Exploring the JSF architecture, describing JSF elements, Exploring the JSF request processing life cycle.</p>  |          |                        |  |                     |                       |

Working with spring 3.0: Introducing features of the spring framework, exploring the spring framework architecture, exploring dependency injection & inversion of control, exploring AOP with spring, managing transactions. Securing java EE 6 applications: Introducing security in java EE 6, exploring security mechanisms, implementing security on an application server.

**Course Outcomes:**

After going through this course the student will be able to:

- CO1. Enabling knowledge :** Explain the protocols and systems used on the Web (such as XHTML, HTTP, URLs, CSS, SSI, XML) and the functions of clients and servers on the Web for internet application concepts, relevant alternatives.
- CO2. Develop project management skills** related to web development, such as:  
Gather data to identify customer requirements, Define scope work, Select programming languages and tools, Evaluate web technologies and standards, Define security measures, Review technical considerations and constraints of projects.
- CO3. Critical analysis:** Analyse and model requirements and constraints for the design of client-server internet applications.
- CO4. Problem solving:** Design and implement client-server internet applications using Servlets, JSPs and JSFs to build a web application for the enterprise, performing unit, integration testing and Manage deployment configurations
- CO5. Communicate** effectively to a wide variety of audiences, verbally, in writing, and electronically by:  
Documenting application/website changes, Preparing and presenting functional and technical specifications, Evaluating and recommending web hardware, software and third party solutions, Providing quality customer service.

| <p><b>Course Learning Objectives (CLO):</b><br/>The students shall be able to:</p> <ol style="list-style-type: none"> <li>1. Understand the process of applying engineering knowledge to produce product and provide services.</li> <li>2. Explain the importance of management and resource utilization</li> <li>3. Comprehend the importance of team work, protection of environment and sustainable solutions.</li> <li>4. Imbibe values, professional ethics for life long learning.</li> </ol>  |   |                |                |                     |   |                |
| <ol style="list-style-type: none"> <li>1) The duration of the internship shall be for a period of 8 weeks on full time basis between II semester final exams and beginning of III semester.</li> <li>2) The student must submit letters from the industry clearly specifying his / her name and the duration of the internship on the company letter head with authorized signature.</li> <li>3) Internship must be related to the field of specialization or the M.Tech program in which the student has enrolled.</li> <li>4) Students undergoing internship training are advised to use ICT tools such as skype to report their progress and submission of periodic progress reports to the faculty members.</li> <li>5) Every student has to write and submit his/her own internship report to the designated faculty.</li> <li>6) Students have to make a presentation on their internship activities in front of the departmental committee and only upon approval of the presentation should the student proceed to prepare and submit the hard copy of the internship final report. However interim or periodic reports and reports as required by the industry / organization can be submitted as per the format acceptable to the respective industry /organizations.</li> <li>7) The reports shall be printed on bond paper – 80GSM, back to back print, with soft binding – A4 size with 1.5 spacing and times new roman font size 12.</li> <li>8) The broad format of the internship final report shall be as follows <ul style="list-style-type: none"> <li>• Cover Page</li> <li>• Certificate from College</li> <li>• Certificate from Industry / Organization</li> <li>• Acknowledgement</li> <li>• Synopsis</li> <li>• Table of Contents</li> <li>• Chapter 1 - Profile of the Organization – Organizational structure, Products, Services, Business Partners, Financials, Manpower, Societal Concerns, Professional Practices,</li> <li>• Chapter 2 - Activities of the Department -</li> </ul> </li> </ol> |   |                |                |                     |   |                |

- Chapter 3 – Tasks Performed – summaries the tasks performed during 8 week period
- Chapter 4 – Reflections – Highlight specific technical and soft skills that you acquired during internship
- References & Annexure

**Course Outcomes:**

After going through the internship the student will be able to:

CO1: Apply engineering and management principles

CO2: Analyze real-time problems and suggest alternate solutions

CO3: Communicate effectively and work in teams

CO4: Imbibe the practice of professional ethics and need for lifelong learning.

**Scheme of Continuous Internal Evaluation (CIE):**

A committee comprising of the Head of the Department / Associate Dean, Associate Professor, Assistant Professor and Guide would review the presentation and the progress reports in two phases. The evaluation criteria shall be as per the rubrics given below:

**Scheme for Semester End Evaluation (SEE):**

The evaluation will be done by ONE senior faculty from the department and ONE external faculty member from Academia / Industry / Research Organization. The following weightages would be given for the examination. Evaluation will be done in batches, not exceeding 6 students.

- |  |     |
|--|-----|
| (1) Explanation of the application of engineering knowledge in industries  | 35% |
| (2) Ability to comprehend the functioning of the organization/ departments | 20% |
| (3) Importance of resource management, environment and sustainability      | 25% |
| (4) Presentation Skills and Report   | 20% |

**GUIDELINES FOR INDUSTRIAL TRAINING****Course Learning Objectives (CLO):**

The students shall be able to:

1. Understand the process of applying engineering knowledge to industrial products & processes
2. Explain the importance of skilling, training and resource management.
3. Comprehend the importance of team work, communication and sustainable solutions.
4. Imbibe values, professional ethics for life long learning.

- 1) The duration of industrial training must be for a minimum of 1 week and maximum of 8 weeks on full time basis.
- 2) Industrial Training in which students pays a fee to the organization / industry will not be considered.
- 3) He/she can undergo training in one or more industry /organization.
- 4) The student must submit letters from the industry clearly specifying his / her name and the duration of the training provided by the company with authorized signatures.
- 5) Industrial training must be related to the field of specialization or the M.Tech program in which the student has enrolled.
- 6) Students undergoing industrial training are advised to use ICT tools such as skype to report their progress and submission of periodic progress reports to the faculty members.
- 7) Every student has to write and submit his/her own industrial training report to the designated faculty.
- 8) Students have to make a presentation on their industrial training in front of the departmental committee and only upon approval of the presentation should the student proceed to prepare and submit the hard copy of the final report.
- 9) The reports shall be printed on bond paper – 80GSM, back to back print, with soft binding – A4 size with 1.5 spacing and times new roman font size 12.
- 10) The broad format of the industrial training report shall be as follows
  - Cover Page
  - Certificate from College
  - Training Certificate from Industry / Organization
  - Acknowledgement
  - Executive Summary
  - Table of Contents
  - Chapter 1 - Profile of the Organization –Organizational structure, Products, Services, Business Partners, Financials, Manpower, Societal Concerns, Professional Practices
  - Chapter 2 – Details of the Training Modules
  - Chapter 3 – Reflections – Highlight specific technical and soft skills that you acquired
  - References & Annexure

**Course Outcomes:**

After going through the industrial training the student will be able to:

CO1: Understand the process of applying engineering knowledge to solve industrial problems

CO2: Develop skills through training relevant to industrial requirement

CO3: Communicate effectively and work in teams

CO4: Imbibe ethical practices and develop it as life skill.

**Scheme of Continuous Internal Evaluation (CIE):**

A committee comprising of Head of the Department / Associate Dean, Associate Professor, Assistant Professor and Guide would review the presentation and the progress reports in two phases. The evaluation criteria shall be as per the rubrics given below:

**Scheme for Semester End Evaluation (SEE):**

The evaluation will be done by ONE senior faculty from the department and ONE external faculty member from Academia / Industry / Research Organization. The following weightages would be given for the examination. Evaluation will be done in batches, not exceeding 6 students.

- |  |     |
|--|-----|
| (1) Explanation on the application of engineering knowledge          | 25% |
| (2) Ability to comprehend the importance of skilling and training    | 25% |
| (3) Importance of communication, professional ethics, sustainability | 20% |
| (4) Oral Presentation and Report                                     | 30% |

**Mapping of Course Outcomes (CO) to Program Outcomes (PO)**

|     | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 |

| CO4 | M    | H    |

**GUIDELINES FOR INDUSTRIAL VISITS****Course Learning Objectives (CLO):**

The students shall be able to:

1. Understand the role of industries and service organization in meeting the demands of the society.
2. Explain the working of different industries and organizations with an engineering perspective
3. Comprehend the importance of team work, communication and sustainable solutions.
4. Imbibe values, professional ethics for life long learning.

- 1) Student must visit a minimum of **THREE** organizations/industry. The duration of the visit per organization must be for **ONE** full day, during which he/she must comprehend the importance of organization structure, function of various departments, application of engineering knowledge, resource management, importance to environment and safety, professional ethics.
- 2) It is mandatory to visit **ONE** private multi-national company or public sector industry / organization, **ONE** medium-small enterprise and **ONE** rural based or NG organization.
- 3) The student must submit letter from the industry clearly specifying his / her name and the date of visit to the industry with authorized signatures.
- 4) Industrial visit must be related to the field of specialization or the M.Tech program in which the student has enrolled.
- 5) Every student has to write and submit his/her own report on each industrial visit and submit the report to the designated faculty advisor for evaluation.
- 6) A photograph outside the industry with the name and logo of the industry in the background along with the students and faculty members could be included in the report.
- 7) Students have to make a presentation on their industrial visit in front of the departmental committee and only upon approval of the presentation should the student proceed to prepare and submit the hard copy of the final report.
- 8) The reports shall be printed on bond paper – 80GSM, back to back print, with soft binding – A4 size with 1.5 spacing and times new roman font size 12.
- 9) The broad format of the industrial visit report shall be as follows
  - Cover Page
  - Certificate from College
  - Acknowledgement
  - Synopsis / Executive Summary
  - Table of Contents
  - Chapter 1 - Profile of the PSU or MNC – must include Organizational structure, Products, Services, Financials, Manpower, Societal Concerns, Professional Practices
  - Chapter 2 – Profile of the SME – must include Organizational structure, Products, Services, Financials, Manpower, Societal Concerns, Professional Practices
  - Chapter 3 - Profile of the NGO – must include Organizational structure, services, Manpower, Societal Concerns, Professional Practices

- Chapter 4 – Comparative Analysis of PSU/MNC – SME – NGO
- References & Annexure (Permission letters from the organizations for the visit & photographs)

**Course Outcomes:**

After going through this course the student will be able to:

CO1: Classify the role of different industries and organization in addressing the needs of the society.

CO2: Explain the process of applying engineering knowledge in industries and organizations.

CO3: Describe the importance of communication and team work

CO4: Recognize the importance of practicing professional ethics and need for life skills.

**Scheme of Continuous Internal Evaluation (CIE):**

A committee comprising of Head of the Department / Associate Dean, Associate Professor, Assistant Professor and Guide would review the presentation and the progress reports in two phases. The evaluation criteria shall be as per the rubrics given below:

| <b>Course Learning Objectives:</b>   |          |                |                 |                     |          |                |
| The students shall be able to  |          |                |                 |                     |          |                |
| <ol style="list-style-type: none"> <li>1. Understand the method of applying engineering knowledge to solve specific problems.</li> <li>2. Apply engineering and management principles while executing the project</li> <li>3. Demonstrate good verbal presentation and technical report writing skills.</li> <li>4. Identify and solve complex engineering problems using professionally prescribed standards.</li> </ol>  |          |                |                 |                     |          |                |
| <b>GUIDELINES</b>  |          |                |                 |                     |          |                |
| <ol style="list-style-type: none"> <li>1. Major project will have to be done by only one student in his/her area of interest.</li> <li>2. Each student has to select a contemporary topic that will use the technical knowledge of their program of specialization.</li> <li>3. Allocation of the guides preferably in accordance with the expertise of the faculty.</li> <li>4. The number of projects that a faculty can guide would be limited to three.</li> <li>5. The project can be carried out on-campus or in an industry or an organization with prior approval from the Head of the Department.</li> <li>6. The standard duration of the project is for 16 weeks, however if the guide and the evaluation committee of the department, after the assessment feel that the work is insufficient and it has to be extended, then the student will have to continue as per the directions of the guide and the committee.</li> <li>7. It is mandatory for the student to present his/her work in one of the international conferences or publish the research finding in a reputed unpaid journal with impact factor.</li> </ol> |          |                |                 |                     |          |                |
| <b>Course Outcomes:</b>  |          |                |                 |                     |          |                |
| After going through this course the students will be able to   |          |                |                 |                     |          |                |
| CO1: Conceptualize, design and implement solutions for specific problems.  |          |                |                 |                     |          |                |
| CO2: Communicate the solutions through presentations and technical reports.  |          |                |                 |                     |          |                |
| CO3: Apply project and resource managements skills, professional ethics, societal concerns   |          |                |                 |                     |          |                |
| CO4: Synthesize self-learning, sustainable solutions and demonstrate life long learning  |          |                |                 |                     |          |                |

### **Scheme of Continuous Internal Examination (CIE)**

Evaluation will be carried out in THREE Phases. The evaluation committee will comprise of: guide, two senior faculty members, one industry member and Head of the Department.

| Phase                        | Activity  | Weightage |
|------------------------------|---|-----------|
| I<br>5 <sup>th</sup> week    | Synopsis, Preliminary report for the approval of selected topic along with literature survey, objectives and methodology.   | 20%       |
| II<br>10 <sup>th</sup> week  | Mid-term progress review shall check the compliance with the objectives and methodology presented in Phase I, review the work performed.  | 40%       |
| III<br>15 <sup>th</sup> week | Oral presentation, demonstration and submission of project report. After this presentation, the student will have one week time to correct / modify his report to address the issues raised by the committee members. | 40%       |

**CIE Evaluation shall be done with marks distribution as follows:**

|   |     |
|---|-----|
| • Selection of the topic & formulation of objectives              | 10% |
| • Design and simulation/ algorithm development/experimental setup | 25% |
| • Conducting experiments / implementation / testing / analysis    | 25% |
| • Demonstration & Presentation                                    | 20% |
| • Report writing  | 20% |

**Scheme for Semester End Evaluation (SEE):**

The evaluation will be done by ONE senior faculty from the department and ONE external faculty member from Academia / Industry / Research Organization. The following weightages would be given for the examination. Evaluation will be done in batches, not exceeding 6 students.

|    |  |     |
|----|--|-----|
| 1. | Brief write-up about the project                       | 5%  |
| 2. | Formulation of Project Objectives & Methodology        | 20% |
| 3. | Experiments / Analysis Performed; Results & Discussion | 25% |
| 4. | Report   | 20% |
| 5. | Viva Voce  | 30% |

| After going through this course the student will be able to:   |          |                |                |                     |          |               |
| CO1: Identify topics that are relevant in the present context of the world and relate it to sustainability and societal relevance.   |          |                |                |                     |          |               |
| CO2: Perform literature/market/product survey and analyse information to the field of study.   |          |                |                |                     |          |               |
| CO3: Enhance presentation and report writing skills.   |          |                |                |                     |          |               |
| CO4: Develop creative thinking abilities.  |          |                |                |                     |          |               |

**Scheme of Continuous Internal Evaluation (CIE):** Evaluation would be carried out in TWO phases. The evaluation committee shall comprise of TWO senior faculty members. The evaluation criteria shall be as per the rubrics given below:

**Scheme for Semester End Evaluation (SEE):**

The evaluation will be done by ONE senior faculty from the department and ONE external faculty member from Academia / Industry / Research Organization. The following weightages would be given for the examination. Evaluation will be done in batches, not exceeding 6 students.

**Rubrics for Evaluation:**

- |  |     |
|--|-----|
| 1) Topic – Technical Relevance, Sustainability and Societal Concerns | 15% |
| 2) Literature Review   | 25% |
| 3) Presentation Skills   | 35% |
| 4) Report  | 25% |
